SYMPTOMS OF LIVER COMPLAINT AND OF SOME OF THOSE DISEASES PRODUCED BY IT.
A sallow or yellow color of the skin, or yellow-brown spots on the face and other parts of the body; dullness and drowsiness, sometimes headache; bitter or bad taste in the mouth; internal heat; in many cases a dry, teasing cough; instead of appetite, sometimes sour stomach, with a rising of the food; a bloated or full feeling about the stomach and sides; aggravating pains in the sides, back or breast, and about the shoulders; constipation of the bowels; pale, flatulence, coldness of the extremities, etc.

KOSKOO
is a remedy of wonderful efficacy in the cure of diseases of the Kidneys and Bladder. In these affections it is as near a specific as any remedy can be. It does its work kindly, silently and surely. The relief which it affords is both certain and perceptible.
DISEASES OF THE KIDNEYS AND BLADDER.
Persons unacquainted with the structure and functions of the Kidneys cannot estimate the importance of their healthy action.
Regular and sufficient action of the Kidneys is as important, any even more so, than regularity of the bowels. The Kidneys remove from the blood those effete matters which, if permitted to remain, would speedily destroy life. A total suspension of the urinary discharges will occasion death in from thirty-six to forty-eight hours.
When the Urine is voided in small quantities at the time, or when there is a disposition to Urinate more frequently than natural, or when the Urine is high-colored or scalding, with weakness in the small of the back, it should not be trifled with or delayed. Kid Koskoo should be taken at once to remedy the difficulty before a lesion of the organs takes place. Most of the diseases of the Bladder originate from those of the Kidneys; the Urine being imperfectly secreted in the Kidneys, proving irritating to the Bladder and Urinary passages. When we recollect that medicine never reaches the Kidneys except through the general circulation of the Blood, we see how necessary it is to keep the Fountain of Life pure.

KOSKOO
Meets with great success in the cure of
DISEASES OF THE NERVOUS SYSTEM.
Almost nine-tenths of our people suffer from nervous exhaustion, and are, therefore, liable to its concomitant evils of mental depression, confused ideas, softening of the brain, insanity, and complete breaking down of the general health. Thousands are suffering today with broken-down nervous systems, and, unfortunately, tobacco, alcohol, late hours, over-work, (mental and physical), are causing diseases of the nervous system to increase at a fearful rate.
The symptoms to which diseases of the nervous system give rise may be stated as follows: A dull, heavy feeling in the head, sometimes more or less severe pain or headache; periodical headache; dizziness, noises or ringing in the head; confusion of ideas; temporary loss of memory; debility of attention; starting during sleep; bad dreams; hesitation in answering questions; dullness of hearing; twitching of the face and arms, etc., which, if not promptly treated, lead to Paralysis, Delirium, Insanity, Impotency, Apoplexy, etc., etc.

Music on Piano and Guitar.....25 00
Use of instrument.....5 00
Drawing and painting.....20 to 25 00
Contingent fee.....3 00
Board and room, each

NEW ORLEANS MARKETS.

From the N. O. Price Current.

We have no material change to notice in the general market, which continues quiet, with only a moderate business in most branches of the wholesale trade, some of which complain of increasing dullness. Sugar has been extremely dull, with light receipts and no material change in prices, and the sales of molasses have been confined to retail transactions, at previous rates. Western produce has been inactive, with light supplies and only a moderate local demand.

The upper Red river is falling, but most of the cotton in that quarter is reported to have been shipped during the recent favorable stage of water. Navigation is still kept up on the other tributaries, but receipts of the staple are falling off, indicating that we are at last approaching an exhaustion of the supply. We hear some complaints of injury to the growing crop from the protracted drought, but in other quarters timely showers have been of great benefit, and the prospects are still encouraging.

The river is two feet nine inches below high water mark.

COTTON.—The following are the arrivals since the twenty-seventh ultimo:

Louisiana and Mississippi	4923
Mobile	1321
Alabama	28
Total	6272

On Saturday the demand was slack throughout the day, only a few buyers coming forward, seeking for small lots to complete pending orders, and claiming further concessions, which few factors were willing to admit. The sales were consequently confined to 700 bales, at easier prices, but without any notable decline. On Monday there was very little movement until noon, after which, finding that under discouraging telegrams from Liverpool and New York factors evinced a disposition to make some concessions, the demand was renewed, but only to a limited extent, and the business did not exceed 2,100 bales, while prices were manifestly weaker, good ordinary closing at 19½ to 20½c, and low middling at 21 to 21½c. On Tuesday the market was nearly stagnant until toward noon, only a few trifling lots changing hands at no material change from Monday's rates, but, owing to the decline at New York and Liverpool, and the course of foreign exchange, factors were subsequently compelled to give way, and the sales embraced 1,900 bales, at irregular rates, showing an average falling off of ½c in middling and the better qualities, and ½c in low middling and the lower grades.

This makes an aggregate for the past three days of 4,700 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 1,094,580 bales, against 775,523 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 753,670 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 358,525 bales to Great Britain, of 108,542 to France, and of 115,649 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	17 to 18½
Good ordinary	19 to 20
Low middling	20 to 21
Middling	21 to 22
Strict middling	22 to 23

COTTON STATEMENT.

Stock on hand Sept. 1, 1869, bales	770
Arrived past three days	6272
Arrived previously	114,983-115,510
Exported past three days	13,335
Exported previously	103,204
Burned	1317-104,619
Stock on hand and on shipboard	109,011

SUGAR.—A limited demand has continued to prevail since our last review, and the sales on Saturday and Monday were confined to 150 hogsheads Louisiana, most of the receipts, at 7½ to 8½c per pound for inferior, 8½ to 9c for common, 9½ to 9½c for fair, 10 to 10½c for good fair, 10½ to 10½c for fully fair, and 11 to 11½c for prime.

FLOUR.—The market has continued very dull since our last issue.

MONEY.—Gold, 114½ to 114½c. American silver half dollars, 106 to 109. Mexican dollars at 2½ to 3 per cent. premium in gold.

Nothing has been reported in bonds.

A moderate business has been done in warrants, the sales of which include \$2,000 Levee on Saturday at 92½c, and \$1,000 new State at 88.

City Treasury notes, 25.

CATTLE MARKET.

New Orleans, May 31, 1870.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, JUNE 11, 1870.

NO. 21.

PROCEEDINGS OF THE GENERAL CONFERENCE OF THE METHODIST CHURCH SOUTH. FIFTEENTH DAY.

Friday, May 20, 1870.

The Conference met at the stated hour. Bishop Pierce in the chair. Religious service was conducted by W. M. Pitts.

The minutes of the last meeting were read and approved.

Bishop Pierce took the chair. J. Hamilton, chairman of the Committee on Revision, submitted Report No. 8 of that committee, which lies over under the rule. It is as follows:

REPORT OF THE COMMITTEE ON REVISION. NO. VIII.

The Committee on Revision beg leave to offer Report No. 8.

Your committee recommend that chapter 3, section 8, question 1, answer 2, page 13, N. A., be amended by striking out the word "and," after "ministry," and inserting the following: "And those who were elders in the local relation at the time of their admission on trial in the Conference shall pass the like examination." "In no case," etc.

The attention of the committee has been called to an apparent discrepancy between the Discipline, chapter 3, section 16, question 2, answer 2, page 19, N. A., and the Manual of the Discipline, page 49, section 3, item 2, in regard to the chairmanship of boards of trustees; if such discrepancy exists, it is the judgment of the committee that the Discipline is right.

All of which is respectfully submitted.

J. HAMILTON, Chairman.

C. I. Vandeventer, chairman of the Committee on the Circulation of the Holy Scriptures, submitted Report No. 1 of that committee, which was adopted.

N. F. Reid, chairman of the special committee to whom was referred the communication of the Rev. J. K. Nichols, D. D., fraternal messenger of the General Conference of the Methodist Protestant Church, submitted the report of that committee, which was read and adopted, and the committee was instructed to communicate the same to Dr. Nichols.

The communication made to the Conference by Dr. Nichols is as follows:

BALTIMORE, May 12, 1870.

At the session of the General Conference of the Methodist Protestant Church, sitting at this time in Baltimore, Maryland, Rev. James K. Nichols, D. D., was appointed a fraternal messenger to the General Conference of the Methodist Episcopal Church South, to fill the vacancy created by the withdrawal of Rev. F. L. B. Shaver, the original appointee from the Methodist Protestant Church.

J. THOS. MURRAY, Secretary.

CONFERENCE ROOM,
BALTIMORE, MD., May 14, 1870.
To the Bishops and representatives, ministerial and lay, of the General Conference of the Methodist Episcopal Church South, in conference assembled, in the city of Memphis, Tennessee, greeting:

REVEREND AND HONORED BROTHERS:—The enclosed certificate will explain the occasion and character of this communication to your respected and venerable body. Honored by my brethren with the position and responsibility of fraternal messenger, I would lose no time in conveying to you the fraternal greetings and Christian salutations of those whom I represent. Not being able to do this in person, by reason of the simultaneous sitting of the two bodies, and the great distance separating them, I substitute this letter in the premises.

In the name, therefore, of our great Father in heaven, and of our Lord Jesus Christ, and in the name of our common Methodism, and especially in the name of the Methodist Protestant Church, dear brethren, I greet you with a glad heart. I greet you as ministers of Christ and members of his church, and bid you God speed in the great work of spreading scriptural holiness over these lands and throughout the world. This is the chosen work of our cherished Methodism, and it affords me unspeakable pleasure to assure you that the Methodist Protestant Church, as one of the feeble branches of that great ecclesiastical brotherhood, rejoices to bear her humble part in its glorious

consummation. We claim to be disciples of that blessed Lord whose kingdom is not of this world. And in the fulfillment of our high commission as a church, therefore, like yourselves, we have "determined to know nothing among men save Jesus Christ and him crucified." A people, emphatically, of one work, and that work the salvation of immortal souls, the height of our ambition is to spend and be spent for its blessed accomplishment.

It is with great pleasure that I would advert to that most pleasing sign in our ecclesiastical heavens, indicating an increasing desire among the evangelical churches of our land—especially those of similar faith and fellowship—to get nearer to each other, in the true spirit of Christian sympathy and fraternity. Indeed, "union" is fast becoming the watchword of Christendom. What an example of this have we among our Calvinistic brethren, in the corporate union and consolidation of the Old and New School Presbyterian churches! Shall Arminian Christians fail in this respect? It is most pleasing to me to be able to say, in this connection, that even since the commencement of this session of our General Conference we have been approached by two distinct branches of the great Methodist family, in the persons of fraternal messengers, respectively, looking to and advocating a closer union of our common Methodism. But honor to whom honor is due. You yourselves, venerable brethren, are in advance of all of them on this subject. Four years ago fraternal messengers were accredited from your venerable body, then sitting in New Orleans, to our own, holding its quadrennial session, at the same time, in Georgetown, D. C. And it is yet fresh in the recollection of the writer how our hearts were made to thrill by the eloquent utterances of one of your messengers—Rev. C. F. Deems; D. D., the only one who reached us—upon the great subject of Christian fraternity and union. Moreover, from your body, at the same time and place, emanated that distinguished commission which, in the persons of Bishops Pierce and McTear, and Drs. Lee and Evans, appeared before the General Conference of the Methodist Protestant Church, which met three years ago in the city of Montgomery, Alabama, to treat upon the subject of a corporate union of the two churches.

And I need not say how highly we appreciated such a presence upon such a subject. Your commission won the hearts of the whole convention. And although the great object of their appointment has not been accomplished, I am sure the blessed results of that meeting, like bread cast on the waters, shall be gathered after many days. Let us hope, dear and honored brethren, that the time may speedily come when all who love our Lord Jesus Christ may see eye to eye, and, in the truest and divinest sense, be one in him.

Praying the great Head of the Church to bless you in your deliberations, and to multiply and make you a thousand times as many as you are; with great respect and affection, I am your brother and fellow-laborer in the gospel of Christ,

J. K. NICHOLS.

THE REPORT OF THE COMMITTEE ON THE FOREGOING.

The committee to whom was referred the communication of Rev. J. K. Nichols, D. D., fraternal messenger of the General Conference of the Methodist Protestant Church to the General Conference of the Methodist Episcopal Church South, now in session, ask leave to submit the following reply as their report:

GENERAL CONFERENCE ROOM,
MEMPHIS, TENNESSEE, May 19, 1870.

J. K. NICHOLS, D. D.—*Reverend and Dear Brother:* Your communication, with the testimonial of your appointment as fraternal messenger from the General Conference of the Methodist Protestant Church to the General Conference of the Methodist Episcopal Church South, now in session in the city of Memphis, was duly received, and referred to us, the undersigned, for consideration and response.

In the discharge of this pleasant duty we assure you that the sentiments of fraternal regard expressed by you, both in your own name and in behalf of the body of venerable Christian ministers and laymen whom you represent, meet with an earnest and hearty response from us. You will allow us to say that, in common with yourself, we realize the highest satisfaction in the vindication which we witness of a nearer approach of the "evangelical

churches of the land" to each other in Christian fellowship and good will; and we trust that the advances made in that direction may be the harbinger of that perfect fellowship and affection which should characterize those who, differing in non-essentials, and nevertheless agreed on the essential points of doctrine of our holy religion. You will permit us especially to express the reciprocal pleasure it affords us to believe that the recent efforts made by the authorities of our respective churches to effect an organic union between these two members of the great Methodist family of this country, have not been entirely fruitless, and we hope the day may not be far distant when this broad east on the waters may be gathered in a complete organic unity of these two branches of Christ's church, on a basis alike agreeable to both parties, already one in sympathy and doctrine, and nearly so in polity. Before this reaches you your General Conference will have adjourned; but you will please make known this expression from us, to your brethren, by adopting such measure as may suggest itself as most suitable to bring it to their knowledge.

With our fervent prayers to God for his blessing upon you and those you represent, we are affectionately yours in Christ,

N. F. REID,
J. C. GRANBERRY,
O. R. BLUE,
L. W. SMITH,
E. W. MASSEY.

Dr. Wiley, chairman of the Committee on the Publishing House, submitted the report of said committee, which was read.

Dr. W. W. Bennett said: "I would like to inquire whether it would not be proper to instruct the agent to establish depositories, or some other plan, whereby our entire work might be supplied with our own publications. The old depository system has been abandoned, and we have no way of supplying this want. We in the East have greatly felt the need of this. I was instructed to write to the agent to see what could be done in this regard, and he replied that he was restricted by the action of the General Conference, which did not authorize him to establish any depositories but the one at New Orleans. The result of this will be that you will have in the East, as now in the West, houses established on private responsibility where books will be published on a larger scale, and a Publishing House *de facto* if not *de jure*. The people will feel constrained to do this, because the church cannot be supplied under the present system. Hundreds and hundreds of dollars go not into the treasury of the church, but into other houses. I have heard of a church in the West sending to Chicago for books. Our trade has been broken down on account of this restriction of the General Conference, and the only reply of the book agent is that he is forbidden by the General Conference to take any steps toward remedying this. I propose two or three places which could not involve any risk, and the response came back as before. If this continues we will be unsupplied with that very literature which should be scattered all over the church. I do not believe that we establish a Publishing House solely for the purpose of making money."

The chair called on the speaker to confine himself to the motion.

Dr. Moran: "I am opposed to the report of that committee, and I hope the majority of the Conference is opposed to it. You might as well have it in the moon as in Nashville. I wrote four times to the agent there without getting a reply, and many others have done the same thing with a like result. I want it put anywhere but Nashville. I move that it be removed to Baltimore."

There being some discussion in regard to the state of the question, Dr. Bond moved to adopt the first resolution, and said: "It is hardly necessary for me to state that I have moved the adoption of this resolution in order to clear the floor. And now, that I have an opportunity to speak, permit me to correct a misapprehension on the part of my venerable friend, Dr. Green, that when I spoke of his character for sagacity being in the way of the removal of the Publishing House, I attributed to him anything that was inconsistent with his well known character as a Christian and a gentleman, and I will forgive him, on the other hand, for his reflections on my understanding of the question under discussion, and, speaking in Tennessee language, I

will 'swing around the circle,' and say to my esteemed friend, Dr. Hamilton, that though in view of his anti-monopoly principles he will not indulge in an afternoon sneak about a hotel, yet, nevertheless, if among the fumes of my cigar his image should arise, I will promise to look upon it with love and esteem."

Dr. Hamilton: "Thank you, doctor."

Dr. Bond: "It is sincere—and now I have only one other gentleman to settle with. I think Dr. McFerrin took an unfair advantage of us. Sir, I think it was unfair in him to appeal to the deepest sympathies of our nature, and to array against Baltimore all the feelings of a parent in agony over a dying child. There is no argument against a man who is thus crying in agony, 'My baby, O my baby.' I am happy to allay any fears which may arise in his mind with regard to any harm which his baby may suffer in our hands. I admit the Book Concern appears to us in all the weakness of helpless infancy, but I am expert in babies, having had much to do with them both personally and professionally, and I am compelled to say at the bedside of his baby, which he is nursing so tenderly, that this is infancy which only lacks size for maturity. It is not a baby; it is only a dwarf, and it had better try a change of air."

H. H. Montgomery: "Will the doctor please talk about Nashville?"

Dr. McFerrin: "I hope the doctor will be allowed to go on—he knows more about babies than anything else."

Dr. Bond: "I think it very likely—that is the foundation of knowledge; and moreover, I know more about babies than babies know about me. I think it ought to be understood, in the first place, what the real purpose of the Publishing House is. We are told that it is a great success, because it made enough money to pay its debts. I admit the agent has manifested great financial ability and nerve, and has done the best that could be done under the circumstances. It was said that he found a vessel stranded and in a wrecked condition, but he has mended it, and it only remains to send her off. And now why has it succeeded?—Simply because he found the Southern market bare of hymn books and Disciples, and he had a monopoly of the trade. He hurried to bind them up—I will not say how; and by ingenious calculation levies an internal revenue tax by which he liquidates the debts. But this can't be repeated. If the object of the house is to supply the literature of the church, then it has failed. If it is merely a financial affair, then I say keep it at Nashville, for as has been said, if you put it on the Alleghany mountains it will succeed with this monopoly of trade, but it never will supply the church with religious publications. No one has touched the real difficulty. We have colleges where we send our children to be educated, to be prepared to use books, and when they go out they never see our church books, and for the best of reasons. We are the only church that has undertaken to monopolize its literature. The Presbyterian Church is richly supplied with literature. Its presses are teeming with it. The Catholics have no publishing house, and yet they are abundantly supplied by individual enterprises. In Baltimore an immense number of books are sold, and on Christmas, of all the ladies who are buying books for presents, four out of five want religious books, and there is not a Methodist book among them, and there is not an editor who does not know that we are obliged to commend other publications to our people. The people are supplied with these, and we have nothing to put against them. No enterprise can rise under the deadly shade of monopoly. If you will have a Publishing House, have it where the books can be distributed."

The speaker was called upon to stick to the question.

J. E. Evans: "I am glad you called attention to the question, and I hope we will confine ourselves to it. In the investigation of the committee they confined themselves to this question in particular, and ascertained that it would cost us from six to eight per cent. more to publish anywhere else than Nashville. As a purely business conclusion, we determined on that resolution. We sought all the information that we could get from all quarters, and reached the conclusion that we could do it better and cheaper in Nashville."

Dr. Marshall: "I desire to ask

information of Dr. Evans. He informs us that he has had under consideration the publishing by ourselves, and by agencies. This question has been thoroughly sifted, but it doesn't touch the point. The real question is, How shall we most effectually spread our literature? When I see the church clamoring for reading matter, the question occurs to me, Why can't we publish the *Ecce Deus*, for example, as well as Appleton & Co.; why can't we supply our people with literature? With all due respect to the authors of the works, I do think we are going to over-publish the histories of Methodism. We will pile up another lot of books which can never be diffused unless we establish some machinery for doing it. The question is, Do we publish these to lay them up in Nashville? Shall there be no plan to accomplish this, which is so much desired?"

Dr. Evans: "The committee felt themselves shut up to the questions now before us, and in settling that we decided upon that first resolution. When the second resolution comes up this subject may be taken up."

Dr. Marshall: "Boxing up books in Nashville is not publishing. Printing is one thing, publishing is another."

The resolution was then put to the house and adopted. The second resolution was then taken up, and Dr. Moran moved to amend by removing the Publishing House to Baltimore.

Dr. Evans: "Upon that point the committee had before them the comparative advantages of Baltimore and Nashville. We had the whole field before us, and the agent made the statement that when he went into the Publishing House it was so embarrassed that he felt bound to try and see if he could publish cheaper by contract, and he went out and got estimates, and came to the conclusion that he could publish as cheap himself in Nashville. We invited *contra* opinions on this subject, and could get nothing which would lead us to any other conclusion. We suppose the agent was in circumstances to know. The next point that came up was, Is there any better point from which we can supply our literature to the church? The book agent told us that he had taken this point into special consideration. He conceived Baltimore too far east and St. Louis too far west. He therefore took Louisville as a competent point from which our books could be distributed. He took the express lines to all parts of the church from Louisville, and also from Nashville, and, on aggregating each, it came out six cents in favor of Nashville. This he regretted. Under these circumstances we concluded that these difficulties which have been suggested from the East could be overcome in some other way."

T. M. Finney: "I would like to call attention to a certain point. Dr. Redford told the history which Dr. Evans has just related, with reference to the other question."

Dr. Evans: "Dr. Finney is right, but I considered it as having a conclusive bearing on this question."

The discussion was continued by A. W. Wilson—the time being extended to allow him to finish his speech—Drs. Selmon and Redford, Judge Morgan, Dr. Harrison, P. A. Peterson, Dr. Green—the time being extended to allow him to finish his speech—and T. M. Finney—the time being extended in his case also.

James A. Dawson and H. A. C. Walker offered a substitute for the amendment and the resolution, proposing to remove the Publishing House to Louisville.

The delegation of the Indian Mission Conference and W. L. J. Wilkes, lay delegate for the Tennessee Conference, were granted leave of absence.

J. D. Giddings moved the previous question. The time of adjournment being near, J. Hamilton moved to extend the session to take the vote on the previous question. This motion did not prevail, and the Conference adjourned, on motion of B. H. Spencer, to meet this afternoon at half-past three o'clock. The Bishop pronounced the benediction.

AFTERNOON SESSION.

Conference met according to adjournment. Bishop Kavanaugh in the chair.

Divine service was conducted by Dr. Craven.

The minutes were read and approved.

The call for the previous question, on which Conference adjourned this morning, was not sustained.

Dr. Moran was allowed to withdraw his amendment.

The substitute is as follows:

Resolved, That the proposition of the memorialists from the city of Louisville, offering to donate to the Publishing House the sum of \$50,000, upon the condition that the same be located in that city, be and the same is hereby accepted; and the book agent is directed, at the earliest practicable period, to remove such of the property of the house as can be advantageously removed to the city of Louisville, and to dispose of the immovable property on the best attainable terms, and hereafter the Publishing House shall be located in the city of Louisville; provided that the action above contemplated shall be contingent upon the payment to the agent by the memorialists aforesaid, or upon such guarantee as will secure the payment of said sum of \$50,000.

JAS. A. DAWSON,
H. A. C. WALKER.

The substitute was then advocated by David Morton, the fifteen minute rule being suspended to allow him to finish his speech. He was followed on the same side by Dr. N. H. Lee.

Dr. McFerrin spoke in opposition to the substitute, and the rule was suspended to allow him to finish his speech.

Dr. Winfield called for the previous question. The call was sustained, and the substitute was lost by a vote of sixty-three to one hundred and nineteen.

The second resolution was then adopted.

The question was then put on the report as a whole, which was adopted, as follows:

REPORT OF THE COMMITTEE OF NINE ON THE PUBLISHING HOUSE.

Your committee have considered as carefully and thoroughly as circumstances would allow, the great interests connected with our Publishing House as brought before them in the resolution of E. H. Myers and W. J. Parks, as to the expediency of selling out at Nashville and publishing hereafter by contract on the agency plan. Also the resolution of L. G. John and J. W. Whipple, asking for inquiry as to the comparative cost of publishing at Nashville and at other commercial centers in the United States, as well as the cost of transportation from that and from other points, together with the present price of real estate, etc., at Nashville, and reached the following conclusions as their best judgment in the premises: 1. That we should continue to manufacture and publish our own books as heretofore. 2. That the best interests of the church require that the Publishing House be continued at Nashville.

E. E. WILEY, Chairman.

The report of the Committee on Boundaries was then taken up and adopted.

A. L. P. Green and W. C. Johnson presented claims of certain parties against the old missionary society, which were referred to the Committee on Missions.

The following resolutions were then offered, read and adopted, to wit:

Resolved, That in pursuance of the action of this General Conference, on the twelfth instant, in relation thereto, the Conference does by these presents appoint the Rev. Alexander L. P. Green, of Tennessee, and Isaac L. Johnson, Esq., of Washington, D. C., a commission on behalf of the book agent of the Methodist Episcopal Church South, with full power and authority to employ counsel to present, prosecute and receive the debt due the aforesaid corporation by the government of the United States for rents, damages, printing material and other property pressed into the service of the United States during the years 1862 to 1865, inclusive; and the said commissioners are hereby invested with full power to do all matters and things pertaining to said claim; and they are hereby required to pay over all moneys arising therefrom, after paying all needful expenses, to the general book agent.

R. ABBEY,
J. HAMILTON.

WHEREAS, The doctrines of our church are not to be found in any one small, convenient work; therefore,

Resolved, That the Bishops be requested to select some suitable person to prepare, under their supervision, a manual of the doctrines of the church, in a brief, clear and guarded form, for general circulation.

J. HAMILTON,
J. E. EVANS,
J. McFERRIN.

J. C. Keener and others submitted resolutions concerning the edu-

tion of young men in the ministry, which were discussed at some length, when the Conference adjourned with the doxology, and the benediction by the Bishop.

SIXTEENTH DAY.

SATURDAY, MAY 21, 1870.

Conference met at the stated hour. Bishop Wightman in the chair.

Divine service was conducted by A. T. Mann.

The minutes were read and approved.

Bishop Marvin took the chair, and called for reports of standing committees.

J. Boring, chairman of the Committee on Missions, submitted Reports Nos. 4, 5, 6 and 7 of that committee, which were read and adopted, as follows:

REPORT OF COMMITTEE ON MISSIONS.—NO. IV.

The propriety of establishing a mission in Mexico, the consideration of which was referred to this committee, has been as fully examined as possible, under the circumstances, and it is recommended that, whenever practicable, a mission shall be organized for the Mexicans, in either western Texas or Mexico, as may be determined best.

Respectfully submitted.

JESSE BORING, Chairman.

REPORT OF COMMITTEE ON MISSIONS.—NO. V.

Resolved, That the Board of Missions be requested at an early day to inquire into the expediency of employing a missionary agent among the Chinese in California.

JESSE BORING, Chairman.

REPORT OF COMMITTEE ON MISSIONS.—NO. VI.

Resolved, That the attention of the General Conference be called to the fact that missions are frequently established in our old Conferences on territory which is not strictly missionary ground, and that real missionary interests are seriously damaged thereby.

Respectfully submitted.

JESSE BORING, Chairman.

REPORT OF COMMITTEE ON MISSIONS.—NO. VII.

The Committee on Missions recommend that the Columbia Conference be made a mission Conference.

JESSE BORING, Chairman.

J. Boring presented a memorial from members of the church in the North Georgia Conference, respecting the trial and expulsion of Dr. W. R. Bell, which, together with the journal of that Conference, was referred to the Committee on Itinerancy.

J. J. Durant, lay delegate from the Tennessee Conference, asked and obtained leave of absence.

The following resolution was then offered and read, to wit:

Resolved, That it is the sense of this General Conference that the episcopacy should be strengthened by the election of at least two Bishops.

W. H. MONTGOMERY, L. P. LIVERY, R. ABBEY.

On motion of A. H. Mitchell, the order of the day was suspended to allow action on this subject.

A. Monroe offered as a substitute:

Resolved, That it is the sense of this Conference that it is inexpedient at this time to increase the number of Bishops.

He said he opposed the increase of Bishops, as the Bishops did not ask it. The subject was thoroughly discussed in the committee. He entered his solemn protest against the measure.

W. H. Bobbitt said that two questions are to be settled: 1. Do we need more Bishops? He had not learned that we do. 2. Can additional Bishops be supported? He doubted. He thought the Bishops we now have can do all the work.

Dr. L. M. Lee was sorry the question was brought up from unusual sources. The Bishops had given no intimation that they need strengthening. The Texas delegation did not ask additional Bishops, but more episcopal service. The request for more Bishops comes from those who do not know the wants of the church. Then there is the monetary question, which he urged for the first time in his life: "We cannot well support more Bishops. Then there is another point—seven, effective Bishops can do the work, as there will be but five Conferences a year to each. If two more Bishops be made, there will be nine men for thirty-five Conferences. Then, as a last argument, it is not true that the episcopacy is essential to the edification of the church. Pastors can do their own work. He did not want the pastorate degraded.

I. G. John said that the resolution asking an increase of Bishops was legitimate. It was ruled out on a previous occasion. The movers were not responsible for this. The Texas memorial was referred back to the Conference. The matter of fact on which the appeal was based was ignored, and, by the indefinite postponement of the question, had placed it in the hands of the Conference, and left those demanding relief no alternative but to make their appeal directly before the Conference. The committee was nearly equally divided. Texas was entitled

to one-thirteenth part of the entire episcopal service performed throughout the connection; but this it had not received. If membership were made the basis of the claim, the total being five hundred and seventy thousand, there are in Texas thirty-four thousand, entitling them to one-seventeenth of episcopal labor. Let preachers be the basis. There are twenty-four hundred preachers in the connection, and two hundred and five in Texas, entitling it to one-thirteenth of their labors. Let Conferences be the basis, there having been thirty, and five of them in Texas; this entitles us to one-sixth of episcopal labor. Take appropriations as the basis. The total being \$29,400 assessed to Texas, this entitles us to, say one-eleventh of episcopal labor. How much does Texas get? There are seven Bishops, and twelve months in the year, making in all eighty-four months of episcopal labor. They had received, on an average, three months, which is one twenty-eighth of the time. He did not say this fretfully; nor was he finding fault; but they had heard of the great results which had followed episcopal labors in other sections of the country, and their hearts yearned for that power among them. He took issue with Dr. Lee in the estimate placed on episcopal service. He considered it the heart of the itinerant system, and they wanted to feel its pulsations, and to send its life-blood all over the land. They had not asked for a Bishop, but they wanted episcopal service.

The substitute of A. Monroe was lost by a vote of sixty-seven to one hundred and four.

Dr. Hamilton moved to amend the resolution by striking out two and inserting one. J. E. Edwards moved to amend the amendment by inserting five. This motion was laid on the table.

Dr. Green said that since the last General Conference one of the Bishops had died, and his death had left a niche into which it seemed proper for another to step. The additional work of four Conferences, together with the wear and tear of the last four years of episcopal labor, seemed to call for an increase of episcopal service.

Dr. Redford differed with Dr. Green as to the number. He thought that there should be two more. The work would then be done, and the support would be forthcoming.

R. H. Powell thought that the strengthening of the episcopacy would bring it in contact with the membership of the church, and exert a powerful influence over it.

Dr. Winfield was in favor of one and no more. The Methodist economy did not intend that the episcopacy should substitute the presiding eldership. The increase of the episcopacy would take the money out of the hands of the traveling preacher, and strike a death-blow at the presiding eldership.

J. L. DeYampert said that he was from the same Conference with Dr. Winfield, and he wished to say that he could take a canvas and a Bishop and show him through Arkansas, and make enough to support him.

J. P. Ralls moved the previous question. The call was sustained, the amendment was carried by a vote of one hundred and ten to one hundred and two, and the resolution was adopted.

M. S. Andrews moved that we now proceed to elect a Bishop.

W. C. Johnson moved a substitute that the election of a Bishop be made the order of the day for Monday next at half-past three o'clock P. M. This was lost.

The previous question was called by H. A. C. Walker. The call was sustained, and the original motion prevailed.

At the instance of Dr. E. H. Myers, the chair called the Conference to prayer—led by the venerable Dr. Lovick Pierce.

W. H. Potter, D. Ball, P. A. Peterson and J. W. Whipple were appointed tellers. The result of the ballot was as follows:

The whole number of ballots was 183; necessary to a choice, 92. No election.

The second balloting resulted as follows:

John C. Keener..... 67
James A. Duncan..... 64
J. M. McFerrin..... 51
N. E. Bell..... 5
J. B. Ralls..... 4
J. H. Linn..... 4

The whole number of ballots was 183; necessary to a choice, 92. No election.

The second balloting resulted as follows:

tact with the general interests of Methodism. Every circuit and station in the district has the benefit of their labors in that they touch the church at every point, thus unifying the connection. They thus inspire, enliven and kindle afresh the fires of Methodism. Time wears all of us, and with this small force spread over such a large amount of labor, I believe this General Conference will be recreant to the interests of the church if they do not increase their number. The practical question which they urge amounts, in my mind, to the old adage: "Penny wise and pound foolish." We can sustain four more Bishops now better than we could four years ago.

J. M. Binkley—"I hail from a country where we desire to have more episcopal labor, and we have paid all that has been assessed us. I regret that it has been asserted that the episcopacy is making inroads upon the pastorate. In the West we are generally called old fogies. Still I am in favor of an increase of the episcopacy. It will be remembered that it was understood that there was to be one Bishop to reside in Texas, and I was surprised that my venerable namesake, when he has taken away our idol, should be opposed to an increase of the episcopacy. I should be ashamed to go home if I did not express myself on this point."

Bishop Paine said that it was not on account of any want of harmony or dissension upon the part of the Bishops that they said nothing on this point, but they thought the Conference could best judge what was needed, especially as they did not know how many new Conferences would be formed. Had they been officially asked, they would have convened and given an answer. Every Conference had had the superintendency and presence of a Bishop, except one session of the Western Virginia Conference, when the Bishop appointed to preside over it was sick, and his colleagues engaged in other fields of labor. As it has been customary to close the Conferences by Christmas, several had to be held at the same time, but all the work has been attended to as far as it has been practicable. He thought it a matter of peculiar delicacy to intimate to his colleagues—that he wanted an increase. When they came to consult, they thought that if their health would permit them they might probably attend to the work as during the last four years. But when four Conferences were added, they agreed that if it pleased the Conference to give them one more Bishop it would suit them, and if two, they would not object.

Dr. Leo wished to know whether they could do the work without the aid of other Bishops.

Bishop Marvin said that in view of the increase of the work one Bishop might be judiciously elected.

The secretary wished to know whether it was the wish of the Texas delegation to have one more Bishop.

Dr. Alexander answered that Texas wanted and would vote for one.

J. P. Ralls moved the previous question. The call was sustained, the amendment was carried by a vote of one hundred and ten to one hundred and two, and the resolution was adopted.

M. S. Andrews moved that we now proceed to elect a Bishop.

W. C. Johnson moved a substitute that the election of a Bishop be made the order of the day for Monday next at half-past three o'clock P. M. This was lost.

The previous question was called by H. A. C. Walker. The call was sustained, and the original motion prevailed.

At the instance of Dr. E. H. Myers, the chair called the Conference to prayer—led by the venerable Dr. Lovick Pierce.

lating to the office of adult baptism, and recommending the adoption of the following resolutions:

Resolved, 1. That the language of the exhortation be so amended as to conform it to the amended form in the office of infant baptism.

2. That the last paragraph, commencing on page 154, be amended by striking out the words, "did shed out of his most precious side both water and blood," and inserting, "did shed his most precious blood."

3. That the second prayer, page 149, be transferred to the form of receiving and recognizing members, and that all be omitted after the word "invocation," on page 155, as recommended by the special committee on the rearrangement of the Dismissals.

W. P. HARRISON, Chairman.

REPORT OF THE COMMITTEE ON REVISION OF RITUAL.—NO. IV.

The Committee on the Revision of the Ritual beg leave to submit Report No. 4.

Your committee have duly considered the papers signed by W. P. Harrison, C. W. Miller, A. G. Brown, H. A. C. Walker and others, and having made all the recommendations they deem necessary, offer, in conclusion, the following resolution:

Resolved, That such emendations and recommendations of the Committee on Rearrangement as do not conflict with action already taken, be and hereby are adopted.

W. P. HARRISON, Chairman.

On motion of T. J. Magruder, Reports Nos. 1 and 2 of the Committee on Sunday Schools were taken up and read.

A motion of A. M. Shipp to amend the first resolution, by inserting between the words "adoption" and "by," the words "as far as practicable," was lost.

The secretary hoped that the first resolution would not be adopted. He felt assured it could not be carried out. Each Sunday school should adopt whatever system the pastor and superintendent might deem most efficient in that particular school. It was impossible to have a great clock at St. Paul's to run by electrical connection all the clocks in the world.

Sunday schools were differently situated and differently constituted. The proposed system was a notion borrowed from across the lue, and, like many others from the same source, would embarrass the church.

Dr. McAnally suggested that it was only a recommendation from the committee and not specially obligatory, and he would not refuse to wear a coat or eat a cheese simply because it came from across the line.

T. J. Magruder said that he was once of the same opinion as the secretary, but that he had seen this system tried and work admirably. It was a system that all classes could study the same week and the same day. The great difficulty with Sunday schools is that the children could not be made to study, and he was satisfied that unless something could be gotten up which did not require so much labor, they would soon prove a failure.

Dr. Schen agreed perfectly with Dr. Summers as to prescribing any uniform mode of carrying on Sunday schools. It had long been his pleasure and his privilege to be intimately connected with Sunday schools, and he felt satisfied that to adopt a uniform system would be destructive of the best interests of the church. He thought they might as well lay down a system of preaching, and say that every preacher should take a certain text.

Dr. Pierce said that he had long been endeavoring to prepare the public mind for this very thing. He was well satisfied that it can and ought to be done. He thought perhaps there might be a Sunday school here and there which could not adopt the system, but he did not think that justified the whole church in sailing without chart or compass. He was confident that it would greatly enhance the Sunday school interest.

J. Matthews said that this was like the discovery of the circulation of the blood, concerning the truth of which it was hard to convince the mind of the world, but that now all the world believed in it. They did not propose to force any Sunday school, but it was merely a recommendation. He explained the working of the system proposed, and said that he thought it would supply a long-existing want.

Asa Snyder said that they had adopted the system in Richmond, and found it eminently successful. By this the whole Bible was brought to bear upon one text, and it was adapted equally to the infant class and to the larger members of the school. He thought the only difficulty lay in the fact that some schools were poor, and could not buy the books. He wanted a literature of our own, selected and prepared by the best talent of our church.

P. A. Peterson moved the previous question, which was sustained, and the first resolution was adopted.

The second resolution was read and a substitute offered by H. P.

Walker and S. X. Hall, recommending a weekly Sunday-school paper, embracing child's, youth's, teachers' and miscellaneous departments, was laid on the table. The resolution was adopted.

This third resolution was adopted.

The fourth resolution was read, and an amendment moved by P. A. Peterson to strike out all after the word "issued," and insert "semi-monthly," was lost, and the resolution was adopted.

The fifth resolution was read and adopted.

The sixth resolution was read, and an amendment by R. Abbey, providing for the appointment of the secretary by the Bishops, was lost, and the resolution was adopted.

The seventh and eighth resolutions were adopted.

The committee, by unanimous vote, were allowed to withdraw this paragraph in Report No. 1: "After inquiry into the facts of the case, your committee have come reluctantly to this conclusion that our child's paper, the Sunday School Visitor, has not competed successfully with its many and attractive rivals, that have solicited and largely secured the patronage of our schools."

The report, as a whole, was then adopted.

The special committee on the Sunday school song book submitted the following report, which was adopted:

REPORT OF THE SPECIAL COMMITTEE ON SUNDAY SCHOOL SONG BOOK.

The special committee to whom was referred the subject of a Sunday school song book, have given the same due consideration, and beg leave to report:

1. That the great object of Sunday schools for our children will not be successfully reached so long as we depend upon others for song books in our Sunday schools.

2. The highest obligations to our church and children require us to use, to the best advantage, every legitimate and available means of religious culture, and we consider the department of song at once a delightful and successful method of imparting and impressing religious truth.

3. We consider the subject of sufficient importance to justify the appointment, by this General Conference, of a committee of five suitable and competent persons, to aid the Sunday school secretary in collecting and providing, from time to time, suitable songs and song books for our Sunday schools, and we so recommend.

Respectfully submitted.

W. M. LEFTWICH, Chairman.

MEMPHIS, May 17, 1870.

On motion of H. H. Montgomery, the election of the Sunday school secretary, and other General Conference officers, was made the order of the day for to-morrow, at ten o'clock A. M.

On motion of W. M. Rush, it was ordered that when we adjourn we adjourn to meet this afternoon at half-past three o'clock—the report on books and periodicals to be the order of the day.

Report No. 1 of the Committee on Missions was called up, and on motion of W. W. Bennett was acted on item by item.

Dr. Cunningham said that the report was the result of long and laborious consideration. After hearing all on both sides of the question they decided to consolidate the boards, and the first reason which led them to this was that our missionary work was essentially the same, and we do ourselves harm by distinguishing between them. He who toils in the mountains and valleys, among the poor, is just as much a missionary as he who labors in China. He thought there was a reflex influence of the foreign upon the domestic missions, and vice versa. He thought we did ourselves injustice by discriminating between the two. This consolidation had also in view the diminishing of expenses. The proportion of expense to the amount of receipts has been a great difficulty in our missionary work. God has now thrust upon us a vast work. More than seventy thousand heathen have been thrown among us.

A. W. Wilson submitted the following question to the Bishops for their decision:

"Is the provision inserted in each missionary constitution by the General Conference of 1860, requiring a two-thirds vote of this body in order to effect an alteration of the same, valid and binding upon this body?"

Bishop Paine, after consultation with his colleagues, returned the following answer:

"It is the opinion of the College of Bishops that the provision in question is not valid or binding upon this body. One General Conference has not the right, by a mere majority vote, to pass a measure which a succeeding General Conference cannot alter or amend, save by a two-thirds vote, unless in a case where vested rights have been created."

W. H. Pettor moved that the first item, being article 1 of the proposed constitution, be substituted by article 1 of the constitution adopted

in 1866. This motion was laid on the table, and article 1 was adopted.

Article 2 was read, and on motion of A. W. Wilson was laid on the table and made the order of the day for this afternoon, after action on Report No. 10 of the Committee on Books and Periodicals.

A motion of W. Barringer that such matters as are on the table be referred to the Bishops, to bring forward at their discretion, was lost.

Conference then adjourned with the doxology and the benediction.

AFTERNOON SESSION.

Conference met according to adjournment. Bishop Doggett in the chair.

Religious service was conducted by J. C. Granberry.

The minutes were read and approved.

Bishop Keenor took the chair, and called for reports of committees.

On motion of W. Headen the call was suspended to allow Report No. 5 of the Committee on Education to be taken up.

Bishop Doggett said that Corpus Christi was on the borders of civilization and was a missionary enterprise. There had been no school there but a Roman Catholic institution, so that Protestants were compelled to send their children to that school. But this school had withdrawn a large number of Roman Catholic children. They had not only withdrawn them, but they were opening a school for Mexicans. If the General Conference could lay hold on this they would establish out-posts, which would open up an extensive field of labor.

J. Boring and I. G. John followed in commendatory remarks concerning the agent, W. Headen, and the institution.

On motion of J. E. Evans and E. H. Myers the report was amended by striking out the third resolution and inserting the following in its place:

Resolved, 5. That the subject of giving aid to the Corpus Christi Male and Female Academy be referred to the Missionary Board, with instructions to do what it can to promote the success of the school.

The report, thus amended, was adopted.

On motion of N. A. Cravens, Report No. 3 of the Committee on Itinerancy was taken up, and adopted.

A memorial from the Rev. J. W. P. McKenzie, respecting a claim of the Publishing House, was presented, read and referred to the Committee on Books and Periodicals.

Dr. Marshall and others offered resolutions favoring the appointment of a committee to whom shall be referred all proposed amendments of the Discipline in the interval of the General Conference, which was read and laid on the table.

Report No. 10 of the Committee on Books and Periodicals, being the order of the day, was taken up.

P. A. Peterson moved to strike out "Home Circle" and insert "Southern Methodist Magazine."

Dr. T. E. Bond moved to amend the amendment by striking out "Southern Methodist Magazine."

Dr. Winfield called for the previous question. The call was not sustained.

On motion of Dr. McFerrin the whole subject was laid on the table for the present.

Report No. 1 of the Committee on Missions being the order of the day, was called up, and on motion of Dr. Boring, Dr. Munsey, secretary of the Board of Foreign Missions, was invited to address the Conference on the subject at his discretion.

The second item, being article 2 of the proposed constitution, was read, and Dr. McFerrin moved to amend by striking out articles 2, 3 and 4, and inserting the following in their places:

ARTICLE 2. The board shall consist of a president, two vice presidents, a secretary, a corresponding secretary, a treasurer, and eleven managers. They shall all be members of the Methodist Episcopal Church South, and shall be elected quadrennially by the General Conference, except the treasurer, who shall be elected by the board.

When, from any cause, the General Conference shall fail to meet at the appointed time, the board shall continue in office until the next meeting of the General Conference. The Bishops shall be ex officio members of the board.

Dr. McFerrin thought it best to have those men appointed on the board who were near at hand and could be called together at any time and without any expense.

Dr. Leftwich said that he was in sympathy with Dr. Cunningham on this subject. He thought there was great necessity to have representatives from each missionary district, so that none of the work might be overlooked. He was in favor of the districting of Conferences, and thought that it would hold the connection in sympathy with the interests of the whole church, and there would be less danger of the complaint of partiality.

P. A. Peterson thought that the

great difficulty in the way of our missionary work was the expense of the board itself.

T. Reed said that every word of that report was well weighed. Both secretaries were before them and they came to the deliberate conclusion that it was due to the church to consolidate the boards, and to adopt the plan suggested in that report. He thought the interests of the church would be enhanced by sending men from the different parts of the connection.

Dr. Winfield did not see how one man from a district could know anything about the other Conferences from his district. He thought this system was too complex to work well. He thought they must have two secretaries.

Dr. Key was in favor of but one secretary and letting the pastors do the work of the other.

Dr. Bennett thought that the general sense of the Conference was to reduce the expenses. He then made statements showing that it costs seventy-five per cent. of what was collected to disburse the same. He was opposed to making offices to put men in.

J. B. Cottrell did not see how they were to get along without two secretaries.

Dr. J. Boring suggested an assistant secretary instead of one of those recommended in the report.

Dr. McAnally thought it was time to stop such expensive operations. He was reminded of the case of one who contributed twenty-five cents and then paid \$1 to send it to its destination.

Conference adjourned with the doxology and benediction by the Bishop.

EIGHTEENTH DAY.

TUESDAY, MAY 24, 1870.

Conference met at the stated hour. Bishop Keenor in the chair.

Divine services were conducted by R. Abbey.

The minutes were read and approved.

The following resolution was then offered and read:

Resolved, That for the remainder of the session the fifteen minutes' rule be changed to five minutes, and that the Bishops be authorized to call up at discretion the business of the Conference in such order as may seem to them necessary and fitting.

A. M. SHIPP.

J. B. COTTRELL.

On motion of J. E. Evans the resolution was divided.

A motion of D'Arcy Paul to strike out five minutes and insert ten was lost.

The first part of the resolution was then adopted by a vote of ninety-six to fifty-three.

On motion of L. M. Lee the second part of the resolution was laid on the table.

Bishop McTyeire took the chair.

Leave of absence after this morning was granted to L. D. Travers, lay delegate of the Virginia Conference; A. H. Colquhitt, and James Jackson, lay delegates of the South Georgia Conference; S. W. Moore, clerical delegate of the Memphis Conference; S. J. Bradley, lay delegate of the Baltimore Conference; and Thomas E. Thompson, lay delegate of the Missouri Conference; and after to-morrow to T. W. Garrett, lay delegate of the Virginia Conference, and W. P. Conley, lay delegate of the Baltimore Conference.

J. B. Palmer and M. E. Baldridge, lay delegates of the Tennessee Conference, asked but did not obtain leave of absence after to-morrow.

W. M. Rush, chairman of the Committee on Books and Periodicals, submitted Reports Nos. 18 and 19 of that committee, which were read and adopted, as follows:

REPORT OF THE COMMITTEE ON BOOKS AND PERIODICALS.—NO. XVIII.

Your committee, to whom was referred the memorial of W. W. Bennett, asking that the Publishing House be authorized to pay a certain claim to Leroy M. Lee, having considered the same, would recommend that the claim be referred for adjudication to the Book Committee.

Also, your committee having considered the memorial of J. W. P. McKenzie, touching certain claims which the Publishing House holds against him, but which he says he has paid, would recommend that this whole matter be referred to the general book agent and the East Texas Conference for adjudication and settlement at the next session of that Conference.

Respectfully submitted.

W. M. RUSH, Chairman.

REPORT OF THE COMMITTEE ON BOOKS AND PERIODICALS.—NO. XIX.

Your committee, to whom was referred certain memorials inquiring into the propriety and expediency of publishing a hymn and tune book, would recommend for adoption by the General Conference the following resolutions:

Resolved, 1. That the book agent be and he hereby is authorized to publish a hymn and tune book for the use of our congregations.

2. That Dr. J. M. Bonnell, Dr. T. O. Summers and Dr. W. P. Harri-

son are hereby appointed a committee to compile the hymn and tune book for publication.

Respectfully submitted.

W. M. RUSH, Chairman.

Jesse Boring, chairman of the Committee on Missions, submitted Report No. 10 of that committee, which was read, as follows:

REPORT OF THE COMMITTEE ON MISSIONS.—NO. X.

The committee report that they have considered the report of the Board of Foreign Missions, and beg leave to recommend that it be so amended as to leave out the expletives introduced in the case of the late treasurer of said board.

Respectfully submitted.

JESSE BORING, Chairman.

J. A. Dawson raised a point of order—whether it is competent for the Conference to take the action recommended by the committee to amend the report of the Board of Foreign Missions.

The chair ruled that the point of order was well taken, and that the General Conference is not competent to amend the report of the Board of Foreign Missions. The report of the committee, therefore, is out of order.

Paul Whitehead appealed from the decision of the chair on the ground that the procedure recommended by the committee is analogous to the action of courts of law in expunging scandalous matter from the pleadings of defendants, even when sworn to; and to permit the board to make a statement in any manner they please in their report is to make them utterly irresponsible.

The decision of the chair was sustained.

On motion of M. S. Andrews the order of the day, being the election of General Conference officers, was suspended.

A. J. P. Green, chairman of the special committee on the proposition of Dr. Bledsoe concerning a quarterly review, submitted the report of that committee, which was read.

W. H. Potter said that he wished to make a suggestion. Every one who is acquainted with the history of political papers knows that, whatever the change of proprietorship, the paper still retains its political status in the minds of the people, and no future act can expunge its history. He doubted whether we should tie the Methodist Episcopal Church South to any periodical which has had in the past a political history.

Dr. Moran said that so far from regarding its political history as an objection against it, he thought it afforded an argument in favor of it. It has attained a literary reputation, and he thought we would gain a great deal by the prestige of the review.

Dr. Evans said that if there was one thing that we gloried in outside of Christ Jesus and him crucified, it was in the fact that the Methodist Episcopal Church South ignored all connection with party politics.

Dr. McFerrin said that he had serious doubts about the propriety of this movement. The church ought to have the sole control of it, and held its own editor responsible for it. He also doubted whether it would meet the end proposed. The present demand was for a first class monthly.

Pending action on the first item, A. Monroe called for the previous question. The call was sustained, and the first item was adopted.

The second item was adopted.

The third item was read.

Dr. Bennett said that it was evident that alliance was sought from the consideration that the main support of this review came from the Methodist Church.

Dr. Watkins said that the proposition did not come originally from Dr. Bledsoe, but it was only made at the earnest solicitation of some of the members of the General Conference. The review was not a sinking concern. It was paying well, and it was not pecuniary motives that influenced Dr. Bledsoe to make the proposition.

The secretary thought the Conference should hesitate before entering into such a measure as this. He did not consider Dr. Bledsoe an Arminian.

Dr. Cravens thought a monthly was needed much more than a quarterly, and that this movement would strike a death-blow to that.

A. S. Andrews thought it a splendid offer, and he was fully satisfied that Dr. Bledsoe was a true Arminian.

J. E. Evans moved to amend by striking out the last clause, and inserting the clause, "giving the church one-third of its profits." This motion was laid on the table, and the item was adopted.

The fourth item was adopted after considerable discussion.

W. M. Rush thought that we had better not complicate ourselves in this way.

Colonel Lester stated what he conceived to be the nature of the transaction, and said that this was a big Armstrong gun which was to be fired for Methodism.

Bishop Paine suggested the limitation of the contract to four years.

Dr. Bennett thought there was some danger in these big guns to which Brother Lester referred—they sometimes burst and kill more men than they do any other way.

Dr. Bells thought they had better stand by the monthly. They did not propose to spike that big gun. Anybody could subscribe to the review that wanted it, whether the Conference adopted it or not.

The fifth item was read and adopted.

The report as a whole was then adopted, as follows:

The committee appointed to consider the proposition of A. T. Bledsoe, I. L. D., to identify the Southern Review with the interests of the Methodist Episcopal Church South, has carefully considered the same, and recommends its acceptance upon the following terms:

1. The elimination from said Review of party politics, and the substitution of a theological department.

2. Its advocacy of the doctrines and polity of the Methodist Episcopal Church South.

3. The exemption of the church from all pecuniary responsibility and legal liability on its account, and the relinquishment by the church of all claim upon its emoluments.

4. The acceptance by Dr. Bledsoe of an Editorial Committee, to be appointed by the College of Bishops, and to be associated with him in conducting the theological department.

5. That on these conditions the church accept the proposition, and recommend the adoption of all suitable means for its extensive circulation throughout the church.

A. J. P. GREEN.

S. S. ROSS.

W. H. WATKINS.

A. H. REDFORD.

J. HAMILTON.

GEORGE S. LESTER.

L. C. GARLAND.

D. R. McAnally moved a reconsideration.

On motion of G. N. Lester this motion was laid on the table.

C. W. Miller, clerical delegate from the Kentucky Conference, asked and obtained leave of absence on account of family affliction. H. A. M. Henderson, reserve, took his place.

The following resolution was offered by E. H. Myers, read and adopted, as follows:

Resolved, That the Bishops be requested to prepare a pastoral letter, emanating from the General Conference through them, to give this true views of the church and of this body on the subject of the indulgence of our members in worldly amusements and unscriptural employments and practices, and enforce the opinion of this Conference that the Discipline should be mildly yet firmly exercised against all who persistently infract the law of God in any particular.

A. S. Andrews, J. B. McFerrin and C. L. Vaudeventer expressed their desire to have this subject acted upon in view of the mistaken ideas that were abroad in reference to the action of the last General Conference.

Dr. Pierce said that he had noticed, when he was pastor of the church in Columbus, that in 1867, after the last General Conference, these dissipation grew to such an excess as he had never before known them. He told the people of his charges that they must retract, and they replied that the General Conference had released them from all obligations on these points, and it was told him that if he attempted to enforce his views one-half of his members would find an asylum in an easier place; but not one of them left. He had regretted that the General Conference had made any special rule against any particular crime. All was met by the General Rules. He was sorry that these special rules were taken out, inasmuch as they were in it, as it might furnish some excuse for those disposed to engage in worldly amusements; but it was his opinion that Methodism could live on the General Rules through all time to come. These rules seemed to him the last evidence of inspiration to mortal man. Wesley preached them upon the naked basis of Scripture. Upon these all our committees and churches should find their charges. He favored the adoption of this resolution. He believed the sanction of the Bishops would produce a salutary and saving influence on the whole church.

The question on which Conference adjourned yesterday afternoon, being the amendment of J. S. Key to strike out "corresponding secretary" in the amendment of J. B. McFerrin to article 2 in the proposed constitution, in Report No. 1 of the Committee on Missions, was taken up.

Dr. McFerrin said that one man could not visit all the government, make up his reports, and attend to all the other business of the secretaryship of the Board of Missions. A great deal had been said about the expense of running the board, and it had a serious bearing on his feelings. He had visited the con-

The Christian Advocate.

Official organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, JUNE 11, 1870.

OFFICE—No. 412 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—REV. LINUS PARKER, 112 Camp street, New Orleans, La.

AGENTS—All the members of the patronizing Conference.

CONFERENCE PUBLISHING COMMITTEES.

FOR MONTGOMERY CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MISSISSIPPI CONFERENCE:

REV. M. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTELL.

FOR LOUISIANA CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.
REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, whenever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, REGISTER the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

A MODEL AGENT.

Rev. Thomas J. Upton, of the Louisiana Conference, is, we believe, entitled to this appellation. He has sent us fifty-seven subscribers in four months. Among many agents who merit honorable mention Brother Upton certainly deserves "the blue ribbon." This is with him no new-born or temporary zeal, but in accord with his entire career as an agent for this paper.

Bishop Keener's Appointments.

Bishop Keener left the city on Tuesday last. He expects to be closely occupied for some time with his mission for Centenary College. We know of no enterprise more worthy of a Bishop's time and strength. Now is the time for the friends of this noble institution to rally to the support. The Bishop will be at the district meeting of the Clinton district, which will convene at Jackson, Louisiana, Thursday, June 30. He will also meet the board of trustees of Centenary College on the first of July.

TIME.—The communication from Dr. Walker gives an account of a most agreeable interview between our new Bishop and the officials of the Carondelet Street church. This transaction was as creditable to the donors as the gift was merited on the part of the recipient. Our friends of Carondelet street are becoming noted for the generous expressions of their appreciation of those who have ministered to them in spiritual things. Such acts of courtesy and such tokens of Christian affection guild and beautify, if they do not strengthen the ties which unite the hearts of ministers and people.

STANDARD WORKS.—Our readers will do themselves a valuable service by consulting the advertisement of the standard educational works of Charles Scribner & Co., which appears this week. These works embrace many of the most approved text books for schools. R. J. Harp has them for sale at our depository, 112 Camp street, New Orleans.

CENTENARY COLLEGE.

There will be a meeting of the Board of Trustees and Visitors of Centenary College on Friday, July 1, at Jackson, Louisiana.

J. C. KEENER,
President Board of Trustees.

REPENTANCE begins in the humiliation of the heart, and ends in the reformation of the life.

THE CLASS MEETING PROBLEM.

It seems now to be regarded as a problem. How is this peculiar institution of Methodism to be revived and maintained? The Bishops notice the subject in their address, it came in for a prominent place in the speeches at the General Conference, and we believe a note was ordered to be inserted in the Discipline, in connection with the section on class meetings, explanatory of the action taken four years ago, by which attendance upon them ceased to be a condition and test of membership. By that action class meetings were placed in the same category as the love-feast and prayer meeting. The duty to attend them all is plain, and disciplinary provisions are made for their organization. The class meeting is now conformed to the actual usage as it prevailed long before the test was removed. As a condition of membership it was rarely enforced, and the leading minds of the church, such as Bishop Soule and Dr. Winans, regarded the enforcement as impracticable. The General Conference of 1866 simply modified the law so as to harmonize it with the convictions and practice of the church. This modification was demanded by truth, consistency and expediency. We did well to strike out what we neither wished nor intended to enforce.

It is strange, however, that after four years it should be thought necessary to insert a note of explanation. The obligation of the class meeting is certainly on the same footing as the other social meetings, and this obligation is of such a character as to be binding upon the consciences of all true Methodists. We believe that on grounds both of Scripture and Discipline the character of a member might be arrested for the habitual neglect of the social meetings. They may all be regarded in some sort as a test of membership, and by removing it as peculiar to one, the obligation has really been widened by its more stringent application to all. We can hardly persuade ourselves that a dozen preachers in our church so far misapprehended the legislation of the General Conference as to feel that they were absolved from the duty of organizing class meetings in their charges. If any considerable portion of the membership became possessed with the idea that the institution was abrogated, we fear the wish must have been father to the thought, and if by this time they have not been dissuaded, we shall suspect that our pastors have been somewhat at fault. The almost uniform testimony from the pastorate is to the effect that where class meetings are not dead, they are kept alive with exceeding difficulty. Where they exist the majority of our members do not attend, and there are thousands of younger members who have never been in a class meeting. It is at once the most vitally useful and the most neglected of our social meetings.

What is to be done about the matter? It is to be noticed that in churches where revivals prevail, class meetings are temporarily well attended; and we suppose that a general revival, pervading the entire church, would give new life to this means of grace. Much, doubtless, depends upon the pastors. It is their duty to organize, to urge attendance, and to set the example by often attending and leading. Better keep up the organization, though under discouragements. We need also example as well as precept from the highest officers in the church. Our more intelligent and influential members, whilst they admit the importance of this meeting, fail, as a rule, in attending it. What proportion of our stewards, trustees, local preachers and Sunday school superintendents and teachers is found in the class room? We have seen various analytical classifications of the recent General Conference, as to profession, position and calling among the laymen. There were judges, lawyers, doctors, professors in colleges. Some were Sunday school superintendents. How many of them, clerical and lay, were leaders or attendants upon

class meeting? Do our chief pastors and presiding elders sometimes preach particularly on the subject, and seek opportunities of magnifying their office by occasionally examining and leading classes? Such facts recorded in the lives of Wesley and Ashbury have greatly impressed us.

Our church enterprises are now so multifarious, and our spirituality flows in so many channels, that the class meeting is, to some extent, pushed aside. In the palmy days of the institution there were not so many other societies, conventions and meetings as we have now. The activities of the church are blossoming into so many associations, conventions and conferences; and education, literature and Sunday schools have come to absorb so large a proportion of our time and thought, that the humble class meeting is in danger of being overlooked. Has a class meeting convention ever been called, or has a class meeting institute ever been held? We are not sure but it is as susceptible of improvement and development as any other part of our church organization. The order of exercises and the methods of leading might be made more effective by holding a class meeting, or a class leaders' convention. The want of good leaders is everywhere felt. A few such there are, but they are very scarce. The piety, the intelligence, the godly tact, which constitute this most important officer are rarely found. To keep up a weekly class, the year round, composed, for the most part, of the same members, so as to make it attractive and edifying, is a most difficult achievement. Most of our class meetings break down under the weight of this difficulty. In some instances the formation of children's classes has proved eminently successful. In nearly all of our pastoral charges a class meeting for the children is feasible. And here we see the most encouraging token for good, both as respects the class meeting and the church. The children thus organized and trained will, in the future, give us qualified leaders, flourishing classes and a spiritual church.

Presentation to Bishop Keener.

On Monday evening last, June 6, Bishop Keener was invited to meet the official board of the McGehee (Carondelet street) church, New Orleans. The object of the invitation was to present him with a superior first class gold watch. He had no intimation of the purpose until the pastor arose and told him it had been made his pleasing duty to convey to him the kind consideration of the members of the Carondelet Street church, his first field of labor in the Louisiana Conference, and to present him with a good time keeper as a slight memento of their esteem and love, which in all his wide and varied wanderings, from the Potomac to the Rio Grande, and from ocean to ocean, would daily remind him of his old friends of Carondelet street. The Bishop, in reply, expressed his pleasure at this unexpected testimonial of respect and love, and proceeded to add some very pleasant and appropriate biographical and historical reminiscences. The watch is one of real value, the value consisting not so much in ornamentation as in the richness of the material and excellence of workmanship. On the unadorned circle of the outside case was beautifully engraved, "K." in Old English capital. On the inside of the case was handsomely engraved this inscription: "Bishop J. C. Keener, from Carondelet Street Methodist Church." The whole occasion was pleasant, and will be a pleasing memory to us all. W.

ALMOST THROUGH.—This week nearly completes the proceedings of the General Conference. Next week there will be space for news, communications and selections of a literary and religious character.

MANFIELD FEMALE COLLEGE.—The notice of the approaching commencement of this institution will be found in the appropriate column. We regret that it came too late to be inserted last week.

The Northern Advocates on Unification.

The Christian Advocate of New York, in a long and rather exhaustive leader on the subject, combats the notion that ecclesiastical union is generally desirable or of advantage to the Redeemer's kingdom. Dr. Curry takes ground distinctly against the union of the two Methodist bodies in the United States.

We should esteem it a great calamity for both parties for a union to be formed while our relations, North and South, remain as they are. We have no disposition to fix blame upon either party; nor indeed to declare that there is any occasion for blame in the case. If, as both parties profess, the furtherance of the gospel is the great end aimed at—and if, as each believes, its own methods and measures are best for itself—why not leave each to pursue its own course in peace, and allow the fruits of peace to mature themselves into formal fraternity or organic union, if at all, only normally, and without meddling manipulations? We are well satisfied that a closer formal union of the "two Methodisms" is not desirable for the promotion of the work of the gospel; and that, after taking away a little sentimentalism about "brotherly union," and suppressing a little worldly ambition for numerical greatness, there will appear very little to be said in its favor, and much against it. Seeing God in his providence has separated us from the one from the other, let, then, both sides abide their time in their present liberty.

On the recent overture to our General Conference, and the overture previously addressed to our Bishops, the doctor gives his views at considerable length.

The General Conference, at its last session, very properly defined the attitude of the church to any of the onlooking bodies of Methodists as favorable to union, if found practicable and desirable. It must be conceded, however, that a very large business has been done, by our Bishops and others, upon the capital afforded by that action. The action consisted at first of a resolution providing for "a commission to meet and confer with a similar commission of the Methodist Episcopal Zion Church, (concerning a union of the two bodies,) and report to the next General Conference." Afterward the same commission was authorized to treat in like manner with several other Methodist bodies; last of all the Church South was named, when, to simplify the whole business, a general resolution was passed, instead of the several specific ones, that "the commission be also empowered to treat with a similar commission from any other Methodist Church that may desire a like union." On the strength of this action the Bishops, first of all, and without waiting for the action of the commission, made their overture to the Southern Bishops at St. Louis, and were decidedly snubbed. But that movement was approved by some of our people as a good piece of strategy, whether so designed or not; and there is cause to believe that it was so regarded from the south side. The commission met for the first and only time in Philadelphia, November, 1869, and then provided for officially informing the various Methodist bodies of the action of the General Conference, and of the readiness of the commission to hear from them; and to give the more consideration to that act it was provided that the communication from the commission should be conveyed to those bodies by sub-committees. All this was in order, and the commission only used its proper discretion in adopting its methods of performing its duties. It is evident, however, that the business was magnified by the way of doing it; and that the same zeal which induced the Bishops to go about it, without waiting for the concurrence of their fellow-commissioners, afterward inspired the action of the commission. We do not especially object to the action taken, though it is not such as we should have chosen; and though our personal name is found among those appended to the note sent to the General Conference of the Church South, yet its appearance there indicates only our membership on the commission, and not our personal approval of all its details, whether of matter or manner. Believing that the union of the two chief Methodist bodies of the country is for the present, or near future, neither desirable nor practicable, and yet that it is desirable to avoid everything that might lead to unpleasant complications, we have all along deprecated the teasing importunities with which our Southern brethren have been pursued from our side. It is above all things desirable that a real peace and Christian fraternity should grow up between the two bodies; after that, and not before, the question of fraternization and union may properly be considered.

The Methodist holds the following language in reference to the mission of Bishop James and Dr. Harris:

The reception of our representatives was very cordial; it could hardly have been more so. We agree with one of our official journals that their treatment speaks well for the courtesy of the Southern General Conference, and shows an amelioration of the old asperities of feeling which have been the chief cause of repulsion between the two churches since the war. This obvious improvement renders more satisfactory the prospect of better relations, notwithstanding the present failure of our overture.

After noticing the grounds upon which our General Conference declared against union, and dissenting from them rather than refuting them, the editor of the Methodist concludes:

Upon the whole, we think the interview between the two churches quite satisfactory. None of us could expect, after late demonstrations, any more effective agreement between them. The time has evidently not yet come for complete reconciliation; it is, therefore, gratifying to find that at least good feeling, with the exchange of brotherly salutations, has prevailed. This fact opens the way for something better hereafter, especially as the actual decision of the Conference against reunion is founded on so indefinite a consideration. To most observers this objection will appear to be nothing but a lurking sentiment of the old Southern animosity—the sentiment that led to the separation of the States, with all its direful retributions. If such it be, so much the more manifestly is it destined to give way under the ameliorations of time and forbearance. And we should not forget that it is not an unnatural sentiment in the circumstances of the South. It would be quite contrary to all human experience for us to expect that the South should recover immediately from modes of feeling and thinking which had become traditional and inherent in its very temperament. On nothing, too, are we of the North more confident than that these local predispositions are fated to expire. No man in his senses expects slavery to be restored; and if slavery is dead the traditional ideas which depended upon it must as certainly die.

These dead, what possible reason of expediency can justify the isolated existence of Southern Methodism? But sentiments survive the events which produce them, though they survive only to die at last. Let us have patience, then. Let us reciprocate every expression of good feeling, and wait. The next generation, or at furthest, the next after that, will find both parties without an admissible pretext for disunion. They will then spontaneously coalesce. Thoughtful Southern men must certainly perceive this certainty. Northern men universally see it. The duty of the hour for both parties is to avoid every occasion of further repulsion, and, without more ado about reunion, move forward in their respective work—a work too common, in both design and method, not to tend continually to become common in all respects. Meanwhile we should proceed energetically with the consolidation of the other Methodist bodies which have no such obstacles to reunion. Let these fall into line, and move forward to common battle and common victories, and in due time the Southern host will bring up the rear, we trust, "with singing and shouting."

The Western Christian Advocate holds the following language in reference to the report of the committee of nine:

The report of the committee on the communication of our brethren, which was unanimously adopted, was courteously and yet adroitly worded. It rejects our overtures for the time being, and does it nicely. We shall enter no word of complaint against their interpretation of the resolution under which our commission was appointed. It would admit of their view, and if strict construction is to prevail in such matters, they had a right to deny the authority of our brethren to "treat with them for union." But our brethren did not claim that right. They went not for that purpose, but to suggest the appointment of a committee, that might communicate with our next General Conference. This committee will not probably be appointed.

The third resolution of this report will hereafter elicit attention and discussion, and in the discussion those who adopted it will find the laboring oar in their hands. They have placed themselves upon record as affirming the solemn judgment that the true interests of the church of Christ require and demand the maintenance of their separate and distinct organization. If they had given us the reason they would have enlightened us. Perhaps they will

yet tell us what particular interest of the church of Christ demands this. If they do—and if they know we hope they will—they will encourage their members and enlist the sympathy of all true Christians. The mere asseveration is not satisfactory. We want, and their people will want, the specifications and reasons. Let it be shown that any interest of our common Christianity will suffer by the unification of Methodism, and from that hour we will cease to urge it as a desirable consummation.

The last resolution also has a singular implication in it. They express their sincere desire that the time may soon come when, with a proper Christian sentiment, fraternal relations shall be established between the two bodies. Why not now? What is lacking that it should be postponed? What do they propose to do, to bring it about? The language implies that the time for fraternal relations is not yet; but they neither tell us what is in the way, nor how they propose to remove obstructions. Yet they desire it! We shall see how ardently they desire it after the excitement of this first diplomatic effort shall subside. In the meantime we shall possess our souls in patience, and do all we can to destroy the sectional prejudice that still lives in the South.

The Northwestern, published at Chicago, in a temperate and well considered article, nearly coincides with Dr. Curry. The first paragraph is significant. We quote, as much as our space will permit.

Such has been our history with the Church South, so deep their feeling at the rejection of their proposals for fraternity in 1848, that it becomes us to appoint a commission specifically to confer with them and to distinctly propose to them fraternity or union, or whatever else we may desire in the case. The initiative is evidently ours. We are glad that our Bishops and our commission have gone to the verge of their powers, and we are not sorry to have union delayed. We believe that while the vision tarries, it will not tarry, but that all delays lead toward a real union, while any present union must be merely formal.

We have faith also in the second reason of the Southern General Conference. The South is filled with men and women who are Methodists in doctrine and discipline, but whose intense interest in secession, not yet overcome, makes church union with us not altogether comfortable. It is not easy for the subdued party to be forgiving or loving. Clad by the disappointments and losses of the war, and snarling under its bitter bereavements, they have unreasonable prejudices. If union with us should be immediately pressed, they would secede from their church, and either fall entirely out of religious influences or betake themselves to a partial service in a church with which their tastes and opinions were not in harmony. Whole families might thus be alienated from religion, and a tide of irreligion and infidelity sweep over the best circles in the South that would be a calamity to the whole land and to the world. Our own people in the South are not entirely prepared for a hearty union with the men from whom so many of them lately divided, and with whom there have been collisions intenser than the Northern people have ever conceived. Union is manifest destiny, delay is manifest wisdom. Delay has its advantages with respect to the relation of the colored people to us. Northern sentiment tends to union with the colored people. Southern sentiment is yet impregnated with the spirit of caste, and seeks separation. Their separate Conferences of all kinds and distinct episcopacy for the emancipated race are but an exponent of the Southern heart. Our commission on union speaks for us. On occasion of a union, sectional antagonism on this point would at once spring into the General Conference like wild beasts into the arena, and the right thing to do would be difficult, if not impossible. God will overrule the delay for good. Let us wait and see.

The people of the South cannot but understand us now. There were reasons in 1848 for the action of the General Conference of our church that will justify it for all time. The two churches had divided on the question of slavery, and there could be but little fraternization where that distracting evil still existed. What forbade our remaining one church, forbade any sincere and hearty fraternity.

But the chief reason why no such fraternity could be accepted in 1848 was the great litigation pending at the time, before the United States Court, involving hundreds of thousands of dollars, and the title to counted lands and edifices. The step proposed by the Church South in sending us Dr. Pierce was one that would have seriously compromised our interests in the suits instituted against us by the Church South. The party instituting those

(Continued from third page.)

nection, made missionary speeches, and he could appeal to the Bishops to show that he ate no idle bread. He mentioned places where he had made speeches and collections. For the first time in his life he received a decent salary. In his traveling he had endeavored to save as much as possible. He had never run any machine of the church that didn't pay.

Dr. Schon rose and said: "I feel a great interest in the question now before the Conference. It is one of great and vital importance. Both boards being represented by able and efficient officers, I have forborne, until the present moment, to take any part in the discussion. I rise to sustain the substitute proposed by Dr. McFerrin."

"Frequent reference has been made to personal history, and various matters have been introduced by the speakers who have preceded me. It may not be improper for me to take the same course, and offer, in connection with the subject, some remarks of a historical and personal character."

"It will be remembered that, in 1844, the speaker represented the Ohio Conference in the General Conference of that year, which was held in the city of New York. I then and there, from the purest convictions of the right and justice of the cause, voted and acted with the South, and after the formation of the Methodist Episcopal Church South, united with that body."

"At the convention of delegates from the South, held in Louisville, Kentucky, the Southern Methodist Church was organized. At that time your speaker was invited to accept the office of secretary of the missionary society. This invitation was respectfully declined."

"In 1845 the Tennessee Conference elected your speaker a delegate to the General Conference held in Petersburg, Virginia, in May, 1846. This act of confidence and kindness on the part of the Tennessee Conference has ever been gratefully remembered by myself and my family. At that General Conference I was elected missionary secretary. For one week I held the office, and then respectfully resigned. A most worthy and able minister of Christ—now in heaven—was elected in my place."

"In 1850, by the General Conference held in the city of St. Louis, your speaker was again elected missionary secretary of the Methodist Episcopal Church South, and served the church in that office until his resignation in 1868."

"During the term of his office the annual collections were regularly increased from a small beginning until they reached, previous to the war, \$275,000. The whole machinery of the society was run at an expense not exceeding any one year, more than \$3,000. Your speaker visited the Annual Conferences as far as was practicable—faithfully transacted the business of the society at Washington, and visited frequently our Indian missions. We then had two hundred and fifty thousand colored people—members of our church; an independent Indian Mission Conference, with twenty-eight missions, twenty-eight missionaries and four thousand church members. We had some five missionaries in China, and our missionaries labored faithfully and successfully in that distant and important field. We had also some twenty-eight German missions with a bright prospect of success; and a vast field of domestic missions, which received the constant care of the church. During this time also our mission was established in California, and by the energy and faithful labors of the worthy men of God who cultivated that field, a Conference was formed, and soon took favorable rank and position with older sister Conferences. Your secretary, to the best of his ability, labored for the success of the great cause in which we were engaged. Our time, tears, prayers and labors were given to the work. Such was our history when the war came, and sad and mournful were the results. Our missions were broken up; preachers and people were alike scattered. From this great shock and overthrow we have been gradually recovering. The membership of the church remained firm and true, and everywhere the sublime spectacle was witnessed of a whole church rising superior to her misfortunes, and rallying again, as one man, for the defense of the truth and the support of the great principles of the gospel. All hearts are animated with the hope of success while we rejoice gratefully together in recognition of that good and kind Providence which has so wonderfully sustained and preserved us as a church."

The time was extended to allow Dr. Schon to finish his speech.

"It is most earnestly to be desired that at this Conference such measures alone may be adopted and faithfully pursued by the ministry and membership as will result in still greater blessings upon our beloved church."

"In regard to the question before us, as to the value or importance of

the office of missionary secretary, I have this to say: It is my decided and honest conviction that the office is absolutely necessary—indeed, that two are required, or one traveling and one recording secretary."

"It is true, in my long term of office, I never was favored with an assistant, yet the necessity then existed, and ever pressed me to a consciousness of this fact. Your secretary, in traveling throughout the bounds of the church, with his whole heart engaged in the work—with thoughts that breathe and words that burn—would and ever will arouse the whole church to action in behalf of the great cause of missions."

"It will be in the recollection of the worthy Bishop now presiding, (Bishop McFerrin,) and of our honored and worthy friend who has been so recently elected to the highest office in the gift of the church, that the secretary in New Orleans after one sermon received in a single donation, from one loved and worthy member of the church, a gift of \$10,000. He might speak in most flattering terms also of collections made in Louisville, Richmond, Mobile, Macon, Memphis, St. Louis, Nashville and many other places."

"Again, it is argued that the necessity of the office of the secretary may be met by the preachers themselves making the collections which are required. Why, sir, even now with the requirement of the Discipline that on the passage of the character at the Annual Conference the preachers shall be questioned as to their faithful performance of duty in having raised the required missionary collections, you, Mr. President, know in how many instances the sad and mournful response comes up from circuits and stations, of no report. In many instances the preacher himself gives from his own means a small amount to excuse the charge of neglect, which otherwise might be made."

"Again, sir, I am in favor of the substitute, because it relieves the Bishops of the burden of the management or control of the society. They should be only members of the office of the board."

"The board of directors or managers should be resident at the place of the location of the board. The more simple you make the machinery the safer and better the system."

"Mr. President, I am done, and before I take my seat I would say that all my aspirations, all my wishes, all my prayers are for the prosperity of the church. And I most earnestly hope that the best measures may be adopted to secure this end."

"I ask for myself no higher honor than to live and die in the service of the church, preaching salvation to my dying fellow-men. And when gathered to my rest, I ask no monument of stone or brass, but would far rather, when my family and loved ones shall gather at my grave to indulge their tears and sorrows, that some lone son of the forest, or some son of Ham, or some stranger from our distant field of missions, shall kindly draw near, and in sorrow mingle his tears with theirs, and say, 'He was my friend.'"

On motion of Dr. J. E. Evans it was ordered that when we adjourn, we adjourn to meet at half-past three o'clock this afternoon."

E. H. Myers said: "The matters before us are of grave import, and should be discussed and settled on their own merits, and with a view to the distant future, rather than as affecting only the present condition of things, or as in any degree involved with the fortunes or relations of any brother, however honored and beloved. On this principle I propose to offer a few remarks on this subject."

"The real question is not 'What might be best in a prosperous church, rich in monetary resources,' but is, 'Can we reduce the expense of making missionary collections and still keep up an active organization?'"

"It is proposed to do this by having only one secretary—his business to be that of a journalizing and corresponding secretary—doing all the work heretofore devolved on the missionary secretary, except of traveling from Conference to Conference, and at large in the intervals of Conferences."

"Let us see how a new adjustment of our missionary work may be made with this reduction of its working force."

"1. The secretary of the domestic board has done his work principally by visiting the Conferences, making addresses on missionary subjects, and stimulating collections. This work, however, is done by others in Conferences he does not visit, and it is doubtful whether the collections made through his agency are so much greater than they would be without his aid as to justify the expense of a salaried officer for this purpose. Devolve this duty on the Bishops, and they will do the work as well, without expense. As to his visits here and there, in the intervals of Conferences, to aid parties in making missionary collections, it may help them, but still it is their duty to do the work; and

it results only in harm when the duties of pastors are transferred to other agencies. This general principle should pervade all the action of the General Conference. As well appoint an agent to help pastors collect the Bishops' fund as one to help pastors raise missionary money. Let the pastors do both. We do not, then, want a secretary to visit the Conferences."

"2. The same arguments hold good against a secretary for the Board of Foreign Missions, under the constitution now offered by the Committee on Missions."

"When, as heretofore, there was no binding rule whereby the Conferences were made to collect money for foreign missions, a secretary may have been needed to push our missionary interests in this direction. But you provide in this constitution that the Annual Conferences shall pay one-third of their collections to the general board, and this insures a fund for foreign missions and for domestic missions, in weak Conferences, with no more apparatus or expense than that needed for collecting domestic missionary money, and just as surely; for if any money must be collected for home work, half as much must go to work away from home."

"Thus the collecting may be done without a traveling secretary, either domestic or foreign."

"3. But a secretary is needed. Yet with the exception of the little done in business intercourse with the United States government on behalf of the Indians, if the thirty Conferences are not to be visited, it is all office work, and the office work of both the former secretaries must be done. But it may be done by an office man who has other work, and therefore it can be done at less expense than the full pay of a first class official. He may be a General Conference officer, editor, agent or some available brother permanently resident at a convenient point for the transaction of the office missionary business, whose salary shall accrue partly from his other work, partly from the missionary fund."

"This same place may be fixed as the domicile of the board. The treasurer, too, and a majority of the ten directors proposed, may reside at the same place, and here the board may be incorporated. Here, too, the meetings may be held, whenever necessary, in the intervals of the annual meetings, on the call of the nearest resident Bishop—who shall be charged with the presidency of this standing committee of the board—for such it may properly be considered."

"The annual session may be held wherever the Bishops meet annually, and they, with the secretary and treasurer—whose presence may be necessary—will more than form the quorum required by the constitution before us. The other managers are but ten. Their presence, however desirable at the annual meetings, is not absolutely necessary; and if they go, the expense is small, and sinks into insignificance before the expense of keeping up two perpetual secretariats."

"Two things are needed is provided for, without an expense exceeding \$1,000 or \$1,500 a year, for all our collecting apparatus for missions."

"But there is one branch of our missionary work which has not been looked to in all this report from the Committee on Missions. It must be looked to—the missionary debt. For this, rather than for foreign missionary collections, was an eloquent minister selected last year by the board—and I take pleasure in recognizing his great service in that field. And I conceive that we need his service here still for a short time. And more, I think we need to strengthen our forces in that field till that debt is paid, and I imagine that I can suggest a method of collecting the funds before another twelve months passes. If the policy indicated in my remarks be adopted, I should then propose a resolution that Dr. McFerrin and Munsey be continued in the field, till the next sessions of their respective Conferences, as agents of this body, under the direction of the Mission Board, for the purpose of collecting funds to pay the mission debt; and whatever part of it may then remain unpaid shall be provided for by the Mission Board."

The time was extended to allow Dr. E. H. Myers to finish his speech.

"Put all these provisions together, and I think you will find a plan of operations proposed, which is cheap, effective, puts the Bishops and pastors into proper relation to the missionary work, and will happily compromise all differences now dividing the General Conference."

Dr. Green said he did not think the work at present justified us in paying three or four thousand dollars for a secretary who would have so little to do. The secretary proper, according to the old regime, was expected to overlook the whole work, appear on great occasions, and see to the machinery generally. The residue of the work fell to the corresponding secretary. At present there was little use for but one.

Dr. Moran concurred with Dr. Green. He did not feel like asking for subscriptions to the support of missions while so much was expended in carrying on the operations of the board.

Dr. Bennett thought the Bishops might do the work of making appeals as well as a missionary secretary. By the present system we were educating our people falsely. The exhibitions on these occasions are sometimes absolutely ridiculous. Other churches make their missionary collections by a steady, silent, though powerful movement. He thought it far better to train our people to a regular system than to carry on this work by spasmodic efforts. He thought it was an improper use of widow's mites to make such useless expenditures."

P. A. Peterson called for the previous question. The call was sustained, and the amendment of J. S. Key was adopted."

The amendment of J. B. McFerrin, thus amended, was then adopted. The time of adjournment was extended to finish action on this report."

Articles 2, 3 and 4 were set aside, being substituted by the amendment of J. B. McFerrin."

Article 5 was read, and on motion of J. S. Key was amended by striking out the words "it being understood that they shall not receive more than is allowed by the Discipline to other superannuated ministers, widows, and orphans." It was then adopted as thus amended."

Articles 6 and 7 were then adopted. Article 8 was read, and a motion of J. S. Key to amend by striking out the words "by the secretaries," and inserting "by such agents as the board may order," did not prevail. The article was then adopted."

Article 9 was read, and pending its consideration Conference adjourned with the doxology and benediction by the Bishop."

AFTERNOON SESSION.
Conference met according to adjournment. Bishop McFerrin in the chair.

Divine service was conducted by M. R. Jones.

Minutes were read and approved. Bishop Paine took the chair and called for reports. No response.

The following resolutions were then offered, read and adopted:

Resolved, That the Bishops be authorized to organize a Conference, or Conferences anywhere in the United States not already occupied by an Annual Conference of our church, at any time during the next four years; when, in their judgment, it is expedient to do so.

A. L. P. GREEN.
L. PIERCE.
J. B. McFERRIN.

Resolved, That the book agent be authorized, in publishing the report of the Board of Foreign Missions, to omit such portions as have been inclosed in brackets by the Committee on Missions.

A. L. P. GREEN.
A. W. WILSON.

WHEREAS, We regard our Bishops as sustaining the relation of chief pastors to the ministry; and

WHEREAS, We believe our annual examinations might be rendered more useful to the ministry, and, through them, to the whole church; therefore,

Resolved, That we most respectfully but earnestly recommend to our Bishops that, hereafter, they so conduct those examinations, in all the Conferences, in respect to all the pastors, old and young, whether they hold class meetings, and to what extent and in what manner they have performed their pastoral duties, thereby to stir up our pure minds by way of remembrance, and obtain valuable information.

ANDREW MONROE.
W. M. RUSH.

The subject on which Conference adjourned this morning, being article 9 of the constitution proposed in Report No. 1 of the Committee on Missions, was taken up.

P. A. Peterson moved to amend by substituting the following for the article as reported:

Article 9. The secretary shall reside at the place where the board is located, but may be a member of any Annual Conference.

It shall be the duty of the secretary to journalize the proceedings of the board; to conduct its correspondence; to give information to the missionaries; to publish in the church papers an abstract of the proceedings of the board; to attend to all business which the board may have with the government of the United States; to prepare the annual report of the board; and as far as these duties may permit, to visit the Annual Conferences and the missions under the care of the board, with a view to promote the interests of the missionary cause, and the board may employ such clerical assistance as may be necessary.

The salary of the secretary shall be fixed by the board.

W. H. Potter moved to amend the amendment by striking out the clause "and as far as," down to "cause." This motion was lost.

Dr. Edwards said the sole object seemed to be to reduce expenses,

which, if carried to excess, would paralyze the machinery.

Dr. Winfield was greatly in favor of having the secretary to travel about through the country and fire the hearts of the people for the cause.

Dr. Key thought the people ought to be educated to systematic contribution. They should fill their obligations and not wait for the galvanism of speeches.

Dr. Boring thought that the present tendency of the discussion looked to the perpetration of dangerous mistakes.

N. F. Reid moved to strike out the words, "and the board may employ such clerical assistance as may be necessary." This motion was lost, and the article as amended was adopted.

Article 10 was read, and T. J. McCoy moved the following substitute:

"The treasurer shall hold all the funds of the board, and shall execute such bond as the board may deem satisfactory for the faithful performance of his duties; shall keep all funds in safe deposit, subject to his drafts as such, and to those of his successors in office. He shall furnish an annual report, to be published with the annual report of the secretary."

T. J. McCoy hoped that they would not be less careful of the money of the church than men were in business. It was nothing but just that they should require security, and past experience had taught them a lesson which he hoped they would not forget.

Dr. Moran said that security should be demanded. The people make this inquiry, and were not willing to contribute until they felt assured that their money would reach its destination.

D'Arcy Paul said that he was at the head of a banking institution, and they never would have a cashier without sufficient security. Methodist preachers are but men, and they sometimes fall from grace. He would require the signature of the president and vice president to every check, and would also require his affairs to be subjected to examination by two of the board at any time.

Governor Polk suggested that the treasurer receives no salary, and therefore could not be expected to give security.

D'Arcy Paul said that that altered the case entirely.

J. P. Ralls thought there was no analogy between this and business affairs.

C. F. Harvey thought it very unreasonable to demand security.

E. E. Wiley called the previous question; the call was sustained and the substitute was lost. Article 10 was then adopted.

A motion to adjourn, by J. B. McFerrin, was lost.

Article 11 was adopted.

Article 12 was read, and on motion of J. B. McFerrin "five" was stricken out and "seven" inserted. The article as thus amended was adopted.

Article 13 was read, and N. F. Reid moved to amend by striking out "all" and inserting "one-third of." Pending the action, N. F. Reid having the floor, Conference adjourned with the doxology and benediction by the Bishop.

BROOKS' IMPROVED PATENT

WROUGHT IRON REVOLVING

COTTON SCREW PRESS.

Patented by R. M. Brooks, of Georgia, April 14, 1868.

It took the first premium at the Louisiana State Fair, at New Orleans, April, 1869, over eleven competitors; also at the Tennessee State Fair, at Memphis; and more recently at the Mississippi State Fair, at Jackson; and again at the recent State Agricultural Fair, at New Orleans, April, 1870, in a contest with fourteen Cotton Presses, embracing the most approved patterns from different States of the Union, North and South.

The following is the certificate of some of the principal cotton factors and merchants at New Orleans. In our circulars can be seen the certificates of practical planters and settlors, and the testimonials from several Southern States in regard to the admirable principle and practical working of this Press.

We, the undersigned, purchased last season, from Messrs. J. B. Jennings & Co., the Brooks' Revolving Cotton Screw Press for our customers; and so far as we heard from, they have given entire satisfaction.

Moses Greenwood & Son, Warren, Craven & Co., Wadsworth, Wm. McDaniel & Co., Franklin & Daniel, Campbell & Strong, Clump Bros. & Co., E. F. Gelsom & Co., W. H. Wright, Black & Co., Block Bros., Wright, Allen & Co.

Circulars, giving cuts, with full description, price list, etc., sent by mail on application to J. B. JENNINGS & CO., Proprietors, 14 Union Street, New Orleans.

GEORGE B. HOLZACH'S

PATENTED IMPROVED

MOVABLE WINDOW SHADE.

This improvement relates to a new and simple manner of so arranging window shades that light and air can be admitted into the room through the upper part of the window without raising any portion of the shade; and when the window is furnished with the combined screens its usefulness and comfort in warm weather, when a good current of fresh air is so welcome, cannot be surpassed.

Parlors, dining rooms and bed rooms, the latter especially in time of sickness, are thus improved, combination thoroughly ventilated and lighted at pleasure, without the slightest inconvenience to the sleeper or patient, or exposure to the passers-by.

It can be attached to any window with but little alteration and at moderate expense. Orders solicited and promptly attended to. State Rights for sale by

GEORGE B. HOLZACH,
Inventor and Patentee,
Jel 2m 61 Camp Street, New Orleans.

MUSICAL INSTRUMENTS.

PHILIP WEHLEN,

NOS. 80 AND 82 BARONNE STREET,

NEW ORLEANS,

Southern Depot of the celebrated and renowned

PIANOS: ORGANS:

Marschall & Miltner's, Needham & Son's,

Dunham & Son's, Special Gold Medal for

and Church, School, Lodge

J. P. Hale's, and Parlor,

which are fully equal to any in the world.

MUSICAL MERCHANDISE

OF EVERY DESCRIPTION.

PIANOS TUNED, REPAIRED, RENTED,

EXCHANGED, STORED AND SHIPPED.

I desire to call your attention to the fact that I am conducting my business on the most economical principles as regards store rents and expenses, and am enabled to sell Pianos and Organs at from ten to twenty per cent. under current rates, and at bargains. My large stock cheerfully shown to visitors, and orders promptly filled.

J. P. HALE'S

GREAT PIANO FORTÉ COMPANY.

Chartered January, 1866.

We are now prepared at our NEW FACTORY, corner of Tenth and Third Streets, to turn out fifty Pianos per week. These Pianos are made of the best materials, and are pronounced by the best judges to be the most powerful Square Piano that has ever been brought before the public. There is no Piano made that will stand in time like them.

PRICES.

No. 3—Plain style \$425

No. 3½—Peterson's front Round Corners, 450

No. 4—Peterson's front Round Corners, 450

No. 5—Octave, four Round Corners, 500

No. 6—Octave, four large Round Corners, 600

This Company, believing that the public want demands

A GOOD SUBSTANTIAL

SEVEN OCTAVE PIANO FORTÉ

embracing all the modern improvements, such as a Rosewood Case, French Grand Action, Harp Pedal, full Iron Frame, Overstrung Bass, etc., at

PRICES WITHIN THE MEANS OF ALL.

now offer such an instrument at a price lower than any other reliable manufacturer. These Pianos are made of the best materials, with great care, and by the most skillful workmen, selected from the best factories in this and the old country, and fully warranted to stand in any climate, and to give as good satisfaction as any Piano sold for \$1,000.

Our terms are NET CASH in New York; for by adopting such terms we are enabled to sell at low prices.

We want Five Hundred Agents and Teachers to introduce these splendid new instruments in all parts of the Southern States. All orders must be sent direct to

THE ONLY TRUE AND PERFECT HAIR

COLLOID.

The Mystery, or Turner's Hair Tint.

A harmless, beautiful and permanent Hair Dye, in one preparation!

It is the only preparation ever invented where the shade can be controlled at the will of the operator, and at the same time easy of application. It is now used in the principal Hair Dressing Saloons of New Orleans, and all over the South. A sample box will be sent, and a full description, on receipt of price, \$1, by JAMES TURNER & CO., Chemists and Druggists, No. 20 Camp Street, under City Hotel, New Orleans.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD

NOW IN USE.

THE FASHION.

We call special attention to this Stove, which has been produced at great expense, combining all the new and important improvements; also to the extra height of the Oven under the fire chamber, the Patent Air-Flue, Front Doors, and Patent White Enamel, and the improvements in all which have been covered by Letters Patent, and are used in no other Stove. They are warranted to stand fire, or other heat, free of charge in all cases. We have all sizes of this celebrated Stove, both

PLAIN AND EXTENDED BACKS.

The Extended Back with cast iron Enamel, Reservoir and Fan, The Warming Closet, Girdler Cover, etc. The part of the top supporting the Reservoir is raised so that the fire is above the top plate, instead of below, as in the case of the Stoves now used, and the whole surface of the bottom of the Reservoir, the Reservoir, being detached from the pipe, can be removed at pleasure, thereby forming a safe stove—the best in use, as the back holes will heat as well or better than the middle ones. For sale by
 G. W. W. GOODWIN,
 62 Camp Street.

ALSO, THE MOST

Complete and Perfect Cooking Stove
 FOR BURNING COAL OR COKE
 ever invented, in the estimation of all who have seen it. Patented in 1869.

THE MONITOR.

It can be seen at 62 Camp Street. The advantages possessed by this Stove over all the other Coal Cooking Stoves are so numerous, and so patent to every sensible observer, that it is only necessary to examine it in order to be convinced of its superiority.
 All of the above Stoves are fitted with extra care, Oven Doors lined with tin, and furnished with William Ross's Patent Air Chamber, sliding front doors, patent centres, covers and White Enamel Knobs.
 The operation of every Stove guaranteed. Directions for putting up and using same accompany each Stove.
 G. W. W. GOODWIN,
 62 Camp Street,
 Sole Agent for States of La. and Texas.

STOVES, GRATES AND HOUSE FURNISHING GOODS.

The undersigned would call the attention of city and country buyers of Cooking Stoves to the following list of Stoves manufactured by Mr. M. L. Filly.

The Philanthropist.
 A first class Cooking stove, having all the latest improvements that have been invented. Has a new arrangement for boiling; also an Ash-pail. The casting is heavier than any Stove sold in this market. Sold under a full guarantee in every respect.

The Diamond Rock.

A Stove well known in this market. Thousands of this Stove are in constant use throughout the country. It is a very good recommendation. Sold under a full guarantee.

Besides the above named Stoves, I have on hand the celebrated Cotton Plant, Chatter Box, Trip Kettles, Mould of Orleans, Queen of the South, Bell and others, all of which I offer at a low price.

J. H. CAMPAN,
 134 Poydras St., New Orleans.

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS.

PUBLISHED BY

CHARLES SCRIBNER & COMPANY,
 654 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.

"Incomparably superior to anything published."

Introduction to the Study of Geography. Elementary Geography.

Intermediate Geography. Common School Geography.

Guyot's System is approved and indorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenney, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that over MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering thousands of schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Guyot's series has been a new and better era in the presentation of geographical science, that by it the pupils of this generation will obtain a clearer, more definite and enlarged knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

MEDICINE—MEDICINE.

KOSKOO.....KOSKOO.

THE GREAT REPUTATION

which Koskoo has attained in all parts of the country

AS A GREAT AND GOOD MEDICINE.

AND THE LARGE NUMBERS OF TESTIMONIALS

which are constantly being received from physicians, and persons who have been cured by its use, is conclusive proof of its remarkable value.

As a Blood Purifier it has no Equal.

BEING POSITIVELY

THE MOST POWERFUL VEGETABLE ALTERATIVE YET DISCOVERED.

DISEASES OF THE BLOOD.

"The life of the flesh is in the blood," is a Scriptural maxim that science proves to be true. The people talk of bad blood as the cause of many diseases, and like many popular opinions this of bad blood is founded in truth.

The symptoms of bad blood are usually quite plain. Bad Digestion causes imperfect nutrition, and consequently the circulation is feeble, the soft tissues lose their tone and elasticity, and the tongue becomes pale, broad, and frequently covered with a pasty, white coat. This condition soon shows itself in roughness of the skin, then in eruptions and ulcerative diseases, and when long continued results in serious lesions of the brain, Liver, Lungs or Urinary apparatus. Much, very much, suffering is caused by impure blood. It is estimated by some that one-fifth of the human family are affected with Scrofula in some form.

When the Blood is pure you are not so liable to any disease. Many impurities of the Blood arise from impure diseases of large cities. Eradicate every impurity from the fountain of life, and good spirits, fair skin and vital strength will return to you.

KOSKOO AS A LIVER INVIGORATOR

STANDS UNRIVALLED.

BEING THE ONLY KNOWN MEDICINE

that efficiently stimulates and corrects the hepatic secretions and functional elements of the Liver, without debilitating the system. While it acts freely upon the Liver, instead of copious purging it gradually changes the discharges to a perfectly natural state.

SYMPTOMS OF LIVER COMPLAINT AND OF SOME OF THOSE DISEASES PRODUCED BY IT.

A sallow or yellow color of the skin, or yellow-brown spots on the face and other parts of the body; dullness and drowsiness, sometimes headache; bitter or bad taste in the mouth; internal heat; in many cases a dry, teasing cough; uneasiness of the stomach; sour stomach, with a raising of the food; a bloated or full feeling about the stomach and sides; aggravating pains in the sides, back or breast; and about the shoulders; constipation of the bowels; piles, distention, coldness of the extremities, etc.

KOSKOO!

is a remedy of wonderful efficacy in the cure of diseases of the Kidneys and Bladder. In these affections it is as near a specific as any remedy can be. It does its work kindly, silently and surely. The relief which it affords is both certain and perceptible.

DISEASES OF THE KIDNEYS AND BLADDER.

Persons unacquainted with the structure and functions of the Kidneys cannot estimate the importance of their healthy action.

Regular and sufficient action of the Kidneys is as important, nay, even more so, than regularity of the bowels. The Kidneys remove from the blood those effete matters which, if permitted to remain, would speedily destroy life. A total suspension of the urinary discharges will occasion death in from thirty-six to forty-eight hours.

When the Urine is voided in small quantities at the time, or when there is a disposition to Urinate more frequently than natural, or when the Urine is high-colored or seddled, with weakness in the small of the back, it should not be trifled with or delayed, but Koskoo should be taken at once to remedy the difficulty before a lesion of the organs takes place. Most of the diseases of the Bladder originate from those of the Kidneys; the Urine being imperfectly secreted in the Kidneys, proves irritating to the Bladder and Urinary passages. When we recollect that medicine never reaches the Kidneys except through the general circulation of the Blood, we see how necessary it is to keep the Fountain of Life pure.

KOSKOO

Meets with great success in the cure of

DISEASES OF THE NERVOUS SYSTEM.

Almost nine-tenths of our people suffer from nervous exhaustion, and are, therefore, liable to its concomitant evils of mental depression, confused ideas, softening of the brain, insanity, and complete breaking down of the general health. Thousands are suffering to-day with broken-down nervous systems, and, unfortunately, tobacco, alcohol, late hours, over-work, (mental and physical), are causing diseases of the nervous system to increase at a fearful rate.

The symptoms to which diseases of the nervous system give rise may be stated as follows: A dull, heavy feeling in the head; sometimes more or less severe pain or headache; periodical headache; dizziness, noises or ringing in the head; confusion of ideas; temporary loss of memory; derangement of sleep; starting during sleep; bad dreams; hesitation in answering questions; dullness of hearing; twitching of the face and arms, etc., which, if not promptly treated, lead to Paralysis, Delirium, Insanity, Impotency, Apoplexy, etc., etc.

KOSKOO

is not a secret quack remedy. Formulas around each bottle, recommended by the best Physicians, eminent Divines, Editors, Druggists, Merchants, etc. Tho

NEW ORLEANS MARKETS.

From the N. O. Price Current.

The general market has shown increased dullness since our last issue. In some branches of the wholesale trade we still notice a moderate business in filling orders, and in sales to country merchants and the local trade, but the movement has been on a very limited scale. Sugar has been in fair demand and sold at steady prices, and the sales of molasses have been confined to trifling lots, at previous rates. Corn and oats have been in better supply, and sold at rather lower rates, but most other articles of Western produce have been inanimate at previous quotations.

Our accounts from the country are more encouraging. Timely rains have repaired the injury suffered from the previous drought. Cotton is somewhat behind hand, but we hear no complaints of sugar, which promises a material increase over last year's yield. The crop, nevertheless, may be materially curtailed by unpropitious weather later in the season, or by the scarcity of labor for the requisite cultivation at the proper period. This remark applies even more forcibly to cotton than to cane, and it is yet quite too early for reasonable persons to estimate any considerable excess over last year's product.

The river is four feet nine inches below high water mark.

CORRIGENDUM.—The following are the arrivals since the third instant:

Louisiana and Mississippi bales	3908
Lake	5
Mobile	536
Florida	2
Texas	70
Total	4521

On Saturday the demand was slack throughout the day, and, as buyers would not go on unless at easier prices, factors were compelled to make some concessions, but, refusing to give way to the extent demanded, the sales were confined to 1,100 bales, and the closing rates showed a pretty general reduction of $\frac{1}{16}$ ¢. On Monday, there being no market at Liverpool, and the accounts from New York reporting a decline of $\frac{1}{16}$ ¢, which was subsequently followed by a further falling off to the same extent, and gold and foreign exchange ruling decidedly lower, buyers claimed further concessions of $\frac{1}{16}$ ¢, and the business summed up 3,200 bales. On Tuesday the market opened with a moderate demand, the movement being checked by there being no reports from Liverpool, and foreign exchange showing a continued downward tendency, but as factors evinced more anxiety to realize, several buyers came forward and took 1,900 bales at still easier prices, good ordinary selling down to 10c, and strict at 19 $\frac{1}{2}$ ¢ to 19 $\frac{3}{4}$ ¢, low middling as low as 20c, but mostly at 20 $\frac{1}{2}$ ¢ to 20 $\frac{3}{4}$ ¢, and strict middling at 21 $\frac{1}{2}$ ¢ to 21 $\frac{3}{4}$ ¢.

This makes an aggregate for the past three days of 6,200 bales. The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 1,102,854 bales, against 787,519 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 746,345 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 370,901 bales to Great Britain, of 106,610 to France, and of 112,249 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	18 $\frac{1}{2}$ to 19
Good ordinary	19 to 19 $\frac{1}{2}$
Low middling	20 to 20 $\frac{1}{2}$
Middling	21 to 21 $\frac{1}{2}$
Strict middling	21 $\frac{1}{2}$ to 21 $\frac{3}{4}$

COTTON STATEMENT.

MANSFIELD FEMALE COLLEGE.

COMMENCEMENT OF 1870.—The exam-

ination of the different classes will com-

mence on Thursday, June 23. The an-

nual sermon will be preached on Sun-

day, the twenty-sixth, by the Rev. John

Wilkinson, of the Louisiana Confer-

ence. On Wednesday, June 29, com-

mencement day, the annual address

will be delivered by Major James S.

Ashton, of Shreveport. There will be

the usual concerts of music.

CHAS. B. STUART, President.

NOTICE.

To the Preachers in charge of the Cir-

cuits and Missions in the Lafayette Dis-

trict, Montgomery Conference.—DEAR

BRETHREN: Please send me, as soon as

possible, the number of official mem-

bers that will be likely to attend the

District Meeting to be held at Line-

ville, commencing on Wednesday night

before the third Sunday in July, so that

I can make arrangements for their ac-

commodation during their stay at Line-

ville. Address me at Lineville, Clay

county, Alabama. G. J. MASON.

CAMP MEETING.

A camp meeting will be held at Lin-

wood, DeKalb circuit, Macon district,

Mobile Conference, commencing on

Thursday night before the fourth Sun-

day in September.

To the preachers: Come, come, come

and help us! J. M. Gann, S. H. Cox,

W. I. Powers and A. J. Coleman will

please be sure to come.

The grounds will be greatly improv-

ed and enlarged.

U. L. THOMPSON, P. C.

LAFAYETTE DISTRICT MEETING.

The District Meeting for the Lafay-

ette district, Montgomery Conference,

will be held at Lineville, Alabama, com-

mencing on Thursday, July 14. All

the members are requested to attend

punctually. We hope to be favored

with the presence of one of our Bishops.

F. L. B. SHAYER, P. E.

Wesleyan Female Institute, Staunton,

Virginia.

The commencement exercises of the

Wesleyan Female Institute, Staunton,

Virginia, will occur as follows:

SUNDAY, JUNE 19, 11 A. M.—Commence-

ment sermon by Bishop E. M. Marvin, D. D.,

of St. Louis, Missouri.

MONDAY, JUNE 20, 8 P. M.—Address before

the Lee and Jackson Literary Society, by

Rev. J. A. Proctor, of Richmond, Virginia.

TUESDAY, JUNE 21, 11 A. M.—Address before

the Young Ladies' Christian Association,

by Rev. Samuel Rogers, of Baltimore.

WEDNESDAY, JUNE 22, 8 P. M.—Annual

meeting of the board of trustees, by call of

Rev. E. F. Bussey, president of the board.

THURSDAY, JUNE 23, 8 P. M.—Commence-

ment exercises.

ORDER OF EXERCISES.

1. Prayer. 2. Reading report of the visit-

ors. 3. Salutatory essay by Miss Sue H. Fran-

cis, of Alabama. 4. Conferring distinctions.

PRUSSIAN CORRESPONDENCE.

GERMANY, APRIL 13, 1870.

MR. EDITOR: Perhaps some reminiscences of delightful Dresden might be agreeable to your readers this week. It is the Florence of Germany, and the country round it forms the Saxon Switzerland. It would be impossible even for luxurious Italy to gather into one charming spot greater attractions for literary idlers. Every chance stroll along its ancient streets acquires a unique value from the numberless objects of interest to be seen—traces of a dim antiquity, old churches, palaces, promenades, old curiosity shops, where the twilight loves to dwell, and with all sorts of wonderful things, antique china, rare books, porcelain monsters, medallions, music of the sixteenth and seventeenth centuries, articles of obsolete fashions, and, strangest of all, the withered antiquarian himself fumbling about among his moldering collections, and irresistibly recalling quaint Parnoculus and the seekers after the philosopher's stone; for the passion which clouded the intellects of the alchemists and the gentle lunacy of the antiquary are akin. The labyrinth of streets, too, as in all cities on the continent, affords a world of perplexed enjoyment. For, though your traveling Thesens were the very genius of locality itself, it is to one that he would wander about in helpless bewilderment among the maze of tangled buildings, crumbling masonry, dilapidated tenements and grimy alleys, whose sole purpose seems to be to prove all possible angles and try all possible tempers. The Dutch Ariadne, too—though you do sometimes see an ethereal creature with the sunny hair Carreggio loved to paint—are not the most gracious and amiable in the world. The guides cluster around the great hotels and about the populous thoroughfares, and it is not seldom that a stranger, who has sauntered unintentionally far, finds great difficulty in identifying and regaining his lodgings.

How delightful it is to enter one of those superb shops, like that in Prager strasse, where the most exquisite Italian bronzes, statuary not like a dream of Zeus, but full of delicate grace, Bohemian agate, all elegance and richness and fragility, costly inlaid woods, beautiful engravings, and everything to delight a cultivated virtuoso, are lying about in tempting profusion on heaped-up comports; or to go, by chance, into the Winter Garden, with its wondrous wealth of flowers, camellias as plentiful as peach blossoms in early summer, masses of gorgeous hyacinths and other blooming plants perfuming the air with their fragrance, and chasing away every recollection of winter; or on the terrace overlooking the broad and brimming Elbe, with its lovely view toward the mountains and their fruitful vineyards, over the Elbe bridge, with its throngs of vehicles and foot passengers, and over the modern New Stadt, with its bright colored buildings, long ranks of peplars, and semi-circle of lights reflecting so brilliantly in the river by night. At the latter end of the Elbe Brücke stands the cathedral, a quaint old building, full of fine paintings, with each its altar, silver candlesticks and crucifix. In the distance, withdrawn into the twilight vista of huge pillars, glimmers the main altar with its invaluable riches. Above are the gilded loges for the royal family, who, you know, are Catholics, though Saxony itself is passionately Protestant. The king's choir is renowned for its completeness, talents and the beauty of the voices; it is composed of the finest opera singers, and is musical as a nest of nightingales. I was fortunately in Dresden during Christmas week, and went to high mass in the cathedral on Christmas day.

The music was an exquisite selection from the sacred oratorios. It was as delightful as if sung by a choir of seraphs, and not by sinning, passion-stained, quarrelsome, sensual artists. Rachel was a glutton, remember, and a celebrated Italian actress was prouder of her dancing than of her splendid tragic impersonations; so I did not quarrel with what lay beneath the voices, but gave myself up wholly to their luxuriant and eloquent beauty. The adoring multitude, the clouds of aromatic incense, the startling clang of drum, cymbal and horn, the ripple of the honey-toned flutes and violins, the priests officiating in their scarlet and gold canonicals, and the golden light of the innumerable waxen tapers on the far-off altar, formed a picture as impressive as it was peculiarly Romish. It is the only Catholic church in Dresden, and, of course, all the pomp of this imperial superstition is brought to bear in one focus on the minds of the people. Foreigners frequent it as they used to frequent the opera, the ruins of which lie behind the cathedral. It is easy to be believed that the people, so devoted are they to music, and so susceptible to the fine impressions of the drama, would have preferred the destruction of the house of God to the loss of this classic theater, where, in former years, Madame Schroder Devrient had performed her memorable rôle of Juliet, Phaedra and Medea. At all events they wept over its ruins, and are to-day, in all probability, clamorous for its restoration. Every evening there are delicious concerts by the royal bands, in summer in the great gardens, in winter in the salons of the hotels, admittance to which is extremely cheap, and accessible to all. Indeed, the cheapness of amusements in Dresden is one of its pleasantest and most remarkable characteristics. Although the English ambassador complains that living there is dreadfully high, chiefly, indeed, on account of the Americans who flock thither and increase the prices, it must be confessed that one can hear the choicest classical music, and see all that is worth seeing, at noteworthily little expense. Of course if you dine at the Hotel de Saxe, keep elegant equipages, and go banqueting among the noble families, as it is likely the representatives of the Court of St. James do, your sojourn in Saxony becomes a scene of extravagance. But picnics and evening parties on the Elbe, enchanting drives through the parks and grounds, terraced vineyards and landscape gardens of the suburbs, evenings at the incomparable piano concerts of Rubenstein and Tausig, the one so glowing, soulful, the other so cold, inflexible, and nights in quiet, clean, comfortable lodgings, far from that hideous hotel life—all these are things which the humblest tourist can command. Those who come to see the mighty things which men have done, and not to ingratiate themselves with hotel keepers, find the pure enjoyment which true tourists can have the world over.

Bayard Taylor was such a tourist—genial, pootie, imaginative, easily accommodated, and resolved to see the precious life of European nations at their own firesides; the center of all real, fructifying, national light. It is, perhaps, better never to see Europe than to attempt to squeeze London, Paris, Vienna, Rome and the cantons of Switzerland into a summer tour.

A ramble through the great gallery of Dresden is certainly one of the most delightful treats imaginable. It is like associating with the highest of the earth, and yet an association far sweeter than the spoken words of human intercourse. From the moment you enter the splendid succession of rooms, from the quaint

and yet wonderfully lovely, madonna of Halbein away down into the glorious presence of the Madonna del Sisto, you feel yourself in a rarer and far richer atmosphere than, perhaps, you had ever before breathed. The walls of over fifty rooms are literally covered with the creations that have transformed art into a glowing idolatry—bits of Elysian landscape, groups of heavenly forms, scenes of mysticism, of burning eras, of laughing and shadowy grace, of wit and jolly carousal—everything from the charming old drunkards and tipplers of Feniers, Van Ostade and Ryckaert, to the quiet crystal waters of Ruysdael, and that delicious Claude looking over the sea into the glorified distance. Those dark, noble, intellectual Rembrandts, how they pleased me, and how shall I do even Velasquez, Van Dyk and Rubens appear beside them! Of Guericino I remember noticing that there was moonlight and not sunlight in his pictures, portraits and all—pale, white, spiritual radiance, as if painted at night by the light of an alabaster lamp. I got lost in the wilderness of Flemish painters, among the windmills, fruits and flowers, browsing cattle, pink and lilac skies, and inexhaustible farm yards. Such tiny stretches of canvas they are, and yet such miracles of microscopic talent, coloring, truth and commonplace. Goethe went into raptures over them, and what presumption to differ from the great Olympian!—especially, too, since a distinct Goethe literature has sprung up in Germany, in which all his opinions, artistic, historical, technical and scientific, are collected and mentioned with the most reverent respect. But who, after gazing at rapt and spiritual Carlo Dalce, the sylphs of Carreggio, the angelic sweetness of Murillo's madonna, the Christ, with its gentleness and genius and sorrow, at Dalce's lovely, terrified, and yet malignant Herodias' daughter, who after this can return enthused to the pumpkins and hollyhocks, sunflowers and vegetables of the Flemish school? For some inscrutable reason one side of the gallery, containing the pictures of Raphael, Liotard and many other fine pastels, is opened but once a month, so I missed the inimitable Vienna chocolate girl. As it was, I came away aching and bedazzled. Repeated visits alone could restore my bewildered recollections to order. Even then every spare minute was devoted to the Raffaele or Carreggio rooms. Turner was said to have spent a lifetime studying a London fog; even so might Faust have spent his gift of endless existence among these "eternal youths of history." The buildings are very extensive, and contain, besides, valuable philosophical collections. The liberality with which they are thrown open to the public is a striking proof of the "emancipation of ideas" in Saxony. Some years ago gold and no small diplomacy were required to gain access to this palace of Aladdin. Now even the peasants are permitted to enter many days in the week without paying; so that the simple country folk of the former Saxon electorate enjoy greater privileges than the Emperor of all the Russias. Dresden is full of artists more or less celebrated, attracted by the king's gallery; whether any, however, frequent the American Club and drink brandy cocktails to the welfare of the President is quite another question.

OUR READERS will see, by a communication in this issue, that our Northern brethren have surrendered to our church in Jonosboro, Tennessee. We hope this example will be promptly followed in all other places where our church property has been withheld from us. This looks like the dawn of a better era. If we hold property to which others had a good legal and moral title we should want it surrendered to its rightful owners before the going down of the sun.—Nashville Christian Advocate.

OUR PUBLISHING HOUSE.

We have entered upon another term of labor and responsibility as the publishing agent of the Methodist Episcopal Church South. The experience of the past four years teaches that success can be achieved only by the warmest sympathy and the most active co-operation of the church, combined with unremitting energy and constant care on the part of the agent. It is, however, with feelings of pleasure that we contrast the present condition of the Publishing House with that in which we found it, immediately after the adjournment of the General Conference of 1866. Then the House was without financial credit, either at home or abroad, and embarrassed with a debt of nearly \$100,000, and with no available capital with which to meet the heavy liabilities—with the exception of about \$17,000 worth of books, printed previous to 1861. The presses of the House, too, were idle, while the business was almost entirely suspended. Our creditors, in the meantime, were urging their claims; and, in several instances, suits in civil court had been instituted. Our condition was desperate. The hoof of war had passed over the country, and that portion of it to which we would naturally look for patronage had been left a desolation and a waste; the heart of the church was depressed, and but little hope was entertained of the resurrection of our prostrate fortunes. Four years have elapsed, and the credit of the House is fully restored; and, although we still owe about \$40,000, yet during this period our net profits have been \$23,000 in excess of our indebtedness in 1866, while we have scarcely a creditor who is not anxious for the amount that is due him to remain in our hands. The merchandise on hand, amounting to about \$50,000, is in good condition, with the exception of such of the old stock as remains unsold. Our presses are all actively employed; no suit at law to perplex us, all having been withdrawn, with a single exception, while the country through which the Methodist Episcopal Church South extends is fast recovering from the shock it had received; and the hopes of the church, once so languid, are again revived.

With a net capital of \$188,052.45, compared with \$87,105.70, the amount as reported in our exhibit of 1866, and with our liabilities reduced, during the same period, from \$71,453.55 to \$41,872.12, we re-entire upon the duties assigned us with renewed energy and hope.

We would not, however, presume to base our hope of success on any amount of moneyed capital or financial credit. In the future, as in the past, our only hope is in the continued co-operation and sympathy of the church—the entire church. There must be no abatement in energy and zeal. The church cannot afford to relax their efforts, or to fall below the measure of the past four years. The ministry and laity throughout the connection must feel that the Publishing House is theirs, and that failure would not only disparage the credit, but involve the honor of the whole church. The General Conference did not deem it advisable to establish any new depositories, hence our people will depend chiefly on their respective pastors to be supplied with our publications. We trust that each preacher will see that his charge is supplied with the literature of the church.

We are anxious to furnish all the facilities within our power for the circulation of our books. In several of the Conferences booksellers, conveniently located, have agreed to purchase and keep on hand our publications, in quantities sufficiently large to accommodate the demand of Conferences convenient to them. Ample supplies will be kept by the Southwestern Book and Publishing Company, in St. Louis, Missouri; by John W. Burke & Co., Macon, Georgia; J. W. Stayton & Co., Jacksonport, Arkansas; Messrs. Selby & Dulany, and J. W. Smith & Brother, Baltimore; T. L. D. Walford, Richmond, Virginia; Rev. R. Lamo, Jefferson, Texas; and J. B. Lippincott & Co., and Messrs. Romsen, Claxton & Haffelfinger, Philadelphia; and also by the Rev. R. J. Harp, 112 Camp street, New Orleans, Louisiana. As early as possible we will make similar arrangements with merchants in other Conferences. We hope by this means soon to place our publications within the reach of the entire church. We are frequently requested to reduce the price of the publications of our House. No person is more

anxious to do so than ourselves, and we promise to meet the wishes of the church, in this regard, at as early a day as practicable. The prices of our books compare favorably with those of other houses, and our muslin 18mos are cheaper than books of the same size and style of binding sent out by any other American house. Many of the preachers, however, have purchased no books since the war, only from us, and finding them one hundred per cent. higher than they formerly paid, are disposed to complain. A careful examination will show that the Southern Methodist Publishing House has advanced its prices less, in proportion, than any other house in the country.

In reference to prices, we labor under a difficulty of which we have no control. We publish our catalogues, and they are accessible to all persons. From our catalogue prices we allow a liberal discount to both merchants and preachers, and our books should be sold to the people at our retail prices. Instead of this, in many instances, a very large per cent. is added to the retail price; and hence the people complain of extortion. The hymn book, 24mo, sheep, the price of which is \$1, is often sold for \$1.50; and we know of one instance where Binney's Theological Compend was purchased of us for \$1.20 per dozen, and sold to a Sunday school for \$1.80 per dozen. Under these circumstances we are not surprised that complaints exist in reference to the high price of our publications. Our catalogues will be sent free to any person, on application.

The Christian Advocate has been published during the past four years under many embarrassments. It was not meeting its current expenses at the time Dr. Summers was placed in the editorial chair, and the General Conference of 1866 continued its publication on the condition that the Publishing House should incur no expense in its publication. This rendered the occupancy of its columns necessary, to an undesirable extent, by advertisements. Besides, it is the central organ of the church, and was expected to publish many reports remarkably heavy and uninteresting; and by this means much that would have been of special interest has been excluded. The General Conference, which has just closed, while it still requires the Advocate to meet its current expenses, has instructed the agent to enlarge it. We will order a new press immediately on which to print the Advocate, and the first number of the enlarged edition will be issued as soon as possible after we receive the press. It is enough, to insure its success, to say that Dr. Summers still stands at the helm.

The Rev. Attiens G. Haygood, the newly elected secretary of the Sunday school department, including the editorial supervision of the Teachers' Monthly and Sunday School Visitor, will enter upon his duties in a few weeks. He is a practiced writer, and a gentleman of high literary attainments, of indomitable energy, of pure taste, and of uncompromising devotion to the church. We earnestly solicit renewed efforts in behalf of the Visitor. It should be placed at once in all our Sunday schools.

The General Conference has provided for the publication of a monthly magazine. This will be a first-class magazine in every respect. The Rev. W. P. Harrison, D. D., who has the editorial management, is already well known to the church as the gifted author of "Theophilus Walton," a work of great popularity. His learning and excellent practical sense eminently qualify him for the responsible position to which he is called.

A specimen number of the Monthly will be issued early in September next.

Around these several interests we beg the church to rally, and then a bright future awaits us.

A. H. REDFORD, Agent.

NASHVILLE, TENN., June 1, 1870.

MISSIONARY.

MISSION ROOM, NASHVILLE, June 21.

To the Ministers and Members of the Methodist Episcopal Church South:

REVEREND AND DEAR BRETHREN—You have learned before this time that the recent General Conference consolidated the two Boards of Missions, and elected one secretary instead of two. "The Board of Missions," as now constituted, has charge of all the missions, foreign and domestic, connected with our church. As will be seen by the constitution, the board is to take charge of all the funds not appro-

priated by the Annual Conference boards, and are to appropriate the moneys coming into the general treasury, between the foreign and domestic missions under their supervision. Hence it is important to have a clear understanding as to the powers of the new as well as the old boards.

Under the operations of the old boards each Annual Conference had a board auxiliary to the Parent Board of Domestic Missions. These auxiliary boards were required to transmit to the parent board at Nashville one-tenth of all their collections; this ten per cent. was, in part, the revenue of the parent board, and was disbursed according to the provisions of the constitution.

In addition to the funds raised for domestic missions, the Discipline required that there should be "annual collections in every congregation" for the support of foreign missions. Now that the boards are consolidated, it becomes necessary that all the collections and donations for foreign missions be forwarded to the general treasury, as well as the ten per cent. on all collections for domestic missions in each Conference. The General Conference, by resolution, made provision for the payment of Annual Conference drafts heretofore drawn under the operations of the old law. Here is the resolution:

"Resolved, That the appropriations already made by the Annual Conference boards shall be met according to the law obtaining heretofore, without respect to the present law requiring forty per cent. to be forwarded to the parent board."

Brethren cannot fail to perceive that where ninety per cent. is retained under the operations of the old Board of Domestic Missions, to pay Annual Conference drafts authorized at the last sessions, that special collections must be made in every congregation for the parent board. If the parent board is to rely alone on the ten per cent. for its revenue, the coming year; then the support of foreign missions will be cut off, and our work in China, among the Indians and in the Mission Conferences must perish. The General Conference, in adopting the above resolution, intended only to regulate those collections made for domestic missions in the Annual Conferences, and not to interfere with the collections to be made in every congregation for the Board of Foreign Missions. We therefore earnestly urge all our brethren—presiding elders, as well as those in charge of circuits and stations—immediately to lift those special collections for the parent board, and forward the same to A. H. Redford, treasurer of the new Board of Missions. The drafts already issued must be met at maturity, and new appropriations must be made to carry forward the great work already commenced. Let there be no delay. Besides the support of our missions, there remains still a balance of the old debt that must be paid soon. Now, dear brethren, act speedily. A small contribution annually from each member will sustain the grand missionary enterprises of the church; lay this subject before your congregations; they will respond liberally and cheerfully. Tell them that now is a crisis in our missionary movements, and that we must have help, and have it immediately. We want extra donations and contributions. By the blessing of God, and the hearty co-operation of our brethren, the old debt will be paid off, this dreadful incubus will be removed from the church, and new life will be imparted to our missionary efforts. We earnestly appeal to every friend of the church to help in this glorious work—Send your contribution, be it small or great; we will gladly take "two mites," or your \$1's, \$2's, \$10's or \$100's. "Let every man do his duty." We beg all the members and friends of our desolated but gloriously recuperative church to rally to the rescue. Brethren, the cause of missions in the Methodist Episcopal Church South can, must and will be sustained!

J. B. McFERRIN, Secretary.

A. H. REDFORD, Treasurer.

A VERY singular case has lately come up in England. A murderer received sentence of death by hanging, but owing to a malformation of the neck the sentence cannot be executed in the opinion of the medical board appointed to examine the prisoner. Of course he had to be reprieved.

STRONG as our passions are, they may be starved into submission, and conquered without being killed.—Colton.

PROCEEDINGS OF THE GENERAL CONFERENCE OF THE METHODIST E. CHURCH SOUTH.

NINETEENTH DAY.

WEDNESDAY, May 25, 1870.

Conference met at the stated hour. Bishop Paine in the chair. Divine service was conducted by W. P. Harrison.

The minutes were read and approved. Bishop Pierce took the chair, and called for reports. No response.

The following resolutions were then offered and adopted:

Resolved, That the committee of five, appointed to make arrangements for the Sunday school convention, be increased to twelve, by the addition of Clark O. Smith, T. J. McCoy, Samuel A. Nelson, Rev. J. O. Simmons, James Wickersham, John Howard and Dr. W. L. Lipscomb.

T. J. MAGRUDER, Chairman of Committee of Arrangements for holding a Sunday school convention.

Resolved, That the Sunday school convention provided for by this Conference is designed to be only an advisory assembly, to consult as to the best method of carrying out our Sunday school system, authorized by the Discipline of the Methodist Episcopal Church South.

J. E. EVANS, S. ANTHONY.

The question on which Conference adjourned on yesterday afternoon was called up.

Dr. N. F. Reid, having the floor, said: "I shall submit only a few remarks. The man who can, at this stage of our proceedings, with the present temper of this body, inflict a speech upon you, has more nerve than I have. Two things are proposed in my amendment. First, that moneys to be used in the domestic fields shall not be paid into the general treasury just to be transferred back. There is no use in this. Why send money to Nashville just to be sent back? I believe, from what we heard yesterday, this is the opinion of this body generally. The second thing provided for is the amount to be sent—one-third—and the amount to be retained—two-thirds—by the Conference boards. Will this be sufficient? I think so. Suppose we raise \$3,000, on an average, in each Annual Conference. That will give a little more than \$100,000. We then send over \$33,000 to the general treasury. This appears to me to be a liberal proportion, viewed in the light of the comparative destitution of the domestic and foreign fields. Brethren talk about rich Conferences. Where are they? It is no use to shut our eyes to the fact that we are all poor. Our domestic missions are broken down. We must resuscitate them. Two-thirds of all our collections will not be sufficient to do this. It is idle to send money abroad to reach people with the gospel who are not more destitute than our people at home. If this becomes our policy our people will not give to the missionary cause, as we desire they should. Let the amendment be adopted, and it will give entire satisfaction."

Dr. Edwards offered an amendment, which was accepted by Dr. Reid in lieu of his own, to wit: Strike out all after the word "constitution," in the fifth line, and insert instead the following: "Each Conference board shall pay to the treasury of the general missionary board forty per cent. of all the moneys collected within its bounds for missionary purposes; the remaining sixty per cent. may be appropriated by the Annual Conference board and the Bishop presiding to missions within its bounds. Any money not so appropriated shall be forwarded to the general treasury."

Dr. A. L. P. Green spoke in opposition to the amendment, and Dr. McFerrin in favor of it—the time being extended to allow him to finish his speech. W. H. Potter spoke on the same side.

P. A. Peterson moved the previous question. The call was sustained, and the amendment was adopted.

On motion of J. E. Edwards paragraph 2 of article 13 was stricken out. Also all after the word "bounds" in the third paragraph.

On motion of P. A. Peterson all after the word "district," in the fourth line of paragraph 4, was stricken out, and the paragraph adopted.

On motion of J. E. Edwards the fifth paragraph was stricken out.

Article 14 was read and adopted, and, on motion of A. R. Winfield, the blank was filled by "Nashville."

On motion of A. W. Wilson article 15 was stricken out.

The report, as a whole, was then adopted.

The following resolution was then offered, read and adopted:

Whereas, The larger portion of our German work lies in the bounds of the Texas Conferences; and the editor, at a point nearer the work, can better represent the wants of this important field; therefore,

Resolved, That the German Apologist be transferred to Galveston, and

that it be hereafter published at this point.

R. ALEXANDER, I. G. JOHN.

Report No. 9 of the Committee on Episcopacy was called up, and the resolutions were adopted by a vote of one hundred and sixty to four. They have already appeared in the Daily Christian Advocate.

The committee were allowed to withdraw the preamble to the report.

Report No. 10 of the Committee on Books and Periodicals was called up.

A. H. Redford offered the following substitute, which was not adopted:

Resolved, 1. That the book agent be instructed to issue a prospectus for a monthly, soon after the close of this General Conference, and that he be authorized to publish such monthly as soon as the subscription list indicates that the current expenses may be met.

2. That, in the event of the practicability of such publication, the Bishops and Book Committee be authorized to elect a suitable editor.

E. H. Myers offered an amendment to the resolution.

W. C. Johnson moved to strike out the name, "Southern New Monthly." This motion was lost.

W. H. Fleming called for the previous question. The call was sustained, and the amendment was adopted.

Report No. 10, as thus amended, was adopted, as follows:

REPORT OF COMMITTEE ON BOOKS AND PERIODICALS.—NO. X.

The Committee on Books and Periodicals have had before them the recommendation of the agent of the Publishing House to publish a monthly periodical combining the features of a review and magazine; and also a resolution, offered by P. A. Peterson and E. H. Myers, proposing a monthly combining the features of a religious magazine and a theological and literary review; and also a paper, offered by J. P. Ralls and J. Matthews, recommending the publication of a monthly periodical particularly adapted to the youth of the church.

Upon the whole subject thus referred to them, the committee report for adoption the following resolutions:

Resolved, 1. That the book agent be instructed to issue, in 1871, a first class monthly literary magazine, at not more than \$4 a year; to be called the Southern New Monthly.

2. That the first number of said magazine be published by September 1, 1870, which shall be used in canvassing for subscribers; and by February, 1871, the magazine shall begin its regular issue.

3. That the editor for said monthly magazine be elected by this General Conference, who shall bring out the specimen numbers aforesaid; and his salary, to be fixed by the Book Committee, shall run from January 1, 1871.

Report No. 11 of the Committee on Books and Periodicals was called up and amended by striking out the words "that the proposition of Prof. Stark be accepted and." The report thus amended was adopted. It has already appeared in the Daily Christian Advocate.

A motion of M. S. Andrews to reconsider the action upon Report No. 10 was laid on the table.

On motion of J. E. Evans the Conference proceeded to elect officers by ballot when more than one is nominated—by a rising vote when only one.

M. S. Andrews nominated A. H. Redford as book agent. He was unanimously elected by a rising vote.

Thomas O. Summers was nominated and unanimously elected, by a rising vote, editor of books and Nashville Christian Advocate.

H. A. C. Walker nominated E. H. Myers as editor of the Southern Christian Advocate. He was unanimously elected by a rising vote.

W. C. Johnson was unanimously elected, by a rising vote, editor of the Western Methodist, formerly the Memphis and Arkansas Christian Advocate.

In the same manner T. M. Finney was elected editor of the St. Louis Christian Advocate; I. G. John, editor of the Texas Christian Advocate.

W. E. Munsey, J. B. McFerrin, W. G. E. Cunningham and E. W. Schon were severally nominated as secretary of the Missionary Society.

On the first ballot J. B. McFerrin received 74 votes; W. E. Munsey, 46; W. G. E. Cunningham, 31; E. W. Schon, 4; L. Parker, 1. Whole number of votes cast, 154; necessary to a choice, 78. No election.

On the second ballot, J. B. McFerrin, 87; W. E. Munsey, 50; W. G. E. Cunningham, 14; L. Parker, 3. Whole number of votes cast, 154; necessary to a choice, 78. J. B. McFerrin was declared duly elected secretary of the Missionary Society.

On motion of E. H. Myers and A. H. Redford, a committee of five to nominate double the number of persons to be elected managers of the Missionary Society and the Book Committee was appointed, as follows: E. H. Myers, S. B. Roszell, E. E. Wiley, D. Morton and C. Taylor.

On motion of I. G. John the vote by which the German Apologist was located at Galveston was reconsidered, and the place was changed to New Orleans.

J. B. A. Ahrens was elected unanimously, by a rising vote, editor of the German Apologist, and Ed. N. S. Blegg associate editor.

F. Vordenbaumen and John Schaper were added to the Publishing Committee of the German Apologist.

A. G. Haygood, H. A. M. Henderson, J. E. Edwards, I. G. John, W. M. Leftwich, J. Matthews, L. D. Huston, J. C. Simmons and T. J. Magruder were severally put in nomination for Sunday school secretary. The result of the first ballot was as follows:

A. G. Haygood, 37; H. A. M. Henderson, 30; W. M. Leftwich, 26; J. E. Edwards, 24; J. Matthews, 11; T. J. Magruder, 9; L. D. Huston, 8; I. G. John, 6; J. C. Simmons, 3; W. V. Tudor, 1; R. A. Young, 1. Whole number of ballots cast, 156; necessary to a choice, 79. No election.

The second ballot resulted as follows: A. G. Haygood, 75; H. A. M. Henderson, 38; W. M. Leftwich, 27; L. D. Huston, 3; J. Matthews, 3; I. G. John, 2; J. E. Edwards, 2; T. J. Magruder, 2. Whole number of ballots cast, 152; necessary to a choice, 77. No election.

The third ballot resulted as follows: A. G. Haygood, 110; H. A. M. Henderson, 29; W. M. Leftwich, 5; I. G. John, 3; L. D. Huston, 2; J. Matthews, 1. Whole number of ballots cast, 150; necessary to a choice, 76.

Atticus G. Haygood was declared duly elected Sunday school secretary.

W. P. Harrison, T. E. Bond, A. B. Stark, R. S. Moran and J. E. Edwards were severally nominated for editor of the Monthly.

Dr. Moran rose and said that he appreciated the compliment of his friend from Baltimore in nominating him for the editorship of the Southern New Monthly Magazine, but that he unconditionally declined to run, and would not serve if elected.

The magazine is to unite the features of the popular light literature of the day, and these of a theological review—an incongruous combination—and he could not consent to have his name associated with such a hybrid.

The ballot resulted as follows: W. P. Harrison, 84; T. E. Bond, 36; J. E. Edwards, 12; A. B. Stark, 12; E. H. Myers, 1; W. V. Tudor, 1. Whole number of votes cast, 151; necessary to a choice, 76. W. P. Harrison was declared duly elected editor of the Monthly.

W. I. Green, lay delegate of the South Georgia Conference, asked and obtained leave of absence.

The pastoral address was then read by Bishop Wightman.

The following resolution was adopted:

Resolved, That the preachers of our church be and they are hereby directed to read the pastoral letter of the Bishops to their respective congregations; and that the book agent be directed to publish it in tract form, and that we recommend its universal circulation among our members.

P. A. PETERSON, S. P. WHITTEN, A. S. RIGGS.

The following resolutions were offered, read and adopted:

Resolved, That the General Conference recommend the formation of children's missionary societies in all Sunday schools, and missionary collections made monthly.

Resolved, 1. That the appropriation already made by the Annual Conference boards shall be met according to the law obtaining heretofore, without respect to the present law requiring forty per cent. to be forwarded to the parent board.

2. That when Conferences have been divided, all drafts drawn in favor of parties within those Conferences shall be paid out of the common fund of said Conferences.

JOS. B. COTTELL, W. H. POTTER.

It was ordered that when we adjourn we adjourn to meet at half-past three o'clock P. M.—the special business being to choose the place of the next meeting of the General Conference.

Report No. 5 of the Committee on Itinerary, and the report of the minority, were taken up.

The minority report was adopted. John E. Edwards, chairman of the Committee on Itinerary, submitted Report No. 7 of that committee, which was read, and the rule requiring it to lie over was suspended.

Bishop Kavanaugh said that the stern necessity of this case had long impressed him with the need of some appendage to the regular work. He said that Bishop Pierce had stated the most formidable objection, but yet he thought, notwithstanding that, there should be some such an appendage. We had to compete with our sister churches, and, to do this, we must have more Sunday preaching, which would curtail the size of the circuits, and we

would thus take away from these sections which could not be conveniently reached, and this necessitated some such system as this. He was not afraid of the abuse of it in Kentucky by placing men in this position, who were not fit for any other, for it was the best men that were needed for this work. He did not wish to use the term "proud," but from the poverty of language he was compelled to say that he was proud of his church for her doctrines. He was a Methodist from convictions established by earnest investigation, and he believed the Methodist doctrine and faith was the best safeguard against the world, and the people should be taught it. This system would accomplish this. There was nothing good but could be abused. Even the Bishops would carry the logs which they had to drop, if you would show them some place to throw them down.

Brother Biggs hoped the resolution would not pass. He thought that a good class meeting would cure all such diseases as those they were proposing to treat.

After considerable discussion the report was not adopted. It is as follows:

REPORT OF COMMITTEE ON ITINERANCY. NO. VII.

The committee has considered the paper signed by H. P. Walker and C. W. Miller, asking for the introduction of the following provisions to be added to paragraph 2, under question 3, section 5, page 61 of the Discipline:

"He, the Bishop, may moreover, when requested by an Annual Conference, appoint a member of the body to travel within the bounds of the Conference, and do such ministerial work as the Conference may direct," and recommend concurrence on the part of the General Conference.

JOHN E. EDWARDS, Chairman.

E. H. Myers, chairman of the Committee on Nominations, reported the following nominations for the Book Committee: J. E. Evans, Samuel Watson, P. A. Peterson, J. S. Lithgow, A. L. P. Green, W. R. Elliston, Thompson Anderson, W. H. Morgan and T. D. Fite.

The committee appointed to nominate officers for the Missionary Society have obeyed instructions by offering twenty-eight names of persons, out of whom are to be elected a president, first and second vice presidents and eleven managers.

The committee recommend that he who receives the highest vote shall be the president, the next highest first vice president, and the next highest second vice president; while from the others nominated, the eleven managers shall be elected.

The names offered are: N. H. Lee, W. G. E. Cunningham, H. A. C. Walker, Truman Polk, Leroy M. Lee, R. A. Young, I. G. John, D. R. McAnally, Jefferson Hamilton, A. H. Redford, John S. Martin, Mortimer Hamilton, Asa Holt, T. O. Summers, W. H. Potter, N. F. Reid, J. A. Dawson, O. R. Blue, A. G. Haygood, T. J. Magruder, John Morrow, W. T. Gates, W. P. Harrison, J. H. Brooks, Drummond Welburn, A. P. McFerrin, A. R. Winfield and W. T. Copeland.

Respectfully submitted.

E. H. MYERS, Chairman.

MAY 25, 1870.

The report was adopted.

Conference then adjourned with the benediction by the Bishop.

AFTERNOON SESSION.

Conference met according to adjournment. Bishop Paine in the chair.

Divine service was conducted by C. K. Marshall.

The minutes were read, corrected and approved.

Bishop Kavanaugh took the chair. The order of the day was taken up, and Louisville, Nashville, Baltimore, Richmond, San Francisco and Atlanta were severally put in nomination as the place for the next session of the General Conference.

Louisville having received one hundred and three votes, the Conference, by a unanimous vote, chose that city as the place of the next session.

L. M. Lee, chairman of the Committee on Episcopacy, submitted Report No. 10 of that committee, which was read.

Guilford Jones objected to the assessment to the Memphis Conference.

J. S. Key moved the previous question, which was not sustained.

G. A. Dagnolly objected to the assessment.

The report was adopted as amended. It is as follows:

REPORT OF COMMITTEE ON EPISCOPACY. NO. X.

The Committee on Episcopacy beg leave to make their Report No. 10, respecting the estimates for the support of the Bishops.

1. They recommend that the assessment for Bishops' support be fixed as follows:

Bishop Andrew, \$2,500; Bishop Early, \$2,500; Bishop Paine, \$3,000; Bishop Pierce, \$3,000; Bishop Kavanaugh, \$3,000; Bishop Wightman, \$3,000; Bishop Martin, \$3,000; Bishop Doggett, \$3,000; Bishop

McTyeira, \$3,000; Bishop Keener, \$3,000. Total, \$29,000.

2. They recommend that this \$29,000 be distributed for payment among the Conferences as follows:

Baltimore Conference, \$1,450; Virginia, \$1,700; Western Virginia, \$200; North Carolina, \$1,600; South Carolina, \$875; North Georgia, \$1,500; South Georgia, \$1,400; Florida, \$200; Alabama, \$1,450; North Alabama, \$1,100; Louisiana, \$1,140; Mississippi, \$1,350; North Mississippi, \$1,000; Memphis, \$1,400; Tennessee, \$1,800; Holston, \$650; Kentucky, \$1,350; Louisville, \$1,400; St. Louis, \$1,300; Missouri, \$1,200; Kansas and Nebraska, \$125; Little Rock, \$700; Arkansas, \$425; White River, \$475; Indian Mission, \$60; Texas, \$500; Trinity, \$550; East Texas, \$375; Northwest Texas, \$350; West Texas, \$300; Columbia, \$300; Pacific, \$100; Los Angeles, \$100; Illinois, \$275. Total, \$29,000.

All of which is respectfully submitted.

L. M. LEE, Chairman.

MEMPHIS, May 25, 1870.

Report No. 2 of the Committee on Revision was taken up, all of the report having been acted upon but the last clause; this was read.

A. G. Brown stated the grounds of the memorial presented by the Virginia Conference. They did not propose any innovation; they only asked to have the law restored as in the heroic days of Methodism, as they had been called. It was not a movement to impair the presiding eldership, but only to sustain it and enlarge its influence.

L. M. Lee said that the law as it now stands is one of the legacies that had come down to us, and only remained to cripple our work in many respects. He thought it might be changed in all our Conferences, as well as in the Virginia Conference. He only wanted to remove the restriction which embarrasses one part and does no good to the others.

Rev. Dr. Teasdale, corresponding secretary of the Sunday school board of the Southern Baptist Convention, was introduced to the Conference.

Paul Whitehead wanted the Conference to hear the arguments on this point. He thought it was greatly needed in the Virginia Conference. He represented the eminent preacher and wanted the presiding elder.

Dr. Winfield wanted the presiding elders' office magnified by putting the best men in it, and not weakened by giving them too many appointments.

P. A. Peterson said that he did not think this was asking much; it was only to remove a restriction, not to impose anything on any Conference.

D'Arcy Paul said that he had been an old steward in the church, and saw the great need of this movement, and moved to strike out 14 and insert 18.

M. S. Andrews thought this will impose on the presiding elder more than he can perform. It is an entering wedge which will finally split up the presiding eldership.

P. A. Peterson moved to strike out "that the General Conference do not concur," and the words "number 14" be changed to 18.

S. X. Hall moved to lay it on the table, which motion prevailed.

O. Fisher said that the office of the presiding elder was a very valuable one if it was not overloaded, but if this were done it would break up the office. We want a presiding elder that could spend the Sunday, and sometimes Monday and Tuesday, in a place.

The previous question was moved and sustained.

This clause of the report was adopted.

E. H. Myers, chairman of the Committee on Nominations for the Missionary Board, added the following names to the nominees: W. M. Rush, E. K. Miller, R. Alexander and J. Anderson.

Report No. 3 of the Committee on Revision was taken up, item by item.

The first item was read.

J. E. Edwards moved to add after the words "preachers in charge," "of two or more persons."

A. W. Wilson moved to substitute for the whole, "that it is inexpedient for quarterly conferences to elect superintendents."

C. Long moved to lay the substitute on the table, which motion was lost.

W. H. Potter moved to lay the whole subject on the table, which motion prevailed.

J. E. Edwards moved that when we adjourn we adjourn to meet at eight o'clock to-morrow. This motion was carried.

The second, third, fourth, fifth, sixth, seventh, eighth, ninth and tenth items were read and adopted.

The eleventh item was read, and after considerable discussion Dr. Moran called for the previous question, which call was sustained.

The eleventh item was adopted. The rest of the report was adopted, and the report thus amended was adopted as a whole.

Conference adjourned with the

doxology and benediction by the Bishop.

TWENTIETH DAY.

THURSDAY, May 26, 1870.

Conference met at the stated hour. Bishop Wightman in the chair.

Religious exercises were conducted by C. Long.

The minutes were read and approved.

The following resolutions were then offered, read and adopted:

Resolved, That the treasurers of the Boards of Foreign and Domestic Missions, superseded by the Board of Missions created by this Conference, be instructed to turn over all the moneys and assets of every kind, which may be in their hands, to the treasurer of the newly appointed board.

J. B. McFERRIN, W. M. LEFTWICH, J. B. McFERRIN, A. S. RIGGS.

Resolved, That Rev. W. E. Munsey, D. D., be and he is hereby requested to continue in the great work of raising funds to liquidate the old missionary debt of the church until the next session of the Annual Conference of which he is a member, and that the Board of Missions be instructed to provide for his support, and appropriate such funds as he may raise to the payment of the old missionary debt.

Resolved, 1. That the book agent and book editor be instructed to prepare and publish the Discipline, as revised by this General Conference, at the earliest day.

2. That Bishop McTyeira be requested to assist the editor in its preparation.

J. S. MARTIN, JAS. A. DAWSON.

The committee of five on the Sunday school song book were amended, as follows: T. J. Magruder, Baltimore; Judge W. H. Pester, New Orleans; Dr. W. P. Harrison, Macon, Georgia; Theodore F. Childs, St. Louis, Missouri; J. T. Curdin, Louisville, Kentucky.

The report of the Committee on Finance was taken up, and on motion of R. S. Moran was laid on the table.

The resolutions of L. Pierce, S. Anthony and J. S. Key, on infant baptism, were taken up, discussed at some length, and withdrawn by the movers.

Bishop Andrew made the following remarks:

"I don't expect to take up much time—not half as much as you have wasted in quarreling over that resolution, and then indefinitely postponing it. I am glad that it has been done, however. Now, I want to say a few things to you. I have been attending your present session, and it has afforded me much pleasure. I have met many of my old friends, and they have pressed my hands warmly, and made me feel very happy. And now we are going to separate. My mind has been burdened when I have looked on this large body of preachers and lay brethren, and I have thought, have you sought the glory of God more than your own? Have you considered this in all your speeches and talks and reports? And now another point. You are now about to part. Many of us will never meet again. Shall we go away, and carry with us the flame of revival, and show that the General Conference has been a season of reviving influences. Your people will soon see it if this is the case. I have been gratified, as well as sorry, to hear some of your debates. I am glad that we have been conservative enough to reject a great many things that have been presented. I feel as if I was delivering my last charge. Many years ago it was my habit to deliver an address at the close of Conference. It is not now under similar circumstances. I am about to leave you. Farewell! That word comes with sadness from my heart. I'll never see many of you any more. I want you to remember the old man. I want you to pray for the old Bishop. I think I can say, with Paul: 'I have coveted no man's silver or gold.'"

I have not aimed at my own glory. I have always gone wherever I have been sent. I can appeal to my colleagues to say whether I have ever flinched. When I went into the work I considered that I had given myself up to God, and had no right to choose where I should go. That's the spirit of the itinerancy. No man is fit for it who has not laid all on God's altar. If you are seeking and clamoring for good places, what will the people say of you? Now perhaps I hear more than you do, and I have been pained at some things which have come to my ears. You have no right to choose your own work. Now some preachers want to be Bishop. If you want comfort and honor you had better be where you are. If the church calls you, then go, but woe be to him who thrusts himself into a position to which God has not called him. I remember well the last charge of the venerable Bishop McKendree to me. We were coming down from Philadelphia just after I had been elected Bishop. I said to him that the Conference had laid on me a

work for which I was not prepared, and had no experience whatever; and I asked him to please give me some advice. He said: 'James, I have not much to say, but I will say, I want you Bishops to hear it, never shrink from responsibilities, for remember that by this you assume the most fearful of all responsibilities. I have thought of that ever since. To you preachers I would say, You know I love you all, and as an old man I take the liberty of catechizing you a little. Many of you are young men, and I pray you to consecrate your hearts and lives to the work of Christ. Don't be afraid of not being provided for. This book (with his hand on the Bible) provides for you. A California missionary once said to me, God has so often interposed in my behalf that I do not feel concerned at all, for I know that God will take care of me. Go forward and do your duty. The Duke of Sully once said to Henry the Fourth, 'You treat your old servants badly. You appoint those who are not your friends to places where they receive large salaries, and leave your old friends out.' The king said to him, 'Don't be uneasy; I'll take care of you and yours.' Let us trust in God. I have been traveling sixty years. I remember the venerable Dr. Pierce when the Bishop was a baby. I thought at that time he wouldn't live long. 'But here he is before me, in a wonderful state of mental and physical activity. God blessed the old man! I have always sustained an intimate relation to the Bishop. God bless you, George! I rejoice at your triumph, and pray that you may live long. Now, brethren, forgive the old man for talking so long. God bless you and yours. I love you all; and when you go away, pray that, up yonder, I may stand with those who have labored with me on earth.'

The following resolution was offered, read and adopted by a rising vote:

Resolved, 1. That the presence and counsels of our beloved senior Bishop, the Rev. James O. Andrew, at this Conference, have been a source of great pleasure and comfort to the members of this body.

2. That we separate from him, after hearing perhaps his last words, with fervent prayer, and hope that his declining years may be full of joy, and that his dying hour may be radiant with the light of immortality.

J. B. McFERRIN.
THOS. O. SUMMERS.

The following resolutions were offered, read and adopted:

Resolved, That the chairmen of the board of finance of the respective Conferences are instructed to take into consideration the new estimate and apportionment for the Bishops, and readjust the assessments in their Conferences and in the portions added to them accordingly.

Resolved, That the delegates included in the new Conferences, made now, to appoint a board of finance for their respective Conferences to attend to this matter.

E. H. MYERS.
A. L. P. GREEN.

Resolved, That the Rev. Samuel Watson is hereby elected editor of the Christian Index, until other arrangements are made by the colored people for a church organ.

J. E. EVANS.

Resolved, That Thomas Taylor be added to the committee appointed by the Conference to attend the General Conference of the colored people, December next.

J. E. EVANS.

The Rev. Dr. Munsey addressed the Conference, declining the work to which he was called by a resolution adopted this morning.

The resolution of R. Alexander and J. W. Whipple, instructing the book agent to keep a deposit at the Texas Book Depository, in Galveston, of our publications to the amount of two thousand dollars, was called up and lost.

The following resolution was offered, read, and not adopted:

Whereas, The condition of our Book Concern requires such rigid economy that no facilities can be afforded to the remote portions of the work; therefore,

Resolved, That the agent and Book Committee be instructed to employ no more than \$3,000 in the improvement and enlargement of our buildings at Nashville—the object of our Book Concern being to supply the church with religious literature, and not the building up of an establishment for show.

J. G. JOHN.
T. POLK.

The committee on the quarterly review were announced, as follows: Bishop Doggett, Professor Francis H. Smith, A. W. Wilson.

Bishop Marvin took the chair. The report of the special committee on 'orphans' homes was taken up and amended by striking out the clause providing that it be placed in the Discipline.

The report, as thus amended, was adopted. It has already appeared in the Daily.

On motion of E. H. Myers, Bishop McTear, J. B. McFerrin and A. H. Redford were appointed a committee to nominate officers and managers of the Missionary Board.

The following resolution was offered, read, and on motion of O. R. Blum was laid on the table:

Resolved, That the Bishops who shall preside at the annual sessions of the North Carolina Conference, during the next four years, be and they are hereby authorized to appoint Rev. C. F. Deems, D. D., to the Church of the Strangers in New York city, provided the North Carolina Conference shall request such an appointment to be made, from year to year, during that time.

R. S. MORAN.

Report No. 17 of the Committee on Books and Periodicals was taken up, read and laid on the table.

The report of the special committee on a collection of church music was taken up and laid on the table.

The following resolution was then offered, read and adopted:

Resolved, That the Book Committee be and is hereby instructed to prepare and present a suitable testimonial, as an expression of the lively appreciation by this General Conference of the arduous, accurate and indefatigable labors of our esteemed secretary, Rev. T. O. Summers, and that the Book Committee be allowed full discretion in preparing the same.

L. G. JOHN.
W. HADLEY.
THOS. REED

Bishop McTear nominated the officers and managers of the Board of Missions, as follows: T. O. Summers, president; N. H. Lee, first vice president; W. G. E. Cunningham, second vice president. Managers: A. G. Haygood, W. P. Harrison, R. A. Young, Mortimer Hamilton, R. A. McFerrin, John Morrow, W. T. Gates, W. M. Rush, J. Hamilton, R. Alexander, T. J. Magruder. These nominations were confirmed.

The report of the special committee on the revision of the Ritual was called up, and the committee had leave to withdraw the report, with instructions to report on the subject at the next General Conference. The following resolutions were then offered, read and adopted:

Resolved, 1. That the thanks of this General Conference are due and are hereby most respectfully, and with the heartiest gratitude, tendered to the citizens of Memphis and adjacent country, who so kindly received us to their homes, and with such openhanded and elegant hospitality have entertained us during our sojourn among them.

2. That we cordially reciprocate the Christian love and fraternal courtesy which prompted the tender of their houses of worship by the Presbyterian, Cumberland Presbyterian, Christian and Baptist churches of the city and its vicinity, and hereby express our great gratification in occupying the pulpits, to which we were so kindly invited. We also gratefully recognize the liberality of railroad and packet lines for commutation of fare.

H. A. C. WALKER.
F. MILTON KENNEDY.
JAMES WICKERSHAM.

Report No. 5 of the Committee on Revision was taken up, and J. E. Evans offered the following amendment to the first item:

On page 5, N. A., chapter 2, answer 1, after the words "equal numbers of," strike out all down to "preachers," and insert "members, three-fourths of whom shall be laymen and one-fourth may be local preachers." And in the same answer, after the word "representatives," insert the words, "and local preachers."

And on page 6, chapter 2, section 2, item 1, after the word "four," strike out all to the word "preachers," and insert the words "representatives, three of whom shall be laymen, and one may be a local preacher." And in item 2, after the words "lay members," insert, "and local preachers," also strike out all after the word "district" down to the word "direct," and insert the word "Conference." In item three, after the words "lay members," insert, "and local preachers."

R. S. Moran raised a point of order. The point was sustained by the chair, who decided that such a change of the constitution as is proposed by the amendment cannot be made without reference to the Annual Conference. The report was then laid on the table.

The following resolution was then offered and read, and R. S. Moran called for the previous question. The call was sustained, and the resolution was adopted, as follows:

Resolved, That the Bishops be and are hereby authorized to appoint one or more preachers to any proper work beyond the bounds of the Annual Conference.

R. S. MORAN.

On motion of W. M. Leftwich the vote was reconsidered by which the name of the Kansas and Nebraska Conference was decided, and the name was changed to the Western Conference.

A resolution of W. S. Baird and others, proposing a change of the name of the church to "Episcopal Methodist," was read, discussed and laid on the table among the unfinished business—the movers of the resolution preferring to substitute "Methodist Episcopal Church in America."

On motion of J. E. Evans it was *Resolved*, That the law requiring lay representatives to be elected by the district stewards, etc., be confirmed to the action of this Conference on the subject of district conferences.

J. E. Evans asked to be excused from attending and assisting in the organization of the Colored Methodist Episcopal Church South, and Dr. A. L. P. Green was appointed in his place.

The minutes were read and approved.

On motion of W. M. Leftwich, Conference agreed to adjourn—the next session to be held in Louisville, Kentucky, May 1, 1874.

Bishop Paine addressed the Conference as follows:

"Being called upon unexpectedly to close these exercises, and knowing the necessity of being brief, I would condense all that I would say in a very few words. This is the twelfth General Conference at which I have been present as a member, beginning in 1824 in Baltimore; and I confess I have never known a more pleasant and more working Conference. It is the briefest Conference I have ever attended. It has been very harmonious too. The inauguration of the system of lay delegation has worked admirably, confirming our conviction that the laity can greatly aid in managing the great interests of the church, and I hope they will return home with the impression that they are not only welcomed, but that they are felt to be an important element in our deliberations. I repeat, this has been a remarkably harmonious Conference. No great conflicts—none on principle. We have not all agreed on the policy of the church, but there has been no want of appreciation of each other's motives."

"Brethren, God has been good to us this session. He has preserved us in safety to its close, and now let us go away looking for his blessing, and for a fresh baptism of the Holy Ghost."

"Age is creeping on many of us. We may never meet again in this great assembly. God grant that we may be useful and faithful in the performance of our duties even unto the end! Let us preserve the constitution of our church intact. Keep up the itinerancy; preach Christ and him crucified; retain the great truths and principles of our church, and transmit them down to your posterity. Then, when we get up yonder, we shall be delighted to look down and see our successors carrying out the great principles of Wesleyan Methodism."

"Accept my assurance, and I speak for my colleagues also, of my respect for you, and love for you. May God go with you, and be with you and your families, and in all your work for Christ."

He then led in a fervent prayer, after which the doxology was sung, the benediction pronounced by Bishop Marvin; and thus closed the sixth session of the General Conference of the Methodist Episcopal Church South.

NEWS FROM THE CHURCHES.

GREENSBORO, ALA., May 18, 1870.

Mr. Editor: Upon my arrival here, on the thirteenth instant, to meet an appointment for the quarterly meeting, I found an interesting revival going on. It had originated and had been carried on under the labors of the pastor, Rev. J. S. Moore, and the Rev. S. P. Richardson, the latter of whom had just left at the time of my arrival. His labors were felt by brethren to have been very efficient. The work is still going on, and up to this time about forty have professed obedience to the faith, and thirty or more have united with the church.

The pupils of the University and of the Greensboro Female College, under Prof. A. H. Hutchinson, have partaken largely of this bestowment of grace.

The professors of the University, as also Prof. Hutchinson, have labored diligently and with much interest in the furtherance of this blessed work.

The young men here in preparation for the ministry have also been earnestly engaged for the salvation of those associated with them; and have been efficient helpers in the promotion thereof. The church at large is interested in this work. Let it pray for us, and let all of us together at the feet of Jesus render thanks to God for them and all his benefits.

JAS. L. COTTEN.

LINEVILLE CIRCUIT, MONTGOMERY CONFERENCE.

Mr. Editor: The second quarterly meeting for Lineville circuit for this year, of which Brother Geo. J. Mason has charge, was held at Mount Pleasant church, embracing the first Sabbath in May, and was

the most interesting meeting I have yet held on the district. The congregations, though not large, were not only very orderly in their deportment, but most respectfully and seriously attentive to the preaching, and indeed to all the services of the occasion. The love-feast meeting, on Sabbath morning, was one of the genuine old-fashioned Methodist style, and it was really good to be there. Heart held sweet communion and fellowship with heart, and prompted the warm utterances of Christian hope and joy in the language of the purest brotherly kindness and fraternal love; and faltering voices and flowing tears evinced the deep sincerity and warm emotions of the various speakers. Oh! for very many more such seasons of refreshing and consolation in all our churches.

The consecration of a dear little babe to the service of the triune Jehovah, in the holy ordinance of baptism, was a most solemnly impressive and tenderly touching scene, and seemed to reach every heart present in its lessons of instructiveness and hope.

The holy communion of the body and blood of Jesus, in the significant and striking emblems by which it was represented to the faith and confidence of the believer in Christ, was one of unusual solemnity and power. Its immediate significance and comfort to the soul was cheering and consolatory; its prospective and ultimate blessedness in the consummation of eternal felicity with our divine Redeemer, in the kingdom of his glory above, was thrilling and ecstatic. Oh! that happy meeting of the saints on high around the great white throne of God!

At the close of the services one lady presented herself for membership in the church, and was heartily welcomed to a place in our midst. May the God of the widow and the fatherless watch over her and her dependent charge, and bring them all finally to a happy meeting and joyful reunion with the Christian husband and father so suddenly and sadly taken from them.

Truly and fraternally yours,
F. L. B. SHAEVER.

MAY 11, 1870.

Mr. Editor: With gratitude to God we inform the church that we have been abundantly blessed on the Vermillion work this year. We have witnessed the outpouring of God's spirit in the conviction and conversion of sinners, as well as the revival of the drooping spirits of God's people. Up to this time I have baptized forty children and five adults; have received into the church over sixty whites, and have organized a colored society of forty-eight. I have three Sabbath schools, one of which numbers one hundred and ninety members; all doing well. The material for a good parsonage is paid for, and nearly all on the ground at Vermillionville. The brethren at Kimball chapel are going "two and two" through all that broad country, distributing the word of God. They find all classes anxious to have the word. Twelve years past the people were afraid to have the Bible in their houses, saying the witches would haunt them, and thunder would strike them, etc.

We need, in this country, four single men, "full of faith and the Holy Ghost." Come, young brother; you are preaching weekly to several preachers. Come over here, and preach where you are needed.

B. F. WHITE.

AWFUL EFFECTS OF A LIGHTNING STROKE.—During a severe thunder storm, on the twenty-ninth ultimo, the residence of Dr. George B. Smith, near Benevolence, Georgia, was struck by lightning, and the entire family prostrated and stunned by the shock. To those who first recovered an appalling spectacle presented itself. There lay the head of the house with his neck broken, a lifeless corpse, while the mother and two of her little ones were grievously injured and blackened by the fluid. To add to the horrors of the scene, in an instant the entire dwelling was wrapped in flames, and almost before the dead and suffering could be removed to a place of safety, the whole pile was consumed, and a smoking ruin all that remained of the pleasant home of that happy family.

WEST PASOAGOLA CIRCUIT.

MOBILE DIST., MOBILE CONFERENCE, June 6, 1870.

Mr. Editor: If you will allow me a small space in the Advocate I will say something concerning the destitution and wants of this impoverished circuit, and more particularly that part of it in and around Ocean Springs. There are twelve appointments on the circuit, scattered from Ocean Springs, along the west bank of Pasagonla river, as high up as Salem High School, Green county, Mississippi, a distance of about one hundred miles. The people who attend these appointments are much impoverished, and get their living by burning charcoal and getting saw-logs. There is not a dollar's worth of property on the work that belongs to the church. At Ocean Springs, a village containing a population of about six hundred persons, there is no place of worship that we can call our own; no place where we can receive and impart such instructions as are necessary for our own and the salvation of this people. There are, within the limits of this village, more than two hundred children, the majority of whom could be brought under the influence of our church; but for want of church facilities they are almost entirely neglected. The vestaries of the Catholic religion are silently but progressively at work here. They are spreading their nets with expectations of success. They have recently enlarged their church building, and their Sabbath school is in a thriving condition. Believing, therefore, that the friends of the church of God everywhere will sympathize with us when they learn that we are poor, and not able to erect such a building as is necessary for the advancement of the cause of Christ in this community, we, the members of the Methodist Episcopal Church South, and other Christian denominations friendly to the erection of a Methodist Episcopal church at this place, have this day met and appointed the following sisters a committee to solicit donations for said purpose: Mary Y. Perrin, president, Mary Johnson, vice president, and Charlotte Parks, Ocean Springs; Mary F. Dunlap, Mrs. W. A. Bartlett, Mrs. M. A. Keener and Mrs. W. H. Foster, New Orleans.

To any one of the above named ladies money may be paid over, or inclosed to the president, with the assurance that it will be appropriated to the erection of said house of worship in Ocean Springs. We do not wish to draw upon our friends for more than \$1,500. We only wish to build a cheap, comfortable house. Brethren, in giving to this object you are giving to the Lord. This is truly missionary ground. Help us to cultivate it.

U. B. PHILIPS.

LETTER FROM CHINA.

SHANGHAI, CHINA, APRIL 11, 1870.

Mr. Editor: I trust you will allow me again a short space in your valuable paper. I wish I could so present the subject of schools, and so represent the necessity for them in this land of darkness, that our good people might be induced to give in aid of this glorious enterprise. There is much to be done before these people are "brought out of the kingdom of darkness into God's marvelous light." The women of China are degraded and despised and oppressed. They receive no education, and are considered as the useless portion of society. If one is found who can read, it is an exception, and greatly to be wondered at. Their feet are bound, so that they go through life in extreme misery, and in the very worst health. But we desire to better their condition, and teach them the way of eternal life. There are many ways in which this can be done. One way is by Bible women going among them and reading to them the word of God. We must teach these women, and have them prepared, in a measure, to go and teach others. We have some of these women now under teaching for that very work, and we trust many of our good sisters will think of these women, and send some funds to assist them in going about

to teach others. Some have already sent us funds for this object. Will not others send us help for these women? Will not thousands raise the part to the Savior in prayer for them, believing that he is a Physician who is able to heal the souls of even these who are heathen?

The orphan schools which I desire to open in Shanghai is another means through which great good may be effected. They can be supported by Sabbath schools alone, and I am sure, if the subject was presented to those schools they would readily provide the money each year. Some Sabbath schools have already contributed, and that largely, but there are many other schools where they would be just as willing to contribute, if they know for what object. The buildings for the orphan school is now in progress, and will be opened by the first of June. Fifteen scholars can be accommodated, and, as soon as we are able, another building shall be put up to accommodate others. This will be the male school. Now we want a female school. Some funds have already been given for that purpose, but not enough to justify us in beginning. Now let us ask God to aid in this matter. Without his blessing we can do nothing. Our blessed Saviour has said, "Whosoever ye ask in my name I will do." This promise is mine, and it is yours. Can we not have simple faith? Then let us ask and receive, that our peace may be as a river—broad, deep and overflowing. "Ask and ye shall receive" is the promise, and a blessed promise too. I trust we have your prayers, your daily prayers. I am sure, my Christian friends, we know not how much we owe to your prayers in our behalf. But the Lord surrounds us and sustains us, and gives us courage to go on. He will yet come and help us. We can truly say, "The Lord is our shepherd; we shall not want." I trust many Sabbath schools will imitate the noble example of the Sabbath school of Felicity street, New Orleans, and the Sabbath school of Greenville, Mississippi—I am sure there are many who will. We will gladly and thankfully receive funds from any one for these schools. We would be most happy to hear from any one who feels interested in the education of the heathen. We ask an interest in your prayers at a throne of grace, that God may aid us and crown our efforts with success.

J. W. LAMBUTH.

BOTTLES AND COOKS.—A well known member of the Norfolk circuit related to me that he once fell in with an elderly officer in the old Cambridge coach to London, who made inquiries concerning Robinson, the Baptist minister of Cambridge.

"I met him," said the stranger, "in this very coach when I was a young man, and when my tone of conversation was that universal among young officers, and I talked in a very free tone with this Mr. Robinson. I did not take him for a clergyman, though he was dressed in black, for he was by no means solemn; on the contrary, he told several droll stories. But there was one very odd thing about him, that he continually interlarded his stories with the exclamation, *Bottles and cooks!* This seemed so strange that I could not help at last asking him why he did so, saying that the words did not seem to improve his stories at all. 'Don't they?' said Mr. Robinson. 'I'm glad to know that, for I have used these words by way of experiment.' 'Experiment,' said I, 'how do you mean that?' 'Why, I will tell you; I rather pride myself on story-telling, and wish to make my stories as good as they can be. Now I observed that you told several very pleasant stories, and that you continually made use of such exclamations as—'etc. Now I can't use such words, for they are irreverent toward the Almighty, and, I believe, actually sinful; therefore I wanted to try whether I could not find words that would answer the purpose as well, and be quite innocent at the same time.'

"All this," said the officer, "was said in so good-humored a tone that I could not possibly take offense, though apt enough to do so. The reproof had an effect on me, and very much contributed to my breaking myself of the habit of profane swearing."—Crabb Robinson's Diary.

Five musical instruments have recently been discovered in Pompeii. A clarinet, one half silver and one half ivory, was one of the lot.

The Christian Advocate

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, JUNE 18, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—REV. LINUS PARKER, 112 Camp Street, New Orleans, La.
AGENTS—All the members of the patronizing Conference.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

The Editor of this paper having vacated the tripod (here called "chair of the succession") to make a journey North, it may be thought proper for the pro tem to make his salutatory. But as he is no caterer to stiff and formal conventionalities, he prefers entering on the duties of editor, new and grave as they are to him, as unostentatiously as possible; and, as the sequel will show, will resort more to the use of the scissors than the pen.

The editor promises a "correspondence," which will, in a measure, supply the loss the reader will experience in the usual supply of weekly editorials that are served by his ready and facile pen. Meantime the columns of the Advocate will be enriched by other correspondents, news from the churches, latest foreign and domestic news, markets, etc. The "diversity of tongues" may prove edifying in this instance.

Hoping and praying that our dear brother's Northern tour of one month will prove comfortable and rejuvenating, and that the pressure of three-fold care and duty centering in him being laid off, and that no harm may befall him, but in due time, and "renewing his youth," he may be returned to us under the protectingegis of Divine Providence; and that we may be able, by grace, to "supply his lack of service," we make our—courtesy.

CENTENARY COLLEGE.

There will be a meeting of the Board of Trustees and Visitors of Centenary College on Friday, July 1st, at Jackson, Louisiana.

J. C. KEENER,
President Board.

Mrs. ELIZA ELLEN HOWE.—We acknowledge the reception of a copy of the discourse preached in memory of this esteemed Christian lady. It was our privilege to know Sister Howe, and we can sincerely endorse the sentiments of her pastor, the Rev. Myron W. Reed, in the sermon before us. May the heavenly Father's tenderest care and grace minister comfort to the bereaved husband and children.

VIRGINIA FEMALE INSTITUTE.—The advertisement of this institute will be found in the appropriate column. It is located at Staunton, Virginia, in a most salubrious region, and has an able faculty. It will be seen by reference to the advertisement that the school has abundant testimonials from the most distinguished sources. The twenty-sixth annual session opens September 14, 1870.

DEATH OF YOUTHFUL CHRISTIANS

Our obituary department frequently records the peaceful and triumphant death of very young believers, some of them mere children, and others in more advanced youth. A sketch very beautifully and sweetly drawn appeared last week, and another of more than ordinary interest is published in the present issue. During our connection with this paper, for the past few years, we have been impressed with the numerous instances in which young believers have obtained the victory over the last enemy. Our younger readers, with ourselves, may find it profitable to pause and reflect upon the subject.

We have no sympathy with that merbid and misleading literature which associates early piety almost exclusively with an early death-bed. The sickly, and those who prematurely fall into the grave, are not the only religious children. Whether death loves a shining mark or not, there are a good many converted children who live to be old, and to serve God and the church by long and active lives of consecrated devotion. It is to be lamented that youthful piety should be thought of as generally connected with the feeble frame and the dying hour. Such piety is found in the flesh and blood of health, and is nowhere more attractive than in the strength and hope of youthful vigor. More good children live than die, we verily believe. Because a child is spiritually precocious, it does not follow that early death is inevitable.

The record of the triumph of young believers in the final hour is admonitory in part, inasmuch as it tells the story of youthful mortality. Death's richest and most abundant harvest is in the bud rather than in the maturity of human life. It is upon the bloom rather than the fruitage that his scythe is swung and his plow-share is driven. Of a congregation of children, such as our Sunday school anniversaries gather, what considerable proportion will pass the boundaries of adolescence? Not all will swell the ranks of the church which nurtures them. The world will claim some, a few will stray to other folds, but the grave will receive more than both of these.

The record also delivers an argument for youthful piety, for the possibility and genuineness of it. When the little child gives testimony on the death-bed, and when the youth of ten and fifteen years meets the inevitable hour with joyous welcome, we feel that there is a reality in the religious profession even of childhood. The young, at a very tender age, are capable of experimental religion. They may be born of the Spirit, and know that they are new creatures in Christ. There is much skepticism upon this point of a deep and conscious religious experience in childhood. Where profession is made, and reported as the fruits of revival grace, the matter is regarded with a grain of allowance. It may be youthful excitement, sympathetic emotion, or a sentimental apprehension of religion more sensuous than spiritual. Whatever it may be, it is hardly expected to last. Even Christian people sometimes discourage this early development of experience and profession. The experience which enables the tender boy and the timid girl to die calmly, and to enter "the valley of the shadow of death" with exultant raptures, must be authentic. There is neither self-deception nor mistake about it when such a test reveals no flaw. If the religion of childhood is real in death, why should it not be in life? Early religious experience, then, is vindicated.

The necessity of it may also be concluded. In the more advanced and the aged none but infidels question the need. In youth some may doubt. Yet the testimony of those who have been called in the morning of their lives to give up earth and time, is to the effect that all young people must have like support, or be surrendered to darkness and despair.

The adequacy of religion to sustain is also strongly exhibited. To

be called to give up life in youth is a severer trial than when the summons comes to the mature and the aged. Persons old enough to feel the afflictions and troubles of life, or the waste and inanition incidental to age, are, by their very circumstances, reconciled to the termination of their mortal career. With them the autumn and the winter have come, when nature unites with grace in smoothing the pathway to the grave. But in the springtime of life all the natural forces, all the instincts, tend to continuance in the present state. Like the vine whose roots strike deeper whilst every shoot and tendril cling and aspire, so the young take hold upon the present life. The physical senses are complete as avenues of pleasure, and the soul is especially open to the brighter visions of earth. Youth is the period of temporal hope and ambition, and the world is full of delights. The world of youth is a very different thing from the world of the old; almost as different as the dark and the bright side of the moon. We should say that it is hard for the young to die, and to give up this sunny existence for the repulsive and terrible conditions of the tomb. Here is really the greatest exhibition of grace, and the complete serenity and triumph over death is calculated to strengthen the faith of older people. It is not only true of our people, but also of our children, that they die well. A blessed halo to the heavenly ones, it is comforting and encouraging to all. True as it is of living childhood, the inspired declaration has a higher fulfillment in these youthful conflicts with death: that "out of the mouth of babes and sucklings thou hast perfected praise."

PERSONAL.

Dr. Dannelly, after an absence of some weeks in Texas, passed through the city on his return home to Baltimore, via Nashville. The doctor is a little bronzed by his exposure to the sun on the vast and fertile Texas prairies. He represents that it "will pay" any man to visit that great and growing State. He mentions the kind welcome and hospitality and aid for his worthy church enterprise which he received at the many places visited. From his account they kept him busy preaching, and when in transitu, if the railroad or stagecoach went no farther, the accommodating farmer did not hesitate to carry him on in buggy or ox cart, or take the horse from the plow to get him to his destination. Considering those things, we do not wonder at the cheapness with which he traveled. If Methodist preachers could find such treatment everywhere, the divine direction, in its most literal acceptance, might be followed: "Provide neither gold nor silver nor brass in your purses, nor scrip for your journey, neither two coats, neither shoes nor staves; for the workman is worthy of his hire."

May his promise, though it be conditional, to attend the camp meeting on the first Sunday in September, 1870, be fulfilled and realized.

Having preached so much, he reports himself hungry for the word, and devours it with avidity.

CHANGE OF NAME.

From the following paragraph it will be seen that the Memphis Advocate is about to assume a new name. We wish our cotemporary abundant success. It is one of our best church papers.

The change of name—from Memphis and Arkansas Christian Advocate to Western Methodist—seemed to be a necessity, and will be accepted as an improvement. At a joint meeting of the delegates of the patronizing Conferences the change was ordered, and subsequently sanctioned by the General Conference. The new name, to be formally assumed in a short time, we predict, will be very popular throughout all our bounds—it is even now cordially approved by best judges.

EAST ALABAMA COLLEGE.—A calendar of the commencement exercises of this institution will be found in the appropriate column. The commencement sermon will be preached by Rev. Dr. J. Hamilton, July 10.

GENERAL MINUTES FOR 1869.

The Nashville Christian Advocate says: After many vexatious delays and difficulties in procuring the Minutes of the Annual Conference, we have at length stereotyped this work for 1869. Some of the Conferences have excellent secretaries, and some have not. We have begged the Conferences to be more careful when they elect these officers, and that the Bishops will see that full answers to all the disciplinary questions are forwarded to the editor without delay. The connection has cause for gratitude in a net increase of 26,172 ministers and members, after deducting a decrease of 12,399 colored members, who, it is presumed, are for the most part reckoned in the Colored Conferences which the Bishops have been organizing. The following is the

GENERAL RECAPITULATION.

CONFERENCES.	Traveling preachers.	Superintending preachers.	Local preachers.	White members.	Colored members.	Indian members.	Total ministers and members.	Increase.	Decrease.

Increase.....	187	17	340	37,114	16,601	848	26,172
Decrease.....	12,399

The transferred preachers are reckoned with those of the Conferences to which they now belong. The nine Bishops are not counted; their addition would make the number of traveling preachers, including those on the supernumerary list, 2,842. The preachers who located this year (57) are not counted; on the other hand, the preachers who were admitted on trial (197), and those who were readmitted (57), are counted among the traveling preachers, though many of them are also reckoned with the local preachers. There are some members in China who are not counted, not being officially reported. There are defects in the Minutes of some of the Conferences which the editor vainly endeavored to supply. The preachers and members of the separate colored connection, which the Bishops are organizing agreeably to the provisions of the General Conference, are not counted here, as they have their own Minutes.

CHRISTIAN COURTESY.

The Presbyterian General Assembly, South, which recently convened at Louisville, Kentucky, adopted the following response to the fraternal salutations of our Bishops. It is an extract from the report of the Committee on Foreign Correspondence, of which Dr. Palmer was chairman.

In response to the resolution adopted by the Bishops of the Methodist Episcopal Church South, recently assembled in the city of Memphis, and transmitted to us through the Rev. Dr. A. H. Kerr, conveying their "Christian salutations to this General Assembly, with the expression of their profoundest regards, and with their most earnest prayers for the presence and blessing of God upon its deliberations," your committee recommend the following resolution:

Resolved, That this General Assembly recognizes in this fraternal greeting a beautiful illustration of that "unity of the spirit in the bonds of peace" whereby the different parts of the one catholic, visible church of the Redeemer represent to the world that amidst minor diversities they still have "one Lord, one faith, one baptism." And the Assembly hereby directs its stated clerk to transmit to the Bishops of the Methodist Episcopal Church South this cordial recognition of their generous Christian affection, with our fervent prayers that the labors of both the denominations participating in this correspondence may be owned and blessed by our Great Head in turning many to righteousness, and in hastening the day when "the kingdoms of this world shall become the kingdoms of our Lord and of his Christ."

What the Colored Ministers Have Done.

The New York Methodist announces that the question of lay delegation is carried, and that the advocates of the measure have an apparent surplus of thirty-five votes.

According to the returns published in that paper the Conferences within the former slave territory, including the Mississippi, Louisiana, South Carolina, etc., cast three hundred and fifty-two votes for the measure. Now it is evident that if one-third of these votes were cast by colored ministers—and there can be little doubt that such was the case—then the colored brethren have fixed lay delegation upon the Methodist Episcopal Church! Who will say, after that, the colored brethren are not a valuable acquisition to that church? Surely Dr. Curry will not.

MOBILE, June, 1870.

MAP OF ATTAKAPAS.

We acknowledge the receipt of this interesting and valuable publication. Colonel Dennett has rendered an invaluable service to the country by preparing this map and circular. The work exhibits much patient labor and accuracy, and is most creditable to the author. In the Planter's Banner of the eighth instant the editor gives an account of his enterprise and its completion.

At Last.—At last we have put our map and circular to press in the Banner office. We were not compelled to send to New York or Cincinnati to have this job done. Though not a fine job, it is substantial, and we think a good one. The electrotyping and stereotyping were done in New Orleans; the printing of the map and circular is being done in this office.

We think we have reason to be proud of this home effort at informing the world of the real character of Attakapas and St. Landry, the garden spot of the State and of the continent. We mapped this whole matter out in our mind more than a year ago, and we have labored incessantly to give our conceptions a local habitation and a name. The public now have it in the shape of our circular and map. We feel confident that this section of Louisiana is now better and more truthfully advertised than any other portion of the South.

COOPER'S WELL.

Among our new advertisements that of our friends, J. C. McAllister & Co., proprietors of that justly celebrated watering place, Cooper's Well, deserves special attention on the part of all seekers after health. We know of no mineral waters, North or South, which have so seldom failed to fulfill the expectations of those who have been induced to try them for the diseases for which they are recommended. It is sufficient to say of the accommodations at the Well that Mr. McAllister's large house in this city has always been crowded, in the business season, to its utmost capacity, without being able to accommodate half the applicants. He authorizes us to say that ministers of the gospel are invited to preach there whenever they can make it convenient. No charge will be made for the few days they may wish to remain, and their families will be taken at half price.

Death of Rev. James K. Stringfield.

We are greatly affected by the tidings of Bro. Stringfield's death. He was a young minister of rare worth, a scholar, a thinker and a devoted Christian. All that we have heard concerning the sad dispensation is contained in the following paragraph, from the Nashville Christian Advocate:

DEATH OF PROFESSOR STRINGFIELD. We are pained to announce the death of this gifted young minister. The Rev. John Boring writes us Asheville, North Carolina, June 8, 1870: "This note brings to you the sad intelligence that Bro. James K. Stringfield, of the Holston Conference, and professor in Asheville Female College, is no more of earth. He died last night at half-past eight o'clock, at the residence of his brother-in-law, Captain Jehu I. Ray. His affliction was short and severe—caused by the inflammation of the brain. But he died as I lived, full of faith, hope and love."

FLORENCE WESLEYAN UNIVERSITY. A notice of the examination at commencement exercises of this institution will be found in another column. The commencement program promises a rich treat. A sermon is to be preached by Dr. A. Young, and the literary address is assigned to the former prosid Dr. R. H. Rivers. We trust the bright day of prosperity is breaking upon the Florence University.

WE HAVE to acknowledge the receipt of an invitation from Mr. J. B. Carter, superintendent of the public schools of New Orleans, sixth division, to attend the annual oration now in progress, and regret that our departure from the city prevents our accepting it.

WASHINGTON CITY CHURCH.

Dr. Dannelly, the agent for Mount Vernon Place Methodist Episcopal Church South, has just returned to our city from an extended tour of two months in Texas. He is highly pleased with the people and country. He tells us that he traveled more than a thousand miles through the interior, preached thirty-nine times and delivered eleven Sunday school lectures in fifty-three days. His collections have not all been returned, and he cannot at present report the amount donated. The difficulty of travel in many places frequently detained him on his route, and he had finally to inclose his "appeal" to pastors of the various Conferences, requesting their aid in behalf of his enterprise. We trust his visit will finally be a great success. He speaks most flatteringly of the uniform kindness and marked attention which he received everywhere. He was passed free by public conveyance on railroads, and most of the stage and hotel bills were contributed to his mission. This was highly creditable to the railroad officers and public carriers of the Giant State, and as an act of generosity will be duly appreciated.

DEATH OF MRS. J. A. PARKER.

We deeply regret the death of the estimable lady whose decease is mentioned in the following note. Brother Parker has our sincerest sympathies in this greatest of sorrows.

Died, in Milton, Florida, May 31, 1870, MARTHA E. J. wife of Rev. James A. Parker, of the Montgomery Conference. Sister Parker was the daughter of Edward and Patsy Cullifer. She was born in Muscogee county, Georgia, July 30, 1840, and was married to Brother Parker October 2, 1856. The year following she professed religion and joined the Methodist Episcopal Church South, from which time she lived a consistent Christian until her death. A more extended obituary will be given in a few days.

A FRIEND.

THE ARROW.—The attention is called to the advertisement of this most superior and popular tie for cotton balos. Messrs. Barlette & Rayno are old merchants and experienced business men, widely known and universally esteemed. Planters and merchants needing the best article will find it to their interest to send their orders to these gentlemen. Their office is at 124 Carondelet street, New Orleans.

The Child's Corner.

CRADLE SONG.

BY E. R. MAXWELL.

Soft and low, soft and low,
The wind from the sweet south blows
Over the fields of clover white,
Over the June red rose.

Dip down! dip down! sweet wind of the
south,
And kiss my darling's rosy mouth.

Hushed and soft, hushed and soft,
The dawn of the twilight falls
Over the crest of the dimpled hills,
Over the castle walls.

Float in! float in! O soft twilight,
And close my darling's eyes so bright.

Fair young moon, silver moon,
Cradled in realms afar,
New-born queen of the regal night,
Crowned with a radiant star,

Look down! look down thro' the vine wreaths
now,
And crown my darling's snow-white brow.

Murmur low, sweet and low,
Stream of the silver tongue;
Sing the song of the dreamy tune
With the musical ripples strung.

Whisper it low in my darling's ear,
As you sing to the woods when the night
draws near.

Angel of sleep, softly sweep
Open the golden door
That shuts on the wonderful river of dreams,
With the dawn on its farther shore.

Clasp tightly my darling's milk-white hand,
And lead her through the enchanted land.

Safely watch, safely watch
Over my darling's rest;
Thou who wert once a tender babe,
Clasped to a mother's breast,

Lead my lamb o'er life's slip-tracked wold,
Safe and pure to the heavenly fold.

ABOUT MINNIE GOLDWING.

A TRUE STORY.—BY JULIA M. THAYER.

"O mamma," cried Rosa, with a little scream and a sudden rush across the room, "my birdie! my birdie! I do believe it is dead! See! it doesn't move at all, but remains perfectly still at the bottom of the cage!"

The cage was lifted down, and, true enough, there lay Minnie Goldwing, stiff and stark. Not a feather fluttered, the white claws were curled up pathetically, and the dear little beads of eyes were covered by the filmy lids.

"O, my pet! my dear, dainty darling! what shall I do, mamma?" and Rosa threw herself into mamma's arms, weeping violently; nor were mamma's eyes quite dry, if the truth be told.

Rosa was the first to speak. "Just yesterday," she murmured, mournfully, "sweet little Minnie was hopping about, singing so happily! such a tame little thing, and loved me so dearly! Mamma, what did she die for?" and floods of tears burst forth anew.

"Not certainly for want of loving care, Rosa; that is one comfort. You see there is a sweet drop at the bottom of every bitter cup, if you could only find it."

But Rosa refused to be comforted, and mamma held her close to her tender heart, feeling very sorry for her little girl; for she knew this was a real and bitter grief. At last she said:

"Come, darling, dry your eyes; you have other pets to love, and many precious things left to enjoy."

"Nothing like birdie," sobbed the child.

"There's Tina, the dear old kitten," "I would much rather it had been she," persisted Rosa.

"And a host of doll babies." "They are senseless, nonsensical things," cried Rosa. "O mamma, if she had ever so teeny weeny a soul, I wouldn't mind it; but now I can never, never have my darling Minnie again."

"Rosa," said mamma, thoughtfully, "in that bright hereafter, where all tears are wiped from our eyes, no good thing will be denied us."

"Who shall say that there your little birdie, your call, and warble come flying?" "For you?" Does its own sweet song—

"at my precious canary will be changed," then, said Rosa, smiling brightly through her tears; "a bird of Paradise!" and with that she slid softly down.

Rosa now seemed to find a mournful pleasure in preparing for the burial of her pet. First she explored her own little sanctum, and brought thence a small coffin box, prettily ornamented with a bright bouquet of flowers. She then searched mamma's bureau for a bit of soft white muslin, and a tuft of snowy cotton. The box lined and cushioned, Rosa, with a very sad face, laid in it the dead bird. Then she scraped and polished a piece of petrified wood, from her cabinet, for a headstone.

Not far from the house is a wild bit of land, in spring-time covered with violets and buttercups. There Rosa has consigned to mother earth many a dead bird and tiny quadruped. In this little cemetery lies one of Tina Velvet's victims, a dear little squirrel. Rosa placed this epitaph over him:

"BUNNY BRIGHT
Died of a kitten's bite,
Sept. 12th, at night."

And over a precious little dead mouse, taken out of a trap, she wrote:

"Minnie, you died
Your stomach to appease;
But all in vain—
You couldn't get the cheese."

There is another monument to the Unknown. Epitaph—

"Alone,
Unknown,
Here they lie,
Fast asleep—
Let us weep!
My!"

That last doesn't sound one bit like Rosa, however.

It is now a grave question with the little girl whether to bury Minnie in this sacred spot, or some distance away, in a little shaded square, formed by four beautiful flowering shrubs, on the lawn.

What mournful pleasure she takes in all these touching arrangements; and yet her loving heart is not satisfied. For a long time she has been sitting with a sheet of drawing paper before her, pencil in hand. Peeping over her shoulder, I see, O, such a beautiful picture! Surely there is inspiration—the inspiration of grief. Minnie lying in a little open flower-decked coffin; a lovely cherub at the head, and two others hovering above, dropping a garland upon her bosom; and near the foot, sitting all forlorn upon a stone, was the dearest little sprito, crying ready to break his heart.

Raphael might have done better, but Rosa's mamma declares that she shall think this the nicest picture in the world, even if she lives to be a thousand years old.

THE FARM AND GARDEN.

STEAM PLOWING.

The "Brinly," the "Watt," the "Avery," and the "Collins" plows of to-day are certainly a vast improvement on the "scoter," the "shovel," and the "bull tongue" of olden times. The former are as superior to the latter as the gorgeously furnished drawing-room car on a lightning express train is superior as a means of locomotion to the old stage coach jostling over a "dirt road" at the rate of three miles an hour.

But while we readily admit the progress that has been made, we regret to say that in this very matter of plowing we are as far behind our English cousins as the man who sticks to the "bull tongue" are behind those who use the "Brinly." In Great Britain we have seen it stated that there are now in constant operation over one thousand sets of steam plowing machinery, while as far as we know in the whole United States there are not more than half a dozen steam plows. Indeed, we only know positively of two, one in Louisiana on a sugar plantation, and the other somewhere in Illinois.

We claim to be a progressive people; we are certainly an inventive people, and yet in the first and most important work in the whole range of agricultural operations we can learn a useful lesson from the Pacha of Egypt, who cultivates three hundred thousand acres every year by steam machinery made in England.

A first rate set of steam plows, at a current cost of \$18 per day, can break, pulverize and subsoil from fifteen to twenty acres, stirring the earth to a depth of from fifteen to eighteen inches, doing the work of thirty horses, and doing it vastly better than horse power and manual labor could possibly do it, because the land is not trodden and packed by the sole of the plow and the horses' feet, but left in precisely the same condition as if it had been broken up with a spade to the depth of eighteen inches, which is the most desirable condition for the healthy growth of any crop, promoting easy drainage, admitting warmth, air and moisture, and affording an infallible preventive to the evil effects of drought.

But it will be said, "We cannot use a steam plow upon our stumpy, rocky land." That is true. But why should our land be either stumpy or rocky? Stumps can be stumped, and rocks removed; and extracted, and admit that it is a very troublesome and expensive process, yet we are satisfied that the gain in the area of arable land, the greater facility for improved culture, and the increase in production will in two years amply repay the cost.

If we calculate the cost of clearing an acre of land "in the old way"—that is, cutting down the trees and rolling and burning the logs—and then add the amount of annual loss from the untillable land occupied by the hideous stumps until they rot and fall away, and compare this cost with that of removing the stumps at once, and giving the whole surface to good, thorough cultivation, we are not at all sure that the latter mode of clearing is not the cheaper from the beginning.

We address ourselves, of course, to those who recognize the necessity of improved cultivation of our soil, and the desirability of substituting machinery and a minimum of

skilled manual labor for the mule and negro power of old times.

If our ground is left encumbered with stumps and rocks we must not only do ourselves the use of the steam plow, but we are also deprived to a great extent, and frequently altogether, of the advantages of improved turn plows and the subsoilers. If we cannot get rid of stumps and rocks we must continue to scratch along with a "twister," as patented by Elisha.

But again it will be said, "A set of steam plowing machinery costs \$6,000 or \$7,000, and what poor Confederate can afford such an outlay for a plow?"

We do not suppose that every farmer can own a steam plow "all to himself," nor, if he could, would it be necessary, except for the favored few who raise their one thousand bales every year. But the planters of a neighborhood could afford by combination to purchase one, paying for it in proportion to the extent of their arable land; and we believe that the sum which they now invest in plow-mules, corn and fodder would be more than enough to pay their share of the purchase money.

Take the case of a large planter who works fifty miles, representing a money value of \$12,500, the price of two sets of steam plow machinery. No fifty mules that ever were fabled will prepare his land as these steam plows will do it, nor can they do it in double the time. It will cost \$4,000 annually to feed these fifty mules, or within a fraction of \$10 per day. Calculate the cost of the laborers who drive the mules—we mean the wages while plowing—and it will be found that the inferior and slower process costs more than the thorough and rapid mode of preparing the land and cultivating the crop.

Mr. H. E. L. of Louisiana, in a report on steam plowing in his State to the Agricultural Department, gives the following estimate of the cost per day of working the machinery by which fifteen acres of the "tonghest and most sticky" land was "broken, stirred and torn up from fifteen to eighteen inches deep":

Labor of four men and one boy..... \$5 00
Fourteen barrels of coal, at sixty-five cents..... 9 10
Use of water cart and team..... 1 00
Oil, cotton-waste and packing..... 1 40
Current expenses per day..... 18 00

He describes the machinery as follows:

"Fourteen horse-power double cylinder traction engines, each having self-moving and reversing gear, water tanks, stercage, with road wheels twenty-two inches wide, winding drum, and patent, self-acting cooling gear, spuds, tools and tool boxes, with eight hundred yards of steel wire rope, one six-furrow balance-wheeled plow, and one seven-tine pulverizer and subsoiler balanced on wheels.

The engines are driven to the headlands, where they stand on opposite sides of the field, and haul those great balance-wheeled cultivators or plows back and forth at a speed of four miles an hour, or faster than a man can walk.

The engines, plows and the entire steam plowing machinery are worked and managed with the greatest facility, going over bridges and ditches, moving and turning as easily and speedily as a six-horse team. The old plantation hands very soon learn to run the machines, and after a few weeks are intrusted with the entire management, being divided and placed as follows: One man to each engine, who keeps the machine in order, does his own firing, greasing, etc.; two go with the steam plow, one to steer and one to aid in case of stumps or obstructions; and one boy with a cart and team, hauls the water and coal for both engines. Each engine consumes seven barrels of coal for a day of ten hours."

In some of the roughest and stiffest lands in England the steam plow is almost universally used, it being the practice there for a man who owns the machinery to go from farm to farm and do the plowing for twelve shillings (\$3) per acre, just like the men who own threshing machines and horse powers, who thresh the wheat and oats of a neighborhood at a specified rate per bushel.

We hope to see the day when the same practice will obtain throughout our country, when we shall have our land "broken, stirred and torn up" from fifteen to eighteen inches deep, and when the face of our fields will not be disfigured by stumps and rocks.—Southern Farm and Home.

The name of Francis Ronalds, the originator of the telegraph system, has lately received the honor of knighthood. To him, it is stated, belongs the merit of having first suggested and carried out the idea of communication with distant places by electricity. In 1816 he constructed a working telegraph, which he offered to the government, which at once rejected it. Mr. Ronalds, though an active devotee of science, is now in very advanced age.

Northern and Southern Presbyterianism.

The following is the majority report adopted by the Southern General Assembly in reply to correspondence and overtures from the Northern General Assembly.

CORRESPONDENCE AND RETURN WITH THE NORTHERN CHURCH.—On motion of Dr. Robinson, the report of the Committee on Foreign Correspondence was then taken up.

MAJORITY REPORT.

The Committee on Foreign Correspondence, to whom were referred the overture for reunion from the Old School General Assembly, North, of 1869, at its sessions in the city of New York; and also the proposition from the United Assembly of the Northern Presbyterian Church, now sitting in Philadelphia, conveyed to us by a special delegation, respectfully report:

That the former of these documents is virtually superseded by the latter; because the body by whom it was adopted has since been merged into the United Assembly, from which emanates a new and fresh proposal reflecting the views of the larger constituency. To this proposition, then—"that a committee of five ministers and four elders be appointed by this Assembly to confer with a similar committee of their Assembly in respect to opening a friendly correspondence between the Northern and Southern Presbyterian Church"—your committee recommend the following answer to be returned:

Whatever obstructions may exist in the way of cordial intercourse between the two bodies above named are entirely of a public nature, and involve grave and fundamental principles. The Southern Presbyterian Church can confidently appeal to all the acts and declarations of all their assemblies, that no attitude of aggression or hostility has been, or is now, assumed by it toward the Northern Church. And this General Assembly distinctly avows (as it has always believed and declared) that no grievances experienced by us, however real, would justify us in acts of aggression or a spirit of malice or retaliation against any branch of Christ's visible kingdom. We are prepared, therefore, in advance of all discussion, to exercise toward the General Assembly North, and the churches represented therein, such amity as fidelity to our principles could, under any possible circumstances, permit. Under this view the appointment of a committee of conference might seem wholly unnecessary; but, in order to exhibit before the Christian world the spirit of conciliation and kindness to the last degree, this Assembly agrees to appoint a committee of conference already appointed by the Northern Assembly, with instructions to the same that the difficulties which lie in the way of cordial correspondence between the two bodies must be distinctly met and removed, and which may be comprehensively stated in the following particulars:

1. Both the wings of the now United Assembly, during their separate existence before the fusion, did fatally complicate themselves with the State, in political utterances deliberately pronounced year after year; and which, in our judgment, were a sad betrayal of the cause and kingdom of our common Lord and Head. We believe it to be solemnly incumbent upon the Northern Presbyterian Church, not with reference to us, but before the Christian world and before our divine Master and King, to purge itself of this error, and by public proclamation of the truth to place the crown once more upon the head of Jesus Christ as the alone King in Zion. In default of which the Southern Presbyterian Church, which has already suffered much in maintaining the independence and spirituality of the Redeemer's kingdom upon earth, feels constrained to bear public testimony against this defection of our late associates from the truth. Nor can we, by official correspondence even, consent to blunt the edge of this, our testimony, concerning the very nature and mission of the church as a purely spiritual body among men.

2. The union now consummated between the Old and New School Assemblies North was accomplished by methods which, in our judgment, involve a total surrender of all the great testimonies of the church for the fundamental doctrines of grace, at a time when the recovery of these over error hung long in the balance. The United Assembly stands, of necessity, upon an allowed latitude of interpretation of the standards, and must come at length to embrace nearly all shades of doctrinal belief. Of those falling testimonies we are now the sole surviving heirs, which we must lift from the dust and bear to the generations after us. It would be a serious compromise of this sacred trust to enter into public and official fellowship with those repudiating those testimonies; and to do this expressly upon the ground, as stated in the preamble to the overture be-

fore us, "that the terms of reunion between the two branches of the Presbyterian Church at the North, now happily consummated, present an auspicious opportunity for the adjustment of such relations." To found a correspondence profitably upon this idea would be to indorse that which we thoroughly disapprove.

3. Some of the members of our own body were, but a short time since, violently and unconstitutionally expelled from the communion of one branch of the now United Northern Assembly, under ecclesiastical charges which, if true, render them utterly infamous before the church and the world. It is to the last degree unsatisfactory to construe this offensive legislation obsolete by the mere fusion of that body with another; or through the operation of a faint declaration which was not intended, originally, to cover this case. This is no mere "rule" or "precedent," but a solemn sentence of outlawry against what is now an important and constituent part of our own body. Every principle of honor and of good faith compels us to say that an unequivocal repudiation of that interpretation of the law under which these men were condemned must be a condition precedent to any official correspondence on our part.

4. It is well known that similar injurious accusations were preferred against the whole Southern Presbyterian Church, with which the ear of the whole world has been filled. Extending, as these charges do, to heresy and blasphemy, they cannot be quietly ignored by an indirection of any sort. If true, we are not worthy of the "confidence, respect, Christian honor and love" which are tendered to us in this overture. If untrue, "Christian honor and love," truthfulness and truth, require them to be openly and squarely withdrawn. So long as they remain upon record they are an impassable barrier to official intercourse.

The Yosemite Valley is said to afford the finest scenery known to man. It is only accessible at the lower end by two trails that abruptly descend two thousand feet. The walls for six miles are nearly vertical, and in some places are a mile in height, and are composed of pure white granite. But the crowning glory of the place is the Yosemite Fall, which in three leaps falls two thousand six hundred and thirty-four feet. There is no waterfall in the world to compare with this. Other falls are, the Bridal Veil, nine hundred and forty feet; Vernal, three hundred and fifty feet; Nevada, seven hundred feet; and Royal Arch Fall, eighteen hundred feet. The valley is only a mile and a half wide at the broadest part, and in most places is less than half a mile.

LITTLE LEWIE had been listening to the story of a poor blind man, when he interrupted the narrative by asking:

"Aunt Hattie, say, what is it? We man?"

"A blind man is one that can't see," said she.

"Can't he see at all, Auntie?" asked he. "He can see very dark, can't he?"

BROOKS' IMPROVED PATENT COTTON SCREW PRESS THE PATENTED BY R. M. BROOKS, OF TRIERS April 14, 1868.

It took the first premium in the Louisiana State Fair at New Orleans, April, 1868, and also in the Tennessee State Fair, at Memphis, and more recently at the Mississippi State Fair, at Jackson, and at the recent State Agricultural Fair at New Orleans, April, 1870. It is the most approved Cotton Press, embracing all the latest improvements from different sources of the Union, North and South.

The following is the certificate of the principal cotton factors and merchants of New Orleans. In our circulars can be the certificates of practical planters and scientific agriculturists from several Southern States in regard to the admirable practical working of this Press.

"We, the undersigned, purchased 100 3/4 bales, from Messrs. J. B. Jennings & Co. Rev. Bros. Revolving Cotton Screw Press, from our customers, and, so far as heard of, they have given entire satisfaction."

Moses Greenwood & Son, Warren, Atsey and Co., C. L. Walmsley, Dry, Musco, Clapp Bros. & Co., E. F. Golan & Co., 1840, Walker, Violet, Black & Co., Blocker Wright, Allen & Co.

Circulars, giving cuts, with full description, price list, etc., sent by mail on application to J. B. JENNINGS & CO., Proprietors, 14 Union Street, New Orleans.

GEORGE B. HOLZACH'S PATENTED IMPROVED This improvement relates to a simple manner of so arranging the shades that light and air can be admitted into the room through the upper part of the window without raising any portion of the shade; and when the window is turned up the combined screens its usefulness is evident in warm weather, where a good current of fresh air is so welcome, cannot be passed.

Parlors, dining rooms and bed rooms, it is especially in time of sickness, and this improved combination thoroughly ventilates and lightens the room, without the slightest inconvenience to the sleeper or tenant, or exposure to the passers-by.

It can be attached to any window with little alteration and at moderate expense. Orders solicited and promptly attended. State Rights for sale by

GEORGE B. HOLZACH, Inventor and Patentee, 61 Camp street, New Orleans.

Death of Rev. James K. Stringfield.

We are greatly affected by the

tidings of Bro. Stringfield's death.

He was a young minister of rare

worth, a scholar, a thinker and a

devoted Christian. All that we

have heard concerning the sad dis

pensation is contained in the follow

ing paragraph, from the Nashville

Christian Advocate:

DEATH OF PROFESSOR STANFIELD.

We are pained to announce the

death of this gifted young minister

The Rev. John Boring writes us

Christian Advocate.

SATURDAY, JUNE 18, 1870.

EPISTLES OF CHRIST.

Did Christ write any letters? and did we have epistles of James, John and Peter. But where are the epistles of Jesus? Christ was the founder of our religion and the great expositor of our faith, and one would naturally suppose that he would have left on record, somewhere, some great documents for the benefit of his followers. And so he has.

The epistle of Jesus, however, is written on paper or parchment, bound up with the rest of the sacred oracles. Of all true Christians it may be said: Ye are "the epistles of Christ."—Second Corinthians iii, 3.

Christ has chosen the living hearts of believers on which to write his glorious gospel. Thus when Jehovah would reveal his perfections to man, he sent his Son in the likeness of man, whose humanity seemed written all over with the glorious characters of divinity, whose heart of life seemed to glow with the fragrance of the heavens, and whose countenance seemed redolent with the fragrance of the skies.

But now, since Jesus is no longer with the world, he has left his disciples with the handwriting of God upon them, to be "the light of the world," and in Christ's stead to reveal the glory of the Father to his sons and daughters. When on earth Christ preached himself and God himself—not his opinions—ranked. And now Christ is manifest to his saints, to whom God would make known what the riches of the glory of this mystery among the Gentiles; "which Christ in you the hope of glory,"—Colossians i, 26, 28.

The gospel cannot all be put into books or letters, upon paper. Christ cannot be wrought into fine lines, nor embossed upon supererogatory books, nor painted upon gorgeous churches, nor carved upon men's crosses. It is upon the fleshy tablets of the heart that it is written. "The kingdom of God within you," said Christ to his disciples. As the law was in the heart of the covenant, so Christ is in the heart of the believer "the hope of glory." And thus was the promise: "Saith the Lord: I will put my law in their inward parts, and write it in their hearts."

Hence every Christian is bound, in his appropriate measure, to be a living, living and illustrating the spirit of the great Teacher. Every one should so live that he may be known and read of all men; that he has Christ formed and living within him. How glorious, and yet how responsible the work of the believer, to hold up Jesus to a dying world and to illustrate the divine nature. How sad if the epistle written in us should be so effaced and so faded as to give a defective or false picture of Christ to the world.

Nay, we all have grace so to display the handwriting of God on our hearts that others shall read it, understand and be saved by its power, grace and commonwealth.

How to BEGIN THE DAY.—Rise the lark, but not for one. Be careful to attire yourself neatly; dress, like our saviors, are all the better for a good dressing, to unmistakably before you do from your room; chins, like hers, should have their beards off before being permitted to grow. Start with determination agreeable and good-tempered, that, like an overwhelming fire, shall put you out. Should tea not be hot, take it cool; let the ham be salt, enliven the soporific bacon, and having made pleasant observations about the domestic felicity, the cup of happiness being full, and the butter rolling an actor in a fresh part, use it with the appropriate balance: "Let the toast pass," crack eggs and staid jokes simultaneously.

OTHER London house full of reminiscences has just been down—the old home of the mans, on the Green Hill, beted. In the large drawing room, Hooking its pleasant garden Moore, Lord John Russell, Lord Holland, Agnes and John Baillie, Sir Walter Scott and other celebrities of the early of the present century, used to sit last tenant was the late Burton.

once heard a speech before a company of new-school blacks as follows: "Children, you should be because it is so good to be bad, you should not be bad, because it is so good to be bad, you will feel as I do, you will feel as I do."

BELLS—BELLS.

CHURCH BELLS.

We are prepared to furnish Church Bells, of Steel Composition, having a rich, deep tone, at the following prices, which place it within the power of all Churches to be provided with a good Bell:

	Weight.	Wt. of Bell and mounting.	Price.
24-inch Bell...	250 lbs	400 lbs	\$65 00
30-inch Bell...	350 lbs	500 lbs	\$85 00
40-inch Bell...	500 lbs	1000 lbs	\$175 00
48-inch Bell...	1200 lbs	1500 lbs	265 00

These Bells are warranted for one year against breakage in ordinary use.

THOS. B. BODLEY & CO.,

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD.

NOW IN USE.

THE FASHION.

We call especial attention to this Stove, which has been produced at great expense, combining all the new and important improvements; also to the extra height of the Oven under the fire-chamber, the Patent Air-Chamber, Front Doors, and Patent White Enamelled Iron Kettle, the improvements in the covers and ceiling pieces, all of which have been copied by others. They are warranted to stand fire, or others sent out of charge in a case. We have all sizes of this just-arrived Stove, both

PLAIN AND EXTENDED BACKS.

The Extended Back with cast-iron Enamelled Reservoir and Patent Air-Chamber, Glass-Grated Cover, etc. The part of the top supporting the Reservoir is raised so that the fire is above the top plate, instead of below, as is the case in most of the Stoves now used, and the heat is forced direct against the whole surface of the bottom of the Reservoir. The Reservoir, being detached from the pipe, can be removed at pleasure, thereby turning a six-hole Stove, the best in use, as the back holes will heat as well or better than the middle ones. For sale by

G. W. W. GOODWIN,
62 Camp street.

ALSO, THE MOST

Complete and Perfect Cooking Stove

FOR RITCHIE'S COAL OR COKE

ever invented. In the estimation of all who have seen it. Patented in 1868.

THE MONITOR.

which can be seen at 62 Camp street. The advantages possessed by this Stove over all the other Coal Cooking Stoves are so numerous, and so patent to every sensible observer, that it is only necessary to examine it in order to be convinced of its superiority.

All of the above Stoves are fitted with extra large Oven Boilers lined with tin, and furnished with William Rogers' Patent Air-Chamber, sliding front doors, patent centres, covers and White Enamelled Kettles.

The operation of every Stove guaranteed. Directions for putting up and using same accompany each Stove.

STOVES, GRATES AND HOUSE FURNISHING GOODS.

The undersigned would call the attention of city and country buyers of Cooking Stoves to the following list of Stoves manufactured by Mr. M. L. Fliley:

The Philanthropist.

A first class Cooking stove, having all of the latest improvements that have so far been invented. Has a new arrangement for boiling and steaming. The casing is lighter than any Stove sold in this market. Sold under a full guarantee in every respect.

The Diamond Rock.

A Stove well known in this market. Thousands of this Stove are in constant use throughout the country, which is a very good recommendation. Sold under a full guarantee.

Besides the above named Stoves, I have on hand the celebrated Crown Plant, Chamber Oak, True Kettlemaker, Maid of Orleans, Queen of the South, and others, all of which I offer at a low price.

J. H. CAMPBELL,
no 13 6m 133 Poydras St., New Orleans.

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS

PUBLISHED BY

CHARLES SCRIBNER & COMPANY,
651 BROADWAY, NEW YORK.

GAY'S GEOGRAPHICAL TEXT-BOOKS.

Incomparably superior to anything published in America.

Introduction to the Study of Geography. Elementary Geography. Intermediate Geography. Common School Geography.

Gay's System is a complete and indolent by the most distinguished literary and scientific men of our nation, such as Prof. Agassiz, Dana, Tenney, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the best books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; in the cities of Cincinnati, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in the other Western States, with in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Gay's series has marked a new and better era in the presentation of geographical science, that by it the pupils of this generation will obtain a clearer, more definite and extended knowledge of the world on which they live, and that it is so systematically as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

PRILEY'S POPULAR SCHOOL ARITHMETICS.

First Lessons, (Illustrated). Primary Arithmetic, (Illustrated). Intellectual Arithmetic. Intermediate Arithmetic. Grammar School Arithmetic. Practical Arithmetic.

PROF. COOLEY'S WORKS ON NATURAL SCIENCE.

A Text-book of Chemistry. A Text-book of Natural Philosophy.

MEDICINE—MEDICINE.

KOSKOO.

THE GREAT REPUTATION.

which Koskoo has attached in all parts of the country

AS A GREAT AND GOOD MEDICINE,

AND THE LARGE NUMBERS OF TESTIMONIALS

which are constantly being received from physicians, and persons who have been cured by its use, is conclusive proof of its remarkable value.

As a Blood Purifier it has no Equal.

BEING POSITIVELY

THE MOST POWERFUL VEGETABLE ALTERATIVE YET DISCOVERED.

DISEASES OF THE BLOOD.

"The life of the flesh is in the blood," is a Scriptural maxim that science proves to be true. The people talk of bad blood as the cause of many diseases, and like many popular opinions this of bad blood is founded in truth.

The symptoms of bad blood are usually quite plain. Bad Digestion causes imperfect nutrition, and consequently the circulation is feeble, the soft tissues lose their tone and elasticity, and the tongue becomes pale, broad, and frequently covered with a pasty, white coat. This condition soon shows itself in roughness of the skin, then in eruptive and ulcerative diseases, and when long continued results in serious lesions of the Brain, Liver, Lungs or Urinary apparatus. Much, very much, suffering is caused by impure blood. It is estimated by some that one-third of the human family are affected with Scrofula in some form.

When the Blood is pure you are not so liable to any disease. Many impurities of the Blood arise from impure diseases of large cities. Eradicate every impurity from the fountain of life, and good spirits, fair skin and vital strength will return to you.

KOSKOO AS A LIVER INVIGORATOR

STANDS UNRIVALLED.

BEING THE ONLY KNOWN MEDICINE

that efficiently stimulates and corrects the hepatic secretions and functional derangements of the Liver, without debilitating the system. While it acts freely upon the Liver, instead of expending its force in gradually changing the discharges to a perfectly natural state.

SYMPTOMS OF LIVER COMPLAINT AND OF SOME OF THOSE DISEASES PRODUCED BY IT.

A sallow or yellow color of the skin, or yellow-brown spots on the face and other parts of the body; dullness and drowsiness, sometimes headache; bitter or bad taste in the mouth; internal heat; in many cases a dry, teasing cough; instead of appetite, sometimes sour stomach, with a raising of the food; a bloated or full feeling about the stomach and sides; aggravating pains in the sides, back or breast, and about the shoulders; constipation of the bowels; piles; distention, coldness of the extremities, etc.

KOSKOO!

Is a remedy of wonderful efficacy in the cure of diseases of the Kidneys and Bladder. In these affections it is as near a specific as any remedy can be. It does its work kindly, silently and surely. The relief which it affords is both certain and perceptible.

DISEASES OF THE KIDNEYS AND BLADDER.

Persons unacquainted with the structure and functions of the Kidneys cannot estimate the importance of their healthy action.

Regular and sufficient action of the Kidneys is as important, nay, even more so, than regularity of the bowels. The Kidneys remove from the Blood those effete matters which, if permitted to remain, would speedily destroy life. A total suspension of the urinary discharges will occasion death in from thirty-six to forty-eight hours.

When the Urine is voided in small quantities at the time, or when there is a disposition to Urinate more frequently than natural, or when the Urine is high-colored or scalding, with weakness in the small of the back, it should not be trifled with or delayed, but Koskoo should be taken at once to remedy the difficulty before a lesion of the organs takes place. Most of the diseases of the Bladder originate from those of the Kidneys; the Urine being imperfectly secreted in the Kidneys, proves irritating to the Bladder and Urinary passages. When we recollect that medicine never reaches the Kidneys except through the general circulation of the Blood, we see how necessary it is to keep the Fountain of Life pure.

KOSKOO

Meets with great success in the cure of

DISEASES OF THE NERVOUS SYSTEM.

Almost nine-tenths of our people suffer from nervous exhaustion, and are, therefore, liable to its concomitant evils of mental depression, confused ideas, softening of the brain, insanity, and complete breaking down of the general health. Thousands are suffering to-day with long-down nervous system, and, unfortunately, tobacco, alcohol, late hours, over-work, (mental and physical,) are causing diseases of the nervous system to increase at a fearful rate.

The symptoms to which diseases of the nervous system give rise may be stated as follows: A dull, heavy feeling in the head, sometimes more or less severe pain or headache; periodical headache, dizziness, noises originating in the head; confusion of ideas; temporary loss of memory; defection of spirits; starting during sleep; bad dreams; hesitation in answering questions; dullness of hearing; twitching of the face and arms, etc., which, if not promptly treated, lead to Paralysis, Delirium, Insanity, Impotency, Apoplexy, etc., etc.

KOSKOO

NEW ORLEANS MARKETS.

From the N. O. Price Current.
The general market has shown increased dullness since our last issue, every branch of trade participating in the prevailing apathy. Sugar has been in moderate request, with limited receipts, which have commanded steady prices. The movement in Western produce has been mostly confined to the local trade, and shown little animation, but some further sales of flour have been made for the French market, for which 8,000 barrels have been taken within the past ten days. There are orders pending here for both wheat and flour, which cannot be executed.

Accounts from the country show a marked change, and are decidedly unfavorable. From nearly every quarter we receive complaints of excessive rains, and the cotton being badly in the grass, with an insufficient supply of labor to clear it. The rice are also generally spoken of as doing serious injury, and several country editors are reducing their crop estimates. This, however, is no more than what might have been expected, and the crop may recover under a favorable spell of dry weather. Such contingencies should always be allowed for as probable, and show the folly of the extravagant estimates already made by the Northern press. The real question is not whether we shall make 4,000,000 bales, but whether or not there will be any excess over last year, or whether the increase in acreage will not be counterbalanced by less auspicious weather than last year.

The river is six feet eight inches below high water mark.

Corros.—The following are the arrivals since the tenth instant:

Louisiana and Mississippi bales	3303
Mobile	292
Florida	2
Texas	121
Total	3918

On Saturday, with an increased desire to realize, and a more copious supply, the movement showed a fair degree of animation, but at easier rates, the sales embracing 2,400 bales, at an irregular decline of $\frac{1}{2}$ to $\frac{1}{4}$ c., good ordinary closing at 18 $\frac{1}{2}$ to 19 $\frac{1}{2}$ c., low middling at 17 $\frac{1}{2}$ to 20 $\frac{1}{2}$ c., and middling at 20 $\frac{1}{2}$ to 21 c. On Monday, under the unfavorable Liverpool telegrams of Saturday evening, a falling off of $\frac{1}{2}$ c. at New York, and a decline of $\frac{1}{4}$ per cent. in foreign exchange, operations were partially suspended, and prices completely unsettled, the business being confined to 700 bales, and low middling closing nominal at 19 $\frac{1}{2}$ to 20 c. On Tuesday the market opened with few indications of an active movement, and up to noon the business was confined to a few hundred bales, but, factors evincing more anxiety to realize, and buyers finding that they could execute pending orders, the movement subsequently became animated, and resulted in sales of 2,900 bales, at an irregular decline of $\frac{1}{4}$ to $\frac{1}{2}$ c., showing a net falling off since Friday of $\frac{1}{2}$ to $\frac{3}{4}$ c. A considerable portion of the business was for France and Great Britain. We also heard of shipments by factors of 800 bales, reducing the stock accordingly.

This makes an aggregate for the past three days of 6,000 bales. The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 1,109,284 bales, against 789,108 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 740,752 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 373,755 bales to Great Britain, of 113,760 to France, and of 112,679 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	16 to 17
Good ordinary	18 to 19
Low middling	19 to 20
Middling	20 to 21
Strict middling	21 to 22

nation of the different classes will com-

mence on Thursday, June 23. The an-

nuual sermon will be preached on Sun-

day, the twenty-sixth, by the Rev. John

Wilkinson, of the Louisiana Confer-

ence. On Wednesday, June 29, com-

mencement day, the annual address

will be delivered by Major James S.

Ashton, of Shreveport. There will be

the usual concerts of music.

CHAS. B. STUART, President.

NOTICE.

To the Preachers in charge of the Cir-

cuits and Missions in the Lafayette Dis-

trict, Montgomery Conference.—DEAR

BRETHREN: Please send me, as soon as

possible, the number of official mem-

bers that will be likely to attend the

District Meeting to be held at Line-

ville, commencing on Wednesday night

before the third Sunday in July, so that

I can make arrangements for their ac-

commodation during their stay at Line-

ville. Address me at Lineville, Clay

county, Alabama. G. J. MASON.

CAMP MEETING.

A camp meeting will be held at Lin-

wood, DeKalb circuit, Macon district,

Mobile Conference, commencing on

Thursday night before the fourth Sun-

day in September.

To the preachers: Come, come, come

and help us! J. M. Gana, S. H. Cox,

W. I. Powers and A. J. Coleman will

please be sure to come.

The grounds will be greatly improv-

ed and enlarged.

U. L. THOMPSON, P. C.

LAFAYETTE DISTRICT MEETING.

The District Meeting for the Lafay-

ette district, Montgomery Conference,

will be held at Lineville, Alabama, com-

mencing on Thursday, July 14. All

the members are requested to attend

punctually. We hope to be favored

with the presence of one of our Bishops.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, JUNE 23, 1870.

NO. 23.

NEWS OF THE WEEK.

DOMESTIC.

MEMPHIS, June 11.—A terrible tornado passed over portions of Arkansas and Mississippi on Friday and Saturday, accompanied by a terrific hail storm, literally ruining the corn and cotton, and stripping the trees in the woods. It rose near Council Bluffs, crossed the river at Peters' Landing, extending down as far as Bolivar, a width of two miles. As far as heard from no lives were lost, but the damage to the crops is immense.

WASHINGTON, June 21.—The Reconstruction Committee reported a bill for full and general grace, amnesty and oblivion of certain wrongful acts, doings and omissions connected with the late rebellion.

It excludes persons educated at West Point or Annapolis, members of Congress before the rebellion, heads of executive departments, judges of Federal courts or foreign ministers before the war, signers of ordinances of secession and Government of States during the rebellion.

Persons who treated cruelly Federal prisoners; persons who held Federal moneys and property at the commencement of the war and have not made restitution; and all deserters from the Federal army or navy.

The bill was ordered to be printed and re-committed.

The Secretary of the Interior telegraphed Red Cloud that the government had finally consented to give his party the seventeen horses he asked for.

Red Cloud telegraphed back that his heart had been made very big.

Mr. Banks, the chairman of the Committee on Foreign Affairs, reported a joint resolution directing the President to maintain a strict and impartial neutrality between the people of Cuba and the government of Spain, and directs the President to remonstrate against the manner in which the war in Cuba is waged.

CHICAGO, June 14.—The Ute Indians, heretofore most friendly, threaten war with a force of ten thousand warriors. Their chief, Callaras, was killed by the braves for discouraging them with big stories about the power of the whites. Many farmers along the Kansas Pacific Railroad are selling out and leaving.

WASHINGTON, June 22.—The internal revenue receipts for the present fiscal year will reach \$180,000,000, which is a great excess over previous years and Boutwell's estimates, and the agricultural report for the current month of cotton.

Cotton growers seem determined this year to reduce the price of cotton to fifteen cents, with every prospect of doing it. The acreage is materially increased in every State, while that of wheat and probably corn, though the county estimates for the entire country do not come in until July 1, has decreased. If the neglect of all other interests can only be cured by cheap cotton, the sooner the reduction comes the better. The condition of the growing crop in North Carolina is good; in South Carolina cotton is looking well, except that some complaint is made of bad stands; in Georgia it is late and smaller than usual from the effects of a drouth of five weeks, which terminated May 25—the crop is now growing vigorously.

The dry term was shorter in Florida and Alabama, and the cotton is generally in good condition. Reports from Mississippi are still more favorable. In Texas parish, Louisiana, where the greatest cotton yield was made in 1869, the condition of the crop is twenty per cent better than last year, and the average is increased one-fifth. From Texas comes a report of a backward spring, with cotton late, but thrifty and promising.

No State makes a more favorable return than Arkansas, the average condition of cotton being better than last year at this time, a fact desirable and gratifying in itself, but of no controlling force in the determination of the ultimate result, as last season was unpropitious to August, and afterward favorable to an almost unexampled degree—a tenth of the cotton being due to extreme length and propitious character of the autumnal season. The average of sea island cotton in Texas has been increased.

St. Louis, June 22.—About one hundred and fifty Chinese arrived here to-day en route for New Orleans.

Late letters from the plains report that nearly all the young Indians belonging to the Arapahoe and Cheyenne tribes, below the Arkansas river, are on the war path.

Several trains have been captured and a number of white men killed. It is very dangerous for trains, mail parties, or anybody else to travel below Fort Dodge.

FOREIGN.

LONDON, June 14.—It is rumored that the remains of Charles Dickens will be brought to London to-day, the family having consented to their burial in Westminster Abbey.

Mr. Dickens left a fortune of eighty thousand pounds sterling.

LONDON, June 14.—In the House of Commons, to-day, Mr. Gladstone urged a consideration of the educational bill.

The archives of the English embassy at Constantinople were saved from the recent conflagration. The embassy has moved to a village on the Bosphorus, seven miles from the city.

The university bill was resumed in the House of Commons, and an amendment relieving doctors from subscribing to the formalities of faith was rejected. Several other measures were advanced to a reading, and the House adjourned.

Business in the House of Lords to-day unimportant.

A fraction less than five inches of rain fell throughout England to-day.

The ship Wardenlaw, from Sunderland for New York, was abandoned at sea.

The Prince of Wales declines to offer a cup for a yacht race, unless the American yachts compete.

Some rain is reported in the interior counties within a day or two.

LONDON, June 14.—The British gunboat Chney lost in the China sea. Forty-three of the crew perished.

MADRID, June 14.—Bannells, one of the English captives, was rescued from the brigands. Four Spanish soldiers shot during the engagement.

MADRID, June 14.—Prim denies the reported attempt to raise money in America by hypotheating Cuban revenues.

VIENNA, June 14.—Baron Von Benst is slowly recovering from his recent illness.

PARIS, June 14.—The emperor is suffering from the gout. His condition causes much anxiety on the bourse.

MADRID, June 14.—It is rumored that a document containing Queen Isabella's abdication has been received here.

Assurances have been given that the government will restore to Isabella the jewels purchased with her own money.

ROME, June 16.—The discussion on the last chapter of the infallibility dogma commenced to-day.

BOMBAY, June 16.—To-day's dispatches from Hong Kong announce that several vessels were dismantled by the recent typhoon.

A sharp earthquake occurred at Yokohama.

LONDON, June 21.—A meeting was held here last night to promote Christian unity, at which Lord Eliot presided. Speeches were made urging harmony among religious sects. Appropriate resolutions were adopted.

ROME, June 21.—Fifteen cardinals will be selected from the fathers who have been most active in support of papal infallibility by the consistory, to assemble immediately after the adjournment of the council, which is now postponed to the sixth of July.

LONDON, June 21.—The king officially received the new American minister a few days ago.

On Thursday there was an immense demonstration there in favor of General Saldanha—twenty thousand persons being present.

LONDON, June 21.—The Bishop of Manchester delivered an address last evening to the Educational Aid Society of his diocese on the educational bill.

He approved generally the provisions of the new bill now pending in Parliament, and expressed the hope that an amendment would be adopted making education compulsory.

LONDON, June 22.—The deaths by the accident on the Great Western Railway now number seventeen. Three of the bodies remain unrecognized. All who were injured are doing well, except one, who it is thought cannot recover.

A collision occurred to-day between two excursion trains, near Newcastle, in which several persons were injured, two badly. None killed.

Zurich, June 22.—The Nenfchotel Council voted by a large majority in favor of the separation of church and state.

TEMPERANCE ITEMS.

WHAT LIQUOR SELLING DOES.—It destroys home comforts, blights happiness and hope, wastes millions of productive capital; begets poverty, produces paupers; necessitates poor houses, jails, prisons, fills them to repletion, multiplies taxes, ghasts the courts with criminal cases, sends multitudes to untimely graves, and to crown all its mischief, digs down the very pillars of order and morality on which the structure of society rests. If such a business is not an offense against public welfare, what in the name of reason is? It is the fostering parent of all other crimes. Murder is its own child; brawls, arson and robbery are its offspring. Justice requires that it be branded the Father of Crimes.

The Philadelphia Commercial List says that a new process has been discovered by which sulphuric acid is used to greatly increase the amount of whisky produced from a given quantity of corn, giving a still more dangerous and poisonous article than under the old methods. When put through the usual course of rectification it corrodes and destroys everything with which it comes in contact, and an alcohol manufacturer, in attempting to distill it, discovered that it rusted the copper still to such an extent that the fluid which came forth was highly impregnated with copperas. If a copper still cannot withstand this article, how can a top's stomach be expected to hold out very long?—*Advance.*

The New York Times is of the opinion that large numbers of women in this country are rendered imbricated by the use of "bitters." It says they take them at first innocently, for some real or fancied ailment, and awaken a craving for them that leads to ruin. The victims of bitters are chiefly women, "for when men want to drink they find plenty of opportunities for doing it openly. They can ask for 'whisky over a counter without exciting scandal. But a woman cannot walk into a bar-room and call for Bourbon or rye. It is for her, therefore, that the great proportion of bitters, under all sorts of fanciful names, are scattered broadcast over the land." In allusion to this statement the Guardian testifies to the knowledge of a family high in social position, where one daughter has died of delirium tremens, and another has had an attack of the same disease.—*Advance.*

Dr. W. W. Hall tells this true story of a man who had accumulated a fortune by hard work and unrelenting attention to business:

At fifty years of age he retired from business with an ample fortune. Before he was sixty, in fact in about five years, he died a degraded, drunken sot. Having nothing to do, time hung heavily. Being in perfect health he had a good appetite—indulged it, and set around the house, lolled on the sofa, took "naps" in the day time, and as a result did not sleep well at night; taking but little exercise and eating heartily, he soon began to suffer from indigestion or dyspepsia; after each meal he would feel full, oppressed, uncomfortable, and to relieve himself, at the suggestion of a friend, he took a "sip of brandy"; he felt better; next day, he took another; then a little more; soon he took it three times a day; then before meals as well as after, with the result already detailed. Thus it is that this side of heaven no man is safe from a drunkard's grave, except him who never tastes a drop of liquor. It might have been thought that fifty years of abstinence would have been a perfect guarantee against a vice so degrading, but it was not.—*Advance.*

Dr. Osborn, in Outlines of Wesleyan Bibliography, states that six hundred and twenty Wesleyan ministers have aspired to the honors of authorship, the result being two thousand five hundred and fifty-four different publications. This number does not include the publications of the Wesleys themselves. Of the two thousand five hundred and fifty-four works here catalogued, five hundred and ninety-four are sermons, three hundred and twenty are biographies, three hundred and eighty are controversial or polemical publications, and five hundred and thirty-nine are treatises on various subjects. Ninety-nine poetical publications are also included. The number of historical publications is only eighty-seven.

Gloomy sorrow is the sorrow of love; the melting of the heart. Love is the pain and pleasure of a mourning heart.

HEALTH HINTS.

THERE is no doubt that "man's own breath is his greatest enemy," and every precaution should be taken to prevent its inspiration after it has once passed from the lungs. The report of Dr. Stiles contains the result of much original research, and displays a zeal in the service of good health, and an amount of exhaustive labor that is worthy of the highest commendation, and his results and statistics ought to be published in permanent form for the consultation and warning of all classes of society. The amount of carbonic acid produced by respiration has been variously estimated, but Dr. Stiles puts it at the rate of one thousand and thirty-two cubic inches, or three-fifths of a cubic foot, per hour. From this the ratio of vitiation of the air in a given space can be easily computed. "Every hundred persons would vitiate in three hours forty-two thousand cubic feet of air to the extent of 4.3 per cent. of carbonic acid, or eighteen thousand cubic feet, to the injurious proportion of one per cent. of carbonic acid."

A WALK, to be most beneficial to the health, should be performed in the open air. Many students walk in their rooms, and doubtless derive advantage thereby. Out-door exercise in walking is health-involving. When slowly pursued, it may be enjoyed by the invalid and the aged. The rapid walk is a more vigorous exercise, and adapted to men in health, who would keep well; though they, too, may be benefited by a slower gait, especially after dinner, or considerable fatigue. To gain the most benefit from walking, it should not be practiced to gain a prize in the style of a Weston, for such a use of the powers of locomotion is too rapid for health; and then the mind is also in a constant state of anxiety as to the result.

CHILDREN, if not too delicate, should be used from infancy to the cold bath every morning, and while in the water they should be kept in action. When a child habitually cries on being washed, or put into a cold bath, the mother may be assured it is her own fault. The remedy is to be quick, brisk and cheerful, provoking laughter instead of tears.

It is a well-known fact that people who habitually breathe through the nose are less liable to infectious diseases and pulmonary complaints. One very common benefit derived by such who sleep with the mouth closed is, that they never awake with the painful and disagreeable sensation produced by a parched throat and cracked lips. This may be a small matter, but it is deserving of attention. When we break nature's laws we must pay the penalty.

THE DOGMA OF INFALLIBILITY.—The Pall Mall Gazette says the printed scheme of infallibility contains these five canons—each of them, of course, enforced with a curse:

"1. If any one should say that the episcopal chair of the Roman Church is not the true and real infallible chair of blessed Peter, or that it has not been divinely chosen by God as the most solid, indestructible and incorruptible rock of the whole Christian Church, let him be anathema."

"2. If any one should say that there exists in the world another infallible chair of the truth of the gospel of Christ our Lord, distinct and separate from the chair of blessed Peter, let him be anathema."

"3. If any one should deny that the divine magistrature of the chair of blessed Peter is necessary to the true way of eternal salvation for all men, whether faithful or faithful, whether laymen or bishops, let him be anathema."

"4. If any one should say that each Roman pontiff, legitimately elected, is not by divine right the successor of blessed Peter, even in the gift of the infallibility of magistrature, and should deny to any one of them the prerogative of infallibility for teaching the church the word of God pure from all corruption and error, let him be anathema."

"5. If any one should say that general councils are established by God in the church as a power of feeding the divine flock in the word of faith superior to the Roman pontiff, or equal to him, or necessary by divine institution in order that the magistrature of the Roman bishop should be preserved infallible, let him be anathema."

If we put off our repentance to another day, we have a day more to repent of, a day less to repent in.

COURSE OF STUDY.

FOR ADMISSION ON TRIAL.—The Bible, in reference to doctrines generally; Wesley's Sermons on Justification by Faith, and on the Witness of the Spirit; Book of Discipline; the ordinary branches of an English education.

FIRST YEAR.—The Bible, in reference to its historical and biographical parts, and its chronology; Book of Discipline, with special reference to chap. 1, sec. 1 and 2; Manual of Discipline, chaps. 1 and 2; Wesley's Sermons, vol. 1; Ralston's Elements of Divinity; Watson's Institutes, part 4; Written Sermon on Repentance.

Books of Reference.—Watson's Biblical and Theological Dictionary; Theological Compend; Fletcher's Works; Watson's Life of Wesley. SECOND YEAR.—The Bible, in reference to its prophetic parts; Wesley's Sermons, vol. 2; Watson's Institutes, part 3; Smith's Elements of Divinity; Book of Discipline, with special reference to chaps. 2, 3 and 4; Manual of Discipline, chaps. 3 and 4; Coppee's Rhetoric; Written Sermon on Justification by Faith.

Books of Reference.—Newton or Keith on the Prophecies; Angus' Handbook of the Bible; Claude's Essay on the Composition of a Sermon; Watson's Sermons; Bicknor's on the Spirit of Life.

THIRD YEAR.—The Bible, in reference to the Life of Christ; Wesley's Sermons, vol. 3; Watson's Institutes, part 2; Edgar's Variations of Popery; Book of Discipline, with special reference to chap. 5 to the end; Manual of Discipline, chaps. 5, 6 and 7; Written Sermon on the Witness of the Spirit.

Books of Reference.—Young's Christ of History; Neander's Life of Christ; Hickok's Mental Science; Vinet's Pastoral Theology; Steven's History of Methodism; Paine's Life of McKendree; D'Aubigne's History of the Reformation.

FOURTH YEAR.—The Bible, in reference to the Acts and Epistles, their analysis and design; Wesley's Sermons, vol. 4; Watson's Institutes, part 1; Powell on Apostolical Succession; Rivers' Moral Science; Mosheim's Church History; Sumner on Baptism; Book of Discipline, chaps. 8 and 9; Written Sermon on Regeneration.

Books of Reference.—Butler's Analogy; Bingham's Antiquities; Hickok's Moral Philosophy; Hopkins' Homiletics; Wall on Infant Baptism; Liddon's Church of Christ; Neander's Church History; Liddon on the Divinity of our Lord; Conybeare and Howson's Life and Epistles of St. Paul.

COMMENTARIES.—Clarke's, Watson's Exposition, Wesley's Notes, Sumner on the Gospels, Stier's Words of the Lord Jesus, Lange on the New Testament, Olshausen on the New Testament, Bloomfield on the New Testament, Macknight on the Epistles, Henry's Exposition, Whitby's Commentary.

NOTE.—The examination will be confined to the course of study. The books of reference are recommended to be read, and the commentaries to be consulted.

H. N. McTYMME, Sec. of the College of Bishops.

THE ART OF THINKING.—One of the best modes of improving in the art of thinking is to think over some subject before you read upon it, and then to observe after what manner it has occurred to the mind of some great master. You will then observe whether you have been too rash or too timid, what you have omitted and in what you have exceeded, and by this process you will insensibly catch a great manner of viewing a question. It is right, in study, not only to think when ever an extraordinary incident provokes you to think, but from time to time what has passed; to dwell upon it, and to see what trains of thought voluntarily present themselves to the mind. It is a most superior habit of some minds to refer all the particular truths which strike them to other truths more general, so that their knowledge is beautifully methodized; and the general truth at any time suggests all the particular exemplifications, or any particular exemplification at once leads to the general truth. This kind of understanding has an immense and decided superiority over those confused heads in which one fact is piled upon another without the least attempt at classification and arrangement. Some men always read with a pen in their hand, and commit to paper any new thought which strikes them; others

trust to chance for its reappearance. Which of these is the best method in the conduct of the understanding, must, I suppose, depend a great deal upon the particular understanding in question. Some men can do nothing without preparation; others little with it; some are fountains, others reservoirs.—*Sydney Smith.*

REMARKABLE RAINS.

There are, sometimes, real showers of very unusual rain. It is stated by an old writer that in Lapland and Fimmarmark, about a century ago, a peculiar kind were known to fall from the sky; and that such an event was sure to be followed by a good year for foxes. A shower of frogs fell, near Toulouse, in 1804. A prodigious number of black insects, about an inch in length, descended in a snow storm at Pakroff, Russia, in 1827. On one occasion, in Norway, the peasants were astonished at finding a shower of rats pelting down upon their heads. Showers of fishes have been numerous.

At Stanstead, in Kent, in 1866, a pasture field was found one morning covered plentifully with fish, although there is neither sea nor river, lake nor fish pond near. At Allahabad, in 1839, an English officer saw a good smart down-pour of fish, and soon after thousands of small dead fish were found upon the ground; at Islay, in 1830, when a large number of herrings were found strewn over a field after a heavy gust of rain; at Wick, much more recently, when herrings were found in large quantities in a field a mile away from the beach—in all these, and numerous other cases, when a liberal allowance has been made for exaggeration, the remainder can be explained by well understood causes.

Stray winds blowing from the sea or river; a waterspout licking up the fish out of the water; a whirlwind sending them hither and thither—all these are intelligible. The rat shower in Norway was an extraordinary one: thousands of rats were taking their annual excursion from a hilly region to the lowlands, when a whirlwind overtook them, whisked them up, and deposited them in a field at some distance, doubtless much to the astonishment of such rats as came down alive. The so-called showers of blood have had their days of terror and marvel, and have disappeared; not that any one ever saw such a shower actually fall, but red spots have occasionally been seen on walls and stones, much to the popular dismay. Swammerdam, the naturalist, told the people of Hagne, two centuries ago, that those red spots were connected with some phenomena of insect life, but they would not believe him, and insisted that the spots were real blood, and were portents of evil times to come. Other naturalists have since confirmed the scientific opinion.

FIFTEEN GREAT MISTAKES.—It is a great mistake to set up our own standards of right and wrong, and judge people accordingly. It is a great mistake to measure the enjoyments of others by our own; to expect uniformity of opinion in this world; to look for judgment and experience in youth; to endeavor to mold all dispositions alike; not to yield in immaterial trifles; to look for perfection in a fallen world; not to aim at perfection in our own actions; to worry ourselves and others with what cannot be remedied; not to alleviate all that needs alleviation, as far as lies in our power; not to make allowance for the infirmities of others; to consider everything impossible which we cannot perform; to believe only what our finite minds can grasp; to expect to be able to understand everything. The greatest of all mistakes is to live only for time, when any moment may launch us into eternity.

WITHOUT CHRIST.—Dear reader, did you ever consider the import of that apostolic expression? Only two words, a preposition and a noun—the idea contained has magnitude and importance not easily measured. The words are descriptive of what every Christian on earth, and every redeemed soul in heaven were; and also of what every unbeliever on earth and every lost soul in the world of woe now are—"without Christ." Those best understand the meaning of the phrase who have passed through the trials of life "without Christ," who have died "without Christ," who are passing their eternity "without Christ." But none of them are here to give the explanation. What are the facts as we know them?

The Christian Advocate.

SATURDAY, JUNE 25, 1870.

MY CROON.

BY MRS. C. L. SHACKLOCK.

With morning's early dawn
I wake, with such a weary sense of loss,
And with deep sighs take up the heavy cross,
For then, my child, art gone.

In the sweet time of old
It was thy wont to win me from my rest
With fond endearments, kisses warmly
pressed
By lips which now are cold.

Thy little garments lie
Motionless, tenantless; the sunshine seems,
As on our lonely, silent room it beams,
A solemn mockery.

And all the weary day
I miss thy pleasant prattle, joyous song,
Thy sunny smile. Ah me! the hours are
long.

My boy, with thee away.
And O! when fades the light
My heart cries out for very loneliness!
I miss the bounding step, the fond caress,
The prayer and sweet good night.

There is no white-robed form,
No the beloved ones of Father,
Kneeling, with clasped hands and veiled
eyes;

Then nestling, safe and warm,
Close to my bosom pressed,
The dimpled hand clinging so lovingly,
The golden head, where it was wont to lie,
Sinking to peaceful rest.

When from sad dreams I wake
The silence thrills my heart with sudden
pain;
And the long hours are filled with yearning
vain
And weeping, for thy sake.

My pleasant cares are o'er,
Childless! with all this wealth of mother love
Crushed back upon my heart—thy home
above,
Mine, joyful nevermore.

My day star hath gone down
In utter darkness; but my heavy cross
I strive to bear; perchance my earthly loss
May win a heavenly crown.

Letter from Shreveport District.

MR. EDITOR: If the old adage,
"variety is the spice of life," be
true, then is our life greatly well
spiced. In our work we have a variety
of people, politics, churches,
religion, country and climates.

Fort Jessup, a military post in
Sabine parish, the site of one of our late
quarterly conferences, presented ob-
jects and specimens which excited
feelings of reverie, sad and pleasing.
Here are decaying foundations of
houses, once occupied by Generals
Jessup, Manning, Twigg and Z.
Taylor; and here are plains once
alive with United States troops;

these have passed away, and only
one, here and there, can answer such
questions as a visitor would natu-
rally ask. The only evidence left
of science and experiments is the
clover and Bermuda grass pastures
upon these sandy plains. Though
twenty years unoccupied, where it
has been inclosed they have the
finest pastures, where the masses
dig for cotton and corn alone, not
seeming to know that they can have
green pastures, yielding plenty of
the richest of milk and butter.

We have been for some days in
pursuit of early Methodism as given
by Stevens, and find many incidents
related opportune for one in the
succession and actually in service.
The motto of Mr. Wesley, "ever be
in haste, but never be in a hurry or
anxious," is one of the first mag-
nitude. This we would recommend
to the brethren generally, if they
will not think it presumption in one
so young to give advice. Perhaps
the greatest amount of the wear and
tear, nervous debility and prostra-
tion are the result of anxiety—cross-
ing bridges before getting to them.
Let every moment occupy itself, and
be satisfied with its occupation. We
were not a little surprised to find
that Mr. Wesley, more than a hun-
dred years ago, refused to send his
preachers where the people would
not support them. I am not sure
that the church generally, to this
day, mistake his views upon the sub-
ject of the support of the ministry.
There never was a man who paid
more attention to finance, and who
adopted better methods of raising
money. The fact is, his first design
was to raise weekly collections, and
that every one, however poor, might
pay something; and we hope, when-
ever the class meeting is revived in
the church, that the penny collec-
tion will not be left out. While
upon this subject, it seems to us
that there is a radical defect either

in the plan of supporting the min-
istry or in its execution. The idea
prevails that preachers have always
traveled and preached, and always
will. In these rounds we were
struck with the novel idea of a Mr.
H., in reference to an early itinerant
minister who used to come to his fa-
ther's house to shug, pray and preach.
He thought that he came down from
above for that purpose. When he
left, he would follow and track his
horse to see where he left the road
and went up. Query, Are there
not those yet who believe that
preachers live on angels' food?
Presiding elders, perhaps, learn more
of the wants and necessities of the
preachers than others. One of the
preachers on my district told me
that, on one occasion, he ran short
of provisions, but still thought his
stewards would think and act in
time to relieve him. Being timid,
he would say, when interrogated,
"Well, I'm getting along so-so,"
till, on one occasion, he was forced
to say: "To-day we have neither
meat nor bread; we breakfasted on
clabber." We are proud to say this
did not occur on Shreveport district.
We would remind circuit stewards
that "so-so" preachers are not un-
common; they don't like to tell
their poverty. One peculiar charac-
teristic of Methodism is, it prepares
its people to die. Its early minis-
ters and disciples labored, toiled
and suffered, but in death they were
triumphant. This is, in our estima-
tion, not one of its least commendations.

The advocates of the cause of
temperance are still at work, but the
tide to be turned is impetuous. It
is enough to stir their souls to see,
as we have, young men, scarcely out
of their teens, with long bottles in
shallow pockets, staggering into the
church. The involuntary inquiry is,
What can be done to save the
youth of the land from the accursed
habit of drunkenness?

We occasionally meet with old
Methodists who have been living in
this country for forty and fifty years,
and are familiar with the names of
Westerland, Douglass, Bilbo and
Stevenson, preachers who traveled
here in the days of yore; and yet
the resources of the country have
not developed scarcely in any par-
ticular.

There is much talk of a railroad
connecting this country with the
city, which would, doubtless, devel-
op its resources more in twelve
months than they have been for the
last half century.

The spiritual condition of the
church is not what it ought to be;
but the preachers are hopeful, and
seem determined to make every pos-
sible effort for the cause of religion.
Protracted and camp meetings are
much talked of and looked to by all,
when we shall have times of refresh-
ing from the Lord. J. P.

PIONIC.

MR. EDITOR: There is a charm
in the word—the young heart is spell-
bound at its mention. Such oc-
casions are often signalized as times
of dissipation and merriment not
in accordance with the laws of hygiene,
or the exacting law of our merciful
heavenly Father, who prescribes:
"Let your moderation be known to
all men," and "whatsoever ye do,
whether in word or deed, do all in
the name of the Lord Jesus."

Recreation is necessary, healthful,
and in accordance with the divine
economy. Our recreations should
be of the sort and measure as to
minister to cheerfulness and con-
tentment—keeping in view that
the ordinary restraints associated
with close application to labor and
study are thrown off, but that we
have not abandoned our gentility,
or become liberated from moral
obligation. "Train up a child in
the way he should go, and when he
is old he will not depart from it," is
trite. Many are skeptical on it. It
is too patent and potent a truism to
be questioned; besides, it is of divine
authority. It is found and exempli-
fied in all nature.

"Just as the twig is bent
The tree inclines."

The forces of nature may exact
implicit obedience to fundamental
law, yet those laws may be modified
in some cases, and by certain com-

binations yield another result. This
is true in physics. When this
thought is considered in its moral
force and application, and that
it is the law or inevitable tendency
of our being to sin, yet the spell
is or may be broken by the gra-
cious provisions of redeeming grace.
This inevitable tendency to do wrong
may be counteracted by grace, so
that the whole moral machinery
may be put in motion by a different
force, and produce different results.
As the rays of light, traveling in a
straight line, are bent when they
pass through a prism, so the "car-
nal mind," which "is enmity against
God," when operated on by the gos-
pel, is changed (bent) in its tenden-
cies; for, "with open face, behold-
ing in a glass the glory of the Lord,
we are changed into the same image,
from glory to glory, as by the Spirit
of the Lord." To "train up a child"
in reveling, dissipation and dancing,
we may be sure he will not readily
"depart from it." To "train up a
child" in the neglect of Christian
duty, prayer, Bible reading and at-
tending church, we may be sure he
will not readily "depart from it."
To "train up a child" to disobey its
parents, and treat with indignity
and disrespect the aged and those
who have authority, we may be sure
he will not readily "depart from it."
To "train up a child" to play
at games of chance, drink and be in
idleness, we may be sure he will not
readily or easily "depart from it."

But my pen has led me away
from relating the incident of the
picnic of the Moreau street Sunday
school. According to announce-
ment, the most of the school, with
others, assembled at the church, and
were conducted by our venerable
superintendent a short walk, which
brought us to the steamer which
was in readiness. At the word "all
aboard," we steamed up the river,
passing several miles up the levee.
The united songs of children and
teachers, as we passed up, found a
response from many sturdy sailors,
steamboatmen and others, who were
attracted by it, and by waving hats
evinced appreciation. An hour's
run and we made fast, and, disem-
barking, proceeded to the live oaks
not far off, where we deposited our
refreshments, and each one, and all
together, resorted to swing, rope,
ball, etc., and the rollicking laugh
indicated how merry all were. The
hours were not tedious, for all were
amused. Returning by the same
route in the evening, with no mis-
hap during the day, save meeting a
few "breakers" from ascending
boats, each one accredits it a picnic
long to be remembered.

PASTOR.

NEW ORLEANS, JUNE 8, 1870.

THE INFINITE.

There is but one uncreated and
infinite substance—that is God.
There are two created substances—
spirit and matter. Absolute unity
in the former, absolute duality in
the latter—a trinity without unity
in both. Thus polytheism, panthe-
ism and materialism, the three pre-
vailing forms of infidelity, are all
overthrown, and the intuitions of
reason, the dicta of common sense,
and the communications of revelation
synchronously affirmed.

Of these three substances, in their
attributes, properties and relations,
all truth is predicable. All theses
relate to one or more of this cat-
egory. Science, philosophy, theology,
ontology, cannot get outside of this
trinity, which involves all of uncre-
ated and created being, and all of
absolute or unconditioned, and of
contingent or conditioned truth and
being.

The first Substance is not the all,
though the cause of all other than
itself. To suppose the contrary
would be to embrace pantheism.
The last two substances are not the
all, for to embrace the contrary hy-
pothesis would be to make the finite
infinite, the effect the cause, the
contained the container, the less the
greater, and thus to contradict and
stultify all of the conclusions of the
practical and speculative reason, as
well as the highest intuitions of the
understanding, and the plain teach-
ings of revelation.

God and man contain, embody
these substances and present the

all. In the Incarnation they are
epitomized, but not mutilated, and
presented to us in the God-man;
for it pleased the Father that in
him—that is, in Christ—all fullness
should dwell. To know the Incar-
nate word in all his fullness, in all
he is and manifests, is to know all
that can be known of substance,
created and uncreated, of God,
mind and matter. Christ, the only
begotten Son, as the revealer and
only agent and medium of mani-
festation, is the logos or word in the
flesh or in human nature. Thus he
takes up into his compound nature,
in hypostatic union, the elements of
all being; and thus by revealing
himself, revealing all, harmonizing
all, and thus both typifying and
demonstrating the possibility and
fact of a final gathering together in
one—that is, in himself—of all
things. In this view all science is
sanctified, all study legalized, all
truth made a part of theology, for
all are a manifestation of the one
Infinite Substance in his nature, at-
tributes or works.

The essences of these substances,
though radically unlike, are yet con-
cealed from human vision—he buried
in the unfathomable depths of cre-
ated and uncreated being. The
great secret of their nature, if ever
made known, will be the culminat-
ing revelations of a future life.
The foregoing view presents God
and man distinct, apart, unlike, yet
God and man united but not con-
founded in Christ; made one, but
conscious personality of being and
identity preserved. Man is not a
part of Deity—nor an emanation
from him; hence there is no danger
to man of a loss of consciousness,
or of personal being by reabsorption
into the divine nature. The finite
may be embraced within the infinite,
and yet neither limit nor
exclude it; the infinite may contain
the finite, and yet neither exclude
nor annihilate, nor even paralyze it.
Nay, more, the life of the finite
springs from the womb of the in-
finite, nurses the breasts of the in-
finite; in it lives and moves and has
its being. The infinite cannot err,
cannot die; the finite, while united
to it, dwells in light and is immor-
talized. In Christ the infinite and
finite are united indissolubly, and in
this union the mortal is immortalized.
So to all united to Christ by a living
faith, the divine divinizes, the im-
mortal immortalizes, and the life
imparts eternal life. O for this life
in Christ, this union of the finite in
man, with the infinite in God and
Christ, which constitutes man's be-
atitude. VIDEX.

THE HIGHEST FLIGHT EVER MADE
BY MAN.—The most remarkable bal-
loon ascension on record was made
in 1804, by Biot and Gay-Lussac,
in Paris. By this enterprise they
endowed science with a series of
new and important facts, question-
able before that time, as they carried
with them a complete set of suitable
apparatus, and, moreover, an un-
surpassed knowledge of observation
and experiment. They ascended to
a height of thirteen thousand feet,
and observed that at eight thousand
to nine thousand feet the animals
they had taken with them, in order
to observe the effect of the rarefied
air and cold upon them, did not ap-
pear to suffer any inconvenience.
In the mean time the pulses of the
two experimenters were much accel-
erated; that of Gay-Lussac otherwise
always slow, sixty-two beats per
minute, was eighty; and that of Biot,
naturally rapid, seventy-nine beats
per minute, was one hundred and
eleven. At a height of eleven thou-
sand feet a pigeon was liberated;
it dropped down whirling through
the air as if it had been a stone.
The air was too thin, too much rare-
fied, to enable it to fly.

Three weeks later Gay-Lussac
went up alone, and attained a height
of twenty-three thousand feet, four
and one-sixth miles, or two thousand
feet higher than the top of Chimbo-
razo mountain. The barometer was
only thirteen inches high; the ther-
mometer eighteen degrees Fahr-
enheit below the freezing point, while
at the surface of the ground it was
eighty degrees. He left the court-
yard of the Conservatoire des Arts et
Métiers, in Paris, and after an aerial
voyage of six hours descended near
Rouen, one hundred miles distant.
The result of this ascension on Gay-
Lussac's health was very injurious,
partially by the want of air for res-
piration, combined with sudden cold,
but chiefly by the absence of the
accustomed pressure. At the ex-
treme height of twenty-two thousand
feet his face and neck were swollen
enormously, his eyes protruded from
his head, blood ran from the eye-
lids, nose and ears, and also came
from his lungs by vomiting; in short,
his system received a shock from
which he never fully recovered dur-
ing the rest of his life.—*Manufacturer and Builder.*

RICHES A MEANS OF GRACE.

The assertion that riches may be
a means of grace seems rather con-
tradictory to the declaration of Je-
sus, that it is easier for a camel to
go through the eye of a needle than
for a rich man to enter the kingdom
of heaven; and yet we doubt not
the fact. That the mere possession
of riches is not sinful is clearly
demonstrated by the fact that some
of the most holy and devoted serv-
ants of God have been rich. Abra-
ham, the father of the faithful, it is
said, "was very rich in cattle, in
silver and in gold." Job was a man
of vast wealth; it is said "his sub-
stance was seven thousand sheep,
three thousand camels, five hundred
yoke of oxen, and five hundred she-
asses," and yet the Lord declared
him a perfect and upright man;
one that feared God and eschewed
evil. David, the sweet singer of
Israel, was a king, and ruled over a
powerful nation. He was rich in
earthly possessions, and yet God
said he was a man after his own
heart. Joseph of Arimathea was
said to be a rich man and a disciple
of Jesus; he was a just and good
man. It is evident, therefore, that
the mere possession of wealth is not
sinful. On the contrary, riches,
properly used by their proprietors,
may become a great means of grace,
and elevate them to an exalted po-
sition in the kingdom of God.

In order to make riches a means
of grace we must consecrate them
unreservedly to God, recognizing
him as the great proprietor, and
ourselves as stewards, intrusted with
his property; to be used for the
promotion of his cause and king-
dom in the world, laying ourselves
and all our gifts, talents and pos-
sessions upon the altar of consecra-
tion. If a person has a talent for
the accumulation of wealth he may
make it subserve the cause of Christ;
if he cannot preach the gospel him-
self, he may furnish the means of
spreading the gospel to those whom
God has called to preach. He may
furnish facilities for public worship
by the erection of churches. He
may invest in Bibles and tracts, and
employ distributors to circulate the
light of the gospel. He may aid in
the erection of orphan asylums for
the support and religious education
of the destitute. He may make the
widow's heart to sing for joy by
furnishing her with a home for her-
self and destitute family. He may
use the influence that riches gives
him in the community for the
moral and spiritual elevation of his
neighbors. He may be a public
benefactor, and send his treasures
before him, that when he falls on
earth they may receive him into
heavenly habitations. There are
many blessed promises in the Bible
to those who use the riches of this
world in a proper manner; for in-
stance: "Honor the Lord with thy
substance, and with the first fruits
of all thine increase; so shall thy
barns be filled with plenty, and thy
presses shall burst out with new
wine." "Blessed is he that con-
sidereth the poor; the Lord will de-
liver him in time of trouble. The
Lord will preserve him and keep
him alive, and he shall be blessed
upon the earth, and thou wilt not
deliver him unto the will of his ene-
mies. The Lord will strengthen
him upon the bed of languishing;
thou wilt make all his bed in sick-
ness." "He that hath mercy on the
poor, happy is he." In the parable
of the talents, the Lord commended
the faithful servant who had im-
proved his talents, saying: "Well
done, thou good and faithful serv-
ant; thou hast been faithful over a
few things; I will make thee ruler
over many things; enter thou into
the joy of the Lord." And we are
assured that Christ will esteem all
the benefactions rendered to the
poor and afflicted as being confer-
red upon himself, and he will say
to them in the day of judgment:
"Come, ye blessed of my Father,
inherit the kingdom prepared for
you from the foundation of the
world, for I was an hungry and ye
gave me meat, I was thirsty and
ye gave me drink, I was a stranger
and ye took me in, naked and ye
clothed me, I was sick and ye visit-
ed me, I was in prison and ye came
unto me." Can it be possible that

any man who believes the Bible can
read such declarations unmoved,
and treat them with utter indiffer-
ence and neglect?

We do not suppose that God re-
quires the rich to donate all their
possessions to the cause of charity
and religion literally; but there
should be systematic benevolence.
Under the Old Testament dispensa-
tion every Jew was required to give
one-tenth of his income to the cause
of God. This is the only divine as-
sessment we have. Paul said to the
Corinthians: "Upon the first day
of the week let every one of you lay
by him in store, as God hath pros-
pered him," referring to the collec-
tion for the saints. The grand idea
of the gospel is that men should live
to the honor and glory of God—
honor him in all our ways, and do
all the good we possibly can in the
world. It will give a rich man
more exquisite satisfaction on his
death-bed to reflect that he had
been the means of performing one
act of disinterested benevolence
than to see his rooms filled with
bags of gold and silver, and leave
millions to be distributed among his
heirs. G. SHAEFFER.

ONE MORE APPEAL.

Now, gentle reader, do not allow
the caption of this article to prej-
udice you against its contents. Hear
me; then decide as conscience may
dictate. Brother John Rivers, a
relative of Dr. Rivers, of Louisville,
Kentucky, has had his house, with
nearly the whole of its contents,
consumed by fire. Among many
other valuables destroyed by the re-
morseless flames was a number of
valuable books. This Brother Rivers
feels most acutely, as he has long
been accustomed to reading, and
thereby supplying his mind with its
proper aliment.

The people of the community
where he lives have contributed as
liberally, perhaps, as their circum-
stances would warrant; and yet
there is an urgent demand for more,
particularly in the matter of books.

Brother Rivers has been engaged
for forty years in the noble business
of teaching and training the youth
of our country for important posi-
tions in the church and world; and
with the hope that some of his
old students and friends may see
this appeal, we, his pastors and pre-
siding elder, have penned these
lines. A small contribution in the
way of books, or money for the pur-
chase of books of our publication
house, would be highly appreciated.

A small box of books, expressed
to Meridian, Mississippi, M. O. R.
R., to the care of T. J. Terry, from
some one or more of his old stu-
dents, would be a beautiful tribute
to the worth of your old tutor.

If money contributions be prefer-
able, direct to U. L. Thompson, De-
Kalb, Mississippi, or to John Rivers,
Big Oak, Mississippi.

J. B. STONE, P. E.,
Macon Dist., Mobile Conference.
U. L. THOMPSON,
D. G. W. ELLIS,
Pastors, DeKalb Circuit.

DEKALB, MISS., May 20, 1870.

RULES OF STUDY.—Prof. Davies,
the mathematician, gives the follow-
ing rules of study: 1. Learn one
thing at a time. 2. Learn that thing
well. 3. Learn its connections, so
far as possible, with all other things.

4. To know everything about some-
thing is better than to know some-
thing about everything.
Teachers, please ponder these, and
then read them to your pupils, that
they may consider them also. We
are aware that it will take some
courage to apply Rule 4—that is to
resolve to be ignorant of some things,
that we may be profound in some
others. But such is as inevitable
as fate if profundity is gained. He
who resolves to carry the whole
encyclopedia of knowledge abreast of
him will carry nothing very far. If
Blackstone had resolved to carry
geology and astronomy side by side
with law, his name, instead of being
as enduring as the *lex non scripta* of
England, would have perished with
the newspaper in which it was
printed. Had Newton resolved, in
addition to his work on astronomy,
to rival Milton as a poet, Johnson
as a lexicographer, and Hume as a
jurist, his name would not be, as now,
imperishable as the laws of gravity.
And so of Bopp, and Grimm, and
Kepler, and La Place, and Des-
cartes, and Liebig, and Agassiz,
and the shining hosts of others
who have stood upon the tops of the
passing centuries.

The Christian Advocate.

SATURDAY, JUNE 25, 1870.

DEATH OF BISHOP KINGSLEY.

LETTER FROM DR. BANNISTER.

BEYROOT, SYRIA, April 7, 1870.

Knowing that new arrangements would be required on account of this mournful providence, I forwarded a telegram last evening to Dr. Harris, missionary secretary at New York. By the earliest steamer I send now a fuller account.

He had come to Jerusalem from Suez and Alexandria about the time that I had arrived there from my tour through the desert of Sinai. Desiring to make the tour of Palestine, I found a place in our party for him. We arrived in Beyroot on the third instant, and took lodgings together at the Hotel d'Orient. On Monday, the fifth, we visited the excellent missionary establishment of the American Board in the city, and later procured our tickets for passage in the Russian steamer, to sail to Constantinople on the evening of the sixth. Tuesday morning he arose in good health, and ascended the house-top with me to view the snowy heights of the Lebanon. Taking breakfast at the usual time, we repaired to our room to arrange for our voyage in the evening. At about nine he began to complain of acute neuralgic pains in the left breast and side, extending through his arm to the fingers' ends. After lying down a while he arose and took from his satchel a vial labeled "Pain Reliever," and applied the medicine to the parts affected, and drank some of it. He seemed cheerful and unconcerned, and spoke of his pains in gentle and patient inter-ances. Finding his feet cold, and much perspiration in his face, a hot foot bath was at once ordered by me. In this he kept his feet some ten minutes with apparent relief. Ad-justing himself to lie down again, he spoke lowly of some bad feelings still, and at that instant staggered, and before I could reach him fell gradually to the floor. Attempting in vain to raise him, I called for help, and while it was coming his eyes opened, but they were glassy, yet expressed, as I fancied, surprise. He was immediately lifted to his bed, but heart and pulse were still. At considerable intervals he made two heavy gasps, between which the physician, who had been called, ar-rived. Fifteen or twenty minutes from his fall upon the floor it was all over with him. He died at about ten A. M., on the sixth of April. The whole scene was so astound-ingly sudden and stunning that per-haps my measure of time may not be precisely accurate, but I have given the facts as accurately as they now occur to me. Till he was raised upon the bed I supposed the case only a fainting fit.

The consul, Mr. Johnson, and Drs. Van Dyke and Bliss, of the American mission, were present at the mournful scene, in the course of an hour, to render assistance. The consul took charge of all. The remains were removed to the Ameri-can college and laid out for burial. The mystery of the disease suggest-ed the propriety of a post mortem in-quest. Never were more delicate at-tentions rendered than those of Messrs. Bliss and Van Dyke. Their courtesies deserve recognition by our Mission Board. Funeral ser-vices were held to-day in the church, the corpse being followed thither by many friends; among them the president, Dr. Bliss, and the stu-dents of the college. The Rev. Mr. Robertson, pastor, conducted the services; the part taken by myself was to state the character, position, standing, duties, etc., of the deceased, and to read the burial service.

The American mission cemetery has become so full that an ordinance now forbids the burial within it of deceased travelers. The Bishop's remains were deposited in the Prus-sian Protestant cemetery—a beau-tiful and firmly secured inclosure. I suggested, embalmment, and the sending of the remains home; but this was discouraged on account of the great expense, and the excellent security they would have here.

In our association together for the last month frequent was our con-verse on religious experience, and he exhibited always a joyous trust in the Saviour, and his private de-votions evinced this trust in a high degree. The theme of his heart was the great church interests, especially our missions. It is much to be de-precated that they cannot now be re-presented by his own living tongue.

The post mortem examination, which I acquiesced in to make cer-tain the cause of his death, revealed the ease as disease of the heart, and that no help whatever could have been given, as Drs. Van Dyke and Briggsstocke assured me. The follow-ing is a copy of their report to the consul of their examination:

"L. JOHNSON, ESQ., UNITED STATES ACTING CONSUL GENERAL: The un-derigned having been directed to examine, post mortem, the body of the late Rev. Bishop Kingsley, re-port the existence of the following lesions: Heart somewhat enlarged;

enlargement of the left side greater than that of the right; very fatty, and fatty coat with some difficulty separated from the muscular fiber, the two seeming to be fused at their junction, they having a distinct line of demarcation, and not separated by connective tissue; walls of the right auricle attenuated; at the origin of the pulmonary artery was a fibrinous clot about an inch long, rounded at one extremity to about the size of a goose-quill, and tapering to the other one, and apparently lodged between the valves; a second clot of the same nature and about the same length, but flattened, en-tangled among and wound around the ends of right auricle ventricular valves; lungs healthy, brain healthy; abdomen not examined.

C. V. A. VAN DYKE, M. D.
R. W. BRIGGSSTOCKE, M. R. C. S.,
L. S. A. and L. M., London."

"A true copy of original on file in this office."
L. M. JOHNSON,
Acting Consul General."

I have thus given the facts as well as I have been able. Though he was little apprehensive of the coming on of such a result in the course of his pains, he was, no doubt, en-tirely ready for it, and his passing away was without struggle or groan—almost in an instant. The church has greatly to mourn the loss of such an efficient officer; and his family—O his family! of whom he often spoke—let them be remem-bered in multitudes of prayers to the God of all consolation.

HENRY BANNISTER.

UNKNOWN CELEBRITIES.

It is curious how little we know of the personal history of some of our greatest men of letters. We are not certain of the year in which Chaucer was born, nor do we know the university at which he studied. Shakespeare's biographers amuse or fatigue their readers with conjectures, and have only a few barren facts with which to supplement their fancies. About Spenser we know even less, and the latest editor of his works, in a sketch of the poet's life, acknowledges the meagerness of his facts by writing: "His poems are his best biography." In the sketch of his life to be given here his poems shall be our one great authority." Milton, a sublime ego-tist, tells us almost as much about himself as his biographers are able to collect from extraneous sources. Of Bishop Jeremy Taylor, Milton's cotemporary, his equal in eloquence and learning, and the greatest pul-pit orator England has produced, our knowledge is so limited that it is even a question whether, like the poet, he married three wives, or contented himself with two; which reminds us that it is also open to question whether Ben Jonson married a second time, or whether Fletcher, twin dramatist to Beaumont, married at all. Who has not read that enjoyable and inimitable book, the "Anatomy of Melancholy?" Yet of Burton little more is related than that he resided chiefly at Ox-ford, was an indefatigable student, and foretold his own decease, which happened so exactly at the time predicted that, according to Anthony Wood, some of the students said "that rather than there should be a mistake in the calculation, he sent up his soul to heaven through a slip about his neck." A few years be-fore Burton's death was born one of the most notable men of letters that England has produced. Just as Ben Jonson held a higher rank than Shakespeare among his contemporaries, so was Dryden esteemed in his own day far more highly than Milton. Yet it is strange how little, even in Dryden's biography, belongs strictly to the region of fact. He is said to have done this, it is conjectured that he did that, it is probable that he acted in such or such a manner. This is the mode of writing adopted, and no doubt wisely adopted, by the biographers of "glorious John;" and Mr. Christie, in his admirable "Globe Edition," just published, observes that, in spite of all re-search, the deficiency of information about Dryden is still remarkable, and "the names and dates and order of his publications make a large portion of his biography."

Yet Dryden was poet laureate and historiographer royal; he was a Fellow of the Royal Society; he was the supreme object of jealousy to the literary hacks of his day, just as Pope was to Grub-street scrib-blers forty years later; his name for a long period was constantly before the public, the works produced in his old age were even more heartily welcomed than those produced in middle life, and when he died he had a "splendid funeral," and was followed by a hundred carriages to his fitting resting place in Poet's Corner. The conspicuous position occupied by Dryden, if contrasted with the paucity of our information about him, proves, as in the early instances we have mentioned, that what Lord Macaulay calls the "Lues Boswelliana" is a complaint of modern growth. The extent to which it exhibits itself in these days is sometimes ridiculous enough. We are told how often illustrious

men strop their razors, or put on their spectacles, how often they eat, and what they drink, and upon which leg they are accustomed to enter a room, how they look in a nightcap, and what appearance they present in a dress coat. If they smoke, the average number of cigars is chronicled; if they drink of the liquor which Dr. Johnson appropriated to heroes, the quantity is scored down with exactitude. As there is nothing too minute for a life-writer in the nineteenth century, so it is possible also that nothing can be found too great; but, unhap-pily, there is rarely room in this direction for the exercise of his genius. Perhaps it is well that so little is known of the men of letters who are the pride and boast of our earlier literature. The bloom of a plum is spoiled by over-much hand-ling; and there are not many men who, like Dr. Johnson and Sir Walter Scott, can bear without serious detriment the research of the modern biographer.—Every Satur-day.

REV. WM. MORLEY PUNSHON.

Person large and strongly built, tending slightly to corpulency; head squarely and solidly set upon a strong neck; forehead full at the base, but slightly sloping and nar-rowing as it rises, hair straight, rather long, dark, but lacking much of black, and so thin at the parting as to suggest (only suggest) bald-ness; eyes small, or perhaps rather made to seem half shut by heavy eyelids; nose noticeably broad at the nostrils; cheeks decidedly heavy; mouth and chin having nothing about them noticeable, harmonizing with the rest of the face; whole cast of features impressive, but stolid, heavy, English—such is the physical Dr. Punshon.

He comes forward and begins his discourse with almost as little ado as Wendell Phillips. His style of oratory is much the same as that of Phillips, though more rhetorical, more artificial. He does not ges-ticulate much; nor is his gesticula-tion or attitude by any means what an eloquentist would call graceful. Often, especially in the earlier part of his address, he will stand a con-siderable time at once on one foot, his body leaned forward, his hands held of either side of the desk be-fore him, and his unused leg crossed awkwardly behind the other. All this, however, ten chances to one, you do not notice. As soon as he begins to speak the man is lost in the orator; nay, the orator is lost in the oratory. His words chain you, and you forget all else.

The pronunciation of the orator smacks of the side of the ocean from which he comes. It is the pronunciation of a cultivated Eng-lishman rather than a cultivated American. "S" is pronounced much like "z," you hear "absorbing" for "absorbing;" "mezmerism" for "mesmerism;" "Christian" is pro-nounced with three syllables, "Chris-tian;" "convenient" with four; "anal" "ed" is usually or always made a distinct syllable. Thus, the pre-terites "sinned," "raised," "believed," on his lips are "sin-ned," "rais-ed," "believ-ed." "D" takes often very nearly the sound of "j"—for instance, "duty" becomes "juty" or "dyuty." "Circumstances" is pro-nounced as if it contained no "a," but were spelled "circumstnces." "Years" is pronounced "yurs;" "clean" "clean;" "borne" "born;" the sound of "r" is always trilled, and "th" is spoken as if it were "thr." Yet, notwithstanding vari-ations from American usage men-tioned, his pronunciation is on the whole chaste and elegant. The nice accuracy with which he speaks words and names from foreign languages is specially noticeable.

His voice is very fine. If you ob-serve closely, it is a little husky, yet, for all that, remarkably pleasant. The thing that strikes first in his speaking is his enunciation. You never heard it excelled. It is beau-tiful. You scarcely lose a syllable of a whole lecture. Every word is finished and dropped before another is touched. Every minutest sound is as clear as if it were uttered alone. And yet there is no appear-ance of effort to make it so. Each syllable is a distinct silvery drop, and still the whole are a stream, smooth-flowing, unbroken.

The next thing that strikes you is the close linking of sentence with sentence, and thought with thought. There is no fragment. Every part is a link. The whole is a chain, and a chain of wondrous beauty. It seems to you as if no other possible sentence could join itself with the receding one so perfectly as the one chosen, and that no thought could possibly be changed in position or form, or have another substitute for it, without loss. There is a vast difference in orators in this respect. Some oratory is beautiful, powerful, but fragmentary in its make-up, concrete, conglomerate. Dr. Pun-shon's, at least as far as its word and sentence-structure is concerned, is not so. An oration of his is an organism (to repeat a figure already used), a chain, or, best of all, a stream. The first word he utters is

the beginning of a current. Every succeeding word augments that cur-rent. Before you are aware he has drawn you in; and once in, there is no stop for you until the orator stops. Here is Mr. Punshon's power. It is a subtle power, but it is very great. Many orators are profounder than Punshon; many more edifying, many more startling, many more powerful in moving the deeper feelings of one's nature, many richer in wit and humor, many nearly or quite as fertile even in beautiful illustrations, and flashing figures, and brilliant passages; but no one before the English-speaking world of to-day can stand up in the pres-ence of an audience and so easily, so entirely, without appearance of effort, launch them upon a stream of eloquence, at once so quiet, and yet so varied, so rapid, so resistless, so ab-solutely enchanting. His magnetism is unequalled. He is a poet. He sees everything "with the big wondering eyes of childhood." Beneath his eloquence nothing is common-place, nothing is uninteresting. He trans-mutes everything into gold that he touches—and his touch is rapid almost as light. Scarcely has he plucked a flower, sparkling with dew, and fresh with spring's first perfume, and held it up before us, than he flings it down to pluck another only more charming. Now he leads us in a meadow smooth and green, now through a forest vener-able and silent, now amid wild and awful mountains, now over the lonely sea, now sets us down in gardens beautiful as "the gardens of the gods." But nowhere does he leave us longer than a moment. The tinkle of a woodland brook swells into the thunder of Niagara. The terrific music of the ocean storm melts into the singing of the night-ingale. All is change, all is move-ment, but all is harmony. There is no delay. On, on we are borne, without time even to take breath. No sooner does the curtain fall upon one scene than it rises upon another; or, more accurately, the curtain never falls at all, for the whole or-ation is a constantly moving pano-rama, or a series of dissolving views—each picture melting marvelously but beautifully into its successor.

Mr. Punshon's best productions are all carefully written out before delivery. When we have heard him he has had his manuscript be-fore him; and we are informed that this is his usual practice. Yet he cannot be said to read. His eyes steal a glance at his paper now and then, but that is essentially all. One of the most remarkable things in the orations of Mr. Pun-shon is the great number and variety of his quotations. Nor are they mere externalities hung upon the outside of his structure for tawdry ornament. They are polished stones wrought nicely into the mosaic of the structure itself. All literature has seemingly been laid under tri-bute to produce them, ancient and modern, English and continental, prose and poetry. If nowhere does the breadth and richness of the orator's culture appear more plainly than here, neither does his genius anywhere shine out more conspicu-ously. Nothing is more diligent than to use quotations well. In nothing is it more easy or more common to bungle. None but a master workman is fit to attempt mosaics. But Dr. Punshon is a master workman, and here, if no-where else, he proves it.

We said his oratory has some characteristics in common with that of Wendell Phillips. It is perhaps more like that of Dr. Chapin, of New York. Did you ever sail by swift boat, in the midst of our glorious autumn, down the magnificent Hudson from Albany to the Palisades? An ora-tion of Punshon's is such a sail, only he never lets you stop by the way. More delightful, more picturesque, more variegated, more absolutely wonderful and enchanting in its rapid succession of the beautiful, the romantic and the sublime, even the splendid and unequalled pano-rama of the Hudson is not, than is the charming voyage over which, without jar of engine or plash of wheels, the silver-tongued orator al-most unconsciously hurries you.

Are you a musician? Mr. Pun-shon is the Rossini of orators. Are you a poet or a lover of poetry? Mr. Punshon is not Bryant, or Whittier, or Lowell, or Swinburne, or Tennyson. He is Longfellow.—The Standard.

VISCOUNT LEPIC lately presented to the Emperor Napoleon a collec-tion of arms and other curious his-torical objects. This collection is to be placed in the *Musee de Saint Germain*; it comprises axes, lances, arrows, harpoons, fishing tackle and agricultural implements. The em-peror, who appeared to be greatly interested in M. Lepic's explana-tions of the collection, has desired him to make a similar one for the Artillery Museum.

THOMAS CARLILE will probably visit America as soon as he has completed the revised edition of his works upon which he has been en-gaged for the last two years.

TRIBUTES OF RESPECT.

At the first quarterly conference for Marion circuit, Macon district, Mobile Conference, it appearing from the sta-tistics that one of our number had been removed from our midst by death, to wit, Brother THUR HENDER-son; on motion a committee of three was appointed to draft resolutions in reference to his death, whereupon the following were appointed as said committee: T. Y. ARMSTRONG, L. M. BOYD and G. W. McINNIS.

WHEREAS, It has pleased him who holds the destiny of all men in his own hands to remove our beloved brother, T. Henderson, from our midst by death to the church tri-umphant; be it, therefore,

Resolved, 1. That while we as a quarterly conference, deplore his loss from our board of stewards as a most worthy member and zealous brother for the advancement of our church interests, we feel assured that our loss is his eternal gain; and while we mourn we feel assured that he is enjoying the full fruitions of immortal bliss in the paradise of God.

2. That we deeply sympathize with his bereaved family and friends, and we pray and admonish them so to live in this world that as they leave the troubles and sorrows of the present time, they may be gathered home to husband, father and friend, to part no more—where the wicked will cease from troubling and the weary will be at rest.

3. That these resolutions be spread on the minutes of this quar-terly conference, and that a copy be forwarded to the NEW ORLEANS CHRISTIAN ADVOCATE for publication.

T. Y. ARMSTRONG,
L. M. BOYD,
G. W. McINNIS,
Committee.

The following preamble and reso-lutions were passed by the second quarterly conference of North War-ren circuit, Mississippi Conference, held at Wesley chapel, May 15, 1870:

THOMAS C. JONES was born Octo-ber 12, 1813; was converted and joined the Methodist Episcopal Church South in 1852, in which he lived an acceptable member, most of the time filling the office of steward until January 29, 1870, when, at his late residence in War-ren county, Mississippi, he was called to "give an account of his stew-ardship;" not, however, on account of unfaithfulness in the discharge of his duties in that office, for he leaves many living witnesses of his untiring energies in providing for his pastor and his family.

No doubt many a care-worn and neglected itinerant, who in former days has been blessed by his kind hand, will be constrained to say, when he hears of his death: "Help, Lord, for the godly man ceaseth."

While on his death-bed he said to his late pastor: "Move to the parsonage and let me know what you want." None but the often neglected and discouraged Metho-dist preacher can fully appreciate such encouraging words. But, alas! how uncertain is all mortal good, for a few days of intense suffering from pneumonia ended his earthly career, and taught his pastor to look to some other source for help. May the great Head of the Church fill his place by another equally as faithful. When asked about his hopes for a better state, he expressed himself fully resigned to death. In his death the country has lost one of its best citizens, society one of its most generous and noble members, the church one of its most liberal supporters, the widow and the orphan their kindest friend. Yet let us resolve to submit to this seemingly strange providence of God, knowing that, "The Judge of all the earth will do right."

Resolved, 1. That we tender to the bereaved family and friends of the deceased our most hearty con-do-lence, commending them to the grace of God, who alone can com-fort them in their afflictions.

2. That in memory of his faith-fulness as a member of this body we give this report a place upon the records of this circuit, and also have the same published in the NEW ORLEANS CHRISTIAN ADVOCATE.

P. HOWARD,
A. M. CAMERON,
Committee.

At the second quarterly confer-ence of Rocky Mount circuit, Mont-gomery Conference, held at Reho-beth, Saturday, May 7, 1870, the following preamble and resolutions were adopted:

WHEREAS, It hath pleased our heavenly Master to remove our be-loved brother and pastor, J. F. DICKINSON, from the scene of his earthly labors, who for the past fifteen years labored in the Alabama and Montgomery Conferences. He was assigned this year to this cir-cuit, and was well received and highly appreciated at every point at which he preached; but, alas! how soon in the year are our hopes cut short. He was able in the pulpit, interesting, instructive and kind in the family circle, and loved by all. As a body associated with him in the past, it is becoming in us to testify our appreciation of his individual and ministerial worth. He was de-voted to his holy calling, orderly in walk, unwavering in duty, fearless in advocacy of truth. He has been an official member of the Methodist Episcopal Church from boyhood; his life has been spent in the service of his Master, endeavoring to win souls to Christ, and faithfully discharged the last duty to God and the church, and in his last moments, though tortured with bodily pain, was sup-ported by a faith that faltered not, and a hope that brightened as he neared the portals of the grave, giv-ing the strongest assurance to sur-rounding friends that his later end was peace; therefore,

Resolved, 1. That while we deeply deplore the termination of a life so full of usefulness to the church, so-ciety and his family, we bow with meek submission to the will of him "who doeth all things well."

2. That we tender our warmest sympathies and heartfelt condolence to the bereaved family upon whom the blow has so heavily fallen, and invoke the blessings of heaven to rest upon them in their time of trouble.

3. That a copy of these resolu-tions be sent to the family of the deceased, also to the NEW ORLEANS CHRISTIAN ADVOCATE.

J. W. SHORES, P. E.
J. A. GIDDENS, Sec.
Macon Advocate please copy.

At the second quarterly confer-ence of Rocky Mount circuit, Mont-gomery Conference, held at Reho-beth, Saturday, May 7, 1870, the following preamble and resolutions were adopted:

WHEREAS, In the dispensation of an all-wise Providence, our brother, HENRY GRAVES, who was for forty years a member of the church, and for thirty years a local preacher, has been removed from our midst by death; therefore, be it resolved by this quarterly conference:

1. That in the death of Brother Graves we feel that his family has lost an affectionate husband and father, the community a good citi-zen, the church an exemplary, de-voted and useful official member.

2. That while we feel sensibly the loss the church has sustained, we bow submissively to the providence that has taken him from us.

3. That his bereaved and sorrow-ing wife and children are entitled to and shall receive our warmest and kindest condolence.

4. That these resolutions be en-tered upon the journal of our con-ference, and published in the Advoca-te, and a copy furnished his family.

J. W. SHORES, P. E.
J. A. GIDDENS, Sec.

THE WESTERN CONFERENCE, to be organized by Bishop McTear, at Leavenworth, in September next, will include three States and Terri-tories. All accounts represent it as a wide and inviting field for minis-terial labor. Like its old namesake, that Conference will be the mother of Conferences. Let our young men of energy and consecration, who are not waiting on "another man's line of things, made ready" to hand, of-fer themselves willingly for this grand pioneer work—offer them-selves in time—so that the Bishop may occupy the ground largely at the first session of the Conference. Nashville Advocate.

A HARD-SHELL Baptist, preached in Washington lately, and took for his text, "God made man in his own image." He then commenced, "An honest man is the noblest work of God." He made a long pause, and looked searchingly about the audience, and then exclaimed: "But I opine that God Almighty hasn't had a job in this city for nigh on to fifteen years."

A SUFFICIENT amount of money has been subscribed to secure the erection of a suitable memorial to the late Prof. Faraday. The chief contributions came from men of science. About \$7,000 gold have been received. The present scheme is to erect the memorial in the British Museum.

The slightest sorrow for sin is sufficient if it produce amendment—the greatest insufficient if it do not. Colton.

Vice stings us even in our pleas-ures, but virtue consoles us even in our pains.—Colton.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, JUNE 25, 1870.

Office—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—REV. LINUS PARKER, 112 Camp Street, New Orleans, La.

AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS,
REV. WILLIAM A. SHAPARD,
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY,
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To Subscribers.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, Register the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

MONEY.

We cannot issue this paper without money. What does it avail us if we have enough in the hands of agents to run the paper for six months when we have none on hand and cannot borrow, and the printers must be paid every week? If you have only \$3 send it immediately. Remember, if six hundred agents have an average of \$3 each it amounts to \$1,800. This amount would give us relief for the present; but we urge on all to pay up immediately all they owe us.

THE PRINCIPAL of the Felicite street Sunday school was an interesting and pleasant occasion. With such a place as the Fair Grounds, and such a prince of Sunday school superintendents, and such Martha's as prepared the baskets, and such blithe, gay and winsome children, how could it be otherwise?

REV. P. M. GOONVYX, pastor of the church at Jefferson City, deserves great credit in that he has repaired, beautified and thoroughly furnished his church, at an expense of about \$1,200, besides liquidating an old debt. Well done! May his ministrations be waited on by crowds of anxious and profited hearers!

WE HAVE received the catalogue of Millwood Female Institute, Jackson, Louisiana. Indicates prosperity. Full board of instructresses and thorough curriculum.

METHODISTS who study closely the working of an itinerant system of evangelization will be interested in the Wesleyan method of providing for the children of traveling preachers. In order to equalize ministerial support, the Wesleyans of Great Britain since 1810 have assessed the support of the children of the ministers upon the whole church. The assessment has varied from the support of one by every one hundred and sixty-six members to one by every ninety members. At present the sum of £6 10s. is assessed upon every one hundred members, and the total amount raised is £22,244 yearly. Such a system would seem a very strange one for use in America, but it has worked well in England.

HERE is encouragement to perseverance: that Jesus Christ, our Head, is already in heaven. If the head be above water the body cannot drown.—Flavel.

If we study to honor God, we cannot do it better than by confessing our sins, and laying ourselves low at the feet of Christ.

AFFLICTIONS may buzz and hum about the believer, like bees that have lost their sting; but they can never hurt him.

THE STEAMBOAT.

It is nearly sixty years since the first steamboat was seen on the Western waters. She was a stern-wheel, built at Pittsburgh, by Fulton and Livingston, in 1811. This boat was rigged with masts, she was called the Orleans, and made her first trip to the Crescent City in the winter, probably, of 1811-12. We have never met the man or woman that saw this pioneer, though there are, doubtless, a good many living who remember the wonderful apparition. Almost two generations ago this first experiment was made. How much history has transpired in the nation, and how much development in this Western and South-western region! The contrasts, if we were old enough to appreciate them, are marvelous. The levee at New Orleans, as it appears now, and as it was when that first Western steamboat came to the wharf, invites comparison. The produce of the present day was then almost unknown. Cotton was not the great staple—neither prince nor king. The gin was almost unknown, and the man who had ventured to predict millions of bales a year would have been suspected of lunacy. The city, then, scarcely extended above Canal street, and these miles of wharves now growing under the weight of cotton, tobacco, corn, flour, sugar, molasses and other things, were not then in existence. What a difference in the little Orleans and the fleet of steamboats whose smoke darkens the sun, and whose bells and whistles nearly deafen us? The Orleans, with her masts and single wheel, low cabins and snail's pace, barely able with sail and steam to overcome the five mile current, and the Robert E. Lee of to-day, as she backs out from her berth at the foot of Canal street, pauses in mid-stream for a moment, as if to display her magnificent proportions and to gather up her energies, and then moves grandly away at fifteen to twenty knots per hour! What would Fulton and Livingston say, could they stand upon our landing and witness these marvels of graceful architecture and scientific power?

This is the perfection of traveling when not in too much hurry. It is a traveling home, where every comfort is dispensed, and where rest and recreation may be secured. One need not suffer here from hunger, thirst, dust or fatigue. There are facilities for abundant sleep, pleasant reading, social converse and prayer. You can be alone or in company, as you choose. As for the perils of river navigation, they are not more than the railroad, as that institution is managed on some of the American lines; and the manner of one's taking off which either mode of journeying affords, comes to about the same thing. In the ladies' cabin is a large painting representing a railroad catastrophe. There is a broken bridge, and the cars are plunging headlong from a dizzy height into a bottomless abyss, and hard by numerous bodies are laid side by side, whilst agonizing friends seek to recognize their loved and lost. This work of art makes us feel every day of our trip more contented with the trials of river navigation, and thankful that we were so prudent as to avoid the Great Northern and the Mississippi Central! It means, "take the boat, and stay on her as long as possible." The railroad men will doubtless respond by placing in conspicuous panels scenes representing these floating palaces in a sinking condition, wrapped in lurid flames, or in a horrid and fragmentary state of explosion. Dr. Livingstone, the great African traveler, propounds the theory that the first shake of the lion deprives his victim of all sensibility to pain, though life and consciousness remain. The chloroform of nature waits upon the occasion which requires it. So we may hope it is in the disasters of travel. Certain it is that, once actually on board, apprehension measurably ceases.

The want of incident on the Mississippi is almost as painful as in a sea voyage. But to a fresh and untravelled eye there is much to interest and occupy the mind. It is a

real relief when the high land appears, when the bluffs of Natchez and Vicksburg rise before us, and the overlasting flatness of lower Louisiana gives place to actual hills. The river is turbid, broad and always majestic, and we can scarcely weary with thinking of the world of commerce which floats upon the mighty stream, of the empires that will rise upon the extended banks, and of the civilization which will, a century hence, adorn the great valley. Will the steamboat be an institution of that age, or will something else take the place? Steam may, after all, be an element of transition, to give place to some other motive power far more perfect. We gain occasional glimpses of the shore-world, of the sugar cane on the lower coast; and of the corn and cotton higher up. Many of those large plantations, which were highly cultivated a few years ago, are covered with young cotton-woods, and are rapidly reverting to their primitive wilderness condition. There are evidences, however, of recuperative thrift, and not many years hence all these fat lands will be protected from overflow and adequately stocked with labor. The cultivation of these cotton lands is a national necessity, and both labor and levees are bound to be secured. There is hardly anything so certain, in this world of uncertainties, as the boundless productiveness and material prosperity of this alluvial region. The population and monuments of art and civilization of the Nile and Euphrates will be more than repeated here. The changes which have taken place in the channel, at some points, are very great. The town of Providence, in Carroll parish, has almost entirely eaved in within the past twenty years. The church, the courthouse, the private residences are gone. There were scarcely any of the old landmarks by which we could identify a place memorable and hallowed to us by early and pleasant associations. The sad but beautiful sentiments of "The Deserted Village" came to mind, suggested by the ruin and desolation of this locality. An uninterrupted level of giant forests and fields, covered with corn and cotton, stretches from the bluffs of Vicksburg until we come in sight of the high grounds of Helena, and then of Memphis. Between these points, embracing hundreds of miles, we have not seen a town of any size—scarcely anything more than mere landings and shipping points.

The interior life of our steamboat is quiet beyond all expectation. The staterooms are all occupied, but there is no jostle. The officers are at their posts, the waiters at theirs; the crew must be in place also, but they are not heard. There is some smoking, but, wonder of wonders! neither swearing nor drinking. An effort was made to get up a dance the other night, but the young people seem to have been discouraged, and have not renewed the enterprise. We are yet a good way from the "desired haven," but thus far the Mary Houston deserves honorable mention of those who are now on board.

"BITTERS."

Under this captivating head many articles are offered which will at once invigorate the system, give it tone and establish its functions; restore the wasted energies, long preyed upon by disease; recuperate and build up the shattered constitution, long suffering under the intensified throes of acute or chronic derangement. Indeed, all the "ills that flesh is heir to" are either alleviated or prevented by the use of these elixirs of life. This may be considered an age of bitters as well as of chivalry.

We wish as a "faithful" watchman to enter our solemn caveat against our people indulging in the hazardous use of these poisoned cups of intoxication. Not that we condemn all or any, yet their use certainly feeds the appetite for strong drink, creates an abnormal condition of the system, and lays the foundation of far more serious maladies than those intended to be thwarted. Suffering humanity is under high obligations to medical

science, which has, from crude elements, established remedies, and if applied with discrimination by skillful hands will alleviate pain and lessen the aggregate amount of human misery. But the same elements of good, if perverted or manipulated by unskillful hands, prove mighty engines of sorrow and anguish.

No doubt there are many of these tonics that are valuable, and impart the very needed element in the deranged system. But to know which to use, and how and when, are questions that we cannot answer; and to use them indiscriminately is highly hazardous and of doubtful expediency.

Again, that vicious appetite for strong drink is a ruling passion with the multitude. It is fostered and developed, as the noxious weed, by means the most simple, and thoughtlessly used. The germ-seed may lie dormant for a time, but the auspicious season bursts the shell, and then, as by intrinsic power, it springs forth to bloom and bear fruit. Habit thus fixed, correspondent with depraved appetite, is exacting, and rarely yields to moral suasion or the sterner laws of coercion.

The evils of intemperance are too palpable and shocking to be slightly thought of. To chronicle them would be a page of infamy and human depravity, revolting; a picture, graphic, of pandemonium. To strike at the root of this tree of vice is the treatment needed. Heretofore temperance societies and organizations, in their praiseworthy work of arresting this fearful stream of woe and misery, have accomplished much. But there seems to be a failure of effecting the whole purpose intended. Pledges and vows, framed and administered under the most solemn and imposing circumstances, are well enough, but are too often violated in an evil hour, when temptation is presented and the vicious appetite is dared to partake. The ax must be laid at "the root of the tree" of intemperance. Its very vital principle must be destroyed, then its limbs, and finally the trunk will give way and topple to ruin. Pledges, moral suasion, example, all are good; but the religion of Jesus is the *summum bonum*. It prescribes temperance and elasticity, condemns dissipation and intemperance, commands temperance as one of the cardinal virtues, and in language of approval announces: "Whatsoever things are true, whatsoever things are honest, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, and if there be any praise, think on these things." All of this springing from love to God—that love which finds its highest aim in "keeping the commandments."

The Economy Mutual Aid Association of New Orleans.

In another column we publish the card of this company, with a list of the trustees. It was organized for mutual benefit in case of the death of any of its members, securing all the protection and advantages which men seek in life insurance companies, but in a more convenient form, and at a cost within the reach of all, founded on principles of equity, with undoubted security. The company has two classes, A and B. In class A persons from fourteen to forty-five are admitted, but class B includes those from forty-five to sixty years of age. The entrance fee into the first class is \$10, into the second \$15. Only persons in sound health are taken into either class. At the death of a member the company will pay \$1 for every member in the class of the deceased on the day of his or her death, and make an assessment upon the members of \$1-25. The entrance fee is non-forfeiting. Blank applications for membership and full instructions will be forwarded by mail to any person desiring to join the company.

The management of the company is in the hands of gentlemen of well known character and ability. A remunerative commission will be paid to ministers and others who will take an agency of the company. For full particulars address J. B. Guthrie, secretary Economy Mutual Aid Association, New Orleans, Louisiana.

CHURCH AND STATE.

We see by the doings of the late Maine Conference, Methodist Episcopal Church North, that they had "a committee on the state of the country." This, it seems, was not a committee on the temperance, the charities or morality of the country, or any cogent subject, but a committee on the politics of the country—an ecclesiastical indorsement of General Grant's administration. This, we suppose, is their rendering of "render unto Caesar the things that are Caesar's."

This thing is so unlike the council held at Jerusalem, when the "Apostles Peter, James, Paul, Barnabas and the elders came together to consider," that to intimate these holy men had "a committee on the state of the country," and brought in a report upon the administration of Clandins or Nero, would sound so irreverent and absurd that the veneration of all Christendom would be shocked, and would rise in universal protest against the outrage upon the holy memory of the sainted dead.

What is all this but an attempt to wield a partisan influence, and to court favor and secure offices? There are several preachers in the United States Senate and House of Representatives, in foreign consularships and the like—men who profess that they have been called of God and moved by the Holy Ghost to take upon them the office and work of the ministry—men who have most solemnly promised to turn their thoughts and studies to the sacred duties of their holy calling. Such gross and glaring inconsistencies cannot fail to work to the disparagement of the ministry and the hurt of the church. Let Southern ministers look on, be admonished and learn wisdom. The field is white to the harvest and the laborers are few. The Lord hath need of us every one—not to draw up reports on "the state of the country," but to preach the truth as it is in Jesus.

It would be just as pertinent for ecclesiastical bodies to draw up reports upon the navy and army, or the foreign relations of the government, as upon the political state of the country, if, indeed, such a committee does not already necessarily embrace these public interests.

In some three or four years there may possibly be a Democratic administration. What will these ecclesiastical politicians do then? Will they have "a committee on the state of the country," and bring in a report condemning the President and his policy? If consistent with themselves they cannot do less. Will some Christian ministers never learn that their business lies within the kingdom of Christ, and that their motto is and must be, "God forbid that we should glory save in the cross of our Lord Jesus Christ, by whom the world is crucified unto us, and we unto the world?"

PROSELYTING.

The great Teacher said: "Woe unto you, scribes and Pharisees, hypocrites; for ye compass sea and land to make one proselyte; and when he is made, ye make him twofold more the child of hell than yourselves." How constantly human nature repeats itself! What men have done they do now, and will continue to do. This ancient disposition to proselyte grows out of the egotism of human nature. Men complacently assume that amid all errors and contrarieties of opinion they have hit upon the exact truth, and are just right. It is gratifying to this vanity to have their opinions indorsed by others. Every proselyte is a new witness, is a new proof of the correctness of the proselyter's opinion of his theories. It increases his importance and self-satisfaction. We think this is one of the principal reasons or solutions for the proselyter's zeal. Another reason is his desire to build up a certain ism to promote his social, financial or political interest.

There is generally an unmitigated meanness in the methods of procedure. The proselyter watches for his opportunity to make his raid. There has been, for example, a sen-

son of awakening in some branch of the church which has greater zeal than his own in that locality. He immediately goes around among the awakened and the young converts, and pretends to a deep concern for their spiritual welfare, and leaves no stone unturned to accomplish his aim. Thus with a most swinish voracity he hurries to gobble up the fruit which the toils of others have shaken down; or he watches for family or social disorders, or anything that can be driven as a wedge to dissever church ties and the peace of brotherhoods. He insinuates that his victim has been badly treated; that their church is never guilty of such wrongs; and if he will only come among them he will find himself in the bosom of a peaceful and happy family. Thus, like one too indolent to go to the quarry for building materials, he is spying around to see if he cannot find a loose rock in a neighbor's wall with which to build up his own.

This proselyter does not ask his subject to be holier, to labor after a higher standard of spirituality, but to conform to some rite—to adopt certain forms and ceremonies. This is all the change he proposes, except it may be a certain infusion of his own intolerance and narrow bigotry.

What a sad pity it is that labor should be worse than wasted in this way. The world, alas! abounds with sinners; "the fields are white to the harvest," more work than all can do; more souls to save than all who profess and call themselves "Christians" shall ever bring to Christ. These proselyting sportsmen—"mighty hunters before the Lord"—prefer to hunt in somebody's park for tame deer, or prowl around somebody's premises to shoot at tame pigeons.

All this proselyting labor adds nothing to the real strength of the cause of Christ—no more than it adds to a man's capital to transfer his money from one pocket to another, or adds to the strength of an army to transfer a soldier from Company A to Company C, D or E. But there is not only no good in all this, but much positive harm. It injures the proselyte and the proselyter, and it produces discord and the strife of brotherhoods. The whole business is utterly unworthy and unbecoming the charity and magnanimity of our holy religion.

ACQUAINT THYSELF WITH HIM.—How closely God approaches to every soul. Not far off on Olympus is he; not shut up in unapproachable Brahmin exclusiveness. In his word he comes near to man. He talks with Adam, walks with Enoch, eats with Abraham, wrestles with Jacob, retorts upon Moses, blesses Joshua, touches Isaiah's lips, is free, familiar, sociable. And all for what? To save the soul. So be still. He begs you to be acquainted with him—to converse and reason with him, to come to him. He offers pardon, peace, oneness. How simple is salvation!—How easy! How like our God. Horace thought only grand occasions should bring him near; a Gordian knotty question most worthy of him—*dignus hoc nodus*. Not so Moses nor Abraham, David nor Paul. Are you acquainted with him? He solicits that acquaintance. Prince Arthur assumes that he cannot allow everybody to shake hands with him. But the Prince of Peace solicits your hand. The King of kings begs you to make his acquaintance. Beware how you refuse. He will cast you off forever. You will cast him off forever. Now he invites. Come and see him. Fall on your knees as you read this and beg him to accept you as his child. Lift up your heart to him. Be in earnest in this; be honest, and the blessing of such intimacy is instantly and eternally yours. Hasten to comply with his earnest entreaty. Accept Christ as your guest, companion, acquaintance. What richness in that communion! How unspeakably ravishing! Why will you refuse it, and seek the company of sin and hell? May your Father and Saviour now see you coming, and while you are yet a great way off, hasten unto, encompass you in his arms, and give you his divine, eternal, living companionship.

PROSELYTING providences are, for the most part, a dangerous state to the soul. The moon never suffers an eclipse but at the full.

MANY graceless hearts are like children's tops, which will go no longer than they are whipped.

NEW PUBLICATIONS.

ROBERT GREATHOUSE. An American novel. By John Franklin Swift. New York: Carleton, publisher, Madison square. 1870.

Nearly 600 pages, which we have not the time nor patience to wade through. Some of the roughest and worst phases of American frontier life are depicted. The publisher has done his part well. For sale by George Ellis, New Orleans.

HOSON BANCROFT. A romance. New York: Carleton, publisher, Madison square. 1870.

This is another thick volume of over 300 pages. Of more than ordinary merit, we judge from a glance at the first chapters. Religion and moral sentiments are woven into the abundant web of the story. We can commend the general tone which seems to pervade the book. For sale by George Ellis, New Orleans.

MEMOIRS OF THE REV. JOHN SCEDDER, D.D., thirty-six years a missionary in India. By Rev. J. B. Waterbury, D.D. New York: Harper & Brothers, publishers. 1870.

The religious public are familiar with the name of Scedder. Our Sunday school children have read his "Letters." He is one of the few great embodiments of the missionary cause which the Christian church has furnished within the last hundred years. This work is a valuable contribution to religious biography and the literature of modern missions. Its appearance should be welcomed by all who pray for the coming of the Saviour's kingdom. The work will doubtless help to quicken the missionary spirit in our day. For sale by George Ellis, near the post office, New Orleans.

THE LIFE OF BISMARCK, PRIVATE AND POLITICAL. With descriptive notices of his ancestry. By John George Louis Hoeskier. Translated and edited by Kenneth H. Mackenzie, F. S. A., F. A. S. L. With upward of one hundred illustrations. New York: Harper & Brothers, publishers. 1870.

This is an octavo of nearly 500 pages, and seems to be written in a sprightly and entertaining style. Bismarck is probably the first statesman in Europe, and possibly the greatest and most important character of the old world. His ancestry, childhood, education and political career are all exhibited in these pages. His military course is also fully described—the great year of 1866, the field of Sadown—and finally his home life in peace. The last chapters are most exciting, but the entire work will be read with interest, especially by all who are somewhat imbued with the spirit of "hero worship." For sale by George Ellis, New Orleans.

BAFFLED, OR MICHAEL BROWN'S WHOOP. By Julia Goddard, author of "Joyce Dorrner's Story," "The Search for the Grail," etc. Illustrated. New York: Harper & Brothers, publishers. 1870.

For sale by George Ellis, opposite the post office, New Orleans.

IN SPAIN AND A VISIT TO PORTUGAL. By Hans Christian Andersen. Author's edition. New York: Published by Hurd & Houghton. 1870.

This always graphic writer has given us a charming book of travels. He passes through these lands of romance and of great historical events with an appreciating spirit, and describes all in his own inimitable way. For sale by J. A. Gresham, 92 Canal street, New Orleans.

DISCOVERIES ON VARIOUS OCCASIONS BY THE REV. FATHER HYACINTHE. Translated by Leonard Woolsey Bacon. With a biographical sketch. New York: G. P. Putnam & Son. London: S. Low, Son & Marston. 1869.

THE FAMILY AND THE CHURCH. Advent Conferences of Notre Dame, Paris, 1866-7, 1868-9. By the Rev. Father Hyacinthe. Edited by Leonard Woolsey Bacon. With an introduction by John Bigelow, Esq. New York: G. P. Putnam & Son. London: S. Low, Son & Marston. 1870.

We have received these two volumes of discourses from Eyrieh, 130 Canal street, New Orleans. The celebrity of the author, his unquestionable genius and eloquence, and his connection with the reform movement in the Catholic Church, will cause these works to be widely circulated and read. At present we have not space to notice them at length. It is plain, however, that the eloquent father is only a library

Catholic, and, as yet, a good way from Protestant Christianity in many of his views and sentiments. **HERBERT PERCY.** By S. A. Monier. Consideration for Others. By Emma Marshall.

Two very interesting volumes for young persons. Golden up neatly by Robert Carter & Brothers, and on sale by our book agent, 112 Camp street, whose shelves are loaded with delicious fare for the intellect. Price per volume, seventy-five and sixty cents.

THE CHRISTIAN INDEX.

This paper, as our readers are aware, is edited and published at Memphis, by Rev. S. Watson, in behalf of the colored people of our church. We have recently received the entire file up to June 1, and have been pleased and edified by the examination of the numbers as issued. Concerning the condition of the paper we quote a paragraph:

WHAT ARE YOUR PROSPECTS?

This is a question often propounded to us in regard to the success of the Christian Index. In reply we answer, we intend to make it succeed. We think we can make it pay all of its expenses the past year of its existence. We have had some knowledge of religious papers in our church, and very few, if any, of them have paid their expenses the past year. Most of the papers have sunk thousands of dollars before they were able to meet the expenses of their publication.

Let all lend a helping hand just now. Send on for it, and we will be able to report that the Index has done better than most of our papers have done in working its way up and paying as it goes. So send your dollar on now if you have it; if not, club together and send \$2, and let the one who announces it for you receive the sixth copy gratis for his trouble.

In reference to the organization of the colored Methodist Church South we give the following from the pen of the editor:

ORGANIZATION OF THE COLORED METHODIST CHURCH SOUTH.

It will be seen by the action of the General Conference that all is done that is necessary to complete this organization. The time for their General Conference is as early as it could be for the organization of some Conferences which are yet to be formed by our Bishops. The middle of December was the shortest period necessary for that work. All the colored Conferences will then have met and elected their delegates, except the Georgia Conference, which has already elected delegates to the General Conference. The place—Jackson, Tennessee—is where the first colored Conference was first formed, and is perhaps as central as any other where it could have been held.

We hope all the members of the General Conference, now assembled in this city, will inform their colored friends relative to these matters. You have done what was promised them four years ago by the General Conference which met at New Orleans. This you owe to yourselves as well as to them and your country. They may not be prepared for this independent organization now, but all agree that it is the best to complete the plan adopted as soon as practicable. Let all lend a helping hand, and give them whatever assistance we can in this great work. They have much to learn, and so far as we have observed, they are very anxious to understand the duties devolving upon them. One great object of the establishment of the Christian Index was to aid them in this organization. We wish to attend all their Annual Conferences and aid them all we can. When this work shall have been accomplished we shall feel grateful to God that we have been spared to pay at least a portion of the debt we owe to this race of people.

KOSKOO.—This medicine is rapidly gaining the confidence of the people, and the numerous testimonials of its virtues, given by practitioners of medicine, leaves no doubt that it is a safe and reliable remedy for impurity of the blood, liver disease, etc. The last Medical Journal contains an article from Prof. R. S. Newton, M. D., president of the Medical College, city of New York, that speaks in high terms of its curative properties, and gives a special recommendation of Koskoo to the practitioners of medicine. This is, we believe, the first instance where such medicines have been officially endorsed by the faculty of any of the medical colleges, and reflects great credit upon the skill of Dr. Lawrence, its compounder, and also puts "Koskoo" in the van of all other medicines of the present day. *Norfolk Daily Journal, Dec. 11, 1869.*

Married.

On the first of June, 1870, at the residence of the bride's father, at Trenton, by Rev. L. P. Mendor, Mr. R. J. Little to Miss Sallie J. Lorton, all of Smith county, Mississippi.

By Rev. J. Nicholson, May 26, at the residence of the bride's mother, Mr. William Ravescraft to Miss Lucinda Westmoreland, all of St. Helena parish, Louisiana.

June 2, 1870, at the residence of the bride's father, near Suggsville, Alabama, by Rev. C. C. Ellis, Rev. B. M. Powers, of the Mobile Conference, to Miss Diphiska Ezell.

At the residence of Henry Frater, Esq., in St. Rosa county, Florida, May 29, by Rev. J. A. Parker, Mr. Joseph N. Andrews to Miss Cammie Frater.

At the residence of Mr. Ginnott, in Milton, Florida, on the fifteenth instant, by the same, Mr. Alex. Voronov, of Warrington, Florida, to Miss Harriet Box, of Milton.

Obituaries.

Mrs. Elizabeth Arnold, wife of Mr. Sol. Arnold, died in Holmes county, Mississippi, April 27, 1870.

Her parents were pious members of the Methodist Episcopal Church South, who resided here in the nurture and admonition of the Lord. In the years of discretion she embraced the same faith and joined the same church. Her life was consistent, her walk worthy of her vocation, her example and influence saving and hallowed, her death peaceful and triumphant.

Her loss is deeply felt by a husband and two little daughters who are left behind. R. J. Jones.

JAMES CLAY ALLEN, son of Colon M. and Sarah H. Allen, was born December 24, 1867, and departed this life April 8, 1870, aged two years, three months and fourteen days.

He was quite a child, yet, notwithstanding he was but an infant, scarcely able to speak distinctly, there was clearly shown in little Clay the elements of a man—a great and good man.

He was taken out of the world by the sudden and unexpected falling of an old door shutter directly on his head, which proved fatal in a very few minutes. While such a death is a source of deep, heartfelt grief to the bereaved parents and friends, it should be endured with Christian patience and unswerving faith in the goodness of God. N. F. M.

AMANDA REBECCA HUGHES was born in Baldwin county, Georgia, March 8, 1831; married to William B. Tarleton January 10, 1856, and died at Delhi, Louisiana, April 16, 1870, aged thirty-six years, one month and eight days.

Sister Tarleton was connected with our branch of the church at the time of her death, and had been for about twenty years. Those who knew her best speak in great praise of her faith in the Lamb for sinners slain.

When she was informed of her dying state she sighed a regret, for she expected to live long enough to enter her new home here; but the regret vanished in an instant as she looked upward and said: "Thank God, I shall have a mansion yonder," and in a few minutes she passed away as "gently as dowers at the set of sun."

Jas. E. Bramley.

Mrs. Florida A. V. Edwards, wife of George T. Edwards and daughter of W. A. and Rebecca Weldon, was born July 28, 1848, and died at her father's residence, in Pike county, Alabama, May 16, 1870, aged twenty-one years, nine months and eighteen days.

She was an acceptable member of the Methodist Episcopal Church South for four years. She was married to George T. Edwards December 19, 1867, and leaves a sweet little babe about five weeks old. Florida was an affectionate daughter, loving sister, devoted wife and tender mother. She was sick about seven weeks. Her afflictions were severe and her sufferings very great, and during the time she did not complain or murmur, but bore all with much patience, and seemed to be resigned to the will of her heavenly Father, "who worketh all things together for good to them that love the Lord." She leaves a bereaved family. She passed away in peace, and rests from the labors and sufferings of a painful life.

W. B. Adams.

LUCY BRUNSWICK FORSYTH, daughter of Rev. James L. and Maria T. Forsythe, and wife of Hiram H. Singleton, died at Jackson, Louisiana, April 30, 1870, aged fifteen years and eleven months.

The subject of this memoir, though so young, had all of those experiences that characterize mature womanhood, and that serve to develop and perfect character. In the short period of twelve months past she was a school-girl, a

wife, a mother, and before its close was called to know the future as it is revealed only to the righteous dead. She leaves a tender infant, a kind husband, a brother, sister and affectionate parents to mourn her loss; but they weep not as those without hope. They will meet again.

Having received a thorough religious culture, she early gave evidences of serious religious reflection, and in her fourteenth year joined the Methodist Church, and afterward gave all of those signs of conscientious religious experience and action that usually accompany intelligent childhood. She did not profess conversion until the night of the twenty-eighth of April, only two days before her death. Then, while her father was praying with and for her, though enfeebled by disease and suffering, God graciously imparted to her the knowledge of sins forgiven, and the evidence of spiritual adoption—removed the fear of death, and opened to her new spiritual vision the rich glories of eternal life. From this time no shadow seemed to interrupt her view of Jesus and of heaven. She spent the remaining hours in singing or listening to the songs of Zion, giving special preference to those that portrayed the sweet beauties of her new home, so near at hand; and in judicious and discriminating remarks and admonitions to her late teachers and fellow-pupils, to her husband, parents and friends, calling upon all to meet her in heaven. Finally, feeling the end at hand and that her work was done, commending her young infant to the care of her heavenly Father, with a shout of triumph upon her lips she fell asleep, and sleeps as do the saints dead in Christ. In this her movement all of the sacred relations of life were severed. But it is well. We would not bring her back to life again. "The Lord gave and the Lord hath taken away," blessed be the name of the Lord. J. C. M.

LET THE DEAF HEAR.

Dr. W. L. Davis, No. 10 Rampart street, gives his whole attention to afflicting sensations pertaining to the Ear, such as Deafness, Noises and the like.

CHILDREN TEETHING.

MRS. WISLOW'S SOOTHING SYRUP.

FOR CHILDREN TEETHING. Greatly facilitates the process of teething by softening the gums, relieving all inflammation; will allay all pain and spasmodic action, and is

SURE TO REGULATE THE BOWELS. Depend upon it, mothers, it will give rest to yourselves, and

Relief and Health to Your Infants.

We have put up and sold this article nearly thirty years, and can say in confidence and truth of it what we have never been able to say of any other medicine—NEVER HAS IT FAILED IN A SINGLE INSTANCE TO EFFECT A CURE, when timely used. Never did we know an instance of dissatisfaction by any one who used it. On the contrary, all are delighted with its operations, and speak in terms of commendation of its magical effects and medicinal virtues. We speak in this matter "WHAT WE KNOW," after years of experience, and pledge our reputation for the fulfillment of what we here declare. In almost every instance where the infant is suffering from pain and exhaustion relief will be found in fifteen or twenty minutes after the Syrup is administered.

Full directions for using will accompany each bottle. Be sure to call for

"Mrs. Wislow's Soothing Syrup," having the fac-simile of "CURTIS & PERKINS" on the outside wrapper. All others are base imitations.

Sold by Druggists throughout the world. je19 6111

WALTHAM WATCHES.

The extensive use of these Watches for the last fifteen years by Railway Conductors, Engineers and Expressmen, the most exacting of watch-wearers, has thoroughly demonstrated the strength, steadiness, durability and accuracy of the Waltham Watch. To satisfy that class in all these respects is to decide the question as to the real value of these time-keepers.

More than 150,000 of these Watches are now speaking for themselves in the pockets of the people—a proof and a guarantee of their superiority over all others.

The superior organization and great extent of the Company's Works at Waltham enable them to produce Watches at a price which renders competition futile, and those who buy any other Watch merely pay from twenty-five to fifty per cent. more for their Watches than is necessary.

We are now selling Waltham Watches at less prices in greenbacks than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said.

These time-keepers combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watchmaking originating in this country or in Europe, only those were finally adopted which were tested by the most skillful artisans in our works, and long use on the part of the public demonstrated to be essential to correct and enduring time-keeping.

Among the many improvements we would particularize:

The invention and use of a center pinion of peculiar construction, to prevent damage to the train by the breakage of main springs, is original with the American Watch Company, who, having had the refusal of all other contrivances, adopted Fogg's Patent Pinion as being the best and most useful.

Hardened and tempered hair springs, now universally admitted by watchmakers to be the best, are used in all grades of Waltham Watches.

All Waltham Watches have dust-proof caps, protecting the movement from dust, and lessening the necessity of the frequent cleaning necessary in other Watches.

Our new patent stem-winder, or keyless Watch, is already a decided success and a great improvement on any stem-winding Watch in the American market, and by far the cheapest Watch of its quality now offered to the public. To those living in portions of the United States where watchmakers do not

abound, Watches with the above mentioned improvements, which tend to insure accuracy, cleanliness, durability and convenience, must prove invaluable.

Every Watch guaranteed by the Company. To prevent imposition, buyers should see that every Watch should bear either of the following trade marks:

American Watch Co. Waltham.
Appleton, Tracy & Co. Waltham.
P. S. Bartlett Waltham.
Waltham Elery Waltham.
Home Watch Co. Waltham.

For sale at retail by all respectable dealers. A descriptive circular, giving much useful information, sent to any address on application.

No Watches retailed by the Company.

Address—

ROBBINS & APPLETON,

General Agents,

194 Broadway, New York.

Ask to see the new FULL-PLATE WATCH bearing the trade mark "AMERICAN WATCH CO., Crescent St., Waltham, Mass." It is by far the best Full-Plate Watch made in the United States, and surpasses anything heretofore made in this country for Railway Engineers, Conductors, etc. ap30 3111

BRACES AND TRUSSES.—DR. JOHN G. BANGELL, informs the medical profession and others that he has constantly on hand and for sale a complete assortment of HANXING'S TRUSSES, Spinal and Shoulder Braces, and other appliances for the prevention, relief and cure of general debility, vocal weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, spinal weakness and deformity, dyspepsia and nervous affection, constipation and chronic diarrhoea, female derangements and extreme displacements of the womb, uterine Piles, prostatic and weakness of the male and female system.

These light, cool and springy auxiliaries are the special favorites of the profession; are intensely common-sense and rational in their action; supply a missing link in treatment; place the above affections in a new and more hopeful light, and often provide centres where medicine can only utilize, any more than it can cure a hernia or a dislocated joint.

He specially desires an examination of these appliances by the profession and others. Where necessary the professional application of the above braces will be under his supervision or that of the family physician.

These valuable appliances are sanctioned by a large number of the medical profession in the United States and Europe as the best adapted to fulfill the purpose for which they are intended, and the Trusses and Braces are adopted by the United States government for the use of the army and navy. Terms cash. Consultations free. Send for their pamphlet; it is better to call.

Office and residence, 152 JULIA STREET, near Camp, New Orleans. je11 11

ONE DOSE OF DR. SHALENDERGERS

The Child's Corner.

FAITH GOD, our heavenly Father,
A blessed angel came,
And unto certain shepherds
Brought tidings of the same.
How that in Bethlehem was born
The Son of God by name.
O tidings of comfort and joy!
For Jesus Christ, our Saviour,
Was born on Christmas day.

The shepherds at those tidings
Rejoiced much in mind,
And left their flocks a-feeding
In tempest, storm and wind,
And went to Bethlehem straightway
This blessed babe to find.
O tidings, etc.

Now to the Lord sing praises,
All you within this place,
And with true love and brotherhood
Each other now embrace;
This holy time of Christmas
All others doth efface.
O tidings, etc.

DO YOU EVER FORGET?

A little boy went up into his room one night, said his prayers very properly, and went to bed. But he could not sleep. He tossed from side to side, counted a hundred forwards and backwards, recited to himself the multiplication table, long poems and hymns; but, try as he might, he could not get to sleep. He had neglected something, and it weighed so heavily upon his conscience that it was impossible for him to find rest. At last he got up, groped his way down stairs to his mother's room, and timidly knocked at the door.

"Who's there?" cried his father.

"It is I, pa."

"Well, who are you?"

He had several other children, and upon first awakening, could not distinguish the voice.

"It is Met, pa. Please let me come in."

"What do you want, Met? Are you sick?"

"No, sir; I am not sick, but I must see mother."

At this the mother got up in the dark and unfastened the door. When the little boy found her he threw his arms around her neck and kissed her warmly. There were tears on his cheeks, and tears in his voice, when he cried, "Oh! mother, I want to bed without kissing you. I forgot it, mother; indeed I did; and I could not sleep when I thought of it."

You may be sure his mother was by this time in tears herself. They were tears of gratitude to God for having given her such an affectionate child. She drew him to her and kissed him again and again, and with a blessing upon him dispatched him again to bed. The burden off his conscience, he soon fell asleep; and never again, until he left home a man, to battle with the great wicked world, did he forget to kiss his mother good night.

Now a story is not worth much which does not "point a moral."

It seems to me, little children who forget to pray before they go to sleep at night should feel far worse than the little boy who forgot to kiss his mother. And some little ones do forget their prayers. They are so very sleepy, when they do grow sleepy, that they fall down anywhere, and before they know it they are sound asleep, without ever asking God to take care of them through the dark, long night. Now if God were as forgetful as they are, he might forget to take care of these forgetful little ones, and death might come and lock them in his cold embrace before they could ever see the beautiful sunlight again.

Dear little ones, let the good-night prayer to God go with the good-night kiss to dear mamma, and in the course of time you will not be able to do without either, except through pain. The time may come when you will not have a dear mother to kiss good night, for God may take mother to himself; but there never will be a time when you cannot pray to God. You need not grope for him in the darkness down the stairway, for he is by you in your chamber, it matters not where, nor how dark it may be.

Do not forget to kiss mother good night, but, above all things, do not forget to ask God to take care of you before you go to sleep, and not only you, but your father, mother, brothers, sisters, and all friends. Do not forget your prayers.—*Young Christian Soldier.*

WHO BRIES THE BIRDS.—Little Marion asked her mother, one day, what became of the little birds. She had never heard of anybody's finding a dead one in the woods, or anywhere else, unless it had been killed.

"No," said mother, "I do not suppose birds often die of old age. They are all destroyed, by one enemy or another. Animals are made to live on each other."

"That does seem so cruel," said little Marion, with a sigh. "I wonder if God does not love the little birds he has made?"

"It is not as cruel as it seems, if you think on it a little, May."

"But the fierce old lions and

tigers are left to die a natural death, mother, and it does seem as though the little birds and timid rabbits deserve it better."

"Yet, May, I am not sure that the old lions have the best of it. Think what a painful, lonesome time they must have when they are old and stiff. Think how hungry they must get when they have no strength to seize their prey, or no teeth to eat what they may chance to find in their way. And, at the very last, what a lingering, painful death they must die, most likely starving to death. Surely God is very kind to the little birds in giving them a quick death, if it is sharp, and seems to us to come before its time."

"You know there is this great difference between their lot and ours: they have no hereafter. As a little girl said when her canary died, 'I would not care so much, mother, if Cherry only went anywhere; but he just died, and did not go anywhere.'"

"When this little bird-life goes out it is just like a snow-flake falling in the river. Only think what a scene of woe this world would be if all these dear little creatures lived to die a lingering death of old age. God has arranged all things in this world a great deal better than we could have done it, my dear, and the more we learn about his works the more we shall admire his wisdom, and see that his loving kindness is over all his creatures."—*Arthur's Home Magazine.*

The Farm and Garden.

SHAPE OF DWARF PEAR TREES.—A dwarf pear tree should be pruned into a pyramidal shape, and not allowed to grow over eight feet high in any case; nor should any branches be grown nearer than eighteen inches of the ground. So says one of our exchanges.

CURE FOR HOO CHOLERA.—Feed your hogs on the ground with shelled corn, and while they are eating, sprinkle them plentifully with fresh slaked lime in a fine, dry powder, until their hair is full of the lime. Whether it is what they eat with the corn or what they inhale, I am unable to say—probably both; but it has never failed to arrest the disease when tried. It should be done once a day until the disease disappears.

A REMEDY FOR THE APPLE TREE GRUB.—La Patrie, a French paper, publishes the following simple method for destroying the grub, which does so much damage to apple trees: Place a piece of aloe, about the size of a walnut, in a quart of water; shake the bottle from time to time, during three or four days, and apply the liquid with a small brush to the affected parts of the tree. If the weather be dry, a single application will suffice.

SUCKERS.—The Country Gentleman says many otherwise good apple orchards are allowed to be defaced, as well as seriously injured, by allowing a profusion of suckers to grow at the base of the trunks. Attempts are sometimes made to get rid of them by cutting them off down to the surface of the ground, and leaving considerable portions below in the form of short stumps. These sprout again, and they soon become as bad as ever. A better way is to wait until they are in leaf, at which time they are loosened more readily, and taking each sprout separately in the hands, and placing a thick boot upon it near the tree, they are quickly separated. If done at this time of the year they will not be likely to sprout again.

MAKING BREAKFAST ROLL.—At nine o'clock at night take one pint of your foment and strain it in the flour, adding water to make the quantity you desire; add salt to suit your taste, and put two or three table-spoonsful of lard, two or three eggs, and make it as stiff as bread dough, and set in a cool place in warm weather, and if cold weather in a warm place; you must use your own judgment respecting the weather.

2. In the morning, the first thing, work out into rolls as large as a hen's egg, and put them into a pan or oven, about half an inch apart in straight rows, and mash them flat; flour your thumb and with it stick a hole from the top to the bottom of each roll, cover them over and set in a warm place to rise; and when they rise half an inch, have your stove in good order. Fifteen minutes are long enough to bake them.

MANAGEMENT OF CARPETS.—All kinds of carpets will wear much longer if fine straw be spread evenly on the floor, about half an inch thick, before they are fastened down. When they lie on the bare floor the gritty dust works through them to the floor, and as they are pressed down on and among it they will be worn out much more than when kept up from it by straw. To aid in drawing carpets close up to the base board preparatory to nailing them, drive eight or ten small nails into a piece of wood, allowing

them to extend about three-eighths of an inch beyond the surface, similar to a weaver's stretcher, and file them to a short point. With such an instrument as this, having a long handle, one person can thrust the side of a carpet up close to the base board, and hold it with ease till it is nailed. There is some science also in the manner of sweeping carpets correctly. Instead of inclining the handle of the broom forward, and rolling the dirt along and pressing it into the carpet by bearing down on the broom, the handle should be held nearly erect, and the dirt brushed along by touching the carpet very lightly. In this way both broom and carpet will be worn less, and the sweeping be done better.

HOW TO RAISE PLUMS.—Many people, in fact most people, think it a very difficult matter to raise plums. As usually cultivated, it is of little use to plant plum trees. The young plums all fall a prey to the curculio. This is the experience of all who plant a few trees. And but few persons plant more than five or six or eight or ten trees—they think these will afford enough fruit for the family. But the family never see any of the ripe plums. The curculio wants all these few trees produce.

Now there is a secret about plum raising. We have discovered it in traveling over the country. We never visited a large plum orchard in all our life that we did not find plenty of the fruit. Now these facts set us to thinking, and the result of our thoughts is this: that it is very easy to have all the plums you want to eat and to sell. The secret connected with plum raising is to plant plenty of trees, so as to give fruit to the curculio and to yourself also. If you will plant fifty or a hundred or two hundred trees, you will have fruit enough for everybody. Every such orchard that we ever visited had plenty of ripe fruit. Some even complained that the curculio did not thin-out the fruit enough—that the trees were overloaded.

So we say to our readers, if you plant plums at all, plant fifty or one hundred trees, then you will be sure to have all the fruit you want. It sells for \$5 to \$10 a bushel in the St. Louis market, and is one of the most profitable crops raised.—*Rural World.*

PEACH TREES CHECKED OR EXHAUSTED BY BLOOMING.—Dr. Hull, of Alto, states in the Prairie Farmer that on comparing side by side the growth of the shoots of peach trees he finds that trees which bloomed copiously in spring make a feeble growth than those which bloomed sparingly—the fruit having been thinned on both alike soon after setting. The fruit on both trees, when nearly grown, was about equal in size, but the shoots and leaves on the copious bloomers were much smaller. As it ripened and the stones hardened, the peaches on the sparse bloomers were much larger—some being nearly twice the size of others. Overbearing still increases the difference.

This affords another strong reason in favor of the mode of thinning which we have repeatedly recommended for the peach crop—namely, by shortening back the fruit-bearing shoots, so as to remove a large share of the superfluous buds. It is the most easy and rapid mode of thinning; it reduces the number of leaves, and the growth is more vigorous, resembling in all trees that of young and thrifty ones. As a consequence, the fruit is much better; for although the peaches may be few in number, they are so much larger as to make up the difference and to afford the same number of bushels. They are more rapidly or easily picked when ripe; the flavor is greatly superior, and they sell for a higher price in market. A skillful fruit grower assures the Country Gentleman that, by thinning out his peach crop after it had set, to one-third the usual number, he still had as many bushels on his trees, and they were eagerly bought at \$1.50 a bushel, at a time when common or unthinned peaches could with difficulty be sold at fifty cents per bushel. According to Dr. Hull's observations and practice, an important advantage would result to the tree as well as to the crop, to cut away the superabundant buds before they had swollen or expanded. As the fruit buds are so readily distinguished at a glance from the leaf buds, this cutting back is easily done at any time in winter, although it would be safer to do it toward spring, or after the severity of the cold has passed, in those regions where the winter is likely to affect the tree or crop, as cutting away a part always renders the rest somewhat tenderer.—*South-western Cultivator.*

HOUSEKEEPERS' DEPARTMENT.

YEAST.—Good yeast is indispensable in order to secure good bread. We give but one receipt at present, of many that are equally reliable. Pare and boil eight medium size potatoes. Remove from the water when done, and put into it one small handful of loose, or two table-spoonsful of pressed hops. While these are boiling, mash and roll the

potatoes very smooth, free from lumps; mix with them three table-spoons, even full, of flour; half cup of sugar—brown sugar is the best for yeast—one table-spoon, even full, of ginger, and three of salt. Strain out the hops after boiling fifteen minutes, and pour the boiling water over the potatoes, hops, etc. Stir well together, and again set it on the range or stove till it boils up once, stirring it all the time, or it will burn. This done, pour it into a large earthen bowl or stone pot, to cool. When mild, or blood-warm, add one penny's worth of baker's yeast, or a yeast cake. Keep in a warm place till well raised, then put it into a stone jug, cork and tie down securely.

One tea-spoonful will raise two good sized loaves.

GENERAL RULES FOR BREAD.—Five quarts of flour or meal, and one quart of milk or water, are sufficient for two loaves in quart pans. Ruth shortening, salt and potatoes, if used, into the flour before wetting it. The milk or water for wetting should be about milk-warm, and the yeast be stirred into part of the wetting for the sponge, or into the whole, if the bread is to be made without sponging, then pour it to the flour and knead.

BREAD.—Sift five quarts of flour, cover and set by the fire to dry. Pare and boil five medium size potatoes. When done, drain them dry from the water, and sprinkle over them a tea-spoonful of salt. Mash perfectly smooth and free from lumps, adding a table-spoon even full of sugar, and rub all together till potatoes and flour are perfectly combined. Take a pint of the water in which the potatoes were boiled, and a little more than a pint of milk—say one gill—and when blood-warm stir into it one cup of home-made or a penny's worth of baker's yeast. Pour it on to the flour and potatoes, and knead the whole together without sponging. All bread should be kneaded a full half hour, then covered with a clean bread-cloth, and over that a bread-blanket, and set in a warm place to rise. If mixed over night it will be ready for the second molding before breakfast; then make it into loaves and put into pans for the second and last rising. When light, let it be well baked, but not long enough to make it hard and dry. When done, take from the pans, wrap a bread-cloth round each loaf, and turn upper side down into the pans, leaving it there till cold. This will help to make the crust tender.

EXCELLENT GINGER SNAPS.—Boil together one pint of molasses, one cup of butter, one table-spoonful of ginger. Let them only boil up once, then set aside to cool. When cold, roll two small tea-spoonsful of soda perfectly smooth, and beat into the molasses; while foaming pour on to just as little flour as will make it possible to roll out very thin. Bake quick.

In measuring by spoonsful be careful the spoon is even full, not heaped. Careless measurement spoils many good dishes.

WHITTIER, being asked for an autograph the other day, at once complied by penning:

"The name is but the shadow, which we find too often larger than the man behind!"

BROOKS' IMPROVED PATENT WROUGHT IRON REVOLVING COTTON SCREW PRESS.

Patented by R. M. Brooks, of Georgia, April 14, 1865.

It took the first premium at the Louisiana State Fair, at New Orleans, April, 1868, over eleven competitors; also at the Tennessee State Fair, at Memphis; and more recently at the Mississippi State Fair, at Jackson; and again at the recent State Agricultural Fair, at New Orleans, April, 1870, in a contest with fourteen Cotton Presses, embracing the most approved patents from different States of the Union, North and South.

The following is the certificate of some of the principal cotton factors and merchants of New Orleans. "In our extensive career we have seen the certificates of practical planters and scientific agriculturists from several Southern States in regard to the admirable principle and practical working of this Press."

"We, the undersigned, purchased last season, from Messrs. J. B. Jennings & Co., the Brooks Revolving Cotton-Screw Press for our customers, and so far as heard from, they have given entire satisfaction."

Moses Greenwood & Son, Warren, Crawford & Co., C. L. Wainwright, Irb, McDaniel & Co., Frank & Daniel, Campbell & Strong, Clapp Bros. & Co., E. F. Golsan & Co., R. S. Walker, Violet, Black & Co., Biscoe Bros., Wright, Ayles & Co.

Circulars, giving cuts, with full description; price list, etc., sent by mail on application to J. B. JENNINGS & CO., Proprietors, 14 Union street, New Orleans.

GEORGE B. HOLZACH'S PATENT IMPROVED MOVABLE WINDOW SHADE.

This improvement relates to a new and simple manner of so arranging window shades that light and air can be admitted into the room without raising any portion of the shade; and when the window is furnished with the combined screens its usefulness and comfort in warm weather, when a good current of fresh air is so welcome, cannot be surpassed.

Parlors, dining rooms and bed rooms, the latter especially in time of sickness, are by this improved combination thoroughly ventilated and lighted at pleasure, without the slightest inconvenience to the sleeper or patient, or exposure to the passer-by.

It can be attached to any window with but little alteration and at moderate expense. Orders solicited and promptly attended to. State Rights for sale.

GEORGE B. HOLZACH, Inventor and Patentee, 61 Camp street, New Orleans.

BELLS—BELLS.

CHURCH BELLS. CHURCH BELLS. We are prepared to furnish Church Bells, of Steel Composition, having a rich, deep tone, at the following prices, which place it within the power of all Churches to be provided with a good Bell:

	Weight.	Wt. of Bell and mounting.	Price.
28-inch Bell...	250 lbs	400 lbs	\$65 00
36-inch Bell...	650 lbs	800 lbs	135 00
40-inch Bell...	800 lbs	1000 lbs	175 00
48-inch Bell...	1200 lbs	1500 lbs	265 00

These Bells are warranted for one year against breakage in ordinary use.

THOS. B. BODLEY & CO., 1013 1/2 No. 9 Perdido st., N. Orleans.

BELLS.....BELLS.....BELLS.

BUCKEYE BELL FOUNDRY. Established in 1837.

VANDUZEN & TIFT. 102 and 104 East Second st., Cincinnati, Ohio.

Church, Academy, Factory, Farm, Fire Alarm Bells, etc., made of pure Bell Metal (copper and tin), warranted in quality, tone, durability, etc., and mounted with our Patent Improved Rotating Hangers. Illustrated catalogues sent free.

BELLS, STEEL COMPOSITION.

For Churches, Schools, Etc.

BLUMER, NORTON & CO., Manufacturers, Cincinnati, Ohio.

These celebrated Bells (not Cast Iron or "Amalgam") rival in purity and volume of tone those of copper and tin, are more durable, and cost only one-third as much. Send for descriptive circular. 2625 1/2

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD NOW IN USE.

THE FASHION.

We call especial attention to this Stove, which has been produced at great expense, combining all the new and important improvements also to the extra heat of the oven under the fire chamber, the Patent Air Chamber, Patent Doors, and Patent White Enamelled Iron Knobs, the improvements in the covers and centre pieces, all of which have been covered by Letters Patent, and are used in no other Stove. They are warranted to stand fire, or others sent free of charge in all cases. We have all sizes of this justly celebrated Stove, both

PLAIN AND EXTENDED BACKS,

The Extended Back with cast Iron Enamelled Reservoir and Faucet, Tin Warming Closet, Grilliron Cover, etc. The part of the top supporting the Reservoir is raised so that the fire is above the top plate, instead of below, as is the case in most of the Stoves now used, and the heat is forced directly against the whole surface of the bottom of the Reservoir. The Reservoir, being detached from the pipe, can be removed at pleasure, thereby forming a six-hole Stove—the best in use, as the back holes will heat as well or better than the middle ones. For sale by

G. W. W. GOODWYN, 62 Camp street.

ALSO, THE MOST

Complete and Perfect Cooking Stove FOR BRIMSTONE COAL OR COKE

ever invented, in the estimation of all who have yet seen it. Patented in 1869.

THE MONITOR.

which can be seen at 62 Camp street. The advantages possessed by this Stove over all the other Coal Cooking Stoves are so numerous, and so patent to every sensible observer, that it is only necessary to examine it in order to be convinced of its superiority.

All of the above Stoves are fitted with extra care, Oven Doors lined with tin, and furnished with William Rees's Patent Air Chamber, sliding front doors, patent centres, covers and White Enamelled Knobs.

The operation of every Stove guaranteed. Directions for putting up and using same accompany each Stove.

G. W. W. GOODWYN, 62 Camp street.

Sole Agent for States of La. and Texas.

1224 1/2

STOVES, GRATES AND HOUSE FURNISHING GOODS.

The undersigned would call the attention of city and country buyers of Cooking Stoves to the following list of Stoves, manufactured by Mr. M. L. Filley:

The Philanthropist.

A first class Cooking stove, having all of the latest improvements that have so far been invented. Has a new arrangement for boiling; also an Ash-pail. The casting is heavier than any Stove sold in this market. Sold under a full guarantee in every respect.

The Diamond Rock.

A Stove well known in this market. Thousands of this Stove are in constant use throughout the country, which is a very good recommendation. Sold under full guarantee.

Besides the above named Stoves, I have on hand the celebrated Cotton Plant, Churn, Oak, True Kentuckian, Mould of Orleans, Queen of the South, Delta and others, all of which I offer at a low price.

J. H. CAMPMAN, 1013 1/2 133 Poydras street, New Orleans.

THE TIMES.....THE TIMES.

THE IMPROVED

LARGE OVEN COOKING STOVE,

with extended Fire Chamber and Feeder Tray—one of the best Baking and most economical Stoves made.

The Fires are constructed so as to insure the most perfect draft. The heat of the Oven is so equal that when baking there is no need for removing anything until done.

THE TIMES

is made of a superior quality of Iron, very heavy, of neat design and fine finish. The Top Plate is put together in sections, to permit of the greatest expansion without cracking.

We invite the attention of Housekeepers to the advantages of this Stove. Remember, we guarantee them to give entire satisfaction. Duplicate parts can be had at all times, at small cost, by which repairs can be made which will frequently save the price of a new Stove.

ZABIE & DALTON, No. 115 Poydras street.

A large variety of MANTLE GRATES, House Furnishing Goods, Tin and Japanned Ware. Agents for the celebrated Osborn Bird and Animal Cages.

1013 1/2 ZABIE & DALTON, No. 115 Poydras street.

A SUMMER TERM OF THE

Southern Methodist High School

will commence on MONDAY, the fourth day of July next. School hours from eight A. M. to twelve M. Rooms remarkably cool and pleasant. The best advantages afforded. For terms, etc., consult

BETTER THAN GOLD.

Better than grandeur, better than gold,
Than rank and titles a thousand fold,
Is a healthy body, a mind at ease,
And simple pleasures that always please.
A heart that can feel for another's woe,
And share his joys with a genial glow.
With sympathies large enough to enfold
All men as brothers, is better than gold.

Better than gold is a conscience clear,
Though tolling for bread in a humble sphere,
Faintly blessed with content and health,
Cared by the lusts or cares of wealth;
Lowly living and lofty thought,
Adorned and ennobled a poor man's cot,
For mind and morals, in nature's plan,
Are the genuine test of a gentleman.

Better than gold is the sweet repose
Of the soul at rest when their labors close;
Better than gold is the poor man's sleep,
And the calm that drops on his slumber deep.
Bring sleeping druggies to the downy bed
Where luxury pillows his aching head;
His simple opiate labor deems
A shorter road to the land of dreams.

Better than gold is a thinking mind
That in the realm of books can find
A treasure surpassing Australian ore.
And live with the great and good of yore.
The sage's lore, and the poet's lay,
The world's great drama, with this unfold,
And yield a pleasure better than gold.

Thermal Influences of the Gulf Stream.

The banks and the bottom of the Gulf stream are of cold water, but its volume is of warm. As it issues through the Narrows of Benin its temperature is eighty-six degrees. But after it has run over a thousand miles to the north it still retains its tropical heat. When her Britannic majesty's ship, the Nile, in May, 1861, sailed from the harbor of Halifax for Bermuda, under Admiral Sir Alexander Milne, that officer, as he entered the Gulf stream, found water at the stern of his vessel at a temperature of forty degrees, while before her bows the thermometer in the stream stood at seventy degrees. The heat actually set free in a winter's day by the Gulf stream is enough to warm up the whole column of atmosphere resting upon France and the British Isles from the freezing point to summer heat. It would be easy to show that the thermal treasures borne on its bosom to the North Atlantic would be (to use the words of another) "sufficient, if utilized, to furnish in constant blast a cyclopean furnace capable of sending forth a stream of molten iron as large in volume as the discharge of the mightiest river." When the south-west winds take up the vesicles of vapor in which these treasures are stored, and waft them to England, the amount of latent heat set free by precipitation overhead in one day is computed to equal that created by the combustion of all the coal consumed in the island annually. If no more heat was received than is due to the position of the islands in respect of latitude, the mean winter temperature of Shetland would be only three degrees, and that of London seventeen degrees. According to the observations of the Scottish Meteorological Society, however, the mean winter temperatures of these places are respectively thirty-nine and thirty-seven degrees—Shetland being thus benefited thirty-six degrees and London thirty degrees. "In Iceland and on the Norwegian coast," we learn from the same high authority, "the increase of heat thus accruing is very much greater." To all such places, along the path of the Gulf stream, even within the arctic circle, the vast current may be regarded as both a repository and dispenser of the sun's warmth given out in summer, and of the genial and vitalizing forces which clothe equatorial lands with a sea of foliage.

So true is this that several of the isochimnals, or lines of equal winter temperature, are bent and carried by the Gulf stream sixteen hundred miles northward of their normal position! This deflection of isochimnals is due to the fact that the stream makes its warmth felt most sensibly in January, just as the hyperborean flow from the Antarctic ocean is coldest in July, deflecting the isochimnals from their normal position the most in that month.

This peculiar distribution of the winter climate of the British Isles, as it becomes known, is brought into requisition by the skillful physician in the treatment of diseases. The patient needing a milder air is no longer sent to the southward, unless directed to the west end of the island; and the weak constitution recuperates almost as rapidly at Shetland, or on the west coast of Scotland, as in any part of England, except from the Isle of Wight westward around the Cornish peninsula.

Little Puerkie, an Ohio girl, two years and a half old, was one morning watching her mother attentively as she stirred up the straw in an under-bed, and seeing that it grew higher and larger, she said: "Mazzer, is er rising in it?"

TO speak of the early productions of the soil here is almost unnecessary. At Penzance is the garden of the English vegetable markets. Green peas and early potatoes spring out of the garden in February, and are on the table in May, and every variety of similar vegetable growth at these early dates. Trees and plants, indigenous only to the tropics, often remain in the ground all winter without injury. Oranges, lemons, myrtles, camellias, magnolias, the Mexican agave, require no protection from frost. So that Humboldt spoke of it as "the Montpellier of the North."

But time and space would fail us to accumulate the evidences of the thermal forces and the balmy inducements which demonstrate the existence and climatic agency of the Gulf stream. It clothes Ireland with her robe of "emerald," and England and western Scotland with verdure. If from its smoky waters the fog rises to hide the rays of the sun, it does for England what the sun, in that latitude, cannot do. It fructifies her soil, tempers her skies; it puts renewed vigor into the arms of her brawny mechanics, and gives the bloom to her maidens' cheeks. The Icelander also rejoices in its proximity. And the poor Norwegian, at the North Cape itself, in midwinter, exults in the fact that his harbors are kept open and his shores delivered from the severe tyranny of the Frost King.—Prof. T. B. Maury in Harper's Magazine.

AIR AS A MOTIVE POWER.
An experiment was recently tried in the mines of Galena, in this State, in the transmission of compressed air through pipes, and its use as a motive power, which is full of suggestion for our builders and manufacturers, as well as for all who have occasion in large cities to use power. The dangers to property from the use of steam power are great. The increase in the cost of insurance, wherever steam power is brought into the same building with other property of great value, is a heavy tax on the business conducted. In the manufacture of inflammable oils, chemicals, and light wooden wares, sashes and blinds, etc., the fires, machinery and belting are surrounded by combustible substances, and the risk of fire is so increased that it becomes almost impossible to insure at any price. All this increased cost and danger may apparently be avoided by the substitution of the power of compressed air for that of steam, if the result of the experiment referred to may be taken as a fair test of its practicability and cost.

It was necessary at Galena to obtain a moderate power, at a depth of one thousand three hundred feet from the surface, to expel the foul air from the mines. Steam, from its tendencies to foul the air, was not available, and for other reasons the ordinary modes of ventilation in coal mines could not be applied. It was determined, therefore, to run an air-pump on the surface, by steam power, which should send the compressed air to the bottom of the shaft, with power enough to run the needed machinery there for the expulsion of the foul air to the surface. It was found, as the result of the experiment, that a ten horse-power engine used at the surface in pumping and compressing the air gave rise to nine horse-power of compressed air at a distance of one thousand three hundred feet from the surface. The loss of power was but one-tenth, and this represented almost wholly the friction of the engine and air-pump. The friction of the air in transmission was inappreciable.

If it be true, therefore, that a working power of compressed air can be obtained and transmitted through pipes for one thousand three hundred, three thousand or ten thousand feet, without perceptible loss of power beyond the one-tenth or less involved in converting the steam power into the power of compressed air, the fact is important, as we have said, to builders and manufacturers. They have only to put their steam engine, or say one hundred horse-power, and air-reservoir, in the center of a block, and they are ready to send an aggregate of ninety horse-power of compressed air, subdivided in any proportions that may be convenient, into any part of any building in the block or neighboring blocks, as easily as gas is conducted from a reservoir into all parts of a city. Unlike steam, which loses its power by cooling, it can be transmitted any distance without diminution. Unlike any system of shafting, belting and pulleys, it involves little or no friction and requires no repairs. It makes the use of manufacturing power throughout the largest building consistent with its being perfectly fire-proof, and insurable at low rates.—Chicago Tribune.

BOOKS AND STATIONERY.
STANDARD EDUCATIONAL WORKS

CHARLES SCRIBNER & COMPANY,
651 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.
"Incomparably superior to anything published."—*Agassiz*.
Introduction to the Study of Geography. Elementary Geography. Intermediate Geography. Common School Geography.
Guyot's system is approved and endorsed by the most distinguished literary and scientific men of our nation, such as Prof. Agassiz, Dana, Tenney, Huxley and others, celebrated in science throughout Europe as well as at home.
The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering thousands of schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California, they are being extensively adopted.
Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by its use the pupils of this generation will obtain a clearer, more definite and exact knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

MEDICINE—MEDICINE.
KOSKOO.
THE GREAT REPUTATION
which Koskoo has attained in all parts of the country
AS A GREAT AND GOOD MEDICINE,
AND THE LARGE NUMBERS OF TESTIMONIALS
which are constantly being received from physicians, and persons who have been cured by its use, is conclusive proof of its remarkable value.
As a Blood Purifier it has no Equal,
BEING POSITIVELY
THE MOST POWERFUL VEGETABLE ALTERATIVE YET DISCOVERED.
DISEASES OF THE BLOOD.
"The Life of the flesh is in the blood." It is a Scriptural maxim that science proves to be true. The people talk of bad blood as the cause of many diseases, and like many popular opinions this of bad blood is founded in truth.
The symptoms of bad blood are usually quite plain. Bad Digestion causes imperfect nutrition, and consequently the circulation is feeble, the soft tissues lose their tone and elasticity, and the tongue becomes pale, broad, and frequently covered with a pasty, white coat. This condition soon shows itself in roughness of the skin, then in eruptions and ulcerative diseases, and when long continued results in serious lesions of the brain; Liver, Lungs or Urinary apparatus. Much, very much, suffering is caused by impure blood. It is estimated by some that one-fifth of the human family are affected with Scrofula in some form.
When the blood is pure you are not so liable to any disease. Many humors of the blood arise from impure diseases of large cities. Eradicate every impurity from the fountain of life, and good spirits, fair skin and vital strength will return to you.

KOSKOO AS A LIVER INVIGORATOR.
STANDS UNRIVALED.
BEING THE ONLY KNOWN MEDICINE
that effectively stimulates and corrects the hepatic secretions and functional vicerelements of the Liver, without debilitating the system. While it acts freely upon the Liver, instead of clogging and paralyzing it gradually cleanses the discharges to a perfectly natural state.
SYMPTOMS OF LIVER COMPLAINT AND OF SOME OF THOSE DISEASES PROCEEDED BY IT.
A sallow or yellow color of the skin, or yellowish spots on the face and other parts of the body; dullness and drowsiness, sometimes headache; bitter or bad taste in the mouth; internal heat; in many cases a dry, teasing cough; insipid appetite; sometimes sour stomach, with a rising of the food; a bloated or full feeling about the stomach and sides; aggravating pains in the sides, back or breast, and about the shoulders; constipation of the bowels; piles; flatulence; coldness of the extremities, etc.

KOSKOO!
Is a remedy of wonderful efficacy in the cure of diseases of the Kidneys and Bladder. In these affections it is as near a specific as any remedy can be. It does its work kindly, silently and surely. The relief which it affords is both certain and perceptible.
DISEASES OF THE KIDNEY AND BLADDER.
Persons unacquainted with the structure and functions of the Kidneys cannot estimate the importance of their healthy action. Regular and sufficient action of the Kidneys is as important, nay, even more so, than regularity of the bowels. The Kidneys remove from the blood those effete matters which, if permitted to remain, would speedily destroy life. A total suspension of the urinary discharges will occasion death in from thirty-six to forty-eight hours.
When the Urine is voided in small quantities at the time, or when there is a disposition to Urinate more frequently than natural, or when the Urine is high-colored or scalding, with weakness in the spinal of the back, it should not be trifled with or delayed, but Koskoo should be taken at once to remedy the difficulty before a lesion of the organs takes place. Most of the diseases of the Bladder originate from those of the Kidneys; the Urine being imperfectly secreted in the Kidneys, proves irritating to the Bladder and Urinary passages. When we recollect that medicine never reaches the Kidneys except through the general circulation of the blood, we see how necessary it is to keep the Fountain of Life pure.

KOSKOO
Meets with great success in the cure of
DISEASES OF THE NERVOUS SYSTEM.
Almost nine-tenths of our people suffer from nervous exhaustion, and are, therefore, liable to its concomitant evils of mental depression, confused ideas, softening of the brain, insanity, and complete breaking down of the general health. Thousands are suffering, and, unfortunately, tobacco, alcohol, late hours, over-work, (mental and physical,) are causing diseases of the nervous system to increase at a fearful rate.
The symptoms of such diseases of the nervous system give rise may be stated as follows: A dull, heavy feeling in the head, sometimes more or less severe pain or headache; periodical headache, dizziness, noise or ringing in the head; confusion of ideas; temporary loss of memory; depression of spirits; starting during sleep; bad dreams; hesitation in answering questions; dullness of hearing; twitching of the face and arms, etc., which, if not promptly treated, lead to Paralysis, Delirium, Insanity, Lipothy, Apoplexy, etc., etc.

KOSKOO
Is not a secret quack remedy. FORMULA around each bottle. Recommended by the best Physicians, eminent Dietitians, Editors, Druggists, Merchants, etc. The
Best and Most Popular Medicine in Use.

SCHOOLS AND COLLEGES.
J. W. BLACKMAN'S
COMMERCIAL COLLEGE,
61 CAMP STREET,
Corner Commercial Place, N. O.
Open day and evening the entire year.
Membership, book-keeping, Mathematics and Languages are specially taught by experienced professors. Persons from twelve to fifty years of age attend. The instruction is private in each student. Persons who have neglected their education can here speedily qualify themselves for good situations in business. Some from the country may obtain board in the family of the principal.
William Walker, a late graduate of the Southern University of Alabama, and son of the Rev. Dr. J. B. Walker, of New Orleans, has charge of the Mathematical department. TERMS: Ten to twenty per cent. less than other colleges in this city.
A liberal deduction made when three or more enter together. The principal has been a practical teacher in New Orleans since 1831. For circulars, giving terms, etc., address
J. W. BLACKMAN,
sell 1/2 New Orleans.

LOUISIANA STATE UNIVERSITY,
(Name changed from Louisiana State Seminary.)
Baton Rouge, Louisiana.
Founded and supported by the State of Louisiana.
The ninth session, now in progress, will close last Wednesday in June, 1870. The next session will begin first Monday in September next, and will continue ten months.
The Academic Board consists of a full corps of able instructors in all branches of literature and science usually taught in the best Colleges and Universities.
The Course of Study embraces a Preparatory and an Academic Department, including a Literary, Scientific and Optional Course; a Special School of Civil Engineering and a Commercial School.
Library, Apparatus and Cabinets are well selected and valuable. The Geological and Mineralogical Cabinets, etc., the largest and most complete in the South, embracing the extensive collections of the late Col. W. H. Holmes, of Mississippi, and the Cabinets of the Topographical, Geological and Botanical Survey of Louisiana.
Admission granted to cadets not under fifteen years of age, who know arithmetic, English grammar and geography.
Expenses of every kind, except clothing, for ten months, \$350; \$200 payable in advance, balance February 1; or by accepted draft at eight per cent. for ninety days. Payments may be made through the Canal or Citizens' Bank.
Cadets received at any time during the session and charged from date of entrance.
Discipline, military, with daily drill. A battery of cadets will afford facilities for instruction in military drill. Uniform of cadets: gray cloth, to be had at the institution at a cost of \$25 per suit.
For further information address
D. F. HOYT, Superintendent,
Baton Rouge, La.
Office of the University in New Orleans, at Saratoga & Co.'s, 35 Camp street.

Until the rebuilding of the College edifice, lately destroyed by fire, near Alexandria, the institution is temporarily located at Baton Rouge, in the Grand and Public Asylum. Location very healthy, and accommodations ample for a large number of cadets. Number this session, 170. sell 1/2

VIRGINIA FEMALE INSTITUTE.
STAUNTON, VIRGINIA.
REV. R. H. PHILLIPS, M. A., Principal.
With Nineteen Assistants.
The Twenty-sixth annual session will open September 14, 1870.
From over a thousand testimonials from Southern patrons we select the following: from General Robert E. Lee, president of Washington College; General Francis H. Smith, president of the Virginia Military Institute; and General W. N. Pendleton, Lexington, Virginia.
"We, the undersigned, have had daughters educated at the Virginia Female Institute, in Staunton, under the care of Rev. R. H. Phillips. They therefore know it to be an admirably conducted and superior institution for young ladies, and they cordially recommend it to favor, even beyond its past extensive patronage."
R. E. LEE,
FRANCIS H. SMITH,
WM. N. PENDLETON.
LEXINGTON, VA., March 14, 1870.
For circulars, with full information, address Rev. R. H. PHILLIPS, Principal, or Rev. J. C. WHEAT, Vice Principal, Staunton, Virginia. sell 1/2

CENTENARY COLLEGE, JACKSON, LA.
was established by the State of Louisiana in 1825, and transferred to the Methodist Episcopal Church South in 1845. It is now under the joint patronage of the Mississippi and Louisiana Conferences.
The College exercises were necessarily suspended during the war, but were regularly resumed, after reorganization, on the first Monday in October, 1865. The approaching session will open on the first Monday of October next.
Tuition, \$75 per annum, payable semi-annually in advance.
Boarding can be obtained at from \$20 to \$25 per month.
The buildings: Libraries, Apparatus, Laboratory and Society Halls, the location in point of beauty, health, ease of access and good society, are all unsurpassed by those of any institution in the Southern States.
The past history of the College is the pledge of the future prosperity.
The Board and Faculty promise the public that nothing shall be wanting on their part to secure the thorough education of the young men committed to their care in both Preparatory and Collegiate Departments.
The old students, alumni, and friends of the institution are requested to give publicity to the full reorganization and opening of the College, as stated above.
W. H. WATKINS, President.

SOUTHERN UNIVERSITY,
GREENSBORO, ALABAMA.
The schools of Moral Philosophy, Ancient Languages, Modern Languages, Mathematics, Natural Philosophy and Chemistry are in successful operation. The Faculty consists of gentlemen whose reputation is well established. The Preparatory School is taught by the Faculty.
The session is divided into two terms. It begins the first Wednesday in October, and closes the first Wednesday in July.
Tuition in University, per term \$35 00
Tuition in Preparatory School, per term 30 00
Contingent fee, per term 2 50
Board in private families, per mo. \$16 to 20 00
Fees must be paid in advance. Send for a circular. Direct to

MANSFIELD FEMALE COLLEGE.
Mansfield, De Soto parish, La.
OWNED BY THE LOUISIANA CONFERENCE.
The Fall Session of this institution, now entering upon the sixteenth year of its existence, will open on WEDNESDAY, the 29th day of September, with a corps of experienced teachers, and enlarged facilities of instruction.
Terms unchanged. For catalogues, containing full particulars, address
CHARLES B. STUART,
President. sell 1/2

NEW ORLEANS MARKETS.

From the N. O. Price Current.
We have no improvement to notice in the general market, which has continued inanimate since our last issue, with only a limited business in dry goods and other branches of the wholesale trade, and a moderate movement in our principal staples. Western produce has shown no new feature. There has been some shipping demand for flour, not only for Cuba and other Gulf ports, but also for Great Britain and France.

Our accounts from the interior are rather discouraging. From some districts we receive reiterated complaints of too much wet weather, ungenial nights, the cotton being badly in grass, and much mischief from lice. In others the crop has suffered from drouth, while all concur in reporting it backward. The cane prospect continues cheering.

The river is seven feet below high water mark.

Cotton.—The following are the arrivals since the seventeenth instant:

Louisiana and Mississippi.....	bales.....	2014
U.S.	2	
Mobile	745	
Florida	20	
Texas	14	
Arkansas.....	451	
Total	3246	

On Saturday, parties being unable to come together, the movement up to noon was on a very limited scale, after which, under later and more discouraging news, factors gave way, and the sales embraced 1,700 bales, at prices indicating an average decline of 1/40. On Monday, the Liverpool market being reported steadier and more active, factors were inspired with renewed confidence, and generally raised their pretensions, which checked the demand. A few, however, were willing to sell at about previous rates, and 1,500 bales changed hands at firmer and, in most cases, stiffer prices, but without any quotable advance. On Tuesday the market opened with a pretty fair inquiry, but at figures below the views of factors, most of whom were more stringent in their pretensions; but as no dispatches were received from that market, except a private one by the French cable, of an unfavorable tenor, they subsequently met the demand more freely, and the business embraced 1,100 bales either at previous rates or a fraction less, while the bulk of the stock continued to be held above the ruling rates.

This makes an aggregate for the past three days of 4,300 bales. The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 1,113,632 bales, against 790,553 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 745,330 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 396,648 bales to Great Britain, of 110,463 to France, and of 111,467 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	15 1/2	to 16 1/2
Good ordinary	17 1/2	to 18 1/2
Low middling	18 1/2	to 19 1/2
Middling	19 1/2	to 20 1/2
Strict middling	20 1/2	to 21 1/2

SUNDAY SCHOOL INSTITUTE.

MONTGOMERY DISTRICT, ALABAMA CONFERENCE.—The third annual session of the Sunday School Institute for the Montgomery district, Alabama Conference, will commence on Thursday before the last Sabbath in July—the twenty-eighth—and include the Sabbath. A full attendance of the superintendents, teachers, preachers in charge and Sunday school workers is earnestly requested. A programme of the exercises and the place of meeting will soon be published by the Executive Committee. O. D. SMITH, Sec'y.

Committees of Examination for 1870.

ALABAMA CONFERENCE.
Applicants for admission on trial—J. W. Rush, B. B. Ross.
First year's course—D. M. Hudson, J. D. Cameron, J. M. Brown.
Second year's course—A. S. Andrews, H. Urquhart, W. A. McCarty.
Third year's course—W. M. Motley, J. S. Moore, J. B. Cottrell.
Fourth year's course—J. Baneroff, W. A. Shepard, E. M. Bonnds.

NORTH ALABAMA CONFERENCE.
Applicants for admission—D. Duncan, B. F. Lea.
First year's course—L. H. Grubbs, W. L. Clifton, W. R. Kirk.
Second year's course—L. M. Wilson, John A. Thompson, B. G. Ferrill.
Third year's course—R. K. Brown, F. T. J. Brandon, C. D. Oliver.
Fourth year's course—A. West, M. L. Whitten, T. L. Moody.

EAST ALABAMA COLLEGE.

COMMENCEMENT EXERCISES.—Sunday.

July 10.—Sermon by Rev. J. Hamilton, D. D.
Monday, July 11.—Meeting of the board of trustees, at nine o'clock A. M.
Monday, eight o'clock P. M.—Freshman prize declamation.
Tuesday, July 12, eleven o'clock A. M.—Annual meeting of literary societies. Tuesday, eight o'clock P. M.—Sophomore prize declamation, and an address by the Rev. B. B. Ross.
Wednesday, July 13, ten o'clock A. M.—Original orations by the junior class, and an address before the Wirt and Websterian Societies, by Admiral Raphael Semmes.

FLORENCE WESLEYAN UNIVERSITY, Florence, Alabama.

The annual examination commences on Wednesday, June 29. Commencement sermon by Rev. R. A. Young, D. D., on Sunday, July 3; literary exhibition, July 4; alumni meeting and address by Captain O. R. Kennedy, July 5; commencement, July 6, when the literary address will be delivered by Rev. R. H. Rivers, D. D.
A full attendance of the alumni of this institution and of Language College is desired to reorganize their society. B. F. MEER, Secretary of Faculty.

MERIDIAN DISTRICT MEETING.

The District Conference for Meridian district, Mobile Conference, will be held at Belmont, Alabama, August 11-14. A full attendance is requested. J. T. HEARD, P. E.

CAMP MEETING.

A camp meeting will be held at Linwood, DeKalb circuit, Macon district, Mobile Conference, commencing on Thursday night before the fourth Sunday in September.
To the preachers: Come, come, come and help us! J. M. Gunn, S. H. Cox, W. I. Powers and A. J. Coleman will please be sure to come.
The grounds will be greatly improved and enlarged. U. L. THOMPSON, P. C.

LAFAYETTE DISTRICT MEETING.

The District Meeting for the Lafayette district, Montgomery Conference, will be held at Linville, Alabama, commencing on Thursday, July 14. All the members are requested to attend punctually. We hope to be favored with the presence of one of our Bishops. F. L. B. SHAWER, P. E.

Mt. Carmel Dist., Mississippi Conference.

THIRD ROUND OF QUARTERLY MEETINGS.
Columbia.....June 25, 26
Guineville.....July 9, 10
Mount Carmel.....16, 17
Okahay.....23, 24
Rankin.....30, 31
Black Creek.....Aug. 13, 14
Hardsboro.....27, 28
The District Meeting for Mount Carmel district will be held at Skiffa, on Mount Carmel circuit, embracing the third Sunday in July.
H. P. LEWIS, P. E.

Woodville Dist., Mississippi Conference.

THIRD ROUND OF QUARTERLY MEETINGS.
Buffalo, at Mar's Hill.....July 16, 17
Meadeville, at Beech Hill.....23, 24
Amite, at Adam's.....30, 31
St. Helena, at Sylmel.....Aug. 20, 21
Wilkinson.....27, 28
Liberty, at Liberty.....Sept. 10, 11

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, JULY 2, 1870.

NO. 24.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, June 23.—Amos T. Ackerman, of Georgia, was confirmed to-day as attorney general, without an objection or debate.

SAN FRANCISCO, June 23.—Advices from southern Arizona up to the tenth of June give the particulars of the murder of Messrs. Kennedy and Israel, and the dispersion of their party. Mr. Kennedy lived in a rancho at Tucson. Mr. Israel was scalped, his legs burned off, heart cut out and a coal of fire placed in it. The remainder of the party reached Camp Grant. All their mules were captured, and their wagons and merchandise destroyed. General Cogswell ordered Lieutenant Cushing, of the Third Cavalry, to pursue the savages. The lieutenant discovered and surprised the Indians in camp, killed thirty-five, captured two, destroyed the village and other property of the savages.

Colonel Sanford, a short time before, in a battle with the same band, killed twenty-one.

Governor Safford is personally visiting the various tribes in the territory, to ascertain their wishes and hear their complaints. The Indians promise fairly, but the governor places no faith in them.

WORCESTER, Massachusetts, June 23.—An explosion of nitro glycerine took place in this city at 10.20 o'clock to-day, killing a man named Timothy Cronan (an Irishman, twenty-two years of age), and injuring about thirty other persons, none of them dangerously, however. Twelve houses were demolished and many others badly shattered. The shock was felt all over the city. Bells were rung, and erecology and furniture broken half a mile distant. The cause of all the mischief was nitro glycerine, that had been smuggled into a car, and addressed to North Adams, and was intended for the Hoosack Tunnel. The wounded were kindly cared for by the physicians of this city. The scene of the disaster has been visited by over fifty thousand people. It is most astounding that but one life was lost and so few seriously injured. The man killed was walking on the track at the time of the explosion. The nitro glycerine was in the last car of the freight train. Three cars were demolished. The railroad officers here, and also in Boston and Springfield, have visited the scene, and are anxious that everything possible shall be done for the sufferers. Heavy bars of iron were thrown a distance of nearly a quarter of a mile, and the shock was distinctly felt at points twenty miles distant. The damage is estimated at about \$150,000.

MEMPHIS, June 27.—Harris Bailey, residing near Louisville, Tennessee, poisoned himself and three children, on Saturday, with bed-bug poison, thinking it was whisky. The children all died. He will probably recover.

NEW IBERIA, June 29.—A disastrous conflagration occurred here last night, completely destroying three squares in the center of the town.

The fire originated at or near Mine Jenny's grocery, about eleven o'clock, and destroyed all the buildings on Main street, from Bridge street down to the residence of Mr. W. F. Weeks, on the north side, and to the hayon, from Church alley to Lot's coffeehouse on the south side.

There were some forty buildings burned in all, including three livery stables, two hotels, three coffeehouses, the courthouse and many large business establishments. No lives lost.

The loss is estimated at \$250,000. TEXAS.—On the night of the thirtieth ultimo a party of Indians visited the settlement of Mr. Coker, about twelve miles northwest of San Antonio, took off the horses from the settlement, those of Coker, Green, Hoffman, Brown and others. The citizens and military went in pursuit.

These border Indians, says the Herald, are getting sharp in trickery. An incident of Monday night will explain. Mr. Green had a valuable white horse staked in sight of his house. The Indians having captured previously an old white mare of Mr. Gallagher's, took her to the spot where the white was and made a swap, so as to deceive Mr. Green, and thereby elude pursuit.

FOREIGN.

LONDON, June 27.—Reports of the intended recall of Mr. Motley, American minister, excite surprise. The reports are not credited.

PARIS, June 27.—Amand Barbes, the French author, is dead.

This illness of the emperor has been exaggerated, probably to influence the action of the bourse.

The emperor intimates that the time for the return of the Orleanist prince has not yet arrived. He will remove restraints whenever it becomes safe and proper. Prince Napoleon has returned to Paris.

The abdication of the Spanish throne by Isabella was signed in the presence of all the members of the royal family in Paris, and several Spanish grandees and generals. The queen preceded the act by reading a formal address of farewell.

In a letter to the Pope the queen notifies his holiness of her abdication, and begs his blessing for the prince of the Asturias and Spain.

THE FATAL EXAMPLE.—An individual residing at —, who was a promising Christian, universally esteemed a good man by those among whom he resided, and who had been for years superintendent of the Sabbath school there, was away from home and staying for a short period in a distant city.

With others, he one evening yielded to an invitation to visit the theater; not, however, without some misgivings as to the propriety of his course. These, however, were overcome, and he went; but whether the act was repeated is not known.

He returned home, thinking that act would never be known to those among whom he lived. But, some years after, he was sent for to visit a sick and dying man. He went, supposing it was to administer spiritual advice and consolation. As he sat down by the bedside the dying man said to him:

"You, sir, have led me to ruin my soul. Some years since you were staying for a short time in — city. I was then living there, and had often been tempted to visit the theater, but had been deterred by the conviction that it was wrong and dangerous. On a particular evening, as I stood in front of the building, hesitating whether or not to go in, I saw you go up the steps and enter. Immediately I thought, 'if Mr. —, who is a member of this church, and was my Sabbath school superintendent, can attend the theater, I surely may.' I instantly went in, was fascinated by the performance, and continued to go till all hesitation was gone, and with it all concern for my soul. In this state I am now. Dreading the summons to appear before God, I felt I must send for you, to tell you the influence of your example."

Are there not other members of churches who are setting such examples? Ponder the result.—*Sunday School Messenger.*

TRIBUTES TO MR. DICKENS' MEMORY.

On Sunday, the twelfth ultimo, in New York city, Rev. Dr. Chapin rendered an enthusiastic eulogium to the memory of Charles Dickens, who he regarded as doing the work of the Redeemer by putting to such noble use the genius he received from God. His every work was characteristic of true charity and faith and mercy and good of the divine being. Rev. Dr. Bellows, in his sermon, spoke of Dickens as an example of Christian zeal. A deep knowledge of the works of the great novelist tended to elevate the mind and create a healthy moral tone. He never exerted his mighty influence except for good, and his pen was never used to express an immoral thought.

The leading divines all eulogized Charles Dickens in their sermons on the same day; Rev. Dr. Bellows paid his respects to Mr. Beecher, who, on Friday evening, asked the question whether Mr. Dickens was a Christian. Dr. Bellows said that in these days we had to be cautious before asking the question whether men like Washington, Lincoln, or even Dickens, were Christians. If Christianity could not hold such men, other questions still more difficult to answer would be asked. Mr. Frothingham alluded to Mr. Dickens preaching the living law of human kindness and sympathy to all mankind; while Dr. Chapin impressed upon his congregation the undeniable fact that Dickens had done great work in this Christian world.

SELFISH PRAYING.—"Oh, sir," said a lean-hearted believer to his pastor, "I have been praying a whole year that I might enjoy the comforts of religion, and get no answer to my prayers." "Go home now and pray, 'Father, glorify thyself,'" was the reply. "Selfish prayer contains no nutriment." Let us read, mark and learn.

Prospectus of the New Monthly Magazine

The General Conference of the Methodist Episcopal Church South, at the recent session in Memphis, Tennessee, resolved to establish a first class monthly magazine.

The reasons assigned for this action of the Conference are: 1. The necessity of furnishing pure and profitable reading for this family circle. 2. The importance of developing a sound literary taste, especially in our young people; pre-occupying, as far as may be, their minds, and preventing them from being poisoned by the publications of an unbridled and unscrupulous press. 3. To give due prominence to Southern interests; affording a medium for the expression of Southern thought, and the manifestation of Southern talent.

To carry out these purposes the General Conference elected Rev. William P. Harrison, D. D., editor of the magazine, and instructed the book agent to issue the first or specimen number by the first of September, 1870. In pursuance of this action of the Conference it is deemed advisable to lay before the church and the public a brief outline of the principles which will be observed in conducting the New Monthly Magazine.

1. It will be a Southern magazine. We do not propose to enter the field of sectional controversy—much less do we think of departing from our lawful work to meddle with the affairs of Caesar—at the same time, whenever occasion shall require an utterance, we do not intend that our trumpet shall give an uncertain sound.

2. It will be a magazine for the people. We shall not cater exclusively to the wants of a single class, or seek only the approbation of the few; but we shall strive to please, amuse and instruct the many. We believe that knowledge can be, and ought to be, made attractive; and hence we shall seek to clothe truth with the garments of beauty. Following the example of holy writ, we shall call to our aid the fable, the allegory and the parable; always seeking to elevate, inform and benefit our readers.

3. It will be a magazine for the young. By this we do not mean a child's magazine—other and competent provision has been made in that department. But we mean to say that the New Monthly will not be filled with prosy essays, or dry and tedious homilies. Fully sympathizing with the joyous nature of the young, we can only ask a fair and patient trial, that we may have opportunities to demonstrate our apprehension of their wants.

4. It will be an illustrated magazine. Pictures are attractive to all classes—the old and the young are alike pleased and instructed by them. We propose, therefore, from time to time, to give pictorial views of noteworthy places and remarkable scenery, yielding the precedence always to the physical geography of our own Southern land. Her mountains and valleys, cataraets and rivers, little known to the pencil of the artist, will furnish abundant materials for this department. In addition to these, the various industries of the country—the mine, the workshop and the forge, the arts and sciences—will each and all contribute to the variety and interest of the magazine.

Lastly, it will be a Methodist magazine. The utmost catholicity of sentiment we conceive to be compatible with absolute decision of character. Therefore, whilst according to all men unqualified liberty of conscience, we shall ever maintain in their integrity, so far as in us lies, those distinguishing features of our church which have been the sources of our power in the past, and form our safeguards for the future.

With this brief statement of our plans and purposes, the editor, and the book agent, cordially uniting to carry out the design of the General Conference, earnestly solicit the co-operation of their brethren in the ministry, and of the church at large. We are conscious that we have promised much. Our ability to perform will, in a large degree, depend upon the encouragement we receive from those we endeavor to serve. If our efforts are met with a ready, hearty co-operation on the part of the church, we shall fear nothing. A large and influential denomination, having nearly six hundred thousand members, and more than two thousand five hundred pastors, can give success to this enterprise.

To his brethren of the weekly newspaper press the editor desires to return his thanks for the gratifying manner in which they have

noticed his appointment. The ability which characterizes these messengers of grace will never find a detractor in our magazine, and whilst we only ask to be judged by our merits, we respectfully solicit a trial of our work before sentence is passed upon us. If any son of prophecy has a message of failure to deliver, we shall spare no effort to prove him destitute of inspiration. At all events, the publication of the magazine for the next four years is placed beyond any ordinary contingency. This was done by the General Conference, and therefore no one need feel any hesitation in extending to us a helping hand.

Terms of subscription, \$4 a year. All communications addressed to the editor must be directed to Atlanta, Georgia, for the present. Due notice will be given of his removal to Nashville. All orders, moneys and subscriptions should be sent to the agent, at Nashville, Tennessee. W. P. HARRISON, Editor. A. H. REDFORD, Agent. NASHVILLE, TENN., June 13, 1870.

THE SOUTHERN REVIEW.

MR. EDITOR: One of the most important measures of the late General Conference was the adoption of the Southern Review—Dr. Bledsoe's—as the organ of the church. This periodical has attained a position of the very first eminence among the quarterlies of the day, whether of Europe or America, for learning and ability; even the condignors of the Northern press have been forced to admit the power with which it treated the questions it handled. I know of no writer in the land better able to deal with and dispose of the questions that are hobbies with modern skeptics than Dr. Bledsoe. His assaults upon the theories of this class are merciless—as they ought to be—and crushing. He leaves nothing of them but a small muddy residuum of hate. If the Review shall maintain its present character in future, it will be a tower of strength in the defense of truth. I have been agreeably struck at the apt and fitting manner in which great truths and principles of revelation were assigned their appropriate place and work in the discussion of great philosophical and social questions, when such principles and truths are so seldom called in by our literary men. Most of our nominally Christian men seem to think that neither literature nor philosophy stand in need of any aid from anything in revealed truth. It is both refreshing and cheering to find at the head of such a work a man who finds the place of revelation in the history of human affairs and the government of the world. I trust our people will do themselves and the country the justice to give this work a hearty support. Help it forward, Mr. Editor.

J. HAMILTON.

THE OFFICE OF SMOELL.—The nose acts like a customhouse officer to the system. It is highly sensitive to the odor of the most poisonous substances. It readily detects hemlock, henbane, monk's hood, and the plants containing prussic acid; it recognizes the fetid smell of drains, and warns us not to smell the polluted air. The nose is so sensitive that air containing the two hundred thousandth part of bromine vapor will instantly be detected by it; it will recognize the thirteen millionth part of a grain of the otto of rose, or the fifteen millionth part of a grain of musk! It tells us in the morning that our bed rooms are impure, and catches the first fragrance of the morning air, and conveys to us the invitation of the flowers to go forth into the fields and inhale their sweet breath. To be led by the nose has hitherto been used as a phrase of reproach; but to have a good nose, and to follow its guidance, is one of the safest and shortest ways to the enjoyment of health.

DEFINITION OF FAITH.—A little girl, five years of age, on being asked what is faith, artlessly replied: "It is doing just what God wants us to do, and asking no questions about it." This covers the whole field of perfect trust combined with implicit obedience.

WINANS' DISCOURSES.

Among the various precious books that grace the almost innumerable shelves of our Book Depot, at 112 Camp street, there is scarcely a work which to a preacher is more invaluable than Dr. Winans' inimitable discourses. Though Dr. Winans can lay no claim to the exquisite fertility of Saunier, the majestic eloquence of Massillon, the poetic flights of Krummacker, the bewildering variety of South, or even the child-like simplicity of Wesley, presents, nevertheless, peculiar excellences. He aims at the establishment of biblical truth; but scorns, in reaching his aims, to tread the flower-scented paths of rhetoric—he hastens along on the highway of logic. He has no time to stop on the wayside, at the romantic brooks of poetry, to pluck flowers of verse and prose wherewith to decorate the children of his mind. He clothes them with home-made garments, with logical deductions and rational inferences. In short, the work is replete with thought and biblical exegesis. After studying these discourses—mere reading will not suffice; they require study—we deem it a sin of omission to preach on any of the fundamental doctrines of Christianity without having previously consulted Winans.

It will be impossible, in this brief sketch, to notice all the seventeen elaborate and masterly discourses which the book contains. Suffice a mere reference to the sermon on "The Origin and Character of the Devil." We had preached on this subject once or twice before reading Winans, and that, too, after perusing several German works combating the "Manichean theory;" but after digesting what is here communicated, so to speak, in a nutshell, we collected such a vast number of ideas that, preaching on the same subject to the same audience again, that audience, we are sure, never thought of ever having similar truths presented them before. Nothing, indeed, can be more explicit than Winans' explanations of the origin of the Evil being. He asks, very pertinently: "What could there have been to engender evil in an holy angel? What was there, either within or without himself, to seduce him into rebellion against his beneficent Creator?" And then answers conclusively: "This question proceeds upon the false, unphilosophical supposition that the determinations of a free and moral agent must have motives to produce them—a supposition as inconsistent with free moral agency as that of either physical constraint or divine coercion."

The price of this book, as Rev. R. J. Harp informs us, has been considerably reduced in order to enable every one of our church members to secure a copy. J. B. A. AURENS.

SUNDAY SCHOOL CONVENTION.

The Sunday School Convention of the Union Springs district will be held in Fort Deposit, Alabama, July 7-10, 1870.

PROGRAMME OF EXERCISES.

Thursday night.—Sermon by Rev. W. G. Perry.

Friday, 9 o'clock A. M.—Devotional exercises. 9½ o'clock.—Address by Rev. C. A. King. Subject: Infant Instruction—its Importance. Discussion. 11 o'clock.—Address by J. A. Radgett, Esq. Subject: Graduation of Sunday School Instruction. Discussion. 3 o'clock P. M.—Devotional exercises. 3½ o'clock.—Address by Rev. W. F. Norton. Subject: Christianization the Ultimate of Sunday School Instruction. Discussion. 8 o'clock.—Devotional exercises. 8½ o'clock.—Address by Colonel E. B. Wilkerson. Subject: Relation of the Sunday School to the Family. Discussion.

Saturday, 9 o'clock A. M.—Devotional exercises. 9½ o'clock.—Address by Rev. W. M. Motley. Subject: Relation of the Sunday School to the Church. Discussion. 11 o'clock.—Address by Rev. J. B. Cottrell. Subject: How shall Music be made to Subserve the Aims of the Sunday School? Discussion. 3 o'clock P. M.—Devotional exercises. 3½ o'clock.—Address by Rev. W. W. Graham. Subject: Relation of the Sunday School to the Benevolent Enterprises of the Church. Discussion. 8 o'clock.—Devotional exercises. 8½ o'clock.—Address by Colonel R. H. Powell. Subject: Influence of Sunday School Instruction upon the Well-being of Society. By order of the board of directors.

J. W. STONES, Chairman. W. C. MENESEE, Secretary.

80 MANY CALLS FOR MONEY.

"This is your subscription to the Tract Society; have you anything to add to it? You know how much it has been doing, and how much more it now desires to do, if Christians would only furnish means. Do you not feel called upon to add something to it?"

Mr. A. was very uneasy about this appeal, but there was something in the still, mild manner of the stranger that restrained him; but he answered that, though he regretted it exceedingly, his circumstances were such that he could not this year conveniently add to any of his charities.

The stranger received back the paper without any reply, but immediately presented in its place the subscription to the Bible Society, and in a few clear and forcible words reminded him of its well known claims, and again requested him to add something to his donation. Mr. A. became impatient.

"Have I not said," he replied, "that I can do nothing more for any charity than I did last year? There seems to be no end to the calls these days. At first there were only three or four objects presented, and the sums required moderate; now the objects increase every day, and call upon us for money; and all, after we have given once, want us to double and treble and quadruple our subscriptions. There is no end to the thing. We may as well stop in one place as another."

The stranger took back the paper, rose, and fixing his eye on his companion, said, in a voice that thrilled to his soul:

"One year ago to-night you thought your daughter lay dying—you could not rest for agony—upon whom did you call that night?"

The merchant started and looked up; there seemed a change to have passed over the whole form of his visitor, whose eye was fixed on him with a calm, intense, penetrating expression, that subdued him—he drew back, covered his face and made no reply.

"Five years ago," said the stranger, "when you lay at the brink of the grave, and thought that if you had died then you would leave a family unprotected for, do you remember how you prayed? Who saved you then?"

The stranger drew yet nearer, and said, in a more impressive tone, "Do you remember fifteen years since, that time you felt yourself so lost, so helpless, so hopeless, when you thought you would give the world for an hour's assurance that your sins were forgiven you? Who listened to you then?"

"It was my God and Saviour," said the merchant with a sudden burst of remorseful feeling; "O yes, it was he."

"And has he ever complained of being called on too often?" inquired the stranger in a voice of reproachful sweetness. "Say," added he, "are you willing to begin to-night and ask no more of him, if he from this night will ask no more from you?"

"O never, never," said the merchant, throwing himself at his feet; but as he spoke the words the figure seemed to vanish, and he awoke, his whole soul stirred within him.

"O God and Saviour! what have I been doing?" he exclaimed. "Take all—take everything. What is all that I have to what thou hast done for me?"

At a collection made at a charity fair a lady offered the plate to a rich man well-known for his stinginess. "I have nothing," was his curt reply. "Then take something," she answered; "you know I am begging for the poor."

The Christian Advocate.

SATURDAY, JULY 2, 1870.

THE SOLID SHORE.

There is many a rest in the road of life,
If we would only stop to take it;
And many a tone from the better land,
If the impatient heart would make it;
To the sunny soul that is full of hope,
And whose beautiful trust ne'er falters,
The grass is green and the flowers are bright,
Though the wintry storm prevaileth.

Better to hope, though the clouds hang low,
And keep the eyes still lifted;
For the sweet blue sky will soon peep through
When the ominous clouds are lifted;
There was never a night without a day,
Or an evening without a morning;
And the darkest hour, as the proverb goes,
Is the hour before the dawning.

There is many a gem in the path of life,
Which we pass in idle pleasure,
That is richer far than the jeweled crown,
Or the miser's hoarded treasure;
It may be the love of a little child,
Or a mother's prayer to Heaven,
Or only a beggar's grateful thanks
For a cup of water given.

Better to weave in the web of life
A bright and golden thread;
And to do God's will with a ready heart,
And hands that are swift and willing,
Than to snap the minute, delicate threads
Of our curious life asunder,
And then blame Heaven for the tangled ends
And sit and grieve and wonder.

LETTER FROM CHINA.

SHANGHAI, CHINA, May 11, 1870.

MR. EDITOR: It has astonished us often to see here and there, in selected places, members of the Roman Catholic Church and small schools, and their numbers seemingly on the increase. We have asked, How can this be? They do not preach openly or in private, neither do they distribute the word, and yet they get a hold that is truly wonderful. I make it a point to visit all these places occupied by Roman Catholics, and I have found that the majority of those who come to worship are women and children. Most of them are the children of those who were Roman Catholics two hundred years since, and down to the present time. The priests collect the children of the poor and those cast off, and put them into schools where they necessarily become members of the Roman Catholic Church, and are taught to work, some at one trade and some at another.

This is indeed an excellent plan, and I think the very best plan which can be pursued in China in regard to the young. Had we the funds to follow up this plan, the very best results would ensue. The strong hold of the Protestant missionary is on the preaching of the gospel of Christ on all occasions, and the thorough instruction of all native Christians in the word of God. Our native ministers, when they happen to meet with any members of the Roman Catholic Church, and there is an argument, the Protestant Christian argues from the gospel—"thus saith the Lord," but the Roman Catholic holds to tradition, and esteems the word of the Pope of the very highest importance and "infallible." I have never once seen the Romanist quit the argument in a good humor. But such arguments do not accomplish any very great good, and we find it best not to get into one. Now that Japan is rejecting Buddhism and prohibiting any more persons from entering the priesthood, and China, too, being prepared more and more for the introduction of Christianity, would it not be well for our churches to be alive to this subject and not allow the Romanists to take the field? Christian literature in the Chinese language is now in great demand by thousands, and many of the intelligent are ready to acknowledge that the foreigners have a superior literature. Now can we not have help, both money and men? The few hundred missionaries in China are not sufficient for the demand. Two or three thousand men are not sufficient for this great mission. We want churches and we want schools, and we must have them, or others will step in before us and claim the prize. Our church is in every sense a missionary church. Send us money for schools and for native helpers. We want your help and we want your prayers, and the work will go on. A brighter day is in store for these dying millions in China. All over this land good news comes to us of the blessed work of grace going on.

There is opposition, but this we must expect in a land where the power of darkness has such a strong hold on the hearts of the people. Our trust is in God, to whom be glory and honor forever and ever.
J. V. LAMBETH.

BIOGRAPHICAL.

Mrs. MATTIE EUGENIA SAMPEY, wife of the Rev. William A. Sampey, of the Montgomery Conference, died at the parsonage, Westville, Dale county, Alabama, April 28, 1870, aged thirty years, three months and twenty-seven days.

She was the daughter of Dr. C. H. Wilson, a native of South Carolina, who afterward removed to Georgia, where the subject of this memoir was born, January 1, 1837. Of the exact place of her birth we are not informed. The family subsequently removed to Clarke county, Alabama, where her aged father still resides.

She embraced religion and joined the Methodist Episcopal Church South in 1857, and was married to the Rev. William A. Sampey February 2, 1858. Prior to her conversion and attachment to the church she was fond of the amusements of the ball room and kindred convivialities, but afterward renounced these as incompatible with a state of grace and destructive to bodily health. For over twelve years she was the wife of a faithful itinerant minister, and though her lot was not always a pleasant and easy one, she never intimated to her husband a location. She freely sacrificed the comforts and pleasures of a settled home, and cheerfully shared with him the privations and inconveniences of an itinerant life, looking for her reward in another and more enduring state of existence. She was not of a very sanguine temperament, conscientious and self-scrutinizing almost to a fault, and was harassed a great deal with doubts and fears concerning her acceptance with God. She often discharged her Christian duties through a sense of principle, without the enjoyment of religious emotion. At the camp meeting held last September at China Grove, near where she lived, all these doubts and fears were dissipated, and she was blessed with brighter evidences and the full assurance of faith, and basked and bathed in the sunlight of God's reconciled countenance. Most nobly and joyfully, then, did she labor for her Master; she went out in the congregation and led souls to the altar of prayer, several of whom were happily converted, and some of them waited around her dying couch.

She was taken with a chill, and this was succeeded by a fever which all medical skill and remedial agents failed to arrest. The brain became involved, and in ten days after her attack she was a corpse. Every attention and kindness was shown her by the excellent Christian people in the midst of whom she died. The hand of Christian love ministered to her wants, and anxious friends, day and night, watched beside her dying couch; but the white-winged messenger had come to bear her spirit hence, and no human agency could avert the stroke.

Energetic and industrious, and possessing rare domestic qualifications, she sought to make home pleasant and attractive to her husband and children. Any observant visitor could readily see how well she succeeded in gaining her object. "The heart of her husband did safely trust in her." To her he could safely confide everything, and nothing escaped her lips to create strife or separation of friends.

She was well posted in the theology and literature of our church, especially fond of religious biography, and was reading the Life of Bishop McKendree at the time of her death.

The poor found in her a friend, and often she economized her wardrobe and labor to minister to their wants. Her religious joy was not of that ecstatic nature enjoyed by some, but a deeply imbedded principle underlying the whole course of life.

On Sunday previous to her death (the following Thursday) the venera-

ble Rev. Z. Dowling visited her, and asked her if she had peace with God, and if to die would be gain? Of this she gave the firmest and fullest assurance.

As she neared her end her husband, seeing that her feet were fast going down into the cold waters of death, asked her if she loved Jesus. She distinctly replied: "O, yes!" She would often say: "He died! He died!" The last words she was heard distinctly to utter were: "Glory to Jesus."

Thus peacefully and triumphantly she passed away, and has gone to join the "spirits of just men made perfect." All that is mortal of Sister Sampey now lies in the graveyard of Pleasant Hill church, in Dale county. Spring-time may come and weave its garlands over her grave, and birds of summer may warble their soft notes by her last resting place, but sweetly and silently she sleeps on until the last trump shall awake her slumbering dust to bloom immortal in the elysian fields of Paradise.

She leaves behind a husband and two children. May that gospel he preaches and offers to others be his comfort and solace in this the hour of his sad bereavement.

WESLEY B. DENNIS.

HON. J. ALFRED GRIFFIN.

Died, at Boerne, Texas, on the seventeenth day of April, 1870, the forty-fourth year of his age, son of Colonel William and Mrs. Mary Griffin, of Moss Point, Mississippi.

Mr. Griffin left Moss Point a few weeks since to seek, by relaxation and change of climate, a restoration of health, which had been declining for several months. The exposure and fatigue of travel doubtless hastened to a fatal termination the disease under which he labored. The intelligence of his sudden demise came with overwhelming effect upon his family and numerous friends; and hard was it for us to realize that we should see his face no more.

Born in Perry county, Mississippi, he had passed his later years at Moss Point laboriously and successfully in business, until declining health compelled him to retire. Few men leave behind them a reputation more desirable than that of our departed friend. Though his pursuits caused him to have dealings with many men, and men of very different temperaments and dispositions, yet such was the uniform uprightness of his conduct that he secured the unbounded confidence and warm friendship of all with whom he came in contact. His energy and strict attention to business were remarkable, and his justice and integrity won for him the sincerest regard of all who knew him. Possessed of a kind and benevolent disposition, his hand was ever ready to assist and uphold the deserving. In him the poor and the sick found a willing friend and a ready helper; yet his charities were unostentatious and noiseless. He seldom permitted himself to speak of acts of kindness which he had done, and they were only known through the grateful expressions of the recipients thereof.

Mr. Griffin was endowed with a mind of unusual strength and vigor, and his information was extensive and varied; yet a casual acquaintance knew it not. His manners and habits were so reserved that only those who were brought into intimate connection with him realized either the extent of his knowledge or the excellency of his heart. But when occasion called him out, or when in the freedom and intimacy of social intercourse, his most familiar friends were often surprised at the variety and accuracy of his learning.

As a citizen none were more exemplary or useful. Ever ready to advance and promote the public good by every means in his power, his loss will not be easily replaced. But in the quietness of the domestic circle his worth was best known and appreciated. As a son and brother he not only called forth the deepest affections of the heart, but he inspired the most profound and unbounded confidence. He was emphatically one to be looked up to and relied on. But it was in the

relation of husband and father that his virtues shone most conspicuous. Not demonstrative in the mode of exhibiting his tender regard—of a manner singularly reserved—yet he was a husband and father in the full and true sense of those endearing terms. Ever kind and gentle, he showed his deep affection and concern not by words alone, for they were few, but by those thoughtful and delicate acts which so much win upon the human heart.

For some time preceding his death, fully sensible that his days on earth were numbered, with judicious care he arranged his earthly affairs and set his house in order. Some time previous to his death he gave public profession to his faith in that Redeemer who came to save, and calmly reposed his hopes of the future upon that sure foundation. With tender and affectionate regret he looked upon the dear ones he was so soon to leave; yet with calm and serene faith he awaited the final change.

His remains were brought to Moss Point and interred in the family burying ground. The religious services were forcibly and eloquently performed by the Rev. Mr. Coleman, assisted by the Rev. Mr. Gaston, at the Methodist church. His remains were then escorted to the grave by the brethren of the Masonic lodge of this place—of which he was a worthy and honored member—assisted by a number of visiting brethren, when the beautiful burial service of the order was read in a most feeling and emphatic manner by Dr. Houze, the worthy and worshipful master.

The large concourse of brethren and citizens which accompanied his remains to the grave, and the deep emotion they evinced, fully attested how much he was esteemed and loved.

He has left us, and we shall not easily supply his place. A void has been made in our midst, and we know not how it may be filled. Long will he be remembered by us, and long will his memory be green in our hearts. Moss Point.

MRS. FAITHFUL RANDOLPH.

Died, at the residence of her husband, in Richland parish, Louisiana, November 4, 1869, Mrs. FAITHFUL RANDOLPH, wife of Rev. J. M. Randolph, after a protracted and painful illness of thirty-two days.

The subject of this notice was born June 5, 1819; joined the Methodist Church in 1833; was married in 1834; embraced religion in 1836, in which profession she lived and died. She was the mother of thirteen children—six boys and seven girls—seven of whom have gone to heaven before her. Six are left behind to mourn her loss. She was a kind and unselfish mother; a faithful and affectionate wife, ever absorbed in the wishes, wants and interests of her husband; a kind and generous friend, and, above all, a devoted Christian. In her dying hours she could testify that she had lived up to the rules of the church in every jot and tittle.

Through all her sickness she never murmured or complained, but said: "The Lord's will be done." She said her peace was made with God long since; she had no settlement to make. All her anxiety was for her family, which she had taken great pains to instruct and admonish both for time and eternity.

When she saw that the time of her dissolution was near she called her family and friends around her bedside to make her last request of them, which was to meet her in heaven. Commencing with the doctor, she requested and instructed them to meet her in heaven by telling them to go three times a day in secret prayer to God, and ask him to bless and direct them, which would secure to them a meeting in heaven. Her special attention was then attracted by the weeping and lamentations of her daughter, who is a cripple, and upon whom the charge of the family would soon fall. She called her close to her, and told her, in her lonely and distressing hours of trial, to come to her grave—which was to be placed in sight of the house—and there kneel beside it and pour out her soul in prayer to God, saying: "I will be there to

appeal it and carry it up to heaven." Then pressing her close to her, told her to kiss her for the last time while she was warm. Placing her hand upon her forehead and finding it cold, she placed it upon her cheek. She said: "Here is a warm place; kiss me there." Pressing her still closer, she said: "Weep not; seven angels are hovering over me to waft my soul to God. Don't you see them? Oh! yes, there's little Stuart, (meaning one of her little sons who had gone before her.) Don't you see him?" And when her daughter said, "No, ma, I can't see him; can you see me, ma?" she answered: "No, it is very dark between you and me; but if you were up yonder where they are I could see you. It is so bright up there." Then sinking seemingly in death, she remained awhile speechless; then reviving, she called the doctor and asked him to feel her pulse, which he did, and told her it was gone. She exclaimed: "Thank God! Glory to God! I'll soon be gone. Don't weep." She said to her family: "The prospect is so bright—you ought to give me up cheerfully." Then seeing her companion, who sat beside her, she said in a whisper: "Thou loved one, farewell!" And speaking many other words, too low to be understood, her voice was hushed in death, and her soul took its everlasting flight to God, who gave it.

Alas! that a home once so bright with her presence should now be darkened by death and shrouded in memory of the past. God grant that this severe affliction may be sanctified to the good of the bereaved, especially to her crushed and broken-hearted husband and dear little children. Yet what a consolation it is to those whom she has left behind, buried in grief and sorrow, to feel that what has been their loss is her eternal gain; and that while in her desolate earthly home there is a vacant chair, the pearly gates of paradise have opened to receive another of earth's redeemed children, and that a new harp of praise has been tuned on the bright and glorious seat of heaven.

THE HAPPY MAN AND TRUE GEN-

TELMAN.—The happy man was born

in the city of regeneration, in the parish of repentance unto life. He was educated at the school of obedience, and lives by faith in perseverance. He works at the trade of diligence, "notwithstanding he has a large estate in the county of Christian contentment, and many times does jobs of self-denial. He wears the plain garb of humility. He often walks in the valley of self-abasement, and sometimes climbs the mountain of spiritual mindedness. He breakfasts every morning upon spiritual prayer, and sups every evening upon the same. He has meat to eat that the world knows not of, and his drink is the sincere milk of the word. Thus happy he lives and happy he dies." Happy is he who has the gospel submission in his will due order in his affections; sound peace in his conscience, sanctifying grace in his soul, true humility in his heart, real divinity in his breast, the Redeemer's yoke on his neck, a vain world under his feet, and a crown of glory over his head; happy is the life of such a person! In order to attain which, pray fervently, believe firmly, wait patiently, work abundantly, live holily, die daily, watch your heart, guide your senses, redeem your time, love Christ and long for glory.

A true gentleman is God's servant, the world's master and his own man. Virtue is his business study, his recreation, contentment, his rest and happiness, his reward, God is his father, the church is his mother, the saints are his brethren, and he is a friend to all that need him; heaven is his inheritance, religion is his mistress, loyalty and justice his two maids of honor, devotion his chaplain, chastity his chamberlain, sobriety his butler, temperance his cook, hospitality his housekeeper, providence his steward, piety is mistress of the house, and discretion is porter, to let in and out as is most fit. Thus is his whole family made up of virtues, and he is the true master of the family. He is necessitated to take the world in his way to heaven; but he walks through it as fast as he can; and all his business by the way is to glorify the name of God and do good to mankind. Take him all in two words—he is a man—a Christian.—*Old Theological Magazine*, 1797.

THE SOUL is the life of the body. Faith is the life of the soul. Christ is the life of faith.

ROUND THE WORLD.

A short time ago we received among our mail matter a long strip of paper, about a yard long, purporting to be a succession of tickets from New York round the world, which at first looked like a "complimentary pass" to Omaha, San Francisco, Yokohama, Hong Kong, Calcutta, Bombay, Cairo, Marseilles, Havre and New York. A closer inspection revealed the words, printed across the face of the ticket, "Good for one lesson in geography, but not good for passage." As we could not therefore visit the scene of George Francis Train's most brilliant exploits—Omaha—nor eat spring strawberries in California, one of which is said to be enough to satisfy the greatest strawberry glutton; as we cannot pay our respects to the Mikado, the Tycoon, or even a Daimio; as we are cut off from our visit to the brother of the Sun, and cannot indulge in a tiger hunt in British India; as we are not allowed to climb the Pyramids or search for the sources of the Nile in Egypt, walk again on the Canebiere of Marseilles, or wonder at the evidences of Hausmann's architectural genius in Paris, unless we give James Fisk, Jr., and the Erie Railroad Company a certain number of legal tenders, we abandon the trip and take the lesson in geography, which we take pleasure in imparting to others, showing how a trip round the globe can be made, and how much time it takes to make it.

Taking New York as the starting point, the tourist proceeds:

To Buffalo or Cleveland, 428 or 625 miles by the Erie, in seventeen or twenty-four hours.

Thence to Chicago, 538 or 855 miles, in twenty-one or fourteen hours.

Thence to Omaha, 490 miles, in twenty-three hours.

Thence to San Francisco, 1,950 miles, in ninety-three hours.

Thence to Yokohama, 4,714 miles, in twenty-one days.

Thence to Hong Kong, 1,670 miles, in six days.

Thence to Calcutta, 3,500 miles, in fourteen days.

Thence to Bombay, 1,219 miles, in two days.

Thence to Cairo, 3,600 miles, in twelve days.

Thence to Alexandria, 100 miles, in five hours.

Thence to Marseilles, 1,800 miles, in six days.

Thence to Havre, via Paris and Rouen, 575 miles, in thirty hours.

Thence to New York—home again—3,150 miles, in nine days.

Thus the "round trip" will consist of 23,739 miles of continuous travel by land and sea, and it will take almost twenty-eight days to complete it, provided all the connections are made.—*Southern Farm and Home*.

THE ALL-SEEING EYE.—One day the astronomer Mitchell was engaged in making some observations on the sun, and as it descended toward the horizon, just as it was setting, there came into the range of the great telescope the top of a hill about seven miles away. On the top of that hill were a large number of apple trees, and in one of them were two boys stealing apples. One was getting the apples, and the other was watching to make certain that nobody saw them, feeling that they were undiscovered. But there sat Prof. Mitchell, seven miles away, with the great eye of his telescope directed fully upon them, seeing every movement they made as plainly as if he had been under the tree with them. So it is often with men. Because they do not see the eye which watches with a sleepless vigilance, they think they are not seen. But the great open eye of God is upon them, and not an action can be concealed. There is not a deed, there is not a word, there is not a thought which is not known to God.

HOW TO GET SLEEP.—How to get sleep is to many persons a matter of high importance. Nervous persons, who are troubled with wakefulness and excitability, usually have a strong tendency of blood to the brain, with cold extremities. The pressure of blood on the brain keeps it in a stimulated or wakeful state, and the pulsations in the head are often painful. Let such rise and shake the body and extremities with a crash towel, or rub smartly with the hands to promote circulation, and withdraw the excessive amount of blood from the brain, and they will fall asleep in a few minutes. A cold bath, or a sponge bath, and rubbing, or a good run, or a rapid walk in the open air, or going up and down stairs a few times, just before retiring, will aid in equalizing circulation and promotion to sleep. These rules are simple, and easy of application in castle or cabin, and may minister to the comfort of thousands who would freely expend money for an anodyne to promote "Nature's sweet restorer, balmy sleep."

Chicago received one hundred tons of strawberries, in one train of twenty-three cars, last week.

The Christian Advocate.

SATURDAY, JULY 2, 1870.

THE DANCE.

My accusation is that the dance, instead of affording an opportunity for mutually ennobling companionship between man and woman, inspired with a chaste and sweet interlarded remembrance of their contrasted relationship to each other, consists substantially of a system of means contrived with more than human ingenuity to excite the instincts of sex to action, however subtle and disguised at the moment, in its sequel the most bestial and degrading. I charge that here, and not elsewhere, in the anatomy of that elusive fascination which belongs so peculiarly to the dance, the scapel is laid upon the quivering secret of life. Passion—passion transformed, if you please, never so much, subsisting in no matter how many finely contrasted degrees of sensuality—passion, and nothing else, is the true basis of the popularity of the dance.

It is no accident that the dance is what it is. It mingles the sexes in such closeness of personal approach and contact as, outside of the dance, is nowhere tolerated in respectable society. It does this under a complexity of circumstances that conspire to heighten its impropriety. It is evening and the hour is late, there is the delicious and unconscious intoxication of music and motion in the blood, there is the strange confusing sense of being individually unmolested among so many, while yet the natural "noble shame," which guards the purity of man and woman alone together, is absent—such is the occasion, and still, hour after hour, the dance whirls its giddy kaleidoscope around, bringing hearts so near that they almost beat against each other, mixing the warm, mutual breaths, darting the fine personal electricity across between the meeting fingers, flushing the face and lighting the eyes with a quick language, subject often to gross interpretations on the part of the vile-hearted—why, this fashionable institution seems to me to have been invented in an unfriendly quarter, usually conceived of as situated under us, to give our human passions leave to disport themselves, unreproved by conscience, by reason or by shame, almost at their will.

And then consider, ye Christian fathers, and brothers, and husbands, to what horrible hazards of contact the opportunities of the dance expose your daughters, and sisters, and wives. For who, that has gained any experience of the world, is ignorant of the fact that hardly-ence does a considerable party assemble, even in the most respectable society, without including some man whom his associates know to be a libertine at heart, if not in life? To think of pure woman pastured on with palms of pollution, and with imminent eyes of adultery, by such a bull of Bashan, the evening long, in the promiscuous corral of the dance! What better facilities could be imagined for an accomplished voluptuary to compass the capture of his prey!

Faugh! in the ordinary occasions of society a lady may let her sacred intuitions have some play to guard her against the access of impurity in the uniform of a gentleman. But it is the boast of the dance that it is a demerit and a leveler, permitting no individual caprice to break the circuit of universal equality. You may shudder to your heart's core at the contact that is coming—but the dance leaves you no election—you must take it when it comes. Blush, blush henceforth, ye Christian women, when you are invited to submit your persons to the use of a diversion that may at any time choose to bring you finger-tip to finger-tip with those whose touch is pollution, or, it may be, encircle you in their arms!

A burning blush of speechless shame were the best reply to the insult of such an invitation. But I plead against an advocate more eloquent than any individual's words. Oh, Fashion! Fashion! what power hast thou, to browbeat holy nature, so that she dares not speak to assert her sacred claims against thy imperious sway!

BIG SERMONS.—The Christian Union says: "It is telling no tales out of school to say that ministers often have a park of superior artillery, kept for great occasions, of a range and bore far exceeding that usually employed. These parade sermons have been got up at the expense of whatever the man knew. We have heard men, in the innocence of their hearts, talking the matter over: 'What did A. give—his Dew sermon?' 'No; his Wild Bear of the Forest.' 'Is G. going to preach?' 'Yes, in the morning.' 'What has he got?' 'His biggest thing is his Cherub.' You ought to hear that. It's splendid. There's another one about as good—it's his Fishhook Sermon.' Thus one has

his 'Abraham,' another his great 'Judas' sermon; another one is best on the 'Destruction of Jerusalem,' while a fourth is never so fine as on the 'Last Judgment.' Forty or fifty clergymen preaching great sermons in our city churches, for two or three Sundays, are enough to create a whole year's backsliding."

THE TOILETTE FOR THE GRAVE.

The above is the heading of an article which lately appeared in the columns of a leading fashion paper. We know it is a dull season for the fashion writer. * * * Apart from this, it is a good time to remind Newport, Saratoga, Long Branch and Niagara that there is such a toilette as the one alluded to. The beautiful dresses which were gotten up for the reason are no longer objects of interest. The hops and the balls, the billiard rooms and the bowling alleys, the moonlight walks and the walks without a moon, the pleasure parties upon land and water, are beginning to weary. In a short time new styles and new interests will engage the attention; but at present there is a brief period of ennui—a pause in the festivities. It is well to take advantage of it, and we hope that the fair devotees of the charming goddess, who rules so absolutely over her subjects, will be pleased with the melancholy caprice which describes for them "The Toilette for the Grave." We learn from this sad dispatch that a beautiful matron, who died not long since, was robed in a morning dress of snowy muslin, richly adorned with embroidery and lace—that a young wife, dying in the first year of her marriage, was buried in her bridal toilette, without jewels, save the wedding ring—that a gifted young girl, just through her school days, was laid in her coffin in the salt-white muslin she wore on graduating day; and that another fair maiden was clothed in the pearl-tinted silk worn last at a ball where she had contracted the cold that caused her death. The last item has made us shiver—one would suppose that the pearl-tinted silk would have been consigned to the tomb of the Capulets instead of being allowed to adorn the form of its probable victim, adding to the melancholy present the sadness of a sorrowful memory.

We are told that one never hears the word shroud any more; that the words robe and wrapper have taken its place. We know that the word is not used to the extent that it formerly was, but we were not aware that it was entirely interdicted in the fashionable circles.

Cannot some one manufacture some syllable, monosyllable or polysyllable which shall take the place of the word death? It is evident that Shakespeare, notwithstanding his remark about the rose, was not as well informed upon the subject as he might have been, and whoever can accomplish such an achievement might, in fashionable circles at least, rob the mighty king of half his terrors.

In conclusion, as the good men in the pulpit say, we must advise our readers to live as long as they can. Caskets, we are told, cost from \$150 to \$200, while the undertaker's charges are sometimes \$1,000, \$500 being the average.

A PERSIAN TALE, OR LITTLE THINGS OF USE.

There was once a prince who, having been much displeased with one of his nobles, determined to punish him. The prince commanded that he should be shut up in a high tower. Into this tower there was only one entrance, which was walled up immediately after the nobleman had been placed there. Thus all hope of escape seemed to be cut off, and the unhappy man was left to perish. Inside the tower there was a long winding staircase, by which the prisoner reached the top. While looking down from there he observed his wife, who had come, indulging a faint hope that she might be able, by some means or other, to aid her husband in escaping from his place of confinement. On inquiring if she could be of any service to him, he replied: "O, yes; go and procure a black beetle, a little grease, a skein of silk, a skein of twine, and a long rope." The poor wife hastened to obtain what her husband asked for, wondering, no doubt, at the strangeness of his request. She soon returned furnished with the things. Her husband then directed her to put the grease on the beetle's head, to fasten the silk to its hind leg, the twine to the silk, and the rope to the twine, and then to place the beetle on the wall of the tower. On being set at liberty on the wall, the beetle, smelling the grease on its head, and not being able to discover where it was, crept up the tower in search of it until it arrived at the top. The nobleman caught it, and taking the silk from its hind leg carefully drew it up. When he came to the end of the silk he found the twine, and next he came to the rope. Fastening this to a creak he let himself down, and thus made his escape.

A STRANGER IN THE CITY.—If there were more with the spirit and habit of Harlan Page in our churches, not half so many of our young men in our cities would go to destruction.

A young man entered a church one evening and found no one present but the sexton. Presently a plain man came in, spoke pleasantly to the sexton, and then sat down by the stranger. He gave him a kind salutation, such as goes to the heart of a young man alone in a strange city, and then said very tenderly: "I trust you love the Saviour."

Oh, how these words thrilled through his heart. He had been preached to all his life at arm's length. This was the first time the world had come home to him face to face. After some conversation addresses were exchanged, and the next day Mr. Page called at his place of working, and gave him a little tract, called "The way to be Saved," which he said he thought he would like to read. These efforts were blessed to his salvation. "But for Mr. Page," he was wont to say, "I should probably have sunk into a miserable eternity."

Christian employer, do you look after the souls of those young men who come into your service? If not, will the Lord hold you guiltless? "If thou fail to warn the wicked, then shall he die in his iniquity, but his blood will I require at thy hand."

The reluctance you feel in beginning a practice so entirely new to you, the awkwardness you may experience, will very quickly vanish after one or two efforts. You will be surprised to find how easy and pleasant it is thus to work for Jesus. And the peace and real joy it will bring your pillow will far exceed the pleasure you feel after the most prosperous day in business. *Sunday School Times.*

SELF-DEVELOPMENT.—John Newton once said that if two angels were commanded to sweep its streets there would be no strife between them as to which should be governor or street sweeper. A similar spirit would lead all Christians to find their duty and their development in doing the work to which the providence of God called them. Dr. Brainard, in his Life of John Brainerd, relates the following incident:

"We once introduced a young minister to a missionary congregation in the suburbs of a great city. The people were highly pleased with him, and invited him to settle among them. He came to consult me on the subject. As he was an unmarried man he regarded the salary as adequate. He had no fault to find with the number, the attendance, the attention and interest of the congregation. I urged him to give an affirmative answer. He hesitated. 'I am afraid,' he said, 'it is not a place for me to develop myself—alluding to the plainness of the people.'

"I replied: 'It is an excellent place to develop the gospel of the Lord Jesus Christ, but I know not whether it is the place to develop yourself.'

"He left the field, and has since developed himself by giving up the ministry. 'He that exalteth himself shall be abased.'

"The little congregation, under labors of purer and better men, has also 'developed' itself into one of the most numerous, intelligent, affluent churches in the land. Are not other young ministers corroding into idleness, rejecting difficult fields, and waiting for a place to 'develop themselves'?"

PROGRESS IN MADAGASCAR.—The report says that the "destruction of the idols in Madagascar left a million of people without a religion; and at once messengers and letters began to arrive from all quarters, asking for Christian teachers. A great number were directed to the missionaries; but, not unilaterally, many others were addressed to the prime minister. The state of things might have involved complications on which missionaries of free churches, anxious to maintain complete separation between the functions of the Christian church and of a civil government, would have looked with dread. But the able Christian man who now directs the public affairs of the island has comprehended the gravity of the circumstances which were presented, and has avoided the difficulties which appeared to be imminent."

The total number of "adherents" recognized by the missionaries increased from thirty-seven thousand to one hundred and fifty-three thousand in twelve months; the number of church members from seven thousand and sixty-six to ten thousand five hundred and forty-six. The society has resolved to send out, not five, as first proposed, but sixteen new missionaries, eight of whom are already on their way. One of the speakers, referring to the proposal of the Propagation Society to send out a bishop to Madagascar, asks: "Whom will you send—him of Honolulu (Staley), who must come home, or him of Natal (Colenso), who won't come home?"

Deaths from Wild Beasts in India.

It has been reckoned that at least ten thousand people die every year in India of snake bites. The new plan of injecting ammonia into the wounds may tend to diminish the number of deaths from snake bite, if it succeeds in India as well as it has in Australia; but the havoc caused by tigers, leopards and other wild beasts, if not greater in fact than it was some years ago, has at any rate been serious enough to draw from Lord Mayo a demand for help on the part of the local governments in devising measures to abate the evil.

Man-eating tigers are the special terror of the countryside. The taste for human flesh either grows with indulgence, or becomes a last resource of tigers of advanced age, whose energies are no longer equal to the demands of their appetite. We had always imagined that the latter was the true way of accounting for the ravages of the "man-eating" class, and the mangy appearance for which they are remarkable. It is certainly a curious fact that the tigers in the Oudh jungle seldom prey on man, being plentifully supplied with wild pig and other large game. There, too, they are such cowards that herdsmen armed with lathies, or iron-bound sticks, often drive them away from their own cattle. A driver of a mail cart will also scare them away by merely sounding his bugle. Elsewhere, however, they are either bolder or have less choice of food.

In the central provinces it is a thing of yearly occurrence to hear that a man-eater has posted himself near some district thoroughfare, whence he falls on unwary travelers and toiling peasants, until, emboldened by practice, he even carries off his prey from within the village inclosures. In the Chanda district alone one of these brutes killed, in a short time, 127 people, and stopped all traffic for many weeks on the road from Mool to Chanda. A tigress in Chindwarrah slew, according to native estimates, 150 people in three years, causing the abandonment of the villages; and throwing 250 square miles out of cultivation. Another old tigress in Kurnool carried off 64 human beings within nine months, stopped the post-runners and police patrols, and scared away the laborers employed on public works. One of her victims was the head constable. The brute's average allowance seems to have been one man every three days. It was only by keeping together in numbers and making a horrible noise with "tomtoms" that travelers could safely pass that way. At last a broad strip of jungle was cleared away from either side the road, and in due time the beast was hunted down.

In the Bhagalpore district alone of Lower Bengal, as many as 1,434 people were killed by wild beasts in six years. During the same period 13,401 deaths from wild beasts were reported for Bengal proper, of which 4,218 are ascribed to tigers, 1,407 to leopards, 4,287 to wolves, 174 to hyenas, and 105 to bears, the balance being set down to boars, jackals, buffaloes, elephants and mad dogs. On the other hand, it cost the government £6,500 in rewards to secure the destruction in the same time of 18,196 wild beasts, of whom 7,278 were tigers, 5,693 leopards, 1,071 bears, and 1,338 wolves. In one year the loss of human life in the Central Provinces amounted to 506, many of whom were children; while 518 tigers, 895 panthers and leopards, 534 bears, 467 wolves, and 475 hyenas were put to death. The wolves of Oudh in the same year killed 5 men, 2 women, 72 boys, and 80 girls. Each of the other provinces adds its quota to the butcher's bill. Of the numbers of cattle slain, and of the loss entailed on their poor owners, no regular estimate can be formed; but one man alone in South Canara complained of having lost fifty head of cattle through wild beasts; Captain Rogers tells of a tiger who killed half a dozen in a few minutes, and it is well known that thousands of villagers are continually reduced to utter poverty, followed by a long term of bondage to money-lenders, through the ravages of these unpleasant neighbors. The very spread of cultivation tends to increase the suffering caused by their neighborhood. In the Neilgherries, for instance, the clearing away of jungle for coffee plantations drives the wild animals to seek their prey from the villages at the foot of the hills. On the other hand, the planting of new and the conservation of old forests may afford new haunts or new means of living to the beasts of prey. Superstition also plays no small part in the maintenance of these intolerable scourges. The Gonds, for instance, instead of mustering in force to hunt down the tigers who wage war against them and their herds, have an idiotic way of regarding the tiger as a divinity whose wrath it is unsafe to arouse. If one of them falls a prey to the divinity's appetite for human flesh, the rest of the family are forthwith tabooed as dis-

pleasing to the object of their reverence and dread, and must expiate their offense by costly sacrifices which may leave them penniless, but will restore them to their caste rights.

The head-money granted by governments to the tune of £15,000 a year, tends, no doubt, to keep the nuisance of wild beasts in some check. As much as a hundred pounds has been given for the head of a man-eating tiger. But the rewards are sometimes granted on very slight evidence, for it is well known that a cunning native will bring up an old head for a new one, or sew a tiger's skin over the head of some smaller animal, and thus elude a credulous or careless official into passing an unfounded claim. Perhaps the present scale of rewards would bear amending, if, as we understand, much too little is offered for the cubs in comparison with full-grown tigers. The quickest way of extirpating the brutes would be to encourage the destruction of young animals by a larger bounty for their heads. Sportsmen naturally shrink from attacking these scourges with other than the sportsman's usual weapons; but even Captain Rogers in his report avows himself a thorough convert to the use of traps and other wiles against foes so widely destructive. *Allen's Indian Mail.*

THE ANNEALING PROCESS.

BY REV. ALEXANDER CLARK.

In glass manufacture there is a process called annealing, which especially interests the visitor. Glass on suddenly cooling acquires great brittleness. A chill, after the most painstaking and successful molding of vase or goblet, would cause the beautiful structure to fly to pieces. A slight touch of finger nail or crumb of glass has, in a critical moment, sometimes crushed the finest specimen of artistry to dust. There is a remedy for this tendency in new-made glass. By annealing or reheating the ware to a degree a little below that by which it was melted, and gradually removing it from hot to cooler temperatures, the particles are toughened into more reliable affinity. A circular train of ears on wheels, made for slow rather than rapid movement, in an establishment which I visited, bears hundreds of fresh-blown vessels in easy advances out from hot to ordinary temperature, in a kind of graduated oven, and this simple process occupies a thousand-fold more time than the shaping of the articles. This brittleness of the glass is attributable to the disturbance of hasty cooling in the arrangement of its delicate particles. There must be deliberation in its adjustment to the new state.

This may serve as an illustration of the brittleness of new converts. They will not stand rough handling. A single thoughtless word has ruined many a young Christian. After conversion they must be annealed. They must be trained into strength to resist the ordinary temptations of life. Conversion is not enough. By prayer and patience the new convert must be disciplined to daily duty, advanced by careful degrees into Christian work, and come by time and regularity into strength.

And there are some old Christians who have never been annealed. They may have been converted years ago, but not being needed particularly, being more ornamental than useful, they have, like blown but unannealed glass ware, been on the shelf and hidden. Their names are on the church register, and that is about their greatest achievement in religion. They have become so accustomed to the shelf and the shade that you never miss them. They keep in rear places and dark corners. They have the form of Christianity; they may have tone enough to pray; they may look solemn and behave respectably in their distant retreats—may even say "our church," "our minister," "our doctrines." But all the while they have never been annealed. A sudden temptation, and their temper flies. Invite them to the prayer meeting, ask them for missionary money, suggest a few hours' earnest work for Jesus, and snap! they go to pieces! They may have been converted, but they were put on the shelf before they were annealed, and they are worthless. I have seen so slight a thing as a wooden pencil, dropped from the hand into an unannealed glass goblet on the workman's table, shiver it to atoms. But no matter how long a piece of glass ware has lain idle and unnoticed on the shelf, it may still be annealed as easily as a new-blown specimen warm from the maker's hand. The two may pass through the oven side by side and emerge together as equals for the tests of use. And this is what all the churches need, that their crystal clear and pre-maturely cold professors should be put into discipline, into exercise, into self-denial, into sacrifice, into endurance for Christ's sake for a season, and gradually tempered into practical religious work; and then the gospel would have power on the minds and hearts of sinners. Every

church ought to have its annealing apparatus, and keep it turning until every brittle vessel of the Lord is tempered into reasonable discipleship.—*Workday Christianity.*

DEATH OF CHARLES DICKENS.

The Atlantic telegraph announces the startling intelligence of the sudden death of the great novelist, Charles Dickens, who died of paralysis on Thursday evening, ninth instant. No previous intelligence had been received here of his illness, though it appears from the dispatches that he had been somewhat indisposed for a week.

The death of no literary man of this era will excite more sincere regret and enlist a larger and deeper sympathy than that of Mr. Dickens. His name is a household word wherever the English language is spoken or the beauties of an elevated, graphic and varied fiction are appreciated.

Mr. Dickens was born at Portsmouth, England, February 7, 1812, and has consequently died in the fifty-ninth year of his age. He was originally intended by his father for the legal profession, and was placed in an attorney's office for that purpose, but soon manifesting a taste for literature, which he seems to have inherited from his father, became a newspaper critic and reporter upon the London journals, and gradually developed, under the nom de plume of "Boz," through a series of sketches displaying remarkable humor and observation, into literary celebrity. Then came the "Pickwick Papers," in monthly numbers, illustrated by comic draughtsmen in a most spirited manner, in keeping with the humorous situations and descriptions of the text. Before this work was finished it had attained a degree of popularity to which nothing in English literature since the publication of the Waverley novels could furnish a parallel. This was about 1837, and from that time up to 1840-41 other works fully sustaining his rapidly acquired reputation as a novelist appeared, as "Oliver Twist," showing not so abundant a humor, but a deeper tragic power, "Life and Adventures of Nicholas Nickleby," "Old Curiosity Shop" and "Barnaby Rudge." He made his well remembered first visit to America in 1842, reaching Boston in January, and sailing for England on the third of June following, after having made a considerable tour southward into Virginia, beginning his land journey in that State upon the old stage road, sometimes called the "corduroy road," then leading from Aquia Creek to Fredericksburg. He afterward made a tour in the West, and upon his return to England published the results of his observations in this country, in his "American Notes for General Circulation," a work which brought down on him much unfavorable criticism on this side of the water, in return for his rather freely expressed and sometimes exaggerated views of our life and manners—a thing, by the way, which might naturally be expected of so brilliant and inveterate a writer of fiction.

The farewell press banquet given him in New York before his return to England, in the spring of 1869, was the occasion of assurances of mutual esteem and regard between our people and that great author, who has always been a peculiar favorite here, because his genius was consecrated to the cause of social reform, and the championship of the poor and defenseless classes against injustice and oppression.

The London press generally, it will be seen, indulge fitting and most expressive tributes to his great talents and worth. They evidently fittingly portray the sentiment of the English nation, and its sense of the great loss sustained in the death of Mr. Dickens.—*Baltimore Sun.*

MIRACLES OF GRACE.—The smiting of a flinty rock, for the purpose of obtaining water, was a scheme of the Divine mind, whose ways are higher than our ways, and his thoughts than our thoughts. It was certainly the last place to which Moses would have gone for water; and he might have expected the stroke to elicit sparks of fire rather than cool, refreshing streams. What eye had not seen and ear not heard, either of men or of angels—what had not entered into the heart of any created being to conceive, terrestrial or celestial—was, that the smiting of the Shepherd should save the sheep; that the condemnation of the just should bring the unjust to God; that the making of Messiah a curse should secure infinite blessings to mankind; that the poverty of Jesus should enrich us, and his death raise us to life eternal. Consuming flames of divine indignation might have been expected to flash upon the guilty world from every wound of the thorns, the nails and the spear, in the sacred person of Emmanuel; but, to the astonishment of men and angels, a tide of love and mercy ran freely from every bleeding vein to wash away the guilt and pollution of human crimes, according to the determinate council and immutable promise of our God.—*Christmas Eve's Sermons.*

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. L. Church South.

SATURDAY, JULY 2, 1870.

Office—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—REV. LINUS PARKER, 112 Camp street, New Orleans, La.
AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MONTGOMERY CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MISSISSIPPI CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAPARD.
REV. J. B. COTTRELL.

FOR LOUISIANA CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To Subscribers.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, whenever practicable, to invest and remit funds in a Post Office ORDER, DRAFT, or by Express. If this cannot be done, REGISTER the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

MONEY.

We cannot issue this paper without money. What does it avail us if we have enough in the hands of agents to run the paper for six months when we have none on hand and cannot borrow, and the printers must be paid every week? If you have only \$3 send it immediately. Remember, if six hundred agents have an average of \$3 each it amounts to \$1,800. This amount would give us relief for the present; but we urge on all to pay up immediately all they owe us.

EXPLANATION.

A number of correspondents who have recently written to the Advocate may feel disappointed that their communications have not been noticed. It arises from the fact that the editor has a private box in the post office, where a number of letters for the Advocate had accumulated since his absence of two or three weeks. All parties here are exonerated of dereliction, as it arose from the recent change of editor. We hope our friends, following the directions given in addressing the Advocate, will hear promptly from us.

THE ARK OF THE COVENANT.—In an address before the Young Men's Christian Association of London, urging the necessity of studying the Earl of Shaftesbury mentioned that he knew a Jew, one of the most learned in all their traditions, who had told him that the Jews looked forward to the time when, at no distant period, the Temple, being thrown open to the researches of learned explorers, they would find in the vaults of that Temple the Ark of the Covenant. It was not carried away at the sacking of Jerusalem by Titus. Their belief was that when the armies of Nebuchadnezzar approached the city, the priests who had possession of the Ark of the Covenant put it in the vaults of the Temple and covered it over, so that it might escape the eyes of men. Perhaps the priests who interred this relic were killed in the conflict, and thus their secret perished with them. There, therefore, probably in those dark vaults, the Ark of the Covenant was lying, to be brought forth in due time as a grand and unanswerable testimony of the truth of the biblical history.

The exhibition of the Bottom's horse power gin gear to-day was more than a success, and fully sustained the incomparable reputation of that horse power, one of Coleman's mills and a fifty saw Emley gin and condenser doing good work, with one ordinary mule, with apparent ease. See notice of Dr. Hutton, proprietor, in advertising column.

EDITORIAL CORRESPONDENCE.

THE OHIO.

Sunday morning, the nineteenth of June, we woke up to find ourselves in the Ohio. People usually have formed conceptions, either true or false, of persons or things they have always been hearing about. Of Dickens, Palmerston, the Natural Bridge and London we have all definite ideas. We cannot well think and read of them otherwise; and one of the chief interests of a first introduction to a life-long celebrity is in the comparison and rectification of these provisional images. Are they like, are they just? or have we been all the time cherishing ideals widely at variance with the reality? To find a noted personage to be physically diminutive, whom you have always thought of as above the average height and weight, or on the contrary to find giant proportions where you expected feminine stature and grace, will give the mind a shock which it will take weeks to get over. Then what complacency when the long entertained portrait which fancy has painted is realized! What credit we give ourselves for a sagacity which hardly stops short of divination! There are few of us who have not felt some of these sensations. The Queen of Sheba had heard a true report of David's successor, but not all. One of Alexander's conquered princes was more astonished at his small stature than at his world-wide conquests. I have heard people go into raptures over a very commonplace scene, and then marvel that Niagara is so celebrated.

The two days spent on "the beautiful river" were days of high enjoyment. The weather was cool, almost bracing, but the sky was such as belongs to blue, hazy June. On Sunday we had preaching in the morning, and there seemed a Sabbath-like tranquillity on board. The views also partook of the nature of the day. It was the worship of repose rather than sounding praise—the perfect accord of nature with the heart in its consciousness of the divine presence. We never before felt Sabbath-like on a steamboat, perhaps shall never so feel again. The river for some distance above the mouth is nearly as wide as the Mississippi. The scenery does not begin until we reach Paducah, but from this point, say fifty miles above Cairo, the views grow in beauty and interest nearly all the way to Louisville. All day Sunday we were passing islands fringed with green to the water, and seeming to float. Then the hills were coming down to look at the river more than occasionally, and towns were frequently in sight on either shore. The rich bottoms lying often in wavy undulations were in a state of garden-like cultivation, whilst the hills with their forest crowns formed the background of most delightful pictures.

Variety of tillage and products is exhibited as we ascend. In the same view of hill and vale we have fields of gold, where the shocks of wheat stand like effigies of plenty, the oat patches just beginning to take on the mellow tint of approaching harvest, and the clean young corn not yet large enough to shade the ground. There is also a change in the look of the forest growth. The familiar cotton-wood sticks to us, and its seed-down is floating in the atmosphere; but the walnut, the sycamore, and the stranger but refreshing foliage of the beech and the maple become conspicuous. Some of the greenest places are here and there, the shadiest of shades—nooks in which the cottage home has been most tastefully located. On some of the hill sides the trees stand apart, and cast their shadows so independently as to double the scenic effect; not a contiguity but a wonderful individuality of shade. We came also into the region of orchards—apple orchards especially. The trees have a large and thrifty appearance, with forest-like stems and wide-spreading boughs. The apple tree of Louisiana is a poor affair in comparison, and evidently not in its proper latitude. The pear and the peach abound on the river, but they were neither new nor remarkable. Another novelty to us was the architecture of the

houses. Nearly everywhere, including the residences of Portland and Louisville, the style appeared suffocating. Without the wide galleries of our Southern homes, and with small openings, they did not suggest ideas of taste or comfort.

The second day of our voyage from Cairo was, perhaps, the most interesting. The character of the river changes, the hills become higher and more abrupt, and the limestone foundation of this Western country reveals its walls and buttresses. On this second day we passed through a country of meadows and of barns. The brown wheat stubble joined fields of grass waving in rich luxuriance, whereof we could smell the sweetness, and hear the singing of the birds as we passed. The breeze was laden, especially in the morning and evening, with a balmy fragrance, and the yellow atmosphere was exhilarating. The last fifty miles below Louisville was certainly the most picturesque, the most Rhine-like of anything we have seen on our Western rivers, always excepting the upper Mississippi. In what are called "the Narrows" there are stretches of greatest loveliness, reaches and vistas which deserve a place among the classics of our American tourists. The day was cloudy somewhat, also hazy, and the hills were sufficiently high and distant in places to look blue. Cloud shadows rested here and there, whilst the sunshine gilded other localities, and then the lights and shadows became transposed, and moved up and down, seeking to surprise and overtake each other. In this part of the river the channel becomes quite narrow, and the heights on either side come nearly to the water. As we steam along we are often entirely surrounded by the bold and precipitous bluffs, and the echo of our steam whistle is heard with startling effect as it thunders and bellows among the gorges.

Some exquisite rural scenes and tastefully improved homes indicate our approach to Louisville. Night came upon us just before our boat touched at New Albany, and "the Falls City" and its surroundings were veiled from our sight until the morning. We felt very much at home as we took a morning ride in a street car through Portland and up Main street on our way to the Cincinnati packet. What a crowd we all were, with the odds and ends of luggage, satchels, bird cages, shawls, magazines and babies! We were able only to see Louisville in this hurried way. Indeed we did not see it, but our glimpses even were mere glances. Impressions, however, were pleasing. We noticed some beautiful residences; the street of business houses along which we passed was handsomely built; and the railroad bridge especially attracted attention, as it stretches, at a dizzy height, across the river, and sits daintily and airily upon its lofty piers. On the whole the Ohio and its accessories of villages, cities and hills, has met expectation. For much of what has been pleasant and enjoyable we have been indebted to a most agreeable company of fellow-travelers, and to the most obliging and gentlemanly officers of the Mary Houston. May they live long and prosper.

On board the mailboat General Lytle we leave at four o'clock P. M. for Cincinnati. Cool nearly all the way up the river; the day at Louisville was a scorcher. To cross the landing might be compared to the Bridge of Lodi, and we must be pardoned for seeing so little where there were so many attractions. We came into a new and rather Northern atmosphere, metaphorically speaking, as soon as we entered the General Lytle. White waiting boys, awkward and not over nice, prominent notices that the bar is in the barber shop (better in the river,) and the absence of that refinement and perfect breeding in the officers, which we had so lately enjoyed on the Southern packet. Dinner revealed the good and the bad. Waiters not very bland, but a paradise of pies. Cherries are ripe, also currants and raspberries, and all made into pies. There was no coffee.

THE TESTIMONY.

That of an approving "conscience" is matter of "rejoicing," and the more so as we feel assured that it is enlightened and sanctified by the word and Spirit of God. Such is the evil engendered in us by transgression that the very "imaginings of the thoughts of the heart are evil; and that continually." The conscience or faculty of deciding upon the merits of every act performed in reference to divine law is perverted, warped and twisted. It may preside as judge in the court of faculties, may hear testimony, interpret law, and weigh the evidences presented, yet its verdict may not be just and equitable. The conscience of the country ("public opinion,") how far from proper! how reckless in discriminating vice from good! And yet conscience governs too many. What is observable among men gregariously is as equally palpable in their distinct relation. "Public opinion" is not an infallible guide to truth and good, nor is the conscience of man. "We have a more sure word of prophecy."

Our religious condition, our acceptance with God, may be gauged by something else beside our joys. Joy is good. It is a "fruit of the Spirit," and the justified soul "stands and rejoices in hope of the glory of God." Ebullition of feeling, breaking out in passionate praise to God, is not always granted to the believer, nor does its presence satisfy the longing soul. Its occasional presence, heavenly glimpses and beatitudes, may leave the soul in deeper doubt and fear than before. There are other criteria that afford stronger testimony. Peace, for instance—deep, abiding, soul-satisfying peace—abiding peace. "My peace I leave with you, my peace I give unto you," says Jesus. Is thy bosom undisturbed by the agitating and conflicting elements that break the repose of others? Know it is the voice of him who, awakened by the quaking and storm-tossed disciples, said: "Peace, be still;" "My peace I leave with you." Confidence, for instance—"Ye believe in God, believe also in me." Reposing on Jesus—"We know whom we have believed, and that he is able to keep that which we have committed to him against that day." Desirable knowledge, happy assurance! Is thy faith unshaken in the promises? Does it "lay hold of the hope set before you in the gospel?" "Thy faith hath made thee whole; we are justified by faith, we stand by faith and rejoice." The marvelous attestations of faith related in Heb. xi have lifted the cloud of doubt from many fearful ones. May I know I have faith? May I know my eye sketches the landscape? that my sympathies are aroused in pity and compassion for the suffering? that my admiration and affection are drawn out toward that I love? that I rely on that earthly friend who has been faithful to me, and loves me most? Then may I know I believe and accredit God?

Putting on Christ, for instance. Putting off the "works of darkness," the lusts, ambition and pride of life. Putting on Christ, his Spirit, his mind, his likeness. Every passion in due subjection, all "glory and imaginings put aside, clothed upon with humility, which is the adornment of a "meek and quiet spirit." These are our testimonials, "peace and assurance forever." Now what a beautiful text is that: "We have fled for refuge and laid hold of the hope set before us in the gospel." There is no other hope, no other refuge! But is not that enough? Christian brother, here are our living testimonials—the "mind which was in Jesus," the "witness of the Spirit with our spirits that we are the children of God."

The colored people of Richmond, Virginia, are much disturbed by their failure to hear from their brethren who have emigrated to the South to work on railroads and in the cotton fields. They imagine all kinds of dreadful things. The colored churches have taken the matter in hand, and it is proposed to send a commission through the Southern country to discover what is the real fate of the lost tribe that has wandered away.

PUNISHMENT OF CRIME.

Some fifty years ago an old lawyer in Virginia said that "rich men were hung by their purses, and poor men by their necks." But it might be said in Louisiana that men are not hung at all. This must come to be the case wherever the rich are hung by their money. Public sympathy and fairness will insist that if rich murderers are not hung, neither shall poor men be hung. We are quite aware that we differ widely from many when we say it is one of our most profound regrets that so few men are hung. We confess to be utterly wanting in sympathy with the recent philanthropy which expends itself on the murderer, and ignores the claims of the murdered, and their bereaved and outraged families. "We do not believe," say these sympathizers with murderers, "in taking life. Let us abolish capital punishment." Certainly; but let the murderers set the example. We insist, as they are the aggressors, they shall take the initiative in this reformatory movement. We insist that society cannot safely abolish capital punishment until assassins abolish murder. Otherwise, as S. S. Prentiss once remarked, the reciprocity is all on one side.

Somebody has remarked, as we think, with more smartness than wisdom, that "the worst use you can put a man to, is to hang him." We deny that a deliberate assassin is a man in the proper civil and moral sense. He has abdicated and abandoned manhood and humanity. He has assumed the position and acts the part of a ferocious savage, a wild beast. He has become a moral monster, and clearly forfeited his right to live in civil society.

But now that the victim of the murderer is in his grave, and we cannot recall him, hanging the assassin will not restore or benefit the murdered man." Certainly not; but hanging the assassin will make the life of the writer and reader of this article much safer. We shall sleep all the sounder, and dare to utter our honest conviction much more frankly, feeling that we live under a government of law that defends the right and punishes the wrong. Who can feel safe when red-handed murderers walk abroad in open day, unwhipped of justice, and sympathized with as unfortunate men, who, from whatever motive may actuate them, may take away life without any risk of forfeiting their own? Why not call burglars and pickpockets (too idle to work and too proud to beg) unfortunate men? Why look them up in public prisons, and take their precious liberties? Will it restore your lost treasures? Let these bold and expert gentlemen exercise their professions!

We say, Let the murderer have a fair trial by an honest and intelligent jury; let him have the best legal aid; let him have the benefits of all the doubts; but, if clearly guilty, let him suffer the penalty of the law. Let the law take its course, and the life which the murderer has most clearly forfeited. Society has a right to the greatest security law can give it. No penalty is so efficacious as the death penalty. "All that a man hath will he give for his life"—even liberty, for we find condemned assassins praying for the commutation of their punishment from hanging to imprisonment for life. So long as man has a conscience, and any faith in the retributions of the future, so long the death penalty will be the most appalling and the most efficient preventive of murder. Give the condemned ample time for repentance; let them have all the spiritual instruction and assistance they may be willing to receive; but in due time let the law be surely and inexorably executed, and the bills of crime will show fewer murders, and increased security of life.

"But why not rather condemn the murderer to imprisonment for life?" Because it is not so efficient a preventive of murder as the death penalty—it does not give the best security to life. Besides, statistics show that whatever efficiency this form of punishment might have, it is vitiated and rendered almost

powerless by our system of reprobates. We have long heard it asserted that those who are condemned to imprisonment for life are much more likely to be pardoned than those who are sentenced to five or ten years' imprisonment. The man sentenced for life has much more powerful motives to assume such a deportment as shall secure sympathy and pardon than one sentenced for a short term of years, and in fact he more often succeeds.

Let us get rid of this dangerous and unscriptural philanthropy. Let no silly hue and cry about Draco and bloody codes deter us from the stern but just demands of duty. Let the law be "a terror to evil-doers." Let not humane and tender-hearted jurors be frightened by the eloquent sophistries of counselors into the idea that by bringing in a verdict of guilty they are taking away the life of an unfortunate man. No such thing. The murderer has forfeited his own life. The law, divine and human, says he shall die. All you have to do, upon your conscience and best judgment, is to determine by the evidence whether the accused is guilty or not guilty. Your agency and your responsibility terminates there.

THE WOMAN MOVEMENT.

The position of woman, commercially, civilly and politically, has undergone, and is likely to undergo still greater changes. In nearly all the States of the Union laws have been passed improving the civil rights and privileges of woman. No doubt many of these reforms were justly demanded and will be productive of good. The area of activity, usefulness and self-support has been greatly enlarged. A large number of females are employed as teachers in the public schools, in private academies and collegiate institutions.

In many of the manufacturing establishments, where light and delicate fabrics are produced, it has been found that women are equal, if not superior, to men in taste and skillful manipulation.

But ladies have recently entered in various new fields of enterprise. Some of the most sprightly newspaper correspondents are ladies. Some have entered into the typographical societies, and are profitably employed in setting type. Quite a number of ladies have within a few years turned their attention to medicine—some have graduated in Vienna, Austria, in St. Petersburg, in Zurich, in Paris and Edinburgh, and in the United States. Ladies are also graduating in pharmacy, and are successfully conducting drug stores. Some have taken the profession of lecturers on literature and social science. In the Territory of Wyoming the elective franchise has been conferred on woman. She has acted in the capacity of a grand juror, and the presiding judge says that, notwithstanding all his prejudices, he was compelled to say that she had filled the position with efficiency and propriety—a terror to the keepers of drinking, gambling and other disreputable establishments. Whereunto all this will grow, what influence it will exercise upon woman, whether it will make her less feminine, and less lovely and lovable, we cannot say. Some are fearful that home duties and maternal cares will suffer from this diversion of woman's thoughts and toils from home to out-door concerns. We shall see. We doubt not, from present indications, that ten years will make a marked difference in the political, social and business position of woman in the United States, if not throughout Christendom.

NEW PUBLICATIONS.

CHRISTIANITY AND GREEK PHILOSOPHY, or the Relations between Spontaneous and Reflective Thought in Grace, and the Positive Teaching of Christ and His Apostles. By B. F. Cocker, D. D., professor of moral and mental philosophy in the University of Michigan. New York: Harper & Brothers, publishers. 1870.

The title fairly indicates the general scope of the work. The relations between the Greek philosophy and Christianity have here an almost exhaustive treatment. The religious and philosophy of Athens

are especially displayed. All the philosophers and philosophies are exhibited in connection with Christian theology. Great erudition and deep thought are manifest in every page. The author regards the Greek philosophy for Christianity, and subjects it in this view to a most thorough and analytical exposition. The conclusions reached will not always command the assent of the Christian thinker, but there is nothing in them to throw suspicion upon the writer's fidelity to the truth as it is in Jesus. To us the volume opens most suggestively and instructively. Ministers and students will find in it a rich store of thought and information, bearing directly upon the exposition and enforcement of the truths and doctrines of the gospel. For sale by George Ellis, New Orleans.

Miss VAN KORTLAND. A novel. By the author of "My Daughter Elenor." New York: Harper & Brothers, publishers. 1870.

My Daughter Elenor was a successful American fiction. This we judge to be of about equal merit. If people will read novels, this will be as harmless as any we know of. For sale by George Ellis, New Orleans.

GOD IS LOVE, OR GLIMPSES OF THE FATHER'S INFINITE AFFECTION FOR HIS PEOPLE. Robert Carter & Brothers, 530 Broadway, New York. Pp. 366.

We have read several chapters with comfort and profit. It is scriptural and orthodox. On sale at 112 Camp street. Price, \$1.25.

ANNUAL OF SCIENTIFIC DISCOVERY. By Trowbridge. Pp. 354. 1870. Published by Gould & Lincoln, Boston.

As its title indicates, it gives an insight into the wonderful progress of the human mind in "seeking out many inventions." What marvels are manifested in the discoveries of science and the useful arts! Rev. R. J. Harp, 112 Camp street. Price, \$2.

THE PARABLES OF OUR LORD. By Bourdillon. Pp. 320. Price, \$1. An admirable book—concise, vigorous, practical, brushing away much of the mystery of those wonderful parables of divine truth. R. J. Harp, 112 Camp street.

We have direct from the publishers, Messrs. Root & Cady, of Chicago, Palmer's Normal Collection of Sacred Music. A very tasteful collection of new anthems, hymns, etc., by eminent composers, together with choruses from the masters, Mozart, Handel, Hayden, Rossini, etc.

MONTHLIES. We have received the July number of the American Educational Monthly. J. W. Schermerhorn & Co., 14 Bond street, New York. From the table of contents we judge it to be valuable to teachers especially. Would like to copy some articles read into our columns.

THE ATLANTIC MONTHLY.—Fields, Osgood & Co., 124 Tremont street, Boston. Table of contents presents a rich bill of fare.

LIPPINCOTT'S MAGAZINE.—J. B. Lippincott & Co., Philadelphia. Have read several delightful articles.

THE GALAXY.—Sheldon & Co., 498 and 500 Broadway, New York. The articles are instructive.

RIVERSIDE MAGAZINE.—FOR YOUNG PEOPLE.—Hurd & Houghton, New York. Beautifully illustrated; full of entertainment.

AMERICAN STOCK JOURNAL.—N. P. Boyer & Co., Parkersburg, Pennsylvania. Valuable to stock raisers.

NEW ECLECTIC MAGAZINE.—Turnbull & Murdock, Baltimore. Table of contents rich and varied.

A COOLING DRINK.—As nearly every person is inquiring for some cooling drink during this hot weather, we give the following recipe for a refreshing and invigorating beverage, which has been recommended by an eminent physician. It is an effervescent drink, but far better than soda water, as the effervescence is much more slow: Two ounces of tartaric acid, two pounds of white sugar, the juice of half a lemon, and three pints of water. Boil them together five minutes, and when nearly cold add the whites of three eggs, well beaten, with half a cup of flour, and half an ounce of wintergreen or other flavoring. Bottle and keep it in a cold place. Take two tablespoonfuls of this sirup for a tumbler of water, and add one-quarter of a teaspoonful of soda, stir it and then drink.

STATISTICS OF METHODISM IN ALL PARTS OF THE WORLD.

The following statistics of Methodism are taken from the second volume of Dr. Jacoby's History of Methodism, a very interesting and comprehensive work, which has just been published, in the German language, by the Methodist Episcopal Book-room, Bremen:

EUROPE.	Members.	Ministers.	Local preachers.	Sun. School scholars.
GREAT BRITAIN.				
Wesleyan Methodists.	367,304	1,505	12,070	601,801
Primitive Methodists in Ireland.	20,220	643	14,160	238,957

Total.	3,380,166	19,049	57,364	3,654,215

Dr. Jacoby says: "We see that there are nearly three and a half million of members entered in the church books, and more than three and a half million of children under the spiritual superintendence of the Methodists. As, however, only

those are reckoned as members whose names are registered, while, on the other hand, whole families belong to Methodism of whom perhaps the man only or the wife has joined the church, the religious influence of Methodism cannot be fixed by numbers."

To the Members of the Joint Board of Finance of this Miss. Conference.

Under instructions of a resolution passed by the General Conference, I have advised the presiding elders of our Conference to add ten per cent. to the amount apportioned to their respective districts for Bishops' fund.

You will please represent the board at your respective district meetings, and secure the appointment of a committee to co-operate with the presiding elder in obtaining the needful information for a just distribution among the circuits and stations of the amount apportioned to the district for Conference collection and Bishops' salary, and provide that the same committee shall ascertain and report upon the state of the collections in the district, providing that each church on the district shall have information of the urgent necessity of these collections, and to observe and correct any prejudice against them among the members of the circuits and stations.

W. E. M. LINFIELD, Ch. B. of Finance, Miss. Conf. Vicksburg, Miss., June 14, 1870.

KOSKOO.—This medicine is rapidly gaining the confidence of the people, and the numerous testimonials of its virtues, given by practitioners of medicine, leaves no doubt that it is a safe and reliable remedy for impurity of the blood, liver disease, etc.

The last Medical Journal contains an article from Prof. R. S. Newton, M. D., president of the Medical College, city of New York, that speaks in high terms of its curative properties, and gives a special recommendation of Koskoo to the practitioners of medicine. This is, we believe, the first instance where such medicines have been officially indorsed by the faculty of any of the medical colleges, and reflects great credit upon the skill of Dr. Lawrence, its compounder, and also puts "Koskoo" in the van of all other medicines of the present day. Norfolk Daily Journal, Dec. 11, 1869.

Obituaries.

ELIZABETH JANE, daughter of Isaac and Phoebe Brinker, was born near Hartsboro, Shelby county, Alabama, October 16, 1829; was united in marriage to W. C. Harper in 1845, and died April 15, 1870, in the forty-seventh year of her age, having been a member of the Methodist Episcopal Church South for thirty-three years.

She was among the founders of the Alabama church near which her husband settled in 1848, of which she remained a member until her death.

She leaves a devoted husband, several children, and a large circle of relatives and friends to mourn her loss.

Sister Harper was an exemplary Christian, faithful to God throughout her life, representing him in all things; seemingly never on the mountains or in the valleys, but ever having the witness of the Spirit that she was in love and favor with God. She lived consistently, happily, and died gloriously, praising God and exhorting her husband, children and friends to love God, be faithful, and meet her in heaven. Another bright witness has passed on. Let those behind follow her example.

Mrs. MARY A. McCLENDON, consort of Dr. J. C. McClendon, was born March 29, 1841, and died April 6, 1870, near Youngville, Tallapoosa county, Alabama, aged twenty-nine years.

Sister McClendon had the priceless privilege of having been reared by pious parents, who taught her early the force of religion and piety. She therefore embraced religion and joined the church in her early youth, and from that time she led an exemplary life of piety and good works; and in the relationship of wife, mother and friend she always discharged her duties in reference to her religious obligations. Her strong and well balanced mind, quick perception, with her amiable and mild disposition, possessing all the links of Christian virtues, enabled her to make her home pleasant, thereby winning the entire love and affection of her devoted husband and all the members of her family. In connection with her neighbors, all knew her to love and esteem her.

Sister McClendon was confined to her bed seven weeks and two days, during which time her suffering was indescribable; yet it was all borne without a murmur. The first two weeks of her affliction she manifested a great anxiety to get well, that she might give that motherly care in raising her little children, as they were so dear to her; but as she progressed in her affliction she professed perfect resignation to the will of God—ready to live or die. The night before she died she manifested fully the Christian triumph. On being asked by the writer if she was still willing to go and give up everything, her reply was: "O, yes! O, yes!" She then asked me to sing and pray with her again. After prayer she exhorted us to sing for her, as she delighted so much to hear it, whereupon the weeping group joined in singing over the fast-expiring saint. Truly angels would be delighted to hover over such a scene with that dying Christian.

Thus passed away this young woman, leaving a devoted husband and four little children, and many relatives, and neighbors to weep for her. Yet we can all say that we "weep not as those who have no hope." "Blessed are the dead who die in the Lord." L. R. JELLY.

MARY ADELA, daughter of Valery Herbert, was born in Iberville parish, Louisiana, in October, 1833; was married to Robert S. Isbell, of Virginia, July 17, 1861, and died at her home in New Iberia, of pulmonary consumption, May 17, 1870.

Sister Isbell was a woman of more than ordinary mental endowments, polished by the highest cultivation. These, sanctified by grace, rendered her one of those lovely examples of a pure and exalted piety by which the world is made better. I am not informed at what period of her life she embraced religion. She was reared and educated in the Roman Catholic Church. About two years ago she joined the Methodist church at this place, giving at that time the clearest indications of piety and purity of heart, which continued to grow and ripen until she was made "meet for the inheritance of the saints in light," and the angels came and took her to "the saint's everlasting rest."

During the last two years of her life Sister Isbell was an invalid, going down, sometimes, to the very margin and shadow of death, and then reviving again so far as to be able to attend church and visit her friends. A few months ago she was again brought low, and we thought her stay with us would be very short; but God in mercy made her descent into the dark river so slow and gradual as to enable her to become perfectly familiar with the subject of death, and altogether ready to go—even to have a desire to depart and be with Christ. Only once, as she neared the stream, did a cloud cast its momentary shadow upon her path—as the suggestion was divided upon her dying hours that there were sufferings for the pious after death. She at once referred the question to the Bible, and it gave the answer that to be absent from the body is to be present with the Lord. Determined to be fully assured, she buried her face in her pillow and appealed the question directly to the ear of God. When she had finished praying, turning upon those who sat near a face radiant as that of Moses when he came from the mount of communion with God, she said: "All right! All right!" when the Lord graciously let her see the angels in waiting for her, and from that time she seemed more a resident of heaven than of earth.

Blessed are the favored ones who were privileged to linger about the couch of this dying saint, and feel the influence of a spirit of such heavenly mold. It was indeed "a means of grace," and through that hallowed influence she, "being dead, yet speaketh." The light of her life has gone from us, but it has left its glowing mark upon the path we all must go. May those who know her walk in that shining path where the host of her radiant spirit still lingers, and may their last end be like hers.

A. E. GOODWIN.

LET THE DEAF HEAR.

DR. W. L. DAVIS, No. 10 Rampart street, gives his whole attention to inflicting sensations pertaining to the Ear, such as Deafness, Noise and the like.

OSWEGO.—Dr. DAVIS NOTES ON DEAFNESS can be had of Steel & Co., 72 Camp street; Eyrill, 130 Canal street; Ellis, opposite the Post Office; also by mail, of the author, Glass Box 399, New Orleans Post Office. Price, Forty cents.

THE PRIZE! THE PRIZE! BY GEORGE F. ROOT.

THE PRIZE is full of such gems as "Come to the Saviour," "All around are kind and loving," "Immortal Land," "Behold, the Bridgroom Cometh," "The Song of the Angel Reapers," "Joy to the World," "There's a Light in the Valley," "Whosoever Will," "The Prodigal Son," etc., which are already immensely popular in the Sunday Schools of Chicago.

In six weeks from the date of publication THE PRIZE has reached an issue of 25,000 COPIES. In the last two weeks of this time over 20,000 copies have been sold. Price, 10 cents single; \$4 a dozen; \$33 a hundred. For sale by the trade generally. ROOT & ADY, 32 2nd St., Washington St., Chicago, Ill.

NEW ADVERTISEMENTS.

THE BOTTOMS HORSE POWER GIN.

GEAR. This Power is now put up in three different forms—stationary, movable and mounted on wheels, all having the same action and capacity, differing only in peculiar movements and arrangements, all of which are covered by patents and events. Models and Patents of the same may be seen by all interested by calling on me at the St. Charles Hotel; and to any one desiring to enter, with a small capital, a new business, which will yield a sure fortune, I will give undoubted and unparalleled inducements. If immediate application is made.

J. W. HUNTOON, M. D.

MONTVALE SPRINGS.—1870.

This favorite Summer Resort, situated in Blount county, East Tennessee, will be open for the reception of visitors on the first of June.

The marked beneficial result attending the use of these waters in functional derangements of the Liver, Bowels, Kidneys and Skin, and the Cure of Chronic Diseases.

ATTEST THEIR MEDICINAL PROPERTIES. The buildings at Montvale have been repaired, refitted and repainted, and everything put in good order.

All the accessories for enjoyment and recreation at the best watering places will be found here.

The facilities for reaching Montvale this season are increased by the extension of the Knoxville and Charleston Railroad, and regular trains are running to Maryville, whence passengers are conveyed in coaches to the Springs, nine miles distant.

ATES OF BOARD. Per day, \$2.50; per week, \$16; per month, \$50.

Address for pamphlets, containing analysis and descriptions of waters, etc., JOSEPH L. KING, Knoxville, Tenn.

CHILDREN TEETHING.

MRS. WINSLOW'S SOOTHING SYRUP.

FOR CHILDREN TEETHING. greatly facilitates the process of teething by softening the gums, reducing all inflammation; will allay ALL PAIN and spasmodic action, and is

SURE TO REGULATE THE BOWELS. Depend upon it, mothers, it will give rest to yourselves, and

Relief and Health to Your Infants.

We have put up and sold this article nearly thirty years, and can say in confidence and truth of it what we have never been able to say of any other medicine—NEVER HAS IT FAILED IN A SINGLE INSTANCE TO EFFECT A CURE, when timely used. Never did we know an instance of dissatisfaction by any one who used it. On the contrary, all are delighted with its operations, and speak in terms of commendation of its magical effects and medicinal virtues. We speak in this matter "What we know," after years of experience, and pledge our reputation for the fulfillment of what we here declare. In almost every instance where the infant is suffering from pain and exhaustion relief will be found in fifteen or twenty minutes after the Syrup is administered.

Full directions for using will accompany each bottle. Be sure to call for "Mrs. Winslow's Soothing Syrup," having the fac-simile of "CURTIS & PERKINS" on the outside wrapper. All others are base imitations.

Sold by Druggists throughout the world.

The Child's Corner.

A BIRD'S FATE.
BY MARGARET BOURNE.

You children have heard of the death of Cock Robin,
And how at his grave all the birds fell to sobbing;
How they buried him gently, as well as they could,
Beneath the fresh grass in a beautiful wood.
I have to tell of a much sadder thing,
Which befell a young bird who had broken his wing.
He dropped from the nest in attempting to fly;
And a cruel old cat, who chanced to be by,
Saw his sad fate, flew at him, of course,
As quick as a wink, with a growl low and hoarse,
Which seemed to say plainly as ever was heard:
"I'll make a nice supper off you, my fine bird."
But good doggie Frisk, who hated all cats,
Heard Pussy's low growl, and came running to see
What upon earth the trouble could be.
Frisk never ate birds, and could not allow
Pussy to do such a thing without a bow-wow,
Which meant, "No you shan't, you cruel old cat."
"I'm a brave little fellow, and will not have that,"
So he flew at Pussy, and she up a tree
Was frightened and quivering with terror,
While he stood below and barked at her; for dogs, as you know,
Cannot climb the high places where pussy-cats go.
Little Tom in the house heard the noise of the riot,
And thought he would go and tell Frisk to be quiet;
For mamma had the headache, and could not be teased,
So Frisk must not make all the racket he pleased.
Tom ran to the garden, whence the noise he had heard,
And saw on the ground the poor little bird.
His feathers were ruffled, and on his poor side
Wash a gash deep and long, where Pussy had tried
To reach the fresh blood so good to her taste;
But had not succeeded, because of her haste
To escape from Frisk's anger. Tom lifted the bird
In his fat little hand, but spoke not a word.
The tears filled his eyes and rolled down his plump cheek,
While the sobs choked him so he hardly could speak.
To say "good dog" to Frisk, who stood wagging his tail,
Quite sure that warm praises his exploit would hail.
Tom ran with the bird to dear mamma's side;
But ere he could reach her the little thing died.
Mamma's fond caresses soothed Tommy's great grief,
(For in her dear arms there was always relief.)
She found a white box, quite narrow and deep,
Which they filled with white cotton, so birds could sleep
In comfort and peace. Then a blue ribbon she tied
Round the poor little neck, the torn feathers to hide.
Green leaves they laid over him, fresh from a tree,
Which was all very nice for a birdie, you see.
They went to the garden; among the sweet flowers
Dug a grave the right size, where the sunshine and showers
Would fill all the summer. They put the bird there,
And covered him up with their tenderest care.
All these bright, sunny days he has lain there at rest,
With the sweet-scented flowers blooming over his breast.
—Independent.

THE GOLDEN RULE.

"Willie," said Mrs. Page, as she lay upon her bed, very sick, "I want to talk to you awhile. I may not be here long; and I want to tell you a few things that are in my mind."
"You are trying to serve Jesus. You want to please him. Now, remember that in no way can you please him better every day than by keeping the golden rule—'Whatsoever ye would that men should do to you, do ye even so to them.' Try and follow this teaching of our blessed Lord, and you will be both good and happy. And I want you to take care of little Nelly. She is not a strong child, and will miss a mother's care. You must be both a mother and a brother to her. Promise me that you will, my son."
Willie was sobbing by the bedside.
"Oh! I will promise anything you ask, darling mother," said he; "only don't leave me!" And the poor boy, who was not much more than a child himself, wept bitterly.
"God knows best, my dear son; and he will do all things well. If I must go from you, he will care for and protect you. I can leave my children in his hands."

A very few days passed, and Willie was motherless. No one in all that city cared for him but little Nelly. He was poor, and too young to do hard work; but he must do something to support himself and his little sister. But he searched in vain for something to do. Some people wanted no boy, and others said he was too small. Even the crossings were all spoken for by other boys; and there seemed nothing left for him to do but starve.

One day he was searching for employment as usual. He was hungry and discouraged. Just as he was crossing a crowded street he heard a cry; and, looking up, he saw a lame boy with crutches who was trying to cross. He could only walk very slowly; and, while he made his way along carefully and painfully, the street became full of vehicles, and one horse seemed to be coming right upon him. Poor Johnny was sadly frightened, and knew not which way to turn. Willie saw him, and in a moment he shouldered him and his crutches and carried him safely over. He was a heavy load for the little fellow, being almost as large as himself; but he did not stop to consider that; and, although it was pretty hard, he carried Johnny across the wide street and set him safely down on the pavement.

"How can I thank you enough?" said a young lady who was crossing behind him.
"I was so afraid my little brother would be run over! Here, little boy, take this!" and she held out some money.

"No, I thank you. I only did as I would be done by. If my little sister was lame and in the street, I should want some one to help her across."

"But can't I do something for you, my boy?" said the lady.
"I don't want anything but something to do. My little sister and I must have something to eat and wear, and I am trying to find work; but nobody seems to want me." And Willie looked very sad.

"I can find you something to do, I know. My father wants a boy in his store; and I will ask him about it just as soon as I get home."

Willie looked very happy, and thanked the lady with all his heart. And he was not disappointed this time; for Mr. Hildreth took him at once, and liked him so well that he said Providence must have sent him just in the right time.

Willie was never sorry he helped across the lame boy; and he still keeps up this practice of the "golden rule." —Well-Spring.

ABOUT GIRLS.—The best thing about a girl is cheerfulness. We don't care how ruddy her cheeks may be or how velvety her lips, if she wears a scowl even her friends will consider her ill-looking; while the young lady who illuminates her countenance with smiles will be regarded as handsome, though her complexion is coarse enough to grate nutmegs on. As perfume is to the rose, so is good nature to the lovely girl, think of this.

A BUSINESS MAN.—He is strict in keeping his engagements; does nothing carelessly or in a hurry; employs nobody to do what he can easily do himself; keeps everything in its proper place; leaves nothing undone which ought to be done, and which circumstances permit him to do; keeps his designs and business from the view of others; is prompt and decisive with his customers, and does not overtrade his capital; prefers short credits to long ones, and cash to credit transactions at all times when they can be advantageously made, either in buying or selling, and small profits with little risk, to the chance of better gains with more hazard.

He is clever and explicit in all his bargains; leaves nothing to the memory which can and ought to be admitted to writing; keeps copies of all important letters which he sends away, and has every letter and invoice belonging to his business titled, classed and put away. He never suffers his desk to be confused by many papers lying upon it; he is always at the head of his business, well knowing if he leaves it it will leave him; holds it as a maxim that he whose credit is suspected is not safe to be trusted, and is constantly examining his books, and sees through all his affairs as far as care and attention can enable him; balances regularly at stated times, and then makes out and transmits all his accounts current to his customers and constituents, both at home and abroad; avoids, as much as possible, all sorts of accommodations in money matters and law suits when there is the least hazard; is economical in his expenditures, always living within his income; keeps a memorandum book with a pencil in his pocket, in which he writes every little particular relative to appointments, addresses, and petty cash matters; is cautious how he becomes security for any person; and is generous only when urged by motives of humanity. —Hall's Journal of Health.

A good story comes from Cambridge. It is said that when the Greek Archbishop of Syros and Tenos attended the other day in the Senate House, for the purpose of receiving his honorary degree of LL. D., he dropped his pocket handkerchief, and on stooping down to recover it, one of the graduates in the gallery exclaimed, "Hurrah for the Grecian bond!" The effect was, of course, so intensely ludicrous that the whole assemblage was convulsed with laughter.

The Farm and Garden.

HINTS ABOUT STABLES.

In the greater part of the United States the stabling of stock in winter is a necessity; and it would be a decided improvement in some other sections where it has never been applied. Great improvements have been made in the construction of stables within the last few years, especially in the manner of erecting feeding troughs. The high racks formerly erected over the heads of horses and cattle from which they had to draw their food, scattering hay, seeds and dust over their heads and into their eyes, have in a great measure been discarded. No one thinks of erecting them in newly built stables at this day, and where they still hold a place in old ones, troughs should be substituted. Besides the injurious effects above named, the animal is obliged to assume an unnatural position to reach its food, and after reaching it, must change its position to masticate and swallow it.

We advise every one who still retains these racks in his stables to have them removed and substituted by troughs of modern plans, which are very simple and well suited to the uses for which they are intended; and to do this now, before the feeding season commences. If the improvement is postponed until then, there are nine chances to one that it will not be done, and the poor animals will have to go through another winter in the old star-gazing, break-neck fashion to reach their food. The man who invented these overhead racks for feeding stock must have been a queer genius, and those who adhere to the system with such pertinacity a rather stiff-necked people.

Want of sufficient light is a great fault in a large majority of stables, and is very injurious to stock in more ways than one. To be shut up in comparative darkness day after day is very hard on the eyes. If a horse be led out of one of those stables into the open light, he is unable for a time to distinguish objects properly, and is liable to stumble and become alarmed until the eyes adjust themselves to their new position. The same difficulty occurs in entering the dark stable from the outside.

Darkness is injurious to the animal's health, which is easily proven by vegetables growing in dark places. Light is one of the great agencies that imparts health and vigor to both the animal and vegetable systems, and being so very cheap ought to be liberally supplied. All stable windows should be glazed in movable sash, and of such size as to admit a full flow of light. The division of light and darkness, as measured by day and night, should be the governing rule in both animal and vegetable economy.

Free ventilation of pure atmospheric air should be a prominent feature in every stable. Without this the best state of animal health cannot be maintained. There are so many plans of accomplishing this that each farmer may choose the one that best suits his views. The great question is, Will he do it? —American Stock Journal.

BOYS, LEARN FARMING.—Why I Want the Boys to Learn Farming.

Every pursuit or calling that ministers to the sustenance, comfort or enlightenment of mankind is honorable and laudable. That is a narrow and essentially false conception which regards the farmer as more a benefactor than a beneficiary, and stigmatizes as drones and cormorants all who do not directly contribute to the production and increase of material wealth. The upright, able lawyer, the studious, skillful physician, the pious, loving clergyman, are workmen as truly and quite as nobly as though they were woodchoppers or bricklayers. He who, by whatever means, helps to diminish the fearful aggregate of ignorance, sin and suffering in the world, and diffuse instead knowledge, virtue and happiness, is worthy of all honor, and far from me the wish to discourage or degrade him. And yet I hold it the duty of every father to look well to the physical and industrial training to efficiency in domestic pursuit which ministers directly to the material or physical needs of mankind. My reasons for this conviction are snipped up as follows:

The demand for intellectual labor or its products, and even for mercantile capacity, is exceedingly capricious. In a season of commercial prosperity a great city affords employment to thousands as clerks, book-keepers, teachers of music, languages, etc., who will nearly all be left high and dry by the ebb of the tide. War, pestilence, a bad harvest, a business revulsion, throws them suddenly out of employment, and no merit or excellence on their part can avert the catastrophe. I would have every one so armed and equipped for the battle of life that, if suddenly unhorsed, he can fight on efficiently and undismayed on foot.

HORSE GEARS.

There is a great deal in gearing a horse or mule so as to enable the animal to work easy, and use a certain amount of power with comparatively small animal force. Much depends on long or short leverage. The draft may be too high or too low; the one will draw too heavy on the top of the neck, the other will choke the animal. The collar may be too large or too small—either of which will cause sore shoulders. A tender-mouthed horse should have a large smooth bit, and not be reined up too tight, or the month will become so sore as to lose its sensitiveness to a gentle draw of the rein. Every part of the harness should be as complete a fit as a dandy's coat, touching everywhere and pinching nowhere.

The harness should be kept clean and soft. There are several preparations made and sold for this purpose, but the misfortune is, they are too little used. The money paid for and the labor spent in using are not spent in vain. When the harness gets wet, as it sometimes will, by being caught out in the rain, straighten it out to dry before it is hung up, or it will curl out of shape. It should be put through a course of greasing and handling, before using again. Examine the face of the collar every time it is used before putting on—see that it is clean and smooth. —Stock Journal.

TO FATTEN A POOR HORSE.—Many good horses devour large quantities of grain or hay, and still continue thin and poor; the food eaten is not properly assimilated. If the usual feed has been unground grain and hay, nothing but a change will effect any desirable alteration in the appearance of the animal. In case oat meal cannot be obtained readily, mingle a bushel of linseed with a bushel of barley, one of oats, and another bushel of Indian corn, and let it be ground into fine meal. This will be a fair proportion for all his feed. Or the meal, or the barley, oats and corn, in equal quantities, may first be procured, and one-fourth part of oil cake mingled with it, when the meal is sprinkled on cut feed.

Feed two or three quarts of the mixture two or three times daily, mingled with a peck of cut hay and straw. If the horse will eat that greedily, let the quantity be gradually increased until he will eat four or six quarts at every feeding, three times a day. So long as the animal will eat this allowance, the quantity may be increased a little every day. But avoid the practice of allowing a horse to stand at a rack well filled with hay. In order to fatten a horse that has run down in flesh the groom should be very particular to feed the animal no more than he will eat up clean and lick his manger for more. —American Stock Journal.

Though we want power to repent, yet we do not want means to repent, nor power to use those means.

An humble confession of sin brings shame to ourselves, but glory to God.

Let not sinful pleasures prevent godly sorrows.

BROOKS' IMPROVED PATENT WROUGHT IRON REVOLVING COTTON SREW PRESS.

Patented by R. M. Brooks, of Georgia, April 14, 1868.
It took the first premium in the Louisiana State Fair, at New Orleans, April, 1869, over eleven competitors; also at the Tennessee State Fair, at Memphis; and more recently at the Mississippi State Fair, at Jackson; and again at the recent State Agricultural Fair at New Orleans, April, 1870, in a contest with four Cotton Presses, embracing the most approved patents from different States of the Union, North and South.

The following is the certificate of some of the principal cotton factors and merchants of New Orleans. In our circulars can be seen the certificates of practical planters and scientific artisans from several Southern States in regard to the admirable principle and practical working of this Press.

"We, the undersigned, purchased last season, from Messrs. J. B. Jennings & Co., the Brooks Revolving Cotton Screw Press for our customers, and, so far as heard from, they have given entire satisfaction."
Messrs. Greenwood & Son, Warren, Crawford & Co., C. L. Williams, Jr., McDaniel & Co., Frank & Daniel Campbell & Strong, Clapp Bros. & Co., E. F. Golsan & Co., R. S. Walker, Violet, Black & Co., Block Bros., Wright, Allen & Co.

Circulars, giving cuts, with full description, price list, etc., sent by mail on application to J. B. JENNINGS & CO., Proprietors, 14 Union street, New Orleans.

GEORGE B. HOLZACH'S PATENTED IMPROVED MOVABLE WINDOW SHADE.

This improvement relates to a new and simple manner of so arranging window shades that light and air can be admitted into the room through the upper part of the window without raising any portion of the shade, and when the window is furnished with the combined screens its usefulness and comfort in warm weather, when a good current of fresh air is so welcome, cannot be surpassed.

Parties, dining rooms and bed rooms, the latter especially in time of sickness, are by this improved combination thoroughly ventilated and lighted at pleasure, without the slightest inconvenience to the sleeper or patient, or exposure to the passers-by.

It can be attached to any window with but little alteration and at moderate expense. Orders entitled and promptly attended to. State Rights for sale by GEORGE B. HOLZACH, Inventor and Patentee, 61 Camp street, New Orleans.

BELLS—BELLS.

CHURCH BELLS. CHURCH BELLS. We are prepared to furnish Church Bells, of Steel Composition, having a rich, deep tone, at the following prices, which place it within the power of all Churches to be provided with a good Bell:

Weight.	Wt. of Bell and mountings.	Price.
28-inch Bell...	250 lbs	\$65 00
30-inch Bell...	400 lbs	135 00
36-inch Bell...	800 lbs	175 00
48-inch Bell...	1200 lbs	265 00

These Bells are warranted for one year against breakage in ordinary use.

TIOS. B. BODLEY & CO.,
No. 9 Perdido st., N. Orleans.

BELLS—BELLS—BELLS.

BUCKEYE BELL FOUNDRY. Established in 1837.

VANDUSEN & TIFT,
102 and 104 East Second st., Cincinnati, Ohio.

Church, Academy, Factory, Farm, Fire Alarm Bells, etc., made of pure Bell Metal (copper and tin), warranted in quality, tone, durability, etc., and mounted with our Patent Improved Rotating Hangers. Illustrated catalogues sent free.

R. J. WEST, Agent,
119 and 121 Magazine street,
New Orleans, La.

BELLS, STEEL COMPOSITION.

For Churches, Schools, Etc.

BLUMER, NORTON & CO., Manufacturers,
Cincinnati, Ohio.

These celebrated Bells (not Cast Iron or "Amalgam") rival in purity and volume of tone those of copper and tin, are more durable, and cost only one-third as much.

Send for descriptive circular. —\$25 1y

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD NOW IN USE.

THE FASHION.

We call especial attention to this Stove, which has been produced at great expense, containing all the new and important improvements; also to the extra height of the oven under the fire chamber, the Patent Air Exhausted Iron Knobs, the improvements in the covers and centre pieces, all of which have been covered by Letters Patent, and are used in no other Stove. They are warranted to stand fire, or where sent free of charge in all cases. We have all sizes of this justly celebrated Stove, both

PLAIN AND EXTENDED BACKS.

The Extended Back with cast Iron Enamelled Reservoir and Funnel, Tin Wrapping Closet, Gridiron Cover, etc. The part of the top supporting the Reservoir is raised so that the fire is above the top plate, instead of below, as in the case in most of the Stoves now used, and the case in most of the Stoves now used, and the heat is forced directly against the whole surface of the bottom of the Reservoir. The Reservoir, being detached from the pipe, can be removed at pleasure, thereby forming a six-hole Stove—the best in use, as the holes will heat as well or better than the middle ones. For sale by

G. W. W. GOODWYN,
62 Camp street.

ALSO, THE MOST

Complete and Perfect Cooking Stove FOR BITUMINOUS COAL OR COKE

ever invented, in the estimation of all who have yet seen it. Patented in 1869.

THE MONITOR.

which can be seen at 62 Camp street. The advantages possessed by this Stove over all the other Cook Stoves are so numerous, and so patent to every sensible observer, that it is only necessary to examine it in order to be convinced of its superiority.

All of the above Stoves are fitted with extra care, Oven Doors lined with lin., and furnished with William Resor's Patent Air Chambers, sliding front doors, patent centres, covers and White Enamel Knobs.

The operation of every Stove guaranteed. Directions for pulling up and using same accompany each Stove.

G. W. W. GOODWYN,
62 Camp street.

Sole Agent for States of La. and Texas.

STOVES, GRATES AND HOUSE FURNISHING GOODS.

The undersigned would call the attention of city and country buyers of Cooking Stoves to the following list of Stoves manufactured by Mr. M. L. Filley:

The Philanthropist.
A first class Cooking stove, having all of the latest improvements, and having so far been invented. Has a new arrangement for boiling; also an Ash-pan. The cast-iron is heavier than any Stove sold in this market. Sold under a full guarantee in every respect.

The Diamond Rock.
A Stove well known in this market. Thousands of this Stove are in constant use throughout the country, which is a very good recommendation. Sold under a full guarantee.

Besides the above named Stoves, I have on hand the celebrated Cotton Plant, Chatter Oak, True Kentuckian, Maid of Orleans, Queen of the South, Delta and others, all of which I offer at a low price.

THE TIMES......**THE TIMES.**

THE IMPROVED

LARGE OVEN COOKING STOVE,

with extended Fire Chamber and Feeder Top—one of the best Baking and most economical Stoves made.

The Fires are constructed so as to insure the most perfect draft. The heat of the Oven is so equal that when baking there is no need for removing anything until done.

THE TIMES.

We invite the attention of Housekeepers to the advantages of this Stove. Remember, we guarantee them to give entire satisfaction. Duplicate parts can be had at all times, at small cost, by which repairs can be made which will frequently save the price of a new Stove.

ZABLE & DALTON,
No. 115 Poydras street.

A SUMMER TERM OF THE

Southern Methodist High School

will commence on Monday, the fourth day of July next. School hours from eight A. M. to twelve M. Rooms remarkably cool and pleasant. The best advantages afforded. For terms, etc., counsel with

D. I. RAST, Principal.

MUSICAL INSTRUMENTS.

PHILIP WERLEIN,
Nos. 80 and 82 BARONNE STREET,
NEW ORLEANS,
Southern Depot of the celebrated and renowned

PIANOS: Needham & Sons, Special gold Medal for Church, School, Lodge and Parlor.
ORGANS: J. P. Hale's, which are fully equal to any in the world.

MUSICAL MERCHANDISE OF EVERY DESCRIPTION.

PIANOS TUNED, REPAIRED, RENTED, EXCHANGED, STORED AND SHIPPED.

I desire to call your attention to the fact that I am conducting my business on the most economical principles as regards rents and expenses, and am enabled to sell Pianos and Organs at from ten to twenty per cent. under current rates, and at bargain.

My large stock, cheerfully shown to visitors, and orders promptly filled.

J. P. HALE'S

GREAT PIANO FORTE COMPANY.

Chartered January, 1868.

We are now prepared at our NEW FACTORY, corner of Tenth Avenue and Thirty-sixth street, to turn out fifty Pianos per week, from our splendid New Scales, which are pronounced by the best judges to be the most powerful Square Piano that has ever been brought before the public. There is no Piano made that will stand in time like these.

PRICES.

No. 3—Plain style.....\$425
No. 3-7 Octave, front Round Corners, Serpentine Molding.....450
No. 4—7 Octave, four Round Corners, Serpentine Carved Legs.....500
No. 5—7 Octave, four large Round Corners.....600

This Company, believing that the public want demands

A GOOD SUBSTANTIAL

SEVEN OCTAVE PIANO FORTE.

embracing all the modern improvements, such as Rosewood Case, Grand Action, Harp Pedals, full Iron Frame, Overstring Bass, etc., at

PRICES WITHIN THE MEANS OF ALL.

now offer such an Instrument at a price lower than any other reliable manufacturer. These Pianos are made of the best materials, with great care, and by the most skillful workmen, selected from the best factories in this and the old country, and fully warranted to stand in any climate, and to give as good satisfaction as any Piano sold for \$1,000.

Our terms are NET CASH in New York; for adopting such terms we are enabled to sell at low prices.

We want Five Hundred Agents and Teachers to introduce these splendid new Instruments in all parts of the Southern States. All orders must be sent direct to

PHILIP WERLEIN,
80 and 82 Baronne St., New Orleans.

Our General Agent for the Southern States

NOTICE......**NOTICE.**

DR. IDAHO'S

Rocky Mountain Indian Remedy

FOR THE BLOOD.

This remedy will cure Rheumatism, and all kinds of disease of the blood, and variety of Cutaneous Eruptions, from the most fatal to the most inveterate scurfy Leprosy, Blotches, Piles, Pimples, Bores, Discolorations, Scaly Rash, Tetter, Skin Worms, Itch, Liver Complaints, Kidney and Spinal Affections, Sore Throat, and Sore Eyes. Ulcers, and Cancer of the Yields to its influence in a few applications.

PRICE, \$1 PER BOTTLE.

Within two months this remedy has created a sensation among the people afflicted with the above diseases. It never fails to cure radically the very worst cases; and demand for the medicine is very great.

DR. IDAHO'S

Rocky Mountain Indian Salve

FOR CORNS, BUNIONS AND PILES.

This Indian Salve cures Corns, Bunions and Piles in a few applications, and the buyer will apply the Salve but three times, when the inflammation will be removed at once. It is never known to fail. Fifty Cents a Box, and at all Drug Stores, and all Druggists, and at F. L. ING'S Patent Medicine Depot, corner of Pine and Magazine streets.

General Depot, 25 St. Charles Street, the office of A. Boucicaut, in Orleans. For testimonials refer to our pamphlet. Country orders promptly attended to.

THE ONLY TRUE AND PERFECT COLORER.

The Mystery, or Turner's Hair Dye.

A harmless, beautiful and permanent Hair Dye, in one preparation!

It is the only preparation ever invented which the shade can be controlled at the will of the operator, and at the same time will not injure the hair. It is now used in the principal Hair Dressing Saloons of New Orleans, and all over the South. A sample box will be sent, postage paid, to any address or office in the United States, upon receipt of price, \$1, by JAMES TURNER & CO., Sole and Druggists, No. 20 Camp street, City Hotel, New Orleans.

ANDREW J. Aiken......**JOHN W. WATT.**

Aiken & Watt,

Cotton Factors and Commission Merchants.

60.....CARONDELLE STREET.....

NEW ORLEANS.

Special attention given to orders for purchase of all descriptions of Produce, and all kinds of Importations and Plantations.

CENTENARY INSTITUTE.

SCYMERFIELD, ALABAMA.

The closing exercises of the Schools of this Institution will take place on the following days:

JUNE 26—Commencement sermon.
JUNE 27—Declaration by members of Male School.
JUNE 28—Exhibition by young ladies Junior Class, (concert at night).
JUNE 29—Commencement day.
The Board of Trustees will meet at College on Monday, June 27, at 10 o'clock.

The Christian Advocate.

SATURDAY, JULY 2, 1870.

Measuring a Flash of Lightning.

Scientific men assert that a flash of lightning does not endure for more than the millionth part of a second. How did they find this out? Obviously, not by any ordinary means; for such small portions of time are utterly beyond the cognizance of our senses, and even of our thoughts. Watches which mark quarter seconds are not uncommon. We have seen men try to count the beats of such a watch, and it is but rarely that we have met any one who could succeed. Not only could they not count them, but they could not even think of the numbers so as to keep a record of them in their minds. How, then, was it possible to measure a portion of time so much less in quantity?

Almost every boy has whirled a fiery brand in the air so as to make a "round robin." How does it happen that such a moving point seems to make a fiery circle in the air? In this way: An impression made upon our sense of sight cannot be instantaneously removed. It lasts for about one-eighth of a second. Hence, if the moving point completes the circuit in less than the eighth of a second, it will make a new impression before the old one has expired. The path which it describes will be constantly visible, and the circle will appear complete. In the same way, if a wheel with many spokes be caused to revolve rapidly, the spokes become invisible, and the wheels appear solid. But if the wheel were illuminated by a flash which did not last long enough for one spoke to take the place of another, the spokes would be visible, and the wheel would appear at rest.

A few years ago we saw such an experiment tried in Rochester, New York. The lecturer had a wheel, which was painted white, and on the white ground was painted a number of red rays. When whirled with a very moderate velocity the wheel appeared of a dim, pinkish hue. If, while thus revolving, it were illuminated by a flash from burning gunpowder, the spokes would not be visible, the flash of even the best gunpowder lasting longer than the time required for one spoke to take the place of another. But when, instead of gunpowder, fulminating mercury was used, the spokes were visible and the wheel appeared to stand still, so much more rapidly than gunpowder does fulminating mercury explode.

By driving the wheel a little faster the flash from the fulminate failed to show the individual spokes; showing that even the flash from fulminating mercury lasted long enough to allow each spoke to move into the place of its predecessor before the impression made by the latter had faded from the retina.

A Leyden jar was now charged and discharged before the revolving wheel, and then the latter could not be driven so fast that the spokes would not be visible and the wheel appear to stand still. Now if we knew the velocity of the wheel and the number of the spokes, it would be easy to tell the time required for one spoke to take the place of another. Suppose the wheel had one hundred spokes, and moved at the rate of one thousand revolutions per second; it is obvious that if the individual spokes be seen, the duration of the flash must be less than one hundred thousandth part of a second.

Such is a rude outline of the method by which the duration of a flash of lightning is measured. Of course the apparatus used in determining this duration is much more delicate than that which we have described, and which was used merely for illustration before a large audience. But the general principle is the same, and in this way it was determined that the duration of a flash of lightning is less than the millionth part of a second. Hence a carriage wheel in rapid motion, seen at night by means of a flash of lightning, appears at rest. The swiftest race horse would not have time to make a perceptible movement of a muscle, but would appear as if carved in some inanimate material; and even the swiftest locomotive and its train would appear as if some icy hand had been laid on its energies.

That a flash of lightning endures for a certain period there can be no doubt; but this period, when compared with the duration of any mechanical operation, is infinitely small. Stand beside a target at which bullets are being fired from a distance of say two hundred yards, and first you will see the flash, after a short interval you will hear the thud of the bullet, and finally you will hear the report of the gun. In this case you might see the flash, and afterward be shot by the bullet. Indeed, so much time elapses between the flash and the arrival of the bullet from a distance of two hundred and fifty yards, that it

would be impossible to hit an active man, at that distance, if there was a cover to which he could spring when he saw the gun discharged. How different with lightning! There the flash and stroke are simultaneous. If we see the flash we are safe. He that is killed by lightning never hears the thunder.—*The Technologist.*

WHAT COMMON DUST CONSISTS OF. Mr. Dancer, by washing out with distilled water twenty-five cubic feet of air from the city of Manchester, England, obtained about one hundred and fifty drops of a liquid in which the microscope discovered two hundred and fifty organic beings in the one-thousandth part of a drop, or some forty millions in the one hundred and fifty drops. These had, of course, been taken up by the water from the twenty-five cubic feet of air, which is only the small quantity inhaled by one man in ten hours. Besides these beings, there were also many other solid dust particles. The scientific officers of the Board of Health in New York have lately done the same thing with air obtained from our streets, from our theaters, etc. They took simply the particles of dust sitting on glass, and this showed by microscopic examination that the street dust is the finer the higher it is collected, and consists of sand from quartz and feldspar, carbon from coal or lamp-black, fibers of wool, cotton, etc., of different colors, epidemic scales, granules of starch, wheat, tissues of plants, hairs or down, and different kind of pollen. Fungi were very abundant; and when water was added, and the contents exposed to heat and light for half a day, thousands of animalcules made their appearance, while the fungi sprouted and multiplied, and formed a perfect microscopic aquarium, full of vegetable and animal life.

NEW INVENTION.—The New York correspondent of the Boston Journal describes a new invention for displacing steam by electricity, and says that lathes, planing machines and other mechanical arrangements are driven by this power. To run an engine of twenty horse power by this invention would require only a space of three feet long, two feet wide and two feet high. The cost per day would be thirty-five cents. On a steamship no coal would be required, and the space now used for coal and machinery could be used for cargo. The stubborn resistance of electricity to mechanical use heretofore has, it is believed, been overcome. A continuous battery has been secured and other difficulties removed, principally through the coil of the magnet. If the invention works as well on the large scale as it does on the machine to which it is now applied, steamships will soon ply the ocean under the new propelling power. A machine of great capacity is being constructed and will soon be on exhibition in New York. The whole thing, mighty enough to carry a Cunarder to Liverpool, can be secured in a trunk.

DISCOVERIES OF THE MICROSCOPE.—Lowenbeck tells of an insect seen with the microscope, of which twenty-seven millions would equal a mite. Insects of various kinds may be seen in the cavities of a common grain of sand. Mold is a forest of beautiful trees, with the branches, leaves, flowers and fruit. Butterflies are fully feathered. Hairs are hollow tubes. The surface of our bodies is covered with scales like fish; a single grain of sand would cover one hundred and fifty of these scales, and yet a single scale covers five hundred pores. Through these narrow openings the sweat forces itself like water through a sieve. The mites make five hundred steps a second. Each drop of stagnant water contains a world of animated beings, swimming with as much liberty as whales in the sea. Each leaf has a colony of insects grazing on it, like oxen on a meadow.

According to a French statistician, taking the mean of many accounts, a man 50 years of age has slept 6,000 days, worked 6,500 days, walked 800 days, amused himself 4,000 days, was eating 1,500 days, was sick 500 days, etc. He ate 17,000 pounds of bread, 16,000 pounds of meat, 4,600 pounds of vegetables, eggs and fish, and drank 7,000 gallons of liquid, namely, water, coffee, tea, beer, wine, etc., altogether. This would make a respectable lake of 300 square feet surface and 3 feet deep, on which a small steamboat could navigate. This estimate is, however, made from a Frenchman; for an American we have to modify it by lessening the number of days he devotes to amusements, and, in place of this, substitute 1,000 days of quietly speculating how to get more of the almighty dollar, 15,000 days for traveling by steam and horse power, and 200 days in waiting for means of transportation.

He that repents of sin as sin, doth implicitly repent of all sin.

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS

PUBLISHED BY

CHARLES SCRIBNER & COMPANY,

651 BROADWAY, NEW YORK.

Gayot's Geographical Text-Books.

"Incomparably superior to anything published."—*Lyons.*

Introduction to the Study of Geography.

Elementary Geography.

Intermediate Geography.

Common School Geography.

Gayot's System is approved and indorsed by the most distinguished literary and scientific men of our nation; such as Frois, Agassiz, Dana, Tenney, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unimpaired success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important cities and cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Gayot's series has marked a new and better era in the presentation of geographical science, that by the pupils of this generation will obtain a clearer, more definite and extended knowledge of the world on which they live, and that it is so systematically as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

MEDICINE—MEDICINE.

KOSKOO.....KOSKOO.

J. L. DUNNICA.....THOS. A. HAMILTON.

New Orleans, La. Memphis, Tenn.

G. P. HARRISON, New Orleans, La.

THE GREAT REPUTATION

which Koskoo has attained in all parts of the country

AS A GREAT AND GOOD MEDICINE.

AND THE LARGE NUMBERS OF TESTIMONIALS

which are constantly being received from physicians, and persons who have been cured by its use, is conclusive proof of its remarkable value.

As a Blood Purifier it has no Equal.

BEING POSITIVELY

THE MOST POWERFUL VEGETABLE ALTERATIVE YET DISCOVERED.

DISEASES OF THE BLOOD.

"The life of the flesh is in the blood," is a Scriptural maxim that science proves to be true. The people talk of bad blood as the cause of many diseases, and like many popular opinions this of bad blood is founded in truth.

The symptoms of bad blood are usually quite plain. Bad Digestion causes imperfect nutrition, and consequently the circulation is feeble, the soft tissues lose their tone and elasticity, and the tongue becomes pale, broad, and frequently covered with a pasty, white coat. This condition soon shows itself in roughness of the skin, then in eruptions and ulcerative diseases, and when long continued results in serious lesions of the Brain, Liver, Lungs or Urinary apparatus. Much, very much, suffering is caused by impure blood. It is estimated by some that one-fifth of the human family are affected with Scrofula in some form.

When the Blood is pure you are not so liable to any disease. Many impurities of the Blood arise from impure diseases of large cities. Eradicate every impurity from the fountain of life, and good spirits, fair skin and vital strength will return to you.

KOSKOO AS A LIVER INVIGORATOR

STANDS UNRIVALED.

BEING THE ONLY KNOWN MEDICINE

that efficiently stimulates and corrects the hepatic secretions and functional derangements of the Liver without debilitating the system. While it acts truly upon the Liver, instead of clogging purging it gradually changes the discharges to a perfectly natural state.

SYMPTOMS OF LIVER COMPLAINT AND OF SOME OF THOSE DISEASES PRODUCED BY IT.

A sallow or yellow color of the skin, or yellow-brown spots on the face and other parts of the body; dullness and drowsiness, sometimes headache; bitter or bad taste in the mouth; internal heat; in many cases a dry, teasing cough; uneasy appetite; sometimes sour stomach, with a raising of the food; a bloated or full feeling about the stomach and chest; aggravating pains in the sides, back or breast; and about the shoulders; constipation of the bowels; piles; flatulence; coldness of the extremities, etc.

KOSKOO:

Is a remedy of wonderful efficacy in the cure of diseases of the Kidneys and Bladder. In these affections it is as near a specific as any remedy can be. It does its work kindly, silently and surely. The relief which it affords is both certain and perceptible.

DISEASES OF THE KIDNEYS AND BLADDER.

Persons unacquainted with the structure and functions of the Kidneys cannot estimate the importance of their healthy action. Regular and sufficient action of the Kidneys is as important, nay, even more so, than regularity of the bowels. The Kidneys remove from the Blood those effete matters which, if permitted to remain, would speedily destroy life. A total suspension of the urinary discharges will occasion death in from thirty-six to forty-eight hours.

When the Urine is voided in small quantities at the time, or when there is a disposition to Urinate more frequently than natural, or when the Urine is high-colored or scalding, with weakness in the small of the back, it should not be trifled with or delayed, but Koskoo should be taken at once to remedy the difficulty before a lesion of the organs takes place. Most of the diseases of the Bladder originate from those of the Kidneys; the Urine being imperfectly secreted in the Kidneys, proves irritating to the Bladder and Urinary passages. When we recollect that medicine never reaches the Kidneys except through the general circulation of the Blood, we see how necessary it is to keep the Fountain of Life pure.

KOSKOO

Meets with great success in the cure of:

DISEASES OF THE NERVOUS SYSTEM.

Almost nine-tenths of our people suffer from nervous exhaustion, and are, therefore, liable to its concomitant evils of mental depression, confused ideas, softening of the brain, insanity, and complete breaking down of the general health. Thousands are suffering today with broken-down nervous systems, and, unfortunately, tobacco, alcohol, late hours, over-work, (mental and physical), are causing diseases of the nervous system to increase at a fearful ratio.

The symptoms to which diseases of the nervous system give rise may be stated as follows: A dull, heavy feeling in the head, sometimes more or less severe pain or headache; periodical headache, dizziness, noise or ringing in the head; confusion of ideas; temporary loss of memory; a feeling of irritability during sleep; bad dreams; hesitation in answering questions; dullness of hearing; twitching of the face and arms, etc., which, if not promptly treated, lead to Paralysis, Delirium, Insanity, Impotency, Apoplexy, etc., etc.

KOSKOO

Is not a secret quack remedy. FORMULA around each bottle. Recommended by the best Physicians, eminent Divines, Editors, Druggists, Merchants, etc. The

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, JULY 9, 1870.

NO. 25.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, June 30.—The treaty for the annexation of the Island of San Domingo to the United States was rejected by the Senate this afternoon by a vote of 28 to 28, being ten less than the required two-thirds to secure its ratification. An order was passed to notify the President of the refusal of the Senate to consent to the ratification. Intelligence of the defeat of the treaty was soon communicated to the President, who said he had been quite confident of a different result, and was, therefore, disappointed. It is thought measures will be at once taken to negotiate a new and more acceptable treaty.

Vicksburg, Miss., July 4.—In celebration of the fourth, the North Louisiana and Texas Railroad (finally completed) was opened today.

Next to the restoration of the levees this joyful event is of the greatest importance to all northern Louisiana. It means competition, low freights and quick connection. A large train filled with passengers left Monroe at six A. M., reaching Vicksburg at eleven A. M.

The unfinished part of the road between Monroe and Marshall, Texas, will be immediately taken in hand and put in operation.

St. Louis, July 4.—The Lee arrived at eleven twenty-five A. M. Out from New Orleans three days, eighteen hours and fourteen minutes.

Nothing has been heard of the Natchez.

There is great excitement, and all St. Louis has turned out.

St. Louis, July 4.—10 o'clock P. M.—The Lee arrived at eleven twenty-five A. M., three days, eighteen hours and fourteen minutes from New Orleans.

She was met twenty-five miles below by an excursion train on the Iron Mountain Railroad, which kept abreast of her to the city.

Several steamers also met and escorted her up to the levee.

The steamboat roofs, house tops and every available spot for miles were packed with people, who hailed the victor with tremendous cheers.

Salutes were fired, and immense enthusiasm prevailed. Nothing like it was ever known in the history of St. Louis.

The Lee was delayed by a fog and the low water last night, between Cairo and this city, two hours or more. She ran into the bank once and went over seven and a half feet at the worst bars.

The time from Cairo to St. Louis, seventeen hours fifteen minutes.

Captain Cannon is confident that with a full river she can make the trip in twelve hours less time.

The Natchez was behind at Cairo one hour and forty minutes. She was caught in the fog below Grand Tower and seriously delayed.

She passed Grand Tower at 8:30 A. M., and is due here at 3 P. M.

St. Louis, July 4.—9:15 P. M. The Lee arrived at eleven twenty-five. Natchez arrived about six o'clock.

The Lee's time is three days, eighteen hours and fourteen minutes. The Natchez's net time, deducting all stops and delays, is three days, eighteen hours and eight minutes.

The Natchez was delayed about seven hours. She brought a full passenger trip.

Not less than seventy-five thousand people turned out to greet the boats. St. Louis never saw such a gala day or so much excitement.

WASHINGTON, July 5, Noon.—The Senate last night resumed consideration of the naturalization bill. The vote adopting Sumner's amendment, striking out the word white, was reconsidered—yeas 27, nays 14. Sumner's amendment was then rejected.

Mr. Warner moved to extend the naturalization laws to aliens of African nativity, and to persons of African descent. Adopted—yeas 31, nays 30.

The bill as reported to the Senate by the committee and amendment was agreed to. On Mr. Warner's amendment a separate vote was taken. The amendment was concurred in—yeas 30, nays 1.

Mr. Sumner renewed his amendment to strike out the word "white," but was defeated—yeas 12, nays 26. The bill then passed.

The Alaska fur seal bill was today signed by the President. Contracts under it will undoubtedly be given to the Alaska Commercial Company, which consists of ten

California and four Connecticut gentlemen, with General John F. Miller, president. He was a good soldier from Indiana during the war, and then was for some time collector of the port at San Francisco. The company is largely in business with Alaska, and has three steamers and eight schooners in the trade, and is the holder of seal privileges from China, Japan and Russia, on islands westward from Alaska.

It did something in salmon fishing last year, and this year is greatly increasing that branch of its business.

It has from forty to fifty thousand seal skins now on the Islands of St. Paul and St. George, on which it must pay a tax of \$1 each, and has supported the natives of those islands for about a year, on a chance of getting the contract provided for in this measure.

General Miller had a talk to-day with the Secretary of the Treasury, who must make the regulations governing the seal business, and said to him that his company had no other purpose than to work in full harmony with the department.

FOREIGN.

LONDON, July 3.—Modification in the naturalization laws of England is exciting attention on the continent. Holland is the first to follow in the matter, and will probably make similar alterations in her laws.

St. Petersburg, July 3.—The Czech Catholics residing here publicly announce their determination to adopt a Greek faith should the dogma of papal infallibility be adopted at Rome.

Paris, July 3.—The emperor wears mourning for eight days in consequence of the death of Jerome Patterson Bonaparte, of Baltimore. Advice from Rome represent the discussion on the infallibility dogma will certainly close this week.

Prince Napoleon has sailed in his yacht to visit the Norwegian coast.

MADRID, July 5.—It is announced to-day that the Prince of Hohenzollern has accepted the offer of the Spanish throne.

The council will immediately take the matter under discussion.

It is tolerably certain this candidature will be proclaimed without the sanction of the Cortes.

LONDON, July 5.—The steamer Robert Lowe sailed yesterday from here, with an apparatus on board to repair the Atlantic cable, near Heart's Content, and the French cable between St. Pierre and Duxbury. This steamer has just been built by the Atlantic cable companies, and is fitted with the most approved appliances. She will be stationed permanently on the American side, and will be in readiness for a contingency.

Rome, July 5.—The discussion of the fourth chapter relative to the supremacy of the Pope was ended in the Ecclesiastical Council yesterday, many of the orators inscribed to speak on the subject having withdrawn. It is reported that there will be a public meeting on Sunday, the seventeenth instant.

MADRID, July 5.—The government authorities to-day officially deny having made any but confidential overtures to a foreign prince. The name of the prince, the government adds, it is not yet proper to divulge.

PARIS, July 5.—In the Corps Legislatif to-day several members of the Left Center submitted interpellations concerning the proposed candidature of the Hohenzollern prince for the Spanish throne. They were assured that Duke De Gramont, minister of foreign affairs, had informed the cabinets of Berlin and Madrid that France could not give her assent to the project.

It was also stated that France would propose a congress of the great powers to settle the question.

LONDON, July 6.—The Morning Post has a telegram dated at Tein-stein, June 25, giving the particulars of the terrible massacre of Christians by the natives of Pekin. Count De Rochechouart, the French secretary of legation, and a number of priests and sisters of mercy were slaughtered.

A well-informed correspondent says that Prince Leopold of Hohenzollern has accepted the Spanish crown. The English government approves it, but France still objects.

CRIMINALITY is a kernel of the forbidden fruit, which still sticketh in the throat of a natural man, sometimes to the danger of his choking. Fuller.

SELLING THE SOUL.—There is a story of a most eccentric minister, that walking out one morning he saw a man going to work, and said to him, "What a lovely morning! How grateful we ought to be to God for all his mercies!"

The man said he did not know much about it.

"Why," said the minister, "I suppose you always pray to God for your wife and family—for your children—don't you?"

"No," said he, "I do not know that I do."

"What," said the minister, "do you never pray?"

"No."

"Then I will give you a half crown if you will promise me you never will, as long as ever you live."

"Oh," said he, "I shall be very glad of half a crown to get me a drop of beer."

He took the half crown, and promised never to pray as long as he lived. He went to his work, and when he had been digging for a little while he thought to himself, "That's a queer thing—I've taken money and promised never to pray as long as I live." He thought it over, and it made him feel wretched.

He went home to his wife, and told her of it. "Well, John," said she, "you may depend upon it, it was the devil; you've sold yourself to the devil for half a crown." This so bowed the poor wretch down that he did not know what to do with himself.—This was all his thought—that he had sold himself to the devil for money, and would soon be carried off to hell.

He commenced attending places of worship, conscious that it was no use, for he had sold himself to the devil; but he was really ill, bodily ill, through the fear and trembling which had come upon him. One night he recognized in the preacher the very man who had given him the half crown, and probably the preacher had recognized him, for the text was, "What shall it profit a man if he shall gain the whole world and lose his own soul?" The preacher remarked that he knew a man who had sold his soul for a half crown. The poor man rushed forward and said, "Take it back! Take it back!" "You said you never would pray," said the minister, "if I gave you a half crown; do you want to pray?" "Oh, yes; I would give the world to be allowed to pray?" That man was a great fool to sell his soul for a half crown; but some of you are a great deal bigger fools, for you never had the half crown, and yet you do not pray, and I dare say never will; but will go down to hell never having sought God."—*Spurgeon's Sermons.*

THE NEW ORLEANS, BATON ROUGE AND VICKSBURG RAILROAD.—The New Orleans, Baton Rouge and Vicksburg road has broken ground on their line to Pontchartraine. The contract to build the road to the Amite has been given out, and the work already commenced. The other sections are also about to be adjudicated, so that the whole line will be under contract before the summer is out. The surveys have been made, and the lines are about to be laid to Clinton, and thence in the northern direction to Vicksburg. This company, with its large grants and its fortunately central position, will not let the grass grow under its feet. It holds the commanding position as to the line from this city to Marshall, the great central and eastern terminus of the Southern Pacific. With its two lines from Baton Rouge to New Orleans, one by Pontchartraine, in connection with the Jackson road, and the other by the left bank of the river from the Highlands in a straight course to the city, it will be able to place passengers and freight on its western branch, the Grossete route, connecting with the Boyce route up the valley of the Red river, by the very shortest line to the richest and most productive portion of eastern Texas, until it reaches Marshall, which will stand toward all the eastern lines in the relation that Omaha does now as the eastern depot or terminus of the Northern Pacific.—*New Orleans Times.*

NONE are so seldom found alone, and are so soon tired of their own company, as those coxcombs who are on the best terms with themselves.—*Colton.*

HE THAT will believe only what he can fully comprehend must have a very long head or a very short creed.—*Colton.*

WE HAVE promises to live upon until the trials come, and then, when they have come, accomplishments. Hayburton.

ANOTHER VETERAN AT REST.

A letter from Bishop Paine, written at Humboldt, Tennessee, informs the Western Methodist of Memphis, of the death of that veteran preacher, the Rev. William McMahon.

Upon my arrival here to attend the Jackson district conference the report reached me of the death of the venerable William McMahon, June 15. This report was confirmed by Rev. W. T. Harris, who had received a telegram announcing the fact, and requesting him to officiate in the funeral services. He died at the residence of his son-in-law, Rev. J. N. Temple, near Paducah, Kentucky, and his remains were interred in that city with Masonic ceremonies, in accordance with his request. It seems that after the close of the General Conference in Memphis, which he daily attended with great pleasure, he went to visit Mr. Temple, and shortly after he arrived was taken very ill, and died in a few days. His last hours were calm and resigned, and his intellect unclouded.

Thus has passed away a veteran of the itinerancy, the last name upon the list of preachers in 1817, when I first attended a session of the Tennessee Conference. He was not present at the Conference, having recently married Mrs. Perkins, and gone with her to visit her father, Judge Seth Lewis, then residing in Opelousas, Louisiana. They traveled in company with Bishop McKendree, on his way to the Mississippi Conference. The following year he returned to Tennessee, and for many years labored indefatigably and successfully in that Conference as presiding elder. His first wife was a lady of finely cultivated mind and profound piety, and gladly shared with him the inconveniences and fatigues incident to his vocation; but her frail constitution soon showed signs of consumption, and, after a severe struggle with the destroyer, she slept in Jesus. She left no child. A few years afterward he was married to Miss Francis Saunders, a beautiful and lovely lady. She too preceded him to the tomb, with, I believe, most of their children. His latter days have been clouded by financial losses and the death of his loved ones. His own once robust and powerful constitution has been, for several years, gradually breaking down, and has finally yielded to the inevitable law, "Dust to dust."

In his palmy days William McMahon was no ordinary man. In person he was of low stature, large in his chest, compact, active and remarkably vigorous. He seemed formed for endurance, and his early pioneer life as an itinerant preacher in the wilds of the West tested fearfully his physical capabilities. He was, I believe, a native of Virginia. I think he began his labors about 1810, in Ohio or northern Kentucky. My acquaintance with him began in 1818, having followed him upon the Nashville circuit in 1817-18, and for many years. I enjoyed a most pleasant and intimate association with him. He had a very active mind; a remarkably keen sense of the ridiculous; unusual powers of elocution; was quick at repartee, and as a popular preacher had much celebrity. He performed a great amount of labor, and at one period suffered inconceivable pain from hard riding, thereby producing and aggravating a most distressing complaint. His early exposure and excessive labors brought on also the asthma, which seemed to threaten his life for a long time. And yet he persisted. He was a man of unusual courage, both physical and moral, and had a high and delicate sense of honor. He deeply loved the church, and proved it by his life and labors.

He was the early and intimate friend of Dr. Bascom, and, being the elder of the two, was useful in calling out and encouraging him in the work of the ministry; and no one felt a higher gratification than did he in witnessing the development of that gigantic mind. Their affection was mutual and life-long. They have met again.

Farewell, friend and brother! Few remain of my early friends, but the period of separation must be short. May it be passed safely and usefully!

HUMILITY is a grace, that adorns and beautifies every other grace; without it the most splendid natural acquisitions lose half their charms.

THE Sabbath is the golden clasp which binds together the volume of the week.—*Longfellow.*

WHAT DOES IT MEAN?

We clip the following extract from an article in the Christian Advocate, New York:

WHAT DOES IT MEAN?—Our readers know well enough that we are not very solicitous for reunion with "the Church South." Its recalcitrant disposition before the question does not, therefore, amuse us, so far as our church relations are concerned. But there is an aspect in which it seems to us very significant, and deserving of public misadversion. What does this general indisposition of Southern religious bodies (universal, we believe, excepting among Romanists and Protestant Episcopalians) to harmonize with Northern kindred organizations mean? The question is a plain one, and it is time it were answered. The whole nation has a right to ask it. The government at Washington has especially a right to ask it. The honor of our common Christianity, as bound by its divine oracles to national loyalty, is involved in it.

Can it be doubted that the leading churches of the South, so energetic in the frightful rebellion, are still fostering the spirit of that great crime by their almost unanimous hostility to ecclesiastical reconstruction?

"What does it mean?" Yes, this is precisely the question we have to ask. The Baptists, Presbyterians and Methodists North have all made various overtures looking to an ultimate organic union with the churches in the Southern States bearing the same name; but these churches in the Southern States have, for reasons satisfactory to themselves, declined propositions looking to organic union, though the Methodists, at least, are willing to establish fraternal relations whenever the General Conference North shall formally propose to do so.

But it seems the Methodist Church North, as represented by its oldest and most influential official organ, is not willing that the division which was consummated twenty-six years ago shall continue, and if we do not remitte with them we show to the world we are "rebellious, and fostering the spirit of that great crime." The Christian Advocate (North) thinks the government at Washington has a right to ask why the churches in the Southern States do not choose to unite in organic relation with the churches in the Northern States—as if it were in any wise the business of the government at Washington what church any citizen attaches himself to, so long as he is a law-abiding man. Has it come to this that the Methodist Church North thinks itself a part of the government, or indeed identical with the government, so that refusal to unite with it is proof of treason and rebellion against the powers that be?

What does the Christian Advocate expect or desire "the government at Washington" to do? To compel an organic union with the churches North, or in default to close and confiscate churches in the South, and arrest Southern ministers for rebellion and treason, and then, as in time of war, fill the pulpits with loyal men? If not, what else? If the government ought to intervene, as the Advocate plainly intimates, it must be because of some crime committed, or certainly contemplated, against the peace, dignity and safety of the Federal government. The Christian Advocate knows (or, as a public journalist, is criminally ignorant if it does not know) that the Christian people of the Southern States are as law-abiding as the people in any section of the Federal Union.

The head and front of our offending is that we will not organically unite with them. This is much like the mean tyranny of a man who has addressed some lady, but because, for reasons satisfactory to herself, she declines his propositions he becomes piqued and angry, and vents his spite in unkind flings and insinuations. We have reasons enough for declining organic union with the

Methodist Episcopal Church North. They have taken and still hold various churches belonging to us. Their General Conference did formally refuse our offer of fraternal relations, and have never as a General Conference rescinded their action or changed their policy in this regard.

Then we are opposed because it does not suit our views to be in organic union with Conferences that appoint "committees on the state of the country," and bring in reports indorsing presidential administrations. We are opposed to organic union because it would be ecclesiastically inconvenient, and because in an elective government like ours it would throw the balance of power into one ecclesiastical organization, out of which it would be impossible to keep corrupt and aspiring demagogues. As in the days of Constantine, all aspiring after place and power would profess faith, profess anything, to secure the influence of the church—thus the church would be corrupted, to the hurt and hindering of the cause of Christ.

There are reasons enough—for us, at least—for declining formal union with the Church North. We hope they will have the forbearance to let us alone. If we understand ourselves we wish to "lead a quiet and peaceful life in all godliness and honesty," and to cherish, so far as we can, respect, good will and good neighborhood toward all. W.

NEW PUBLICATIONS.

LIFE OF CAPLES. By Bishop Marvin. 440 pp. \$2. For sale by the Southwestern Book and Publishing Company, St. Louis.

From our insight into the book the subject was an original character, and is portrayed by a master hand. Such books are useful.

PUT YOURSELF IN HIS PLACE. By Charles Reade.

The author of this book is the leading English novelist since the death of Dickens. It has been read with different degrees of interest by diverse ones. It is interesting to those fond of such literature. We have been kindly furnished with three editions of this popular novel in as many styles of binding. It is beautifully gotten up. On sale by George Ellis, bookseller, opposite the post office, New Orleans.

HOW A FISH SWIMS.—It has been ascertained that the successive or simultaneous removal of the dorsal, pectoral and ventral fins only renders the fish's position unsteady; but he could swim as well as before. But if the end of the caudal fin be snipped off its speed is diminished; if the entire fin is removed it moves still slower, and with evident exertion, but bravely keeps it up until the tail itself has been cut off; then at last the poor victim to science succumbs, rolls over like a log upon the water, gasps convulsively, makes a few desperate but ineffectual struggles with its abbreviated tail—and dies.

We have learned that a fish cannot swim without its tail. Let us now inquire how it swims with it. Very much as you sail a boat with an oar; but with the difference that in this case the oar is a part of the boat, and is flexible both in its length and in its height.

Let us suppose our fish floating at rest in the water. Its tail is extended straight behind the body; suddenly it is bent to one side; this of course turns the head toward the same side, and perhaps carries the fish a little backward; but now comes a more forcible backward stroke of the tail, which turns the head the other way and propels the fish forward. Then, having reached the middle line, it is gently bent to the other side, and again forcibly extended. The result of these alternate movements of the tail in opposite directions is, as in the sculling of a boat, to propel the fish forward, not in a straight but a zigzag direction. But the successive movements are so rapid that we notice only the reluctant forward motion, which in some species, as the salmon, is at the rate of twenty-five miles an hour, and so powerful that the sword fish has been known to thrust his sword through copper sheathing, a layer of felt, four inches of deal, and fourteen inches of oak.—*King's Musical Leaves.*

OVER THE RIVER.

This beautiful and treasured gem will find a response in many hearts. We know not the author.

Over the river they beckon to me—
Loved ones who've crossed to the farther side;
The gleam of their snowy robes I see,
But their voices are drowned in the rushing tide.

There's one with ringlets of sunny gold,
And eyes the reflection of heaven's blue—
He crossed in the twilight gray and cold,
And the pale mist hid him from mortal view.

We saw not the angels that met him there;
The gate of the city we could not see—
Over the river, over the river,
My brother stands waiting to welcome me!

Over the river the boatman pale
Carried another—the household pet;
Her brown curls waved in the gentle gale—
Dorling Minnie! I see her yet!

She crossed on her bottom her dimpled hands,
And fearfully entered the phantom bark—
We watched her glide from the silver sands,
And all our sunshine grew strangely dark.

We know she is safe on the other side,
Where all the ransomed angels be;
Over the river, the mystic river,
My childhood's idol is waiting for me.

For some return from those quiet shores,
Who cross with the boatman cold and pale;
We hear the dip of the golden oars,
And catch a glimpse of the snowy sail.

And lo! they have passed from our yearning hearts,
They cross the stream and are gone for aye;
We may not, under the rill apart,
That hides from our vision the gates of day.

We only know that their bark no more
Sails with us over life's stormy sea;
Yet somewhere, know, on the unseen shore,
They watch, and beckon, and wait for me.

And I sit and think, when the sunset's gold
Is flushing river, and hill, and shore,
I shall one day stand by the water cold,
And list for the sound of the boatman's oar;

I shall wait for a gleam of the napping sail;
I shall hear the boat as it nears the strand;
I shall pass from sight with the boatman pale,
To the better shore of the spirit land;

I shall know the loved who have gone before,
And joyfully greet the meeting be—
When over the river, the mystic river,
The Angel of Death shall carry me.

PRUSSIAN CORRESPONDENCE.

PReSSIA, May, 1870.

MR. EDITOR: Like to rail myself in the indefinite Prussia, because there is a certain pleasing omnipresence—a presence in many political and social centers at one and the same time—necessary to a correspondent, and which would be destroyed should a special point be indicated. At this particular time, too, when the universal land is flying from the imprisonment of room and study into the flower gardens—when the nightingales are warbling to one another among the elms—when those delightful open-air concerts recur generally to one's memory, and draw one like a powerful magnet-point, say to the Hotel Klet, at four in the evening—when a rich symphony of wind blows up from Switzerland, and fills one with the tender languor of summer—at such a time and in such a Hebe of a month, common alike to the whole German Confederation, such an indefiniteness is apposite enough. Indeed, to watch the transformations of the last few weeks would be the delight of a naturalist's heart. All these magical colors—all this green labyrinth of foliage—must have come from the kingdom of Fairy. Even that luxuriant mantle of ivy on those fine old ruins, even the sweet soft twilight among the ruins themselves, seem to have been the play of some necromancer.

Kubezahl, or that wild-bright-eyed monk magician of Cologne, Albertus Magnus, must have touched the roots of the flowers, and made them spring up in thousand-fold shimmering jewels. A seraph possesses the trembling gold finches—there is chattering all day long among the sociable magpies. In Meckenheimer forest, and the royal park of Brühl, there is a jubilee among the innumerable nightingales. Oberon's horn could not ring more enchantingly to the airy-footed elves. It is no wonder that the law patronizes them, and has established a corps legislatif for their protection and preservation. The German national economy has not disdained to pay this exquisite tribute to nature.

To gain one piquant, and at the same time infinitely characteristic trait of the Germans—a trait pervading the entire genial circumference of German life—an evening visit must be paid to the small hotels and *gasthofs*. Sometimes there are beautiful gardens encircling them with classic statuary, pointing to the old glorious antique, shining

among the embowering shrubs and plants, and just indicating that rich and soulful influence which those two tiny peninsulas of the Mediterranean have exerted over the after generations, especially over this grand after generation of Teutons. There are groups of tables, chairs and benches, generally so arranged that, as you inhale the delicate aroma of your coffee, and feel yourself gently passing into the dreamy atmosphere of your afternoon siesta, a stretch of charming scenery is made to catch just that wondrous angle which results in the most graceful of all visions—an evening landscape with glistening phosphor overhead.

As the long German twilight creeps silently up the glacial heavens, with stealthy, empurpled tread, and just reddened with one more day pressed into the wine press of the eternal, the visitors begin to assemble; a kind of wild-fire of conversation commences, greetings and animated arguments are exchanged, anecdotes are exchanged—in short, an effervescence of the whole man, but especially on the sunny, joyous, good fellowship side, takes place. The waiters in pigeon tails and white cravats, napkin under arm, and jingling the musical pennies in capacious pockets, fly around, and administer unto the necessities of the saints. A balmy breath is wafted toward you—a breath subtle, fragrant, intoxicating, melting and blending with the senses in indefinable delight; it is from that crane-necked decanter of Johannisberger or the Hungarian Tokayer to the left, or even from that roseate, pomegranate-hued nectar from Chateau Lagrange, as it gushes in a dewy semi-circle into the curiously shaped goblet. Some tables are surrounded by arid drinkers, others show a wonderful passion for Cluquot veuve and anisette, others cling to the white, pale, ambrosial vintage of Steinberg; but far the greater part—representatives of that great burgher element of Prussian civilization in all its vast ramifications—clink their hugo siedels violently on the tables for beer. This, indeed, seems as inexhaustible as the Geyser of Iceland; ten, twenty, even thirty glasses are drank before the entertainment of the evening closes. It sets the brain in a mild, fruitful heat, the tongue becomes all oil and elastic, the face is suffused with benevolence, the heart is warmed into universal philanthropy, the jolly burgher, the rollicking student, whom you will, then goes homeward, amazed at his own light-footedness, and singing one of Wilhelm Miller's delicious old sweet-tempered drinking songs. If the following day be the mystical seventh, it is consumed in late sleeping and a perpetual round of perambulations either among friends or to the interesting localities in the vicinity. Few German men go to church. The pews are crowded with women. A cold center-freezing indifference seems to congeal all deep religious emotion in the Protestant communion. A bold flight of philosophy, a dream like Hegel's, a beautiful historical romance, a grand poem, music like Gluck's, Handel's, and Barthaldy Mendelssohn's sculpture like the Christ of Thorwaldsen—everything is subject to this gifted people except the eloquent teachings of the Nazarene. It is sorrowful to see the demoralization on this point even among the students. They begin early to philosophize, but their philosophy is the philosophy of scorn. Herder complained that the brilliant speculations of Immanuel Kant were turning the heads of all the young theologians in Germany. The head-turning of his day has appeared in ours as a permanent organic distortion, like the freaks of a moral scarlet fever. But the Catholic element, particularly in the Rhine provinces, has continued to sustain a fresh and astonishing vitality. Their activity is as unceasing as the revolutions of the seasons. By day they work under the sun, by night under the glow-worms or the dreary phosphorescence of rotting wood. They seem not to distinguish between the rich ethereal fire and the decaying lus-

ter of dissolving vegetation. Immense pilgrimages annually take place to shrines, relics of peculiar celebrity—Christ's seamless coat hangs at Friers; a miraculous statue, Heilige Jungfrau, performs indescribable wonders somewhere else, Saint Hubertus' ring wards off and cures hydrophobia, and much other superstitious nonsense. The bones of the Three Kings at Cologne receive abundant reverence, though the antiquarians are not quite certain that they might not be the bones of as many malefactors. Of course the Catholics accomplish much practical good, preserve many lives, nurse the sick with surpassing tenderness, found vast cloisters, hospitals and educational establishments; but they are credulous, intolerant, superstitious, and most comfortably under the papal thumb. The agitation over the Pope's infallibility, and its bearings on political organizations is, of course, great; but the German bishops are pretty generally opposed to it. Dollinger, one of the most celebrated Catholic notabilities in the land, is against it. All the newspapers throw their spark of enlightenment on the subject, some in long historical and dogmatical disquisitions, others in that light, impudent, sparkling ridicule which, like the electric glimmer, plays only about the surface, and characterizes nothing. Whether ridicule, or the gloomy theology of Loyola, or the two hundred and seventy-four fat Italian bishops, or the interference of the European powers will decide a question so weighty in politics and religion, are surmises which hold us all in suspense. Never was espionage so complete, so alert, so overshadowing as it now exists in Rome. The Romans speak only in whispers of the proceedings of the council—whispers, however, which are full of meaning, and which echo has broken into a thousand thunders. There was great scandal about the Pope's behavior over the death of the learned and fascinating Montalembert. There will yet be greater scandal before the great bubble of the Ecumenical Council collapses into its original few drops of powerless water. The Germans laugh at the American bishops, and contemptuously correct Archbishop Spalding in ecclesiastical history. The wild Oriental bishops afford immense employment for caricaturists and photographers. A group of faces lies before me, which, in stupidity, in sensuality, in exuberance of lip and jaw, and in obese ignorance, would be hard indeed to excel. And yet the patriarchs of Jerusalem and the West Indies, and the archbishops of Smyrna, are among them. Their faces look as if they had never melted into the illumined smile of intelligence. The northern transept of St. Peter's Cathedral will be forever memorable as having collected a whole encyclopedia of ugliness, fanaticism, barbaric gorgeousness of dress, and intolerance. It is pleasant to think there are some men among them of singular nobleness and liberality of views—men rich in scientific, philosophical, in classic, in artistic culture—men who rest upon our day like a sweet adolescent spring, and fructify all they touch.

These are precisely the men who recognize the folly of infallibility, and who show that they are least tainted with the infectious disorders of the cloister. There are many Americans in Rome, but they are far more interested in turning over the splendid pages of the Roman past than in reading La Unità and other journals in the papal interest. Especially, too, as some valuable excavations have recently been made, and the museum of archaeology enriched with the precious results. Thus we try to dig an empire out of the ruins! But among all the careful excavations around Pompeii and Herculaneum nobody has ever discovered the spirit of Pliny, the lonesome, quaint, methodical, adventurous genius who found a philosophy even in death.

In some other letter I hope to describe more particularly the domestic German—a colloquation of words which, on this side of the water, sounds laughable enough. DALMEISCH.

THE ATONEMENT.

The atonement is the central truth, the fundamental doctrine of Christianity. It is unknown to any system of theism, however pure, and with revelation it is rejected by deism in all its forms. It is peculiar to and is the distinguishing feature of the gospel system. It begins and ends in that system, and is not found outside of it. It is not in nor of nature, nor is it either invented or discovered by human reason, nor reached by human research; yet when made known it comes within the purview of human thought, receiving its sanctions, and it not only fails to present anything repugnant to the adjudications of a well regulated understanding, but when seen in operation as a new elemental force, averting, transforming, recreating, thus accomplishing its life-giving results in the natural and spiritual universe, that force is seen to harmonize with that universe in its integrity, and to antagonize only with what is foreign to it—with evil and with sin. In this antagonism it is always victorious, and its victory is the strong practical and experimental argument for the divinity, the superhuman source of its origin. This is especially thus demonstrative when consciousness verifies its power in one's own experiences, in the forms of peace with God, purity of heart and holiness of life. Its purpose is only the expression of its power; and that is not only the elimination of all mental, spiritual and physical disease, and the removal of the cause, but to restore humanity to its original perfect state, and more to exalt it to a higher stage of experience in holiness and of free action under the law of liberty, and to a higher knowledge of nature, self and of God. It is a new force, having its center of influence in the new "Man Christ Jesus," and works new results.

The atonement was the one work of Christ—the incarnate divinity. Around it all his other works, in subordinate relationship, cluster; and by it they are illuminated. In its light the birth, life, works, sufferings, death and resurrection of Jesus are all explained and justified. As a sun, to those who experience its power, it lights up and reveals these profound abysses of truth that otherwise would lie concealed in the attributes and nature of God. In Christ and his work, the atonement, that nature is made manifest, for he was the express image of the Father's person; and these attributes in their highest forms of action are made known, for he was the wisdom of God and the power of God; and especially through the redemption that is in Christ Jesus do we read our first, last and only lessons of the Father's love and mercy. It is this only that proves that he would not that any should perish, but that all men should turn to him and live. God is love. Mercy for sinners, redemption in Jesus, these are the voices of the incarnation; they echo up from the Garden of Gethsemane, down from Calvary and the cross, and out from the rocky sides of the open sepulcher of a risen Saviour. All, chronologically and historically, that went before the fact of atonement by the death of Christ, was only preparatory, prophetic, instructive and prophetic; his work, passion, death and resurrection were real, vicarious, propitiatory, atoning. In him, then, God and man met, and were reconciled. All that comes after the atonement is only its results, yet such that they supersede the necessity of prophecy and miracles to vindicate its divine origin and power.

To know the atonement is to know Christianity. To experience its power is to know Christ; and to have that eternal life that was in him.

To be continued.

PREFACE. Solid sense to wit; never study to be diverting without being useful; let no just intrude upon your good manners, nor say anything that may offend modesty, or heedlessly hurt the feelings of another.

SWEET MILK.—This is asserted to be another vehicle in which to administer quinine so as to disguise its disagreeable taste.

THE TAP-ROOT OF ROMANISM.

MR. EDITOR: To complain of popery because of its church infallibility, because of its priestly forgiveness of sin, because of its worship of the Virgin Mary, its ritualistic virtue, mass, candles, popular exclusion of the Bible, seven sacraments, etc., and leaving its great tap-root untouched and vigorous, is to say the least, laboring to disadvantage. Romanism has a tap-root, and these outward irregularities are but the legitimate outgrowths from it. To whip round the outer branches of a tree may retard its spread a little, but perhaps it can well afford this if you leave the trunk and the root vigorous and untouched.

It was a wise saying of Luther that his enemies had been to him of unspeakable advantage. No man thrives much without the jealous and watchful prunings of opponents. Sagacious Romanists can well afford to receive our criticisms of their mere ritual and church doctrines, so long as we leave their essential, fundamental tenet undisturbed. And so might it not be said to Protestants: "See how you prevail nothing!"

We must expose the tap-root; I do not know what better name to give it. The figure seems very appropriate, though I have no sort of favoritism for catch words or cant phrases. It needs no bruising or breaking; it requires only a little exposure to the sun and the natural action of the atmosphere; and the word of reason for it, it will wither and die in a day.

Romanism has but one error about it that is primary or fundamental; and that is not a principle or doctrine, but a fact—a great false, assumed fact. Let that be granted and it can grow, grow and grow on, and smile at all our logical and biblical complaints about infallibility, popish supremacy, virgin worship, priestly pardons, mass and wax candles. The argument now, as it is generally found in Protestant literature and pulpits, is just where I should desire it to remain if I were a papist. Our missiles aim only at the outer ends of the branches, leaving the trunk and the tap-root untouched.

Let me pause here, if you please, Mr. Editor, long enough to inquire, by way of parenthesis, of yourself or any of your thinking readers, How old in the church is the notion that Jesus Christ formed or organized the church? I answer, It is exactly the age of the controversy between Luther and Leo the Tenth about church authority. There is where it arose, and that the cause of its introduction. I am aware that long before that some expressions, many of them, are found which Romanists construe to mean that; but that such construction is erroneous and violates the meaning of those writers, I will say, is palpable.

"Jesus Christ organized his church." That is the great Romish falsehood, and the only falsehood that popery ever had that is primary and fundamental. Popery needs no other. Start there, and Rome has the advantage of you four to one—all sorts of advantage, logical, biblical, popular and all. This point was not brought forward as a question and debated in the time of the Reformation. Rome and everybody else knows that, upon a moment's reflection, it is not a debatable question; and so Leo and his condignors merely assumed it quietly, very quietly, and reasoned from it as a settled matter, making the least possible noise about it. And so, strangely enough, it has passed quietly along down since.

Naturally enough, the reformers directed attention to the immediate things that disturbed them; and mainly, we have done so ever since. These things are but the legitimate, or at least the plausible, sequences or fruits of the central tap-root falsehood. But the time has come, you see, that this pillar falsehood shall be knocked out. Let it be knocked out. Rome, and all other high churchmen, rests upon it alone.

Jesus Christ did not organize a church; nor did Abraham, nor Peter, nor any other man. Such a

thing as organizing, making, setting up, commencing, beginning the outward framework of a church, in any sense, was never dreamed of in the days of the apostles. Such a thing might as well be predicated of this present day as that.

Now, Mr. Editor, I respectfully ask you for room in your paper hereafter for a very few paragraphs to show, first, that falsehood; secondly, its popular prevalence now; thirdly, the plausibility, if not the strict logical legitimacy of the Romish fruit it bears; and lastly, the logical and popular results which must follow its exposure to the light of the sun.

R. ABNEY.

THE TWO ST. PETER.

In history there are two St. Peter. One is the ambitious, unscrupulous, the cruel and tyrannical creation of the Church of Rome. Every unhallowed and worldly impulse was gradually numbered among the attributes of the great apostle. In the third century his Roman defamers began to invest him with an ambitious design of subjecting all other bishops. In the fifth Leo openly demanded for him a universal primacy of authority, that was denied both at Chalcedon and Constantinople. At a later period he was made a temporal prince, ruling over the Roman states by force and fraud. In the eleventh century the haughty Hildebrand, in the allowed name of Peter, proclaimed himself the temporal and spiritual master of the world. In the thirteenth Innocent the Third, to enforce the authority of Rome, filled Europe with bloodshed, and exterminated the heretics of Provence. St. Peter was now made the author of the Inquisition, the champion of the Crusades, the oppressor of the humble, a universal persecutor. Still later he was represented by the horrible vices of a Borgia. At the Reformation he was held up to mankind as the foe of rising knowledge, the patron of a dull conservatism. He was supposed to have inspired the bitter malice of the Council of Trent, and to have countenanced every crime of Charles the Fifth and Philip the Second. In the nineteenth century his name is once more invoked by the Bishop of Rome in exciting a new assault upon human freedom. Priests and pope, in their final council, present once more to mankind their traditional St. Peter—ambitious, cruel, tyrannical—and declare his infallibility.

Very different was the true St. Peter of the gospel and the Acts. He was ever lamenting his own infirmity. In a moment of terror, the thought of death, he denied the Saviour. On him the eye of affection had been turned reproachfully to him had been spoken the words of indignation, "Get thee behind me, Satan." His fervent love had won forgiveness; he was the rock upon which the church was built. Again he had denied his Master when he strove to force the Mosaic law on the followers of Christ; again he yielded, conscience-smitten, to the intercession of James and the fierce denunciation of Paul. At the sacred supper it was not Peter that leaned on the bosom of the Lord and only his age and his rude eloquence gave him any precedence among the disciples. Often the first to act or speak, his advice was not always followed. To James he just to John and Peter, the Lord after his resurrection, commended a divine knowledge; and Peter seems to have paid a willing deference to the family of the Master.

His true greatness, his inspired eminence above mankind, lay in the humility with which he subdued his own imperious nature, and purity which he so freely inculcated upon his disciples. To him the worship paid to a modern pope must have seemed a shocking idolatry. "I am but a man," he cried to the Romans who would have adored him. He could scarcely have presided at an auto da fe, for his language is ever merciful and forbearing. For himself he disclaimed all superiority, and would be only an elder among elders. Instead of the vicar of Christ, the lord of kings, and keeper of the sword of persecution, he would have all men humble themselves to one another. "Love as brethren," he cried, "be pitiful, be courteous, not rendering evil for evil." "God resisteth the proud," and giveth grace to the humble. To such a nature the vain strife of contending bishops, the pretensions of priests to spiritual and temporal despotism, the unhallowed splendors of the medieval church, the horrors of the Inquisition, and the massacres of the religious wars, the pride of Hildebrand, the cruel rage of an Innocent the Third, must have seemed the orgies of evil spirits clad in a sacred robe.—Eugene Lawrence in Harper's Magazine.

The Christian Advocate.

SATURDAY, JULY 9, 1870.

ACOUSTICS IN ARCHITECTURE.

Although the laws of acoustics are as familiar and simple as they are important, buildings designed for public assemblies are frequently so defective in this respect as to suggest that architects are ignorant of the laws of sound. It is true they are often compelled to waive their own views for the sake of fine external appearance or economy of construction. Ground is purchased at considerable cost; the building is made to conform in shape to the ground; and the internal arrangements correspond with the external form. Hence our numerous oblong and rectangular public halls.

Churches are, perhaps, in general, even worse. Some are cruciform; some abound in recesses and other irregularities intended to promote architectural beauty, or to accommodate peculiar modes of ingress and egress. Sometimes massive stone pillars obstruct both sight and hearing. Almost always the ceiling is remote, and the length of the hall or church so great as to seriously affect its acoustic properties. We have often been in rooms where a speaker at one end could be distinctly heard along the central line for perhaps the whole depth of the building; but along the sides, at the same time, one could scarcely distinguish what was said at half that distance. The form of a room, however, seems within certain limits to be even more important than its size. Professional lecturers know well that more labor is required to address audiences in some small rooms than in others larger, but better arranged. Here noise does not overcome the difficulty. An orator may shout so as to be disagreeable to those in his immediate neighborhood, and yet remain unintelligible to those further away. In fact, the difficulty of hearing public speakers is generally due to reverberation, echoes and blendings of successive tones; and these evils are all aggravated by loud and rapid oratory. The great necessity is distinct and deliberate articulation. In music, on the other hand—especially in orchestral music—and, above all, in organ music—the effect may be heightened by some of these causes. Thus the grand old cathedrals of Europe resound magnificently to the tones of the organ; but are quite unfitted for preaching. It is generally necessary in such a cathedral to put the pulpit high and cover it with a canopy of something broad, which serves to direct the vibrations of sound downward upon the audience, instead of outward among columns, tombs and long-drawn aisles, or upward into the depths of groined and fretted roofs.

In order to obtain the proper form and size for any audience room it must be arranged with especial reference to the point where the speaker is to stand. It is noticeable in the best public halls that, while the words spoken from the platform are distinctly audible throughout the house, a speech from the audience is scarcely to be understood. This arises from the fact that sound travels radially in waves in all directions from the point of origin, and is reflected from smooth surfaces like light or radiant heat, the angles of incidence and reflection being equal. The intensity of the vibration decreases as the square of the distance increases. It is therefore important, in order to prevent unpleasant reverberations and resonances, to dispose the walls or other surfaces at such angles to the speaker that they will not reflect the sound upon the audience, and to put all surfaces which cannot be so disposed as far from the speaker as possible, so that their direct reflections may be comparatively inaudible. Angles, corners, uneven walls and ceilings, and solid gallery fronts on a level with the speaker should therefore be avoided. Among sources of unpleasant resonance generally overlooked in churches are the floors and the pews. Every one knows how great a difference a carpet makes, and every one has noticed that it is difficult to speak or to hear in an empty church. Crowds are most easily affected by eloquence, not only because of their sympathetic emotion, but also because they hear more distinctly the words and tones of the orator. It is positive pain to attempt to follow the vociferations of some preachers in half empty churches.

Our theaters are by far the best arranged for this purpose. Builders have recognized the necessity of adapting these rooms to the distinct conveyance of the slightest sounds from the stage; and external form has been accommodated, if necessary, to this demand. A circular, elliptical or parabolic form is generally given to the audience room; and the seats of the hearers are arranged in successively rising tiers, so that each receives the sound direct, without the intervention of reflecting or obstructing surfaces.

If churches were as comfortable as theaters, and ministers spoke as distinctly as actors, there would be fewer empty pews.

Mr. E. H. Clark, of Philadelphia, a civil engineer, in a recent communication to the Manufacturer and Builder (a portion of which we have embodied in this article,) takes the ground that a circle, with the speaker in the center, or an ellipse, with the speaker in a focus, are the best in all cases. We do not think this is mathematically true. The relations between the center and circumference of a circle, and the focus and periphery of an ellipse, are radically different. Probably the exact nature of the curve employed is of little importance compared with the numerous disturbing influences which every building contains. Mr. Clark's suggestion that reflecting surfaces which give trouble should be rendered partially absorbing by means of curtains, etc., is one which may be profitably acted upon in many halls. It is undeniable that rectangular halls are frequently met with which are so well proportioned as to be easy to speak in. But it seems that every construction of this kind, unless copied exactly from some already proved success, is a mere blind experiment. The only safe form appears to be the amphitheatrical.

A few years ago M. Marloye, a French philosopher, wrote as follows:

"Is it not desirable that the spectacle, so humiliating to science, should cease, of all the fruitless or ridiculous efforts made in architecture every day to remedy acoustic defects which could neither be avoided nor foreseen? Is it not deplorable to witness that in Europe there does not exist a passable parliamentary chamber or hall of audience that is not due to hazard? Let it be distinctly understood it is not the ignorance of the architects that I accuse; they may well be allowed to be ignorant of what philosophers do not suspect." The same author proposed a plan (which we believe has never been carried out) of resolving the questions of acoustics concerning public buildings by constructing a deaf and dumb room, to which no sound could penetrate without the will of the experimenter, and testing by accurate measurements the effect of covered or naked walls, floor and ceiling, of height and other dimensions, etc.

M. Marloye "does not blame architects" for the failure to which he refers. Neither do we blame them for failing to construct convenient parliamentary chambers. It may be doubted whether any form can be given to a room which will enable a speaker in any part of it to be heard distinctly. In many foreign chambers, as in our political conventions, it is customary for the orator to mount a tribune at the proper acoustic focus. Again, the majority of members of Legislatures are not fit to speak in public. They mumble, they howl, they whisper; no possible acoustic arrangement could make orators of them.

The United States Senate chamber and the chamber of the House of Representatives we consider to be, in spite of much hostile criticism, reasonably successful. We have never experienced difficulty in hearing from the galleries good speakers in either place. But the galleries are generally empty, and the speeches are generally poorly delivered. It is too much to expect a room to accommodate itself to the requirements new of a crowd, now of a handful, now of a stentor, now of a feeble voice that "pipes and whistles in its sound."

It is, as we have said, in lecture halls, churches and other places where the voice is to proceed from a fixed point, and generally from a practical speaker, that the acoustic problems are comparatively simple; and here architects are either ignorant or remiss. If we cannot do better, let us at least take a lesson from the stage.

A certain old clergyman who had the most unbending faith in Watts' hymn book was fond of saying that he could never open to any page without finding an appropriate hymn. A mischievous son of his thought it would be a good joke to test his father's faith. So he took an old song and pasted it on one of the pages of the book, over a hymn, so nicely that it could not be easily detected. At church, on Sabbath morning, the minister happened to open at that very page, and commenced to read:

"Old Grimes is dead." There was a sensation in the audience. He looked at the choir and they looked at him; but such was his faith in Watts' hymns that he undertook it again, commencing with the same line. There was another sensation in the audience. Looking at it again, and then at the congregation, and then at the choir, said he, "Brethren, it is here in the regular order in Watts' hymn book, and we will sing it, anyhow."

Love is an alchemist that can transmute poison into food.—Colton.

POPULAR AMUSEMENTS.

SERMON BY REV. T. Y. RAMSEY.

The Rev. Mr. Ramsey, of the Methodist Church, according to announcement, preached on Sunday last on "Popular Amusements—What the Denominations Say." A very large audience was in attendance, and marked attention was paid to an unusually long discourse.

He introduced his subject by stating that he was instructed to read to his congregation the Pastoral Address of the Bishops on the subject of worldly and fashionable amusements, written at the request of the General Conference of the Methodist Episcopal Church South, assembled in Memphis, Tennessee, May, 1870.

The address was read, and strongly condemns attendance upon dancing parties, theaters, operas, circuses and cock-pits as being opposed to true religion in the heart and a life of self-denial, and inconsistent with the discipline of the church and the baptismal vows of the members, and urged upon the pastors to use the disciplinary suggestions to suppress these vices in their churches.

He stated that the address was the last official deliverance of the Methodist Episcopal Church South, and was in strict accordance with its oft-repeated views on this subject, that the position of the Methodist Church had always been understood, and probably regarded as the most extreme of the Christian denominations; but that as the

SECOND DIVISION OF HIS SERMON.

he would attempt to prove that the views and opinions of the Methodist Church were in harmony with all denominations of Christians. He proceeded with the proof by extracts from the deliverances of the official bodies, and from the published opinions of many of the most prominent bishops and ministers of the various churches—which he read from a small work, entitled "May Christians Dance?" by the Rev. Dr. James H. Brooks, of St. Louis, Missouri, in which he stated he had found succinctly and conveniently collected the extracts he desired, and also from the published proceedings of the Presbyterian General Assembly. He began with

THE CATHOLIC CHURCH.

and read from the Pastoral Address of the bishops and archbishops of the Roman Catholic Church in the United States in council at Baltimore, Maryland, 1866—from the Lenten Pastoral of the Archbishop of Dublin—both of which strongly condemn "amusements which may easily become the occasion of sin, and especially the fashionable dances," such as polkas, waltzes, etc. He also stated that a general letter of the present Pope of Rome expressed similar views.

HE NEXT CITED THE TESTIMONY OF THE EPISCOPAL CHURCH.

He called particular attention to this testimony, as it was usually charged that this church was the most liberal of all others in these indulgences. He read from Bishop Hopkins, of Vermont, who strongly urged that dancing was inconsistent with the episcopal covenant of baptism; from Bishop Meade, of Virginia, who believed that dancing was in itself wrong, improper and of bad effect; from Bishop McIlvaine, of Ohio, who wrote that "the only line I would draw in regard to these (the theater and dancing) is that of entire exclusion;" from Bishop Cox, of New York, who would not lay hands on classes for confirmation who refused to renounce attendance upon theaters and dancing and other abominations of the world, the flesh and the devil; from the Episcopal Female Tract Society, of Baltimore, and from the Rev. J. T. Brooks, of Cincinnati.

He was glad to array this testimony in favor of the Episcopal Church, and charged misrepresentation upon those who stated that it was loose and unscriptural. He alluded to the similarity of the address of her Bishops and the Methodist Bishops, and called attention to the universal rigidity of the Episcopal Church during Lent.

THE BAPTIST CHURCH.

Testimony was alike strong and decided; in fact the extracts denouncing dancing which he held in his hand he forbore to read on account of their extreme severity.

His fourth collection of testimony was from the societies of the United States, composed of all denominations and he read from the publications of the American Tract Society and the Church Union; and lastly brought up the deliverances of the Presbyterian Church, and the opinion of her distinguished ministers, such as the Rev. Drs. Alexander, Rice, Palmar, Robinson and Barnes. He called particular attention to the last action of that church, by their General Assembly held in Mobile, Alabama, May, 1869, in which they passed the following resolution:

Resolved, 2. That the assembly would, in hearty response to the second suggestion of this overture,

earnestly and solemnly enjoin upon all sessions and presbyteries under its care, the absolute necessity of enforcing the discipline provided in their constitution against offenses, including attendance by our members upon theatrical exhibitions and performances, promiscuous dancing, etc.

He repeated his call of attention to the similarity of the last general bodies of Presbyterian and Methodist churches in their condemnation of popular amusements, and their instructions to their pastors to discipline their members for violation, and closed his array of testimony of the denominations by stating that his congregation would see that the Methodist Church did not stand alone upon the platform of entire exclusion, but that all orthodox churches occupied the same ground.

THE THIRD DIVISION.

contained allusions to the comparative numbers of the various churches, as represented by their comparative liberty of indulgence in popular amusements. The Methodist, the most rigid in this matter, was the most numerous church in the United States. The Baptist, next most rigid, next most numerous; the Presbyterian next, and last and fewest the Episcopal. The Methodist on one extreme represented by over two million members—the Episcopal on the other by only two hundred thousand.

During this part of his sermon he alluded most feelingly to the delinquencies of some of his members, who had been sending their children to the dancing school, and attending dancing parties and circuses, and urged them, in view of their church vows and their hopes of salvation, to abstain in future from these sins.

His allusion to the more prosperous days of Methodism in Columbus, and to some of the prominent dead of her membership, when rigid adherence to church vows was the rule and violation the exception; and his appeal to the church to recall those days and the example of those honored men was touchingly pathetic.

His peroration was an eloquent and earnest exhortation to stand by "old Methodism" and adhere to the church standard, and closed by an invitation to all who would promise so to do, to kneel with him in prayer, whereupon almost every person in the church knelt, and the prayer closed the services.—Columbus Democrat.

BIOGRAPHICAL.

We, as your committee, appointed at our last quarterly conference for Jackson circuit, to draft suitable resolutions relative to the death of our brother, WILLIAM J. BRACEY, beg leave to report the following preamble and resolutions:

WHEREAS, The great Head of the Church in his inscrutable wisdom has removed from his field of labor our worthy brother, William J. Bracey; AND WHEREAS, We cherish the memory of this good man for his efficiency and fidelity as an upright Christian gentleman and officer in the church of God; therefore,

Resolved, That as a quarterly conference we express our profound sorrow at the loss which the church has sustained in the removal of a good and faithful steward from her councils and her support; yet we bow in humble submission to this afflictive dispensation of an all-wise Providence.

Resolved, That while we deplore the loss of this excellent, good man to us as a faithful collaborer in the church of God, we extend our sympathy to the friends of the deceased, praying that they may all strive to meet him in heaven.

Resolved, That these resolutions be spread upon the minutes of this quarterly conference, and a copy furnished to each of his two brothers, and a copy to the NEW ORLEANS CHRISTIAN ADVOCATE for publication.

JULIUS T. CURTIS.
E. H. SPENCER.
T. A. CATCHINGS.

WILLIAM J. BRACEY.

William J. Bracey was born in Sumpter district, South Carolina, January 29, 1812, and died at his residence in Hinds county, Mississippi, January 16, 1870, of phthisis pulmonalis, aged fifty-seven years. His afflictions were protracted and his sufferings very great, but he bore them with Christian fortitude and patience. He was married on the eighth of January, 1839, to Miss Margaret J. Lenoir, of Marion county, a most estimable lady, but she was not permitted to remain to bless his household but a few months, when she sickened and died.

Having lived in this country for forty years, he was well known and greatly respected as an upright Christian gentleman. And it is due to the memory of this good man

and worthy citizen that some record of his consistent Christian life and happy death should be written as an incentive to us all, and more especially as a legacy to his relatives and friends. He made a profession of religion during the famous revival at Spring Ridge, in 1856, under the ministry of the Rev. Dr. Light, and attached himself at once to the Methodist Church. And brethren who witnessed his conversion have told me that it was one of the brightest conversions they ever witnessed. He continued a faithful, consistent, useful member to the day of his death. He was ever its liberal friend and supporter. He was an efficient steward for a number of years, and held the position when he died.

Brother Bracey was a most excellent man. He was all that could be desired as a friend, neighbor, citizen and Christian gentleman. He was a true man in every sense—of great forbearance and unflinching integrity. Generous to a fault, firm in his friendships, ardent in his attachments, he was beloved by all who knew him.

It was my privilege to visit him but once during his illness, as he died soon after I came on the circuit; but I found him sublimely awaiting the Master's will. He was as happy as a poor frail being could well be in the flesh. As with bounding heart and eager eye he would look up toward the great white throne, before which he should soon stand, and clapping his glad hands while silently yet sensibly shouting the praises of God, which he should soon renew in the eternal shore, I felt that I was in the place where waiting angels were, and breathing the atmosphere in which the saint dies. I am glad that I saw him even that one time.

Happy, happy soul! We can have no fears, doubts as to your state; we look back over a quiet but well-spent life, to a happy, triumphant death, and we say, Gone to the realms of bliss, "where the wicked cease to trouble and the weary are forever at rest." JULIUS T. CURTIS.

MRS. MARTHA E. J. PARKER.

Mrs. Martha E. J. Parker, wife of Rev. James A. Parker, of the Montgomery Conference, and daughter of Edward and Patsy Cullifer, was born in Muscogee county, Georgia, July 30, 1840, and died in Milton, Florida, May 31, 1870. In 1864 she moved to Coffee county, Alabama, and was married to Brother Parker, October 2, 1866; and in 1867 embraced religion and joined the Methodist Church.

She possessed many excellencies of character and disposition. Amiability and gentleness were crowning traits. To these had been added the Christian graces of meekness and devotion. Her piety was genuine, ardent and consistent. Her words, her acts, her whole life were in the fullest accord with her profession. In her devotion to the church, to the work of the ministry—the vocation of her husband—her example was truly commendable and illustrious. The inconveniences, trials and hardships incident to a traveling preacher's wife were borne with a patience and resignation that illustrated her apportionment of the pastor's work, and entitled her to be canonized among the true friends and servants of Christianity. Her husband's fields of labor up to and through the war were very extensive and heavy, on circuits and as missionary to the

soldiers in the Confederate army; and on his return, after the surrender, her attachment and devotion to the cause of Christ were still true and unabated, as the following from her husband to the writer fully indicates: "You knew her itinerant spirit, how I would have located after the war had it not been for her." Gloomy as was the prospect, with the encouragement and co-operation of such a companion the preacher continued in his Master's work, and for five years more pressed on through formidable difficulties, until his help-meet is called from labor to rest. No wonder he writes: "My present affliction is inexpressibly great. I am cast down but not forsaken." I need not tell you of my

sorrow of sorrows; you cannot sympathize with me; you know not how." Her last illness was of but short duration, and of such a nature as to allow no expression in her last moments. "But thirteen years of devotion to Christ is her witnessing testimony." Such a testimony is a precious and invaluable legacy to the sorrowing and bereaved husband and children. We bespeak for them the sympathies and prayers of the church.

J. W. SHORER.

YOUNG MEN, DO SOMETHING FOR THE RIGHT.—Young men, live for something; throw yourselves into the breach with all of the ardor, courage and enthusiasm you can command. Let every department of truth find resolute defenders and advocates in you. Let every form of sin and error, of however long standing, meet in you fearless opponents. You are needed; as much needed, if not more, than at any other period of our world's history. "Let no man despise thy youth," was the wise injunction to Timothy while preparing to take charge of the church at Crete. Action and faithful work will produce esteem and respect. Activity is a demand of the age. Everything is in motion; you live in a world of strife and conflict. Sin and righteousness are fighting the greatest of battles. Satan is hourly marshaling his forces to defend the strongholds of sin against the attacks of reformation. "The flag of intemperance is ever unfurled," and many there are who are rallying around it, strongly entrenched within the walls of habit, prejudice, dark ignorance, blind superstition and brute law.

Reformations are comparatively few, but they are invincible in the power of truth, and will inevitably achieve a glorious victory. Reformations as much resisted by popular feeling, and impeded by ignorance and stubbornness, have been accomplished through the medium of a rectified public opinion, and no State ever possessed greater opportunities for doing it than this. And what has already been done in this direction, justifies the expectation that what remains to be done will be accomplished. Young men, you can do much toward bringing about such a grand result by consecrating your energies in defense of this cause. Remember what young men have accomplished, who in early life devoted themselves to the prosecution of great and worthy objects. While you are engaged in business avocations, realize that life is indeed contemptible if it has nothing more elevating, to command the attention of an immortal being, than the simple routine of work, or details of trade. You may live so as to make your life an honor and a blessing. *Min. Temperance Advocate.*

HOW TO KEEP COOL.—The Herald of Health for July gives some directions upon the pertinent problem of how to keep cool. We quote:

1. The diet should be composed largely or entirely of fruits, fresh vegetables and wheat meal bread, and other preparations of wheat and oat meal. Corn meal, bread and cakes should be seldom eaten, if at all, during hot weather. Avoid all stimulating or heating articles of food, as meats, especially fat or salted meats; butter, gravies, and greasy food of all kinds, sugar, mustard, spices, etc. Do not eat hot food, and especially avoid eating more than the system requires.

2. Drink nothing but water, and that only a small quantity at a time. Of course this precludes the use of tea, coffee and all alcoholic drinks.

3. The clothing should be light, light colored, loose fitting and changed often.

4. The entire body should be bathed every day, either in the morning or at night. Farmers and others who perspire freely and are exposed to dust, should bathe at night. They will rest and sleep better for doing so. The whole body can be effectually cooled in a short time by holding pieces of ice in the hands, or letting a stream of cold water run upon the wrists or ankles.

5. Avoid all undue mental or physical excitement.

OH, THE SABBATH STILLNESS—how blessed! how grateful to the eye, the ear, the soul! Earth's feverish throbs is hushed in quietness. Nature seems to rest, and her fields and woodlands assume a brighter green. The sun shines with a milder light, and the breeze whispers more softly as it moves by. The clear-toned bells break out upon the still atmosphere, and waves of sound chase each other away in undulating melody. The hum of busy life has ceased for a moment and weary men turn to their homes for rest. Welcome the Sabbath! It comes like a haven after a stormy passage on the sea of life, with the sails of care all furled; the tossed spirit is moored at the hearth. The streams flow more still, and lakes are like mirrors. As much as the Sabbath is trampled on and disgraced, it is a blessed day for the world.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

MONDAY, JULY 9, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—Rev. LINTS PARKER, 112 Camp Street, New Orleans, La.

To Subscribers.—Any person wishing to subscribe for this paper can do so by giving the Methodist preacher in the street, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office Order, Draft, or by Express. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

Rev. F. L. B. SHAYER, presiding elder of Lafayette district, has sustained a heavy loss in the destruction of his dwelling by fire, consuming about seven hundred volumes of valuable books, besides manuscripts, family memorials, etc. This will awaken sympathy in many hearts. We pray that he may be sustained.

We have received a sample of Weedon's Excelsior Labor-Saving Washing Soap. We commend it on the testimony of a certain housewife who says "it is splendid." Anything to mitigate the present troubles of housekeeping that are entailed on us. A. T. Bennett & Co., corner of Common and Tchoupitoulas streets, agents.

We call the attention of our friends to the card of the Economy Mutual Aid Association of this city, and advise those who want a cheap and simple form of insurance on their lives to connect themselves with this company. It is under the management of some of our oldest and most reliable citizens, as will be seen by reference to the card. The association would be glad to have a good agent in every county throughout the South. Send for circular, addressing James B. Guthrie, secretary, lock box 442.

NEWS FROM THE CHURCHES.

WETUMKA, ALA., June 22, 1870.

Mr. Editor: We have just closed one of the most interesting revival meetings in the Methodist church that our city and community have enjoyed for several years. It began four weeks ago, and continued with increasing interest. The pastors of the Baptist and Presbyterian churches united with us in the glorious work. Many thanks are hereby tendered to Rev. S. P. Richardson, Rev. S. H. Cooper, and Rev. W. S. Turner, presiding elder, for valuable assistance rendered from time to time during the progress of the meeting. Twenty souls professed conversion, most of whom will join the Methodist Church. Not only was our church, which had long been drooping, revived, but all the churches have enjoyed the presence of God's spirit. A general religious impulse has been felt in this community, the results of which eternity alone will reveal. May God continue to pour out his Spirit upon us, until "at the name of Jesus every knee shall bow, and every tongue confess that Jesus Christ is Lord," to the glory of God the Father.

R. T. NALORS, Pastor.

EDITORIAL CORRESPONDENCE.

THE RAILWAY.

The trip by boat from Louisville to Cincinnati gave us a long afternoon and the early morning for farther observation on the Ohio. The parting view of Louisville was such as to increase the regret felt at seeing so little of this interesting place. It is said that blessings brighten as they take their flight, and so it was of our acquaintance with this most beautiful river. Between the two cities it is a continuous panorama of delightful scenes. The hills rise on both sides of the stream to a great height, and their sides are diversified by cultivated fields and forests. Sometimes they ascend abruptly from the water's edge, and throw their shadows as far as the opposite bank, and again, from a foreground of rich alluvion, they slope gently back until their tops repose in an atmosphere of blue and purple. At daybreak we found ourselves looking out upon the vine-clad hills below Cincinnati. The blushing East with its crimson dyes spreading upon cloud and hill, the contour and disposition of this hills themselves, the water view, the dark verdure of the corn, the gold of the ripened grain, and the tasteful rural habitations now perched upon the loftiest eminence, and now nestling in some sequestered vale, made up a chromo which we shall not soon forget. The vine is a very prominent object, and is cultivated successfully. The ground, in many places, is terraced, and the general effect of the regular rows is pleasing. "Vine-clad," however, is as much a misnomer here as it is in many parts of France. Each vine is pruned and staked, and displays almost no foliage at all. Our luxurious Soupermong furnishes no idea of the nakedness of these Western vineyards.

A little after sunrise, on the twenty-first of June, our boat landed close by the Suspension Bridge. The first sound which attracted attention was the squealing of a load of porkers, which were being transferred from a market wagon—a trifling incident, and only noteworthy as coinciding with the Queen City's well known sobriquet. Hurried from boat to car, we bade adieu to "the beautiful river," and were soon rattling and tearing along through the great State of Ohio. The Little Miami railroad is excelled by none in the comfort and elegance of its cars and the smoothness of the track. There is, however, but one recommendation for traveling by rail—it is fast. Apart from rapidity of transit, give us a horse and buggy, a steamboat or almost anything. The dust is well nigh suffocating, the cinders are in one eye or the other, and sometimes in both; and, as for talking, you and your neighbors might as well be deaf and dumb. You can neither hear nor be heard. Then the unpleasant odors from smoke, wheelgrease and lunch baskets, and this necessary proximity of unclean and disagreeable people, affect one nearly as bad as sea sickness. Trains are continually meeting, and pass with a screech and a whiz alarming to the firmest nerves. At times the train is high up on a perilous trestle, again it dives and plows through a hill, and now with a shriek it plunges into a tunnel dark as Erebus and smelling of brimstone.

The irony of Saxo was exquisite when he ventured on the line:

"Bless me! this is pleasant, riding on a rail!"

The views from a car are generally unsatisfactory, often tantalizing and vexatious. Just as the landscape opens with hill, vale, village and forest, you are hurried into a deep cut which shuts out every object; and when you think everything fairly opportune for a good look, behold, it is left far behind! The movement is so rapid that in attempting to get a glimpse on one side you are missing everything on the other. So many views and so much seeing is compressed into so brief a space of time that the sum of enjoyment is diminished thereby. It is very much like concentrating your dinner into a single pill, and taking it at a gulp. The linked sweetness is not long drawn out. With these evident drawbacks there

is a certain pleasurable excitement in the rapidity of railroad travel. The swift transitions, the rattle of wheels, the dance and whirl of outward objects, are intoxicating. Under this temporary delirium all sense of danger is lost, and you could wish the speed a thousand times greater. The traveler would spurn all time and space, and dart along with the celerity of light. Time is money, and this compensates. By the locomotive and the telegraph, by steam and by lightning, our brief lives are longer than the years of Methuselah. We were amazed at the business of the railroads, the double tracks, the number of them, the stream of people flowing on them, the freightage. They have become, indeed, the great arteries of the nation's life, through which the bounding pulsations of our civilization are felt. This Western and Northern region is made by its railroads.

From Cincinnati, northward, we pass through the Little Miami Valley. The river is in sight most of the way from Miami to Xenia, and the entire route to Columbus abounds in pleasant scenery. The valley is truly one of the loveliest in the West, and appears to be exceedingly fertile. There are no very lofty hills, nothing abrupt or precipitous, but the face of the country is undulating, swelling from the water in graceful curves, and rising and falling in a manner best adapted to display every point of the landscape. It is the beginning of wheat harvest, and the valley in places is literally "clothed with corn." The river itself is a miracle of beauty. Fifty yards would span it in most places, but sometimes it widens so as to embrace covey and picturesque islands, and to form rapids. The water is perfectly clear, and shallow enough to display the smooth rocks over which it flows. The murmur and gurgle of the eddies, and the howling of the swift current, are heard from the windows of the cars. Everything in this region indicates prosperity. The towns and villages are well built and full of life, and the farmers' homes exhibit architectural taste. Nothing looks dilapidated, but all objects tell of enterprise and thrift. At Cleveland, on the Lake Shore Road, we have a brief view of the blue waters of Lake Erie, and are refreshed by the breeze which comes stealing over its bosom. There are sails in sight, apparently motionless, and we have a complete water horizon. The sun goes down on Lake Erie; it rises upon us in Buffalo; and ere moridian we are at Niagara.

We would like to furnish a brief cartoon of this great natural wonder, but shall scarcely attempt it. We had heard the roar of the cataract before, and the zest and luxury of first impressions can never be recalled. They never return any more than do the ardor and buoyancy of youth. Some changes have taken place within the past fourteen years. Table Rock is gone, and the Horseshoe Fall has receded considerably in the center of the curve. The fall on the Canada side now has the shape of the three sides of a parallelogram, and the graceful curve which once resembled a horseshoe is almost entirely lost. On the American side there are no noticeable changes. Every rock and shrub appeared as in former years. The bridges and walks and drives of Goat Island have been renewed and greatly improved. There is also a new suspension bridge thrown across the river just below the falls. It is for vehicles only, and is so narrow that carriages cannot meet on it. We crossed on it, but resolved never to do the like again. Compared with the old bridge, two miles below, it is as gossamer, and one feels as if suspended by a single thread while looking at the falls and down into the depths of Niagara river. But for this sense of insecurity the view is very fine, and the mist rises in your face.

The complete view of the falls is from the Canada side, where the eye rests at once upon the front face of the cataract. From this point the American fall is white as snow, and only occasionally veined with blue and green; whilst the

center of the Canada fall is a wall of flowing emerald, flecked and tessellated with the most delicate and lace-like traceries of foam. A rich silk skirt of green, with a mantle of finest lace thrown over it, gives some idea of the effect we are trying to describe. Goat Island is now reached by iron bridges, and affords many interesting views of the falls. Perhaps the most fearfully sublime is from the top of Terrapin Tower. This tower is built of stone, and stands upon the very brink of the awful abyss formed by the great or Horseshoe Fall. It is over thirty feet high, and is reached from the island by a precarious looking bridge of nearly fifty yards in length. From the top of this tower we look upon the rapids as they come thundering down, and gaze into the mighty flood as it plunges into the awful and viewless depths. Here we observed the swallows skimming the angry waves, and dipping their wings in the spray upon the very lips of the falls.

At the upper end of Goat Island are three comparatively tiny islets, called "the Sister Islands," and reached by substantial foot bridges of iron. They are masses of rock covered with stunted trees, and lying in the very teeth of the rapids. From them we have a perfect view of these floods as they come rushing tumultuously to the final leap. We know not which is the grander sight, the rapids or the falls. The former are the types of a sublimity hardly less overwhelming than the latter. They seem to be an animated host; "the floods clap their hands," and rush down upon their fate with a mad and irresistible desperation. There are places where they make a clear bound of forty or fifty feet apparently; and others where they seem to stand at bay, and the currents break into individuals and parties, tossing the foam from their giant horns, and wrestling with each other for the mastery. Here and there their snowy heads are turbaned with fragmentary rainbows, and sparkle with opaline tints. The rapids are power and grandeur in agitation and conflict; the falls are sublimity wrapped in apparent resignation and repose. As the six o'clock train left the old Suspension Bridge we took our farewell look at Niagara. The mass of waters seemed to hang wall-like and fixed, whilst the morning sun poured his beams down through the mist, and to the very heart of the cataract.

NORTH ALABAMA CONFERENCE.

GADSDEN, ALA., June 23, 1870.

Mr. Editor: I see, by the action of our late General Conference, that several new Annual Conferences have been made, one of which is the North Alabama Conference. Gadsden is in its bounds, and is also the place where its first annual session is to be held. I wish, therefore, to call the attention of the presiding elders to the fact that they will confer upon me a great favor by furnishing me, at as early a date as possible, with the names of all the preachers, local and itinerant, and also the laymen, who expect to be in attendance upon its session.

This to me, brethren, is very important. I hope, therefore, you will not promptly. Attala is the nearest point to Gadsden on the A. and C. railroad, and the railroad from Attala to Gadsden is now in course of construction, and doubtless will be completed by the first of September. There will, therefore, be no difficulty in getting from there to this place. There is a daily hack line from Jacksonville to this place. None from Guntersville to Attala. Gadsden is able to support the members of the Conference, and ample provision will be made for all. We hope, therefore, to have a full attendance.

R. A. TRAMMERS, Pastor.

Nashville, Advocate please copy.

The Rev. Dr. B. M. Nadal, who was *pro tem.* president of Drew Theological School, as successor of Dr. McIntock, died suddenly at Madison, New Jersey, on the twentieth of June. He was a leading man in the Methodist Episcopal Church North.

Thinking is the least exerted privilege of cultivated humanity.

CENTENARY COLLEGE.

On the first of July, agreeably to notice, the trustees of this institution met at Jackson, Louisiana. Since the previous meeting of the board one-half the amount necessary to repair the college completely had been collected, and now subscriptions are being secured daily for the accomplishment of this work.

But a very small region of country tributary to the college had as yet been visited; while everywhere its alumni, and the friends generally of Southern Methodism in Mississippi and Louisiana, have expressed the liveliest interest in its full re-suscitation. In this state of things the trustees resolved to appoint a building committee to enter upon the work of repair immediately, so as to arrest the damage which is going on in the center building. An architect of great experience has made a survey of the whole, and has placed the cost of repair, exclusive of painting, for the center and wing buildings, at \$19,600. The committee will repair only as they have the money in hand; and the friends of our church will be called upon, as the work goes on, to supply the needed funds until the whole structure shall be restored to the condition it was in before the war.

These buildings are a part of the college, but not the whole of it. Besides apparatus and library—which, fortunately, in great part survived the alternate fortunes of many skirmishing parties during 1863 and 1864—various items of furniture still remain, with the polish off, but still very serviceable. The grounds require fencing, cisterns repairing, etc. But, above all, the faculty elected will need much help the first two years, in addition to the amounts received from tuition, in order to realize the salaries which the trustees offer, and are determined shall be paid. Putting all those items together, the board passed the following resolution:

"Resolved, That the president of the Board of Trustees, Bishop Koenig, be requested to solicit subscriptions for the college until such time as his other duties shall call him away from this field of operations; that the president of the board be requested to raise the sum of \$30,000, including the \$9,000 already raised, for the purpose of repairing and refurnishing the college, and to assist in sustaining the faculty for two years; and that he also be empowered to appoint a college agent whenever he may deem it necessary to supply his place; that after the above amount shall have been collected the said agent shall proceed to solicit subscriptions for the full endowment of the college."

From the reports made by the president of the board, the preachers of the Mississippi and Louisiana Conferences, and the membership of our church in the Southwest, are interested in the college as much as at any time in its whole history. They see that, as an adjunct to the church in supplying its pulpits with educated young men, it has done a great work, and in this aspect is still indispensable. The college has turned out a large number of young men who now occupy important places in the state and in the church, and who will compare favorably with the graduates of other colleges. No institution of its age has done any better work.

One great matter, and fortunate, in regard to the location of this college now develops itself: it is surrounded by land which will always support a large white population; it is not in danger of being suffocated with Chinese, African or other Hamitic races, who naturally are drawn to the richer alluvial regions. The place can still command very large audiences. It supports now two female schools, each with more than one hundred students. It is neither French nor Catholic in its atmosphere, but American and Protestant. Presently a railroad will be at Clinton, within easy reach of Jackson—full near enough.

The board elected a president, a professor of mathematics, and a professor of ancient languages; intending to elect a professor of natural science and a professor of modern languages at some future meeting. These and a principal over the first forms of college applicants, who

is to be appointed by the president, constitute the faculty. The faculty as elected stands:

President—Rev. W. G. E. Cunningham, D. D.

Professor of Mathematics—A. R. Holcombe, A. M.

Professor of Latin and Greek—W. E. Wiley, A. M.

Prof. of Natural Science—

Prof. of Modern Languages—

Principal of First Forms—

Tuition, \$60 per year. Board,

\$15 per month.

The degree of A. B. was conferred on William Young Dixon, and the degree of A. M. on F. A. Jones and E. R. Jones.

The building committee, appointed by the president of the board, consists of Colonel J. C. Hardee, of Clinton, Dr. T. S. Jones, of Jackson, and General Collins, of East Feliciana.

From present prospects this college will soon have an undisputed field in the great work of educating the young men of the Southwest. It becomes every member of our church to rally to it if he wishes to uphold every interest that is dear to him, either as a citizen or a Christian. So soon as I have finished the work in hand of fully repairing and getting under way this noble institution, I will publish the names of all contributors, and the disposition made of every cent collected. So far as any oversight can secure it, the amounts contributed will be judiciously and economically expended. This work is as noble as it is weighty—to secure to the young men and the youth of the South such an education, moral and intellectual, as will enable them to stand up in any assembly, with ability to discern and to assert their rights, and to advocate the cause of Christ in the face of the world.

J. C. KEEFER,

Pres. of Board of Trustees.

THE MUSICLESS HARP.

It is said: "Every effect has its adequate cause." There are latent causes operating, the effects of which we see. Those occult influences involve the mind in much skepticism—their disclosure is the discovery of science.

Calculation is made by the scientist as to the various phenomena of nature, and with an astonishing amount of precision and certainty their hidden sources of power have been revealed. But to discern the signs of the "coming of the kingdom" is much more difficult. "The kingdom of God cometh not with observation." The history of the kingdom seems to be more or less that of progression and retrogression. Christian experience, in its varied phases, presents that which is strange and anomalous. Yesterday on the mount of hope and rejoicing, to-day in the vale of doubt and despondency. The minister then with light, liberty and power delivers his solemn message of warning to a deeply-awakened multitude; now with hesitancy and little of spirit and power he leaves the house of worship, mortified and chagrined at his own lack of power. The hearers then eagerly devouring the word; now refusing to hear the word; now refusing to hear the word; now refusing to hear the word; now refusing to hear the word.

Why it is, at times, our prayers are spiritual and flow as, if by instinct, and bring us face to face with God in closest communion, and again they seem merely a dull and monotonous lesson—a solemn mock worship—we cannot contrive. Why it is that the means of grace (always efficacious) being used with diligence, none are "slain of the Lord," none are "converted," and again, when no special effort is made, as if by a secret and unexpected influence, multitudes are moved to seek and obtain religion, has always seemed marvelous. Perhaps as a test; perhaps to demonstrate that "not by might or by power, but by my Spirit, saith the Lord."

The elements of power are still with the church. "The secret of the Lord is with them that fear him." Heaven has not projected this wonderful scheme of gracious recovery upon the dark void of this

sin-smitten world, with no pledge that he would not make it efficient. "God hath chosen the foolish things of the world to confound the wise; the weak—those things which are mighty." He who has said, "Lo, I am with you," has declared, "My word shall not return unto me void, but it shall accomplish that whereto I sent it." "He that is for us is mightier than all they who are against us."

"The harp is hung upon the wall, low." The "desolations" of Zion are too saddening. There is no music; its chords are not swept by the fingers of faith; it sends forth no sweet and mellow sound announcing the Sabbath year. Our captivity of sin—the derelictions of former years—is mournful. Our "enemies require of us a song, saying, Sing us one of the songs of Zion." Our reply is: "How can we sing the Lord's song in a strange land?" It seems to be the time for Zion to mourn—to put on the habiliments of sack-cloth and ashes. May not the Israel of God join in the fervent exhortation: "Turn again, O Lord, our captivity!"

The season for revival and protracted meetings has come. The "set time to favor Zion" may be near at hand. Shall not the "means of grace" be vigorously used? God says: "Try me now herewith, and see if I will not pour you out such a blessing as there shall not be room enough to receive it?" O for mighty faith! Faith which says: "Yea, Lord, I do believe! O that the mighty power of God may be made known—his saving health among the people!—Even so. Amen." Then will our mouth be filled with laughter and our tongue with singing.

PROGRESS OF HIGH CHURCHISM.

The Episcopal Council of Wisconsin, held at Milwaukee, June 23, promulgated the following: Every communicant of our church who marries outside of our communion, or is married by any other than a clergyman of our church, shall stand *pro facto* excommunicated.

This is, to use a plowman's phrase, to put the backband pretty far forward, and to set the plow rather deep. It will certainly encounter some roots and rocks of opposition. But we regard it as a logical sequence of the high church apostolical succession assumption. If Lutheran, Presbyterian, Baptist and Methodist ministers of the gospel are not ministers, then, of course, they have no right to exercise ministerial functions. The license to marry authorizes "any minister of the gospel or magistrate to solemnize the rites of matrimony." But if we are not ministers, as high churchmen say, then we have no right to join in holy wedlock parties who may apply to us; and if we do, according to high church theory, the parties are not married, and their children are not born in wedlock. It is notorious that no small percent of Episcopal ministers were Methodist ministers and the children of Methodist parents, married by Methodist ministers of the gospel.

We wish to ask these gentlemen, What was the moral, social and civil position of your parents? What is your own position? By what right do you call yourselves by the names you bear? Who are you—what are you? We do not define your position; you have done that yourselves by your theories, practically carried out by the deliverance and canon of the Wisconsin council.

If we are not mistaken, this is just a little more sail than the Protestant Episcopal Church can carry safely in the waters of modern free thought. Respectable people in and out of the Episcopal Church are not going to have themselves, their parents or their children socially degraded by any such ecclesiastical arrogance, not to say slander. Our parents were virtuous and holy, and lived and died in honorable wedlock. High churchmen must look down from their lofty and exclusive pretensions, or else they must accept the position that many of their members are not living in lawful marriage, and many of their children were not born in wedlock.

CONTENTMENT abides with truth. And you will generally suffer for wishing to appear other than you are, whether it be richer, or greater, or more learned. The mask soon becomes an instrument of torture.—*Friends in Council.*

VICTOR HUGO is now suffering with a disease of the eye. He is even unable to sympathize by letter with the Republicans of Europe, and employs an amanuensis.

CHARITY is never lost—it may be of no service to those it is bestowed upon, yet it ever does a work of beauty and grace upon the heart of the giver.

KOSKOO.—This medicine is rapidly gaining the confidence of the people, and the numerous testimonials of its virtues, given by practitioners of medicine, leaves no doubt that it is a safe and reliable remedy for impurity of the blood, liver disease, etc.

The last *Medical Journal* contains an article from Prof. R. S. Newton, M. D., president of the Medical College, city of New York, that speaks in high terms of its curative properties, and gives a special recommendation of Koskoo. This is the practitioners of medicine.—This is, we believe, the first instance where such medicines have been officially endorsed by the faculty of any of the medical colleges, and reflects great credit upon the skill of Dr. Lawrence, its compounder, and also puts "Koskoo" in the van of all other medicines of the present day. *Norfolk Daily Journal*, Dec. 11, 1869.

Married.

June 30, 1870, in the Methodist church in Algiers, by Rev. Robert J. Harp, Rev. J. GORTON MILLER, of the Louisiana Conference, and pastor of the church at the above-named place, to Miss ALMA M. LA TOURETTE, daughter of H. S. La Tourette, Esq., of this city.

This office is the recipient of a share of the bride's cake. We utter the wish that our young friends may find in each a treasure, and that their united fortunes may be sanctified to the advancement of the Redeemer's kingdom.

On Tuesday evening, June 21, at the residence of the bride's aunt, Mrs. Jacob H. Shell, by the Rev. T. B. White, Mr. BENJAMIN HOGGARTON to Miss KATIE FOGG, eldest daughter of Caspar M. Fogg, Esq., of Philadelphia.

In New Orleans, Louisiana, July 2, 1870, by Rev. J. D. Parker, Mr. WILLIAM M. YOUNG and Miss MARY ELLEN THOMAS, step-daughter of the late John Irvine.

Also, at the same time and place, by the same, Mr. JAMES E. DUNN and Miss ANNIE E. YOUNG.

G. G. TERRELL, of Covington county, and Miss ELIZA JANE DUNN, of Simpson county, Mississippi, were united in holy matrimony, by Rev. H. P. Lewis, on the seventh of June, 1870.

May the Lord mercifully with his favor look upon them, and fill them with all spiritual blessings and grace, that they may so live together in this life that in the world to come they may have life everlasting. H. P. L.

Obituaries.

Mrs. MARTHA C. McRAE, relict of Brother Brunson McRae, died April 23, 1870, near Fayetteville, Talladega county, Alabama.

Sister McRae's maiden name was Crawford. She was born in Jasper county, Georgia, May 30, 1830. She was converted while on a visit to her native county in 1848. She joined the Methodist Episcopal Church South in Fayetteville, in 1851, of which she remained a consistent and devoted member until death.

In the death of Sister McRae the pastor has lost one of his warmest friends, the church one of its brightest ornaments. She leaves a sorrowing husband and six weeping children to mourn her loss.

"Dearest sister, thou hast left us, Here thy loss we deeply feel; But the God that hath bereft us— He can all our sorrows heal."

Yet again we hope to meet thee, When the day of life has fled; Then in heaven with joy to greet thee, Where no farewell tears are shed." E. C. O.

Died, in the city of New Orleans, March 31, 1870, Mrs. W. C. FLEMING, of Carroll parish, aged forty-five years and three months.

Mrs. Fleming joined the Methodist Church twenty-two years ago, and was a faithful and consistent member of the same from that time to the day of her death. She was a close student of the Bible and loved her church. Her house was a home for the preachers. Her seat at church was never willingly vacant. She spent much of her time in reading and secret prayer. She was a good wife and an affectionate mother, a kind neighbor and a devoted friend; lived right and died right, leaving a bright

testimony of her acceptance with God, dying perfectly happy and in her right mind. Just before her departure she called her husband to her and told him where she had put \$5, saying: "Give it to Brother M. for the widows and orphans as my last gift." This duty she had habitually discharged, year after year, during her Christian life. The church has lost one of its brightest ornaments. Her place cannot be supplied at Midway. But we sorrow not as those who have no hope.

W. G. McGAUGHEY, The Baltimore Christian Advocate will please copy.

JESSIE H. SETTLE, the subject of this memoir, was born in Sumpter district, South Carolina, May 24, 1854, and died in the town of Lexington, Holmes county, Mississippi, May 28, 1870, aged sixteen years.

Jessie was a quiet, sweet-spirited girl, retiring in her manners, never participating in the follies and amusements too common with the youth of her age. Her grave demeanor, when surrounded by her giddy and light-hearted companions, often elicited the admiration of her older friends. Her judgment in domestic matters far surpassed her age. Her habits of economy in the household, in the straitened circumstances of her family, made her a treasure to her parents. When she was thought far too weak in body and mind for such an effort, she sat up in bed, handled and disposed of all her little property, naming each article, who should have it and the use to which it should be appropriated—confining her keepsakes to some plain jewelry, etc., which could not well be appropriated to anything else; and then, as if she felt her earthly work was done, quietly laid her down to die.

In her native State she took great interest in Sunday school and church service; but she made no profession of religion until upon her dying bed, during her five months' illness, her anxiety upon this subject increased until she came to look upon death as a welcome visitor, and passed away as one who sleeps to wake again. J. D. N.

WILLIAM OWENS KEARNEY, oldest son of Colonel Walter G. Kearney, died May 11, 1870, at his father's residence, near Vernon, Madison county, Mississippi, in the fifteenth year of his age.

Very many affections were crushed, and a bright, promising future was blighted when Willie died. He was an unusually steady and intelligent and manly boy. He joined the Methodist Church when about nine years of age, and loved to attend the public service and the Sabbath school.

He was fond of study and reading. It was a matter of pleasure as well as of conscience for him to prepare his recitations perfectly. All his teachers and fellow-pupils looked for none but good lessons from Willie. He was taken sick at school, and lingered long and suffered much after he was brought home.

His conversation and conduct during his last illness betokened patient resignation, a right apprehension of religion, and a calm, satisfactory hope of salvation. He asked his father to pray for him, and joined with him in repeating the Lord's prayer. Then looking out of the window, with a face radiant with inward peace and gratitude for God's goodness, exclaimed: "What a beautiful day!"

He contemplated death with the Christian's composure, distributed his little possessions among his brothers and sisters, and requested the writer, his relation, who loved and admired him, to publish his obituary in the NEW ORLEANS CHRISTIAN ADVOCATE.

Willie was his father's pride and companion. No heart not similarly bereaved can tell what anguish his parents have felt since the death of their noble son. They have the Christian's consolation and hope. May they realize that whom the Lord loveth he chasteneth. C. G. ANDREWS.

THE ARROW TIE.

FOR HAILING COTTON THE ARROW TIE

is the most popular, being the best Cotton Tie in use.

Planters and Cotton Press men everywhere prefer it to all others.

THE ARROW TIE

was used to cover MORE THAN HALF THE CROP OF 1869, giving entire satisfaction.

The patentee and manufacturer of the celebrated ARROW TIE, J. J. McComb, formerly of New Orleans, now residing in Liverpool, having control of the best and most extensive Rolling Mills in Europe, is constantly importing large stocks of this popular Tie, manufactured of the very best quality of English iron, to meet the increasing demand for it throughout all the Cotton States.

Planters can buy or order the ARROW TIE of all dealers in Iron Ties, and of country merchants generally, at the lowest market price; and we respectfully solicit the patronage of Planters and Factors everywhere.

NEW ADVERTISEMENTS.

WALTHAM WATCHES.

The extensive use of these Watches for the last fifteen years by Railway Conductors, Engineers and Expressmen, the most exacting of watch-wearers, has thoroughly demonstrated the strength, steadiness, durability and accuracy of the Waltham Watch. To satisfy that class in all these respects is to decide the question as to the real value of these time-keepers.

More than 450,000 of these Watches are now speaking for themselves in the pockets of the people—a proof and a guarantee of their superiority over all others.

The superior organization and great extent of the Company's Works at Waltham enable them to produce Watches at a price which renders competition futile, and those who buy any other Watch merely pay from twenty-five to fifty per cent. more for their Watches than is necessary.

We are now selling Waltham Watches at less prices in greenbacks than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said.

These time-pieces combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watchmaking originating in this country or in Europe, only those were finally adopted which severe testing by the most skillful artisans in our works, and long use on the part of the public, demonstrated to be essential to correct and enduring time-keeping.

Among the many improvements we would particularize:

The invention and use of a center pinion of peculiar construction, to prevent damage to the train by the breakage of main springs, is original with the American Watch Company, who, having had the refusal of all other contrivances, adopted Fogg's Patent Pinion as being the best and faultless.

Hardened and tempered hair springs, now universally admitted by watchmakers to be the best, are used in all grades of Waltham Watches.

All Waltham Watches have dust-proof caps, protecting the movement from dust and lessening the necessity of the frequent cleaning necessary in other Watches.

Our new patent stem-winder, or keyless Watch, is already a decided success and a great improvement on any stem-winding Watch in the American market, and by far the cheapest Watch of its quality now offered to the public.

To those living in portions of the United States where watchmakers do not abound, Watches with the above mentioned improvements, which tend to insure accuracy, cleanliness, durability and convenience, must prove invaluable.

Every Watch guaranteed by the Company. To prevent imposition, buyers should see that every Watch should bear either of the following trade marks:

American Watch Co. Waltham.
Appleton, Tracy & Co. Waltham.
P. S. Bartlett. Waltham.
William Elery. Waltham.
Home Watch Co. Waltham.

For sale at retail by all respectable dealers. A descriptive circular, giving much useful information, sent to any address on application.

No Watches retailed by the Company.

Address

bearing the trade mark "AMERICAN WATCH

CO., Crescent St., Waltham, Mass." It is by

far the best Full-Plate Watch made in the

United States, and surpasses anything heretofore made in this country for Railway Engineers, Conductors, etc. ap30 3m cov r

CHILDREN TEETHING.

MR. WINSTON'S SOOTHING SYRUP.

FOR CHILDREN TEETHING.

greatly facilitates the process of teething by softening the gums, reducing all inflammation; will allay ALL PAIN and spasmodic action, and is

SURE TO REGULATE THE BOWELS.

Depend upon it, mothers, it will give rest to yourselves, and

Relief and Health to Your Infants.

We have put up and sold this article nearly thirty years, and can say in confidence and truth of it what we have never been able to say of any other medicine—NEVER HAS IT FAILED IN A SINGLE INSTANCE TO EFFECT A CURE, when timely used. Never did we know an instance of dissatisfaction by any one who used it. On the contrary, all are delighted with its operations, and speak in terms of commendation of its magical effects and medicinal virtues. We speak in this matter "WHAT WE KNOW," after years of experience, and pledge our reputation for the infallibility of what we here declare. In almost every instance where the infant is suffering from pain and exhaustion relief will be found in fifteen or twenty minutes after the Syrup is administered.

Full directions for using will accompany each bottle. Be sure to call for

"Mrs. Winslow's Soothing Syrup,"

having the fac-simile of "CURTIS & TER-

KINS" on the outside wrapper. All others are base imitations.

Sold by Druggists throughout the world.

This splendid Hair Dye is the best in the

world. Harmless, reliable, instantaneous;

does not contain lead, nor any other poison

to produce paralysis or death. Avoid the

various and deceptive preparations boasting

The Child's Corner.

THE CHILD'S PRAYER.

With eyes unraised appealing,
And eager, earnest air,
A little child was kneeling
Alone in holy prayer.

The sun was brightly shining,
The skies were clear and blue,
And while thick leaves were twining
Gay flowers in plenty grew,
And many a child was straying
Along the fresh green sod,
But the boy was softly praying
Alone—with only God.

He knew that Jesus never
Forgot his sacred word,
That by his care forever
His children's prayers are heard.
He knew the Lord could make him
His child on earth below,
And after death could take him
To his happy spirits go.
And so he knelt all lonely
To ask the God above
To make him his child only,
And keep him in his love.

He said: "Dear Jesus, hear me;
I want to follow thee—
To have thy spirit near me,
And be as I should be—
I want thy grace to hold me
In safety from all harm,
I want thy love to fold me
Within thy precious arm."
And Jesus saw him kneeling,
And heard his trustful prayer,
And answered him appealing,
And sent his Spirit there.

And so, as years were lengthened
And changing seasons smiled,
Christ in his goodness strengthened
And blessed this little child—
He made his life more holy,
And as each day went by
He kept him his child solely
Till fitted for the sky;
And there, beyond all sadness,
Safe from all earthly harms,
He'll dwell in joy and gladness,
A lamb in Jesus' arms—
For always and forever
In heaven our prayers are heard.
Surely blessed Jesus never
Forgot his sacred word.

DRIFTING.

Walter Shirley, a friend of mine, was a young man of fine personal appearance. An open countenance, a fine form and a pleasing address secured for him attention, even from strangers. He had an active mind of more than the ordinary capacity for understanding whatever he chose to learn. His easy, chatty way with his associates made him a great favorite.

Our friend Walter had but one enemy. But that was a terrible one! It was rum! From taking a little occasionally, to be social, he drank often and freely, because he loved it.

One day Walter was on board a yacht which lay at anchor about one-fourth of a mile from shore. He was alone, and had been engaged, until late in the afternoon, putting the boat in trim for an excursion party the next day. As usual, he drank freely of the spirit stored in the caddy. When his work was done he cast off the line of his dory, jumped aboard and pushed from the yacht. When fairly clear from it he looked about for his oars, but he had neglected to put them into his dory! Stupefied by rum, he made no effort to escape from his perilous situation, but lay down in the bottom of the boat and was soon sound asleep.

The tide was setting out, and a light breeze blew from the shore. The night came on—a clear, moonless, starlight night. Walter slept on while his dory, like a sea bird, rose and fell in the heavy waves far away from the land.

Having slept away his stupor, Walter awoke just after midnight. He apprehended at once his situation, for "he had come to himself." They were very sober thoughts that he had while watching for the day, which seemed long in coming! When it did come it brought little relief. The outlines of the shore were growing every moment more shadowy. He strained his eyes in vain to catch a view of an approaching light. Helpless, hungry, and full of fear, Walter felt how terrible it was to be adrift on the ocean!

The hours wore slowly away; the land had wholly disappeared; clouds overshadowed the sky, and the wind began to toss the sea into wild commotion. Walter lifted his heart to God in an earnest, sincere prayer, burying his face in his hands, and bursting into tears.

When he looked around again he felt calmer, for something whispered that God had heard. A sail appeared soon in the distance, but held on its course far to the leeward, and was in a few moments out of sight. But deliverance was at hand. A fishing vessel, bound homeward, came dashing directly upon him. Had it been an hour later he might have been run down. He was seen by the man at the helm, the boat brought to and he was taken on board.

The good-hearted sailors offered him a "doff glass" of spirit. "Not a drop," replied Walter. "That stuff set me adrift. I'm done with it forever."

Our friend kept his word. He has not been adrift since, but is a well known temperance advocate. Young readers, there is nothing like rum to set people adrift. It sets them adrift from their homes, from their friends, from the Bible and from God! When they take rum they lose oar, rudder, sail and compass. They lose all! Hunger, cold, helplessness, and a fearful looking for of darkness, storms and engulfing seas, have they who are adrift on the ocean of intemperance!

BE HONEST, CHILDREN.

I suppose some of the little boys who read this will say, when they look at the title of the piece, "That's easy enough; I am honest, I never took anything that did not belong to me in my life." Well, that is right; but there is more in being truly honest, perhaps, than you think. I will tell you a story, and then you will understand me.

In a country school—the school of which I am teacher—a large class was standing to spell. In the lesson there was a very "hard word," as the boys say. I put the word to the scholar at the head, and he missed it; I passed it to the next, and the next, and so on through the class until it came to the last scholar—the smallest of the class—and he spelled it right; at least I understood him so, and he went to the head, above seventeen boys and girls, all older than himself. I then turned and wrote the word on the blackboard, so that they might all see how it was spelled, and learn it better. But no sooner had I written it than the little boy at the head cried out, "O, I didn't say it so, Miss W—; I said it instead of i," and he went back to the foot, of his own accord, quicker than he had gone to the head. Was not he an honest boy? I should have always thought he spelled it right if he had not told me; but he was too honest to take any credit that did not belong to him.

Let me tell you another story with a like lesson. One summer day a school was out at play. There were a great many children, and the boys, some of them, had balls to play with. The boys had not much play-ground around the school house; there was only a very small yard, and all around were high brick houses. One of the little boys threw his ball, and it went straight through a window, breaking the glass, and the pieces came rattling down on the bricks. There were so many children playing that nobody knew who broke the window except the boy who did it. He did not tell any one, but he was very sorry. Directly the bell rang, and all went in. The children had not much more than taken their seats, and all was still, when the door was opened, and a lady came in who was Eddie's ball in her hand. She lived in the house where the window was broken. She was very angry, and scolded so loud and fast that the teacher could not say anything. When at last she stopped, and the teacher told her that she would inquire about it, just then Eddie raised his hand; the teacher gave him leave to speak, and he rose from his seat, and said distinctly, "I broke the window accidentally, and I am very sorry; but this afternoon I will bring the money to pay for it." Was not that an honest boy?

HOUSEKEEPERS' DEPARTMENT.

LOAF CAKE.—Three pounds of flour, one and one-half of sugar, one and one-half of butter, six eggs, one-half pint of sweet milk, one-half pint of yeast; spice to suit your taste.

GLAZING SHIRTS.—To every quart of starch add a teaspoonful of salt and one of white soap, scraped fine; boil the starch (after adding hot water) until you have it as thick as you wish.

TO FRESHEN GILT.—Alum and common salt, of each one ounce; purified niter, two ounces; water, one-quarter of a pint. This much improves the color of gilt articles, it being laid over them with a brush.

TO CLEAN PAINT.—Smear a piece of flannel in common whitening, mixed to the consistency of paste in warm water. Rub the surface to be cleaned quite briskly, and wash off with cold water. This will leave a clean and bright surface.

LOIN OF VEAL.—This is best larded. Have every joint thoroughly cut, and between each one lay a slice of salt pork; roast a fine brown, and so that the upper sides of the pork will be crisp; baste often; season with pepper; the pork will make it sufficiently salt.

SAGO JELLY.—A teaspoonful of sago, boiled in three pints and a half of water till ready. When cold, add half a pint of raspberry sirup. Pour it into a shape which has been

rinsed in cold water, and let it stand until it is sufficiently set to turn out well. When dished, pour a little cream around it, if preferred.

POTATO CAKES.—Take two pounds of very mealy potatoes, mash them very fine with a little salt, mix them with two pounds of flour, and milk enough to make this into dough, beating it up with a little yeast. Set it before the fire to rise, and when it has risen divide it into cakes the size of a muffin, and bake them.

SOUP WITHOUT MEAT.—Pare and slice four onions and eight potatoes, and put them in a kettle with six quarts of water. While they are boiling, toast a few slices of bread, which, when toasted, butter and lay in a soup dish. When the potatoes and onions are well cooked, season well with salt and pepper, pour over the toast, and serve hot.

POTATO PUDDING.—Boil three large, mealy potatoes, mash them very smoothly, with one ounce of butter, and two or three tablespoonfuls of thick cream; add three well beaten eggs, a little salt, grated nutmeg, and a tablespoonful of brown sugar. Beat all well together, and bake it in a buttered dish for half an hour. A few currants may be added to the pudding.

PUMPKIN PIE.—Here is a pumpkin or squash pie without sugar or eggs, and pronounced "fit for a king." Stew and strain the pumpkin or squash as usual, add boiling milk till it is left about one-third thicker than the ordinary preparation, then thin and sweeten with equal quantity of molasses, and bake one hour in a hot oven. Those who have always made pumpkin pies with eggs will be surprised to find how good this is without any.

ICE CREAM.—Two quarts of milk, four eggs, three-quarters of a pound of white sugar, two tablespoonfuls of maizena, and a little salt. Boil the milk with the salt for two or three minutes in a tin pail set in a kettle of water. Remove it from the fire and stir in the maizena dissolved in a little cold milk, then the sugar, and lastly the eggs. Stir it constantly for two or three minutes to keep the eggs from cooking. Add the flavoring extracts just before freezing.

TEA cannot be properly made from water that has been boiling long. Cold water must be put in the kettle, and added to the tea at the moment of ebullition, and not a second after. It might also be pointed out that the practice of measuring tea in spoons is a mistaken one, as the strength of the infusion depends on the weight; and a few larger or smaller leaves make a wonderful difference in the quantity contained in a teaspoon, and consequently in the strength of the infusion.

The Farm and Garden.

APPLES.—An eminent French physician thinks that the decrease of dyspepsia and bilious affections in Paris is owing to the increased consumption of apples, which fruit, he maintains, is an admirable prophylactic and tonic, as well as a very nourishing and easily digested article of food. The Parisians devour one hundred millions of apples every winter.

HOW TO TREAT STAKES.—Many of the stakes now used for bushes and plants in flower gardens and lawns are worth preserving from year to year, but they soon rot where they are driven into the ground. This may be obviated to a great extent, and the stakes made to last much longer by soaking the ends of them, before setting, for a few hours in strong brine.

PRUNING NEWLY SET TREES.—If shrubbery or fruit trees transplanted this season look sickly or backward in growing, prune them sharply. It is the only way to save them, their setting out and other things being duly attended to. The trees should also have the soil frequently scratched about them and watered well through the nose of the watering pot; then apply a fresh mulch.

CARROTS FOR COWS.—High authorities on the subject recommend, and even urge, the cultivation of carrots for fodder. They are excellent for cows in December, through winter and about the time they "come in." They keep up the supply of milk, when upon dry feed the cows generally fall off in their yield. The quality of butter is also improved by this. This root, moreover, contributes largely to the strength and endurance of horses, and the rapid recovery of sick ones. Its effect on the skin is good, and it is an excellent alternative for horses out of condition.

HOW TO REMOVE STUMPS.—A gentleman recently called our attention to the importance of removing stumps from fields by the use of kerosene oil. Five or ten cents' worth of oil, he says, poured on a stump, and fired, will consume it. It might be better to hack the stump on the top in one or two

places so as to give the fire a good start.

Suppose it costs twenty-five cents' worth of oil to consume a stump; it would be an advantage and profit to the farmer by giving richer land and several more hills of corn, besides making plowing much easier and being a saving of time. Try it. *Charlotte Democrat.*

TURNIPS AMONG CORN.—It is frequently the case that in passing through corn fields in autumn we find the spaces between the rows occupied with sturdy weeds; sometimes the spurious vegetation completely overtops the maize and "casts it into the shade." Now I would inquire, is it not much better and more prudent in every sense of the word for the farmer to occupy the soil monopolized by the exhausting weeds with some crop that will contribute to his resources, than to have it filled with such productions, and which will not only sap the land most wretchedly, but foul it by the dissemination of their minute and multitudinous seeds. Certainly no farmer can doubt the affirmative. By sowing the purple top turnip seed at the last dressing of the corn crop, and sending it in or sowing just before a rain and allowing that to cover it, he can have a hundred bushels of good turnips per acre, if the soil be rich and well cultivated, instead of a host of worthless and pestilent weeds.

A NEW DISCOVERY WITH CORN.—An intelligent and reliable neighbor of ours, who has for many years been making experiments with corn, has discovered an importance and value in replanted corn which is quite novel, and worthy of publication. We have always thought replanted corn was of little consequence, but this gentleman says: "It is of so much consequence, he replants whether it is needed or not—or rather he plants, two or three weeks after the crop is planted, a hill about every fifteenth row, each way." He says: "If the weather becomes dry during the filling time, the silk and tassel both become dry and dead. In this condition, if it should become seasonable, the silk revives and renews its growth, but the tassel does not recover. Then, for want of pollen, the new silk is unable to fill the office for which it was designed. The pollen from the replanted corn is then ready to supply the silk, and the filling is completed." He says nearly all the abortive ears, so common in corn crops, are caused by want of pollen, and that he has known ears to double their size in this second filling—*Exchange.*

HATH any wronged thee? Be bravely revenged: slight it, and the work's begun; forgive it, and 'tis finished; he is below himself that is not above an injury.—*Enchiridion.*

WOULDEST thou that thy flesh obey thy spirit? Then let thy spirit obey thy God. Thou must be governed that thou mayst govern.—*Augustine.*

This world cannot explain its own difficulties without the assistance of another.—*Colton.*

MODERATION is the silken string running through the pearl chain of all virtues.—*Fuller.*

BROOKS' IMPROVED PATENT WROUGHT IRON REVOLVING COTTON SCREW PRESS.

Patented by R. M. Brooks, of Georgia, April 14, 1869.

It took the first premium at the Louisiana State Fair, at New Orleans, April, 1869, over eleven competitors; also at the Tennessee State Fair, at Memphis; and more recently at the Mississippi State Fair, at Jackson; and again at the recent State Agricultural Fair, at New Orleans, April, 1870, in a contest with fourteen Cotton Presses, embracing the most approved patents from different States of the Union, North and South.

The following is the certificate of some of the principal cotton factors and merchants of New Orleans. In our circulars can be seen the certificates of practical planters and scientific artisans from several Southern States in regard to the admirable principle and practical working of this Press.

"We, the undersigned, purchased last season, from Messrs. J. B. Jennings & Co., the Brooks Revolving Cotton Screw Press, for our customers, and so far as we heard from, they have given entire satisfaction."

Moses Greenwood & Son, Warren, Crawford & Co., C. L. Walmsley, Ivey, McDaniel & Co., Frank & Danks, Campbell & Strong, Clark Bros. & Co., E. F. Galsen & Co., R. S. Walker, Violet, Black & Co., Rock Bros., Wright Allen & Co.

Circulars, giving cuts, with full description, price list, &c., sent by mail on application to J. B. JENNINGS & CO., Proprietors, 14 Union street, New Orleans.

GEORGE H. HOLZACH'S PATENTED IMPROVED MOVABLE WINDOW SHADE.

This improvement relates to a new and simple manner of so arranging window shades that light and air can be admitted into the room through the upper part of the window without raising any portion of the shade; and when the window is furnished with the combined screens its usefulness and comfort in warm weather, when a good current of fresh air is so welcome, cannot be surpassed.

BELLS—BELLS.

CHURCH BELLS. CHURCH BELLS. We are prepared to furnish Church Bells, of Steel Composition, having a rich, deep tone, at the following prices, which place it within the power of all Churches to be provided with a good Bell:

Weight.	Wt. of Bell and mountings.	Price.
28-inch Bell.	250 lbs	\$65 00
36-inch Bell.	650 lbs	135 00
40-inch Bell.	800 lbs	175 00
48-inch Bell.	1200 lbs	265 00

These Bells are warranted for one year against breakage in ordinary use.

THOS. B. BODLEY & CO.,
Tel 9 0 1 y No. 9 Perdido st., N. Orleans.

BELL—BELL—BELL.

BUCKEYE BELL FOUNDRY. Established in 1837.

VANDUZEN & TIFT,
102 and 104 East Second st., Cincinnati, Ohio.

Church, Academy, Factory, Farm, Fire-Alarm Bells, etc., made of pure Bell Metal, (copper and tin,) warranted in quality, tone, durability, etc., and mounted with our Patent Improved Rotating Hangings. Illustrated catalogues sent free.

B. J. WEST, Agent,
119 and 121 Magazine street,
New Orleans, La.

BELLS, STEEL COMPOSITION.

For Churches, Schools, Etc.

These celebrated Bells (not Cast Iron or "Amalgam") rival in purity and volume of tone those of copper and tin, are more durable, and cost only one-third as much. Send for descriptive circular.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD. NOW IN USE.

THE FASHION.

We call especial attention to this Stove, which has been produced at great expense, combining all the new and important improvements; also to the extra height of the Oven under the fire chamber, the Patent Air Chamber, Front Doors, and Patent White Enamelled Iron Knobs, the improvements in the covers and centre pieces, all of which have been covered by Letters Patent, and are used in no other Stove. They are warranted to stand fire, or others sent free of charge in all cases. We have all sizes of this justly celebrated Stove, both

PLAIN AND EXTENDED BACKS,

The Extended Back with cast Iron Enamelled Reservoir and Fancier Tin Ware Close, Gridiron Cover, etc. The part of the top supporting the Reservoir is raised so that the fire is above the top plate, instead of below, as is the case in most of the Stoves now used, and the heat is forced directly against the whole surface of the bottom of the Reservoir. The Reservoir, being detached from the pipe, can be removed at pleasure, thereby forming a six-hole Stove—the best in use, as the back holes will heat as well or better than the middle ones. For sale by

G. W. W. GOODWYN,
62 Camp street.

ALSO, THE MOST

Complete and Perfect Cooking Stove

FOR RITIMOUS COAL OR COKE

ever invented. In the estimation of all who have yet seen it. Patented in 1869.

THE MONITOR.

which can be seen at 62 Camp street. The advantages possessed by this Stove over all the other Cook Stoves are so numerous, and so patent to every sensible observer, that it is only necessary to examine it in order to be convinced of its superiority.

All of the above Stoves are fitted with extra care, Oven Doors lined with tin, and furnished with William Resor's Patent Air Chamber, sliding front doors, patent centres, covers and White Enamelled Knobs.

The operation of every Stove guaranteed. Directions for putting up and using same accompany each Stove.

G. W. W. GOODWYN,
62 Camp street,
Sole Agent for States of La. and Texas.

STOVES, GRATES AND HOUSE FURNISHING GOODS.

The undersigned would call the attention of city and country buyers of Cooking Stoves to the following list of Stoves manufactured by Mr. M. L. Filley:

The Philanthropist.

A first class Cooking stove, having all of the latest improvements that have so far been invented. Has a new arrangement for boiling, also a Ash-pan. The cooking is heavier than any Stove sold in this market. Sold under a full guarantee in every respect.

The Diamond Rock.

A Stove well known in this market. Thousands of this Stove are in constant use throughout the country, which is a very good recommendation. Sold under a full guarantee.

Besides the above named Stoves, I have on hand the celebrated Cotton Plant, Charter Oak, True Kentuckian, Maid of Orleans, Queen of the South, Delta and others, all of which I offer at a low price.

J. H. CAMPAN,
no 13 6 m 133 Poydras st., New Orleans.

THE TIMES. THE TIMES.

THE IMPROVED

LARGE OVEN COOKING STOVE.

With extended Fire Chamber and Feeder Top—one of the best Baking and most economical Stoves made.

The Flues are constructed so as to insure the most perfect draft. The heat of the Oven is so equal that when baking there is no need for removing anything until done.

THE TIMES.

is made of a superior quality of Iron, very heavy, of neat design and fine finish. The Top Plate is put together in sections, and is of the greatest expansion without cracking.

We invite the attention of Housekeepers to the advantages of this Stove. Remember, we guarantee them to give entire satisfaction. Duplicate parts can be had at all times at small cost, by which repairs can be made which will frequently save the price of a new Stove.

ZABLE & DALTON,
No. 115 Poydras street.

A SUMMER TERM OF THE

Southern Methodist High School

will commence on Monday, the fourth day of July next, school hours from eight A. M. to twelve M. Rooms remarkably cool and pleasant. The best advantages afforded. For terms, etc., consult

Dr. I. RAST, Principal.

MUSICAL INSTRUMENTS.

PHILIP WERLEIN,

Nos. 80 and 82 BARONNE STREET,

NEW ORLEANS.

Southern Depot of the celebrated and renowned

PIANOS: **ORGANS:**

Marshall & Miltner's Needham & Son's,
Dunham & Son's, Special gold Medal for
J. P. Hale's, Church, School, Lodge and Parlor.

Which are fully equal to any in the world.

MUSICAL MERCHANDISE

OF EVERY DESCRIPTION.

PIANOS TUNED, REPAIRED, RENTED,

EXCHANGED, STORED AND SHIPPED.

I desire to call your attention to the fact that I am conducting my business on the most economical principles as regards store rents and expenses, and am enabled to sell Pianos and Organs at from ten to twenty per cent. under current rates, and at bargain prices. My large stock cheerfully shown to visitors, and orders promptly filled.

J. P. HALE'S

GREAT PIANO FORTE COMPANY.

Chartered January, 1868.

We are now prepared at our NEW FACTORY, corner of Tenth avenue and Thirty-sixth street, to turn out fifty Pianos per week, from our splendid New scales, which are pronounced by the best judges to be the most powerful Square Piano that has ever been brought before the public. There is no Piano made that will stand in tune like these.

PRICES.

No. 3—Plain style \$425

No. 3 1/2—Front Round Corners, Serpentine Molding \$450

No. 4—7 Octave, four Round Corners, Serpentine Carved Legs \$500

No. 5—7 Octave, four large Round Corners \$600

This Company, believing that the public want demands

A GOOD SUBSTANTIAL

SEVEN-OCTAVE PIANO FORTE,

embracing all the modern improvements, such as a Rosewood Case, French and Action, Harp Pedal, full Iron Frame, Overstrung Bass, etc., at

PRICES WITHIN THE MEANS OF ALL

now offer such an Instrument at a price lower than any other reliable manufacturer. These Pianos are made of the best materials, with great care, and by the most skillful workmen, selected from the best factories in this and the old country, and fully warranted to stand in any climate, and to give as good satisfaction as any Pianos sold for \$1,000.

Our terms are NET CASH in New York; for by adopting such terms we are enabled to sell at low prices.

We want Five Hundred Agents and Teachers to introduce these splendid new Instruments in all parts of the Southern States. All orders must be sent direct to

THE ONLY TRUE AND PERFECT HAIR COLORER.

The Mystery, or Turner's Hair

The Christian Advocate.

SATURDAY, JULY 9, 1870.

THE SHAWLS OF CASHMERE.

There are no "camel-hair shawls," nor can I learn, by much searching of many authorities, that shawls are or ever were made of camel's hair at all.

On the highest inhabited table-land of the earth, the average height of which is about fourteen thousand feet above the level of the sea, lives and thrives the Thibet goat.

Nature has supplied this goat with a covering the warmest and softest that is known to exist; and every attempt to remove the animal from its high home has proved a failure, for nowhere else will the supply of wool remain sufficient to reward the labor of keeping. The animal has a coating of long, coarse hairs, underneath which is found the exquisitely soft substance that is almost without a name, it being too fine for hair and too straight for wool.

The fleece is conveyed from Thibet—a month's journey it reaches the vale of Cashmere—the vale of Cashmere in northern India, where the women are beautiful as no other women are, and where the men have attained to the perfection of the Asiatic physical man. Who has not heard or dreamed of this valley, where the shawls are made?

The date of the manufacture of the Cashmere shawls has not been learned, nor is it positively known of what origin the Cashmerians are. They appear to be of Hindoo descent.

Arrived in Cashmere from Thibet, the wool is carefully, slowly and patiently collected, fiber by fiber the choicest being selected for the costly shawls (probably the \$50,000 shawls).

The color is gray as received. It is bleached by the preparation of rice flour, after which it is dyed. It is then given to women, who spin it. It is estimated that one-half the weight is lost in the preparation of the article before it is woven.

The yarn is next given out to the weavers by a merchant, who enters largely into the shawl trade, and employs a number of shops in which the men work for him, or else he supplies a certain number of overseers with yarn, delivering to them at the same time instructions as to the quality, colors and patterns, and these men carry on the manufacture at their own houses with the aid of ordinary weavers. The overseers receive six or eight pice a day for their wages; common workmen from one to four, or about three and a half pence.

A remarkably fine and elaborate shawl will sometimes occupy a shop for a whole year, four persons being employed on it.

Plain and inexpensive shawls are made with a long and heavy shuttle, but the shawls of many colors and wondrous patterns are worked with wooden needles instead of a shuttle, there being a separate needle for every color, and the more tints there are in a shawl the greater is its cost. In the fine shawls scarcely a quarter of an inch is completed by three or four persons in a day.

In order to hasten the process many of the shawls are woven in separate pieces at different looms. They are so dexterously joined together as to evade ordinary scrutiny, and sometimes it is impossible to discover the junction.

One object in dividing the work upon a shawl is to avoid loss by insects and time, as it would require three years to complete certain shawls, if made entire.

The worker puts in the pattern upon the wrong side of the shawl, and, if it is new or especially difficult, an overseer directs every movement with the pattern before him.

The shawls of Cashmere are always made with both sides alike, although in the weaving one side is called the rough side.

Queen Victoria receives by treaty five Cashmere shawls each year, or did a brief time ago.

In Cashmere the shawls (not the finest, which are almost fabulous in price, and which find their way into Turkey, and seldom thence), are worth from \$500 to \$800. They pay duties at every step of the way thence, so that, arrived in London, they are worth \$2,000.

There are but few real Cashmere shawls in the United States, the articles known to commerce and republican shoulders being the French and English imitations.

The English have established manufactories at Delhi and Lahore. The labor is carried on by native Cashmerians, and although the material be quite the same, the fabrics have a coarse, degenerated appearance difficult to account for.

There is a mystery about the shawls of Cashmere.

It may be some peculiarity of the water of the wonderful valley, pouring down from the heights of mountains; it probably is the tedious process of arranging the fibers, hair by hair, just as they grew; or it may be the special education of slight enabling the workers to weave

tints separately that our blind eyes could not distinguish; or it may be many little things combined—certain it is that France, with all her proud looms, has not yet made one shawl to outvie the soft, yielding, wonderful creations which almost float out of the valley of Cashmere.—*J. Pritchard in Heath and Home.*

Loose Threads in the Scholastic Web.

Many noble ships have been lost because shiftless builders overlook unsound planks. Because of the inefficiency of teachers, the world is filled with dwarfed men. The neglect of certain departments in the early education of a boy will cripple and mar the man. It is neither a long nor a hard task to show this. Too little attention is given to the style of compositions. It is not enough that an article faultless in grammatical construction and free from misspelled words is handed to the teacher. I had rather read a badly written original essay than a faultless borrowed one. Old magazines furnish more than half of the compositions handed in for correction. Hereby is encouraged barrenness of thought. The boy grown to manhood cannot write a letter without hunting over books for choice expressions, which he neglects to mark as quotations.

I saw a very nice letter, one of the style written to make an impression, beginning with—"Friendship may live, I grant you, without being fed and cherished by correspondence; but, with that additional benefit, I am of the opinion it will look more cheerful and thrive better," etc., quoting entirely the commencement of one of Prior's letters to Sir Thomas Hamner. Then came a tit-bit from one of Sterne's gay letters, about being as "Merry and as innocent as our first parents in Paradise." After this, something from Pope, very pleasant to read.

The only merit of the letter was the ingenuity it displayed.

"He always writes just so beautifully, he is very brilliant," said the lady who received the letter. I left her to cherish the pleasant delusion; not telling her, as Lady Montague once told a young girl who was charmed by her lover's epistle, that it was stolen, showing her the sweet lines in Randolph's poems, and bringing upon the miserable plagiarist a just punishment.

Because the compositions of children are not justly attended to, ministers fall back upon their old sermons after a few years; sermons that at the start were not their own; built upon the principle, "here a little, and there a little."

One of a family of celebrated writers said, in answer to my question, "How is it that you are all gifted in writing?" "Because we were trained to it. When we were little fellows our father compelled us to write sketches, stories, anything of interest occurring during the day. We were required to note down and read aloud before the family. What seemed hard at first became our chief pleasure. If we met with no real incidents, we invented to suit our taste. If we exceeded natural limits, we were corrected. 'Be true to nature, boys,' was our daily lesson. We took delight in writing because our minds were filled with pleasant fancies. We have never been tempted to borrow imagery or glowing expressions."

The writers educated in this family take a high rank because of this originality, and are not likely to lose their popularity from poverty of style.

Teachers neglect to train the voices of their young pupils, forgetting the old adage, "As the twig is bent the tree is inclined." If teachers would be more watchful with the little lads, preventing sing-song style, drilling them into the natural, easy tone of voice, the clear enunciation, we might hope that future generations would hear less of the tiresome drawl and hum-drum delivery of the pulpit. Pay more attention to this department, and we shall have more "silver-tongued" orators.

Speech is a royal faculty; it floods the world with music and eloquence. Educate the young voices, and by-and-by will rise a race of orators who will play the magician over their audiences—who will bewitch and sway multitudes.—*John McLean in American Educational Journal.*

Falls in San Diego. A gentleman connected with the surveying party of the Memphis, El Paso and Pacific Railroad says that he recently visited a remarkable waterfall, known as the Transit Falls, on the head waters of the San Diego river. He describes these falls as being two hundred and twenty-five feet in perpendicular height; the stream, as it dashes over the precipice, being ten feet in width. The water falls the whole distance at a single leap, and presents a magnificent scene. Above the falls the stream runs for some distance through a beautiful valley. The scenery of that region is described as equaling in grandeur and beauty anything ever seen, except only that of peerless Yosemite.

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS

PUBLISHED BY

CHARLES SCRIBNER & COMPANY, 654 BROADWAY, NEW YORK.

Gay's Geographical Text-Books.

"Uncomparably superior to anything published."—*Agassiz.*

Introduction to the Study of Geography. Elementary Geography. Intermediate Geography. Common School Geography.

Gay's System is approved and indorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenney, Henry and others, celebrated in science throughout Europe as well as at home.

The first that ONE MILLION (1,000,000) copies of the books are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools in Ohio, and hundreds of schools in the other Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Gay's series has marked a new and better era in the presentation of geographical science, that by its use the pupils of this generation will obtain a clearer, more definite and exact knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvement and progress.

FELTZ'S POPULAR SCHOOL ARITHMETICS.

First Lessons, (Illustrated.) Primary Arithmetic, (Illustrated.) Intellectual Arithmetic. Intermediate Arithmetic. Grammar School Arithmetic. Practical Arithmetic.

PROF. COOLEY'S WORKS ON NATURAL SCIENCE.

MEDICINE—MEDICINE.

KOSKOO.....KOSKOO.

THE GREAT REPUTATION

which Koskoo has attained in all parts of the country

AS A GREAT AND GOOD MEDICINE,

AND THE LARGE NUMBERS OF TESTIMONIALS

which are constantly being received from physicians, and persons who have been cured by its use, is conclusive proof of its remarkable value.

As a Blood Purifier it has no Equal,

BEING POSITIVELY

THE MOST POWERFUL VEGETABLE AL-

TERATIVE YET DISCOVERED.

DISEASES OF THE BLOOD.

"The life of the flesh is in the blood," is a Scriptural maxim that science proves to be true. The people talk of bad blood as the cause of many diseases, and like many popular opinions this of bad blood is founded in truth.

The symptoms of bad blood are usually quite plain. Bad Digestion causes imperfect nutrition, and consequently the circulation is feeble; the soft tissues lose their tone and elasticity, and the tongue becomes pale, broad, and frequently covered with a pasty, white coat. This condition soon shows itself in roughness of the skin, then in eruptive and ulcerative diseases, and when long continued results in serious lesions of the Brain, Liver, Lungs or Urinary apparatus. Much, very much, suffering is caused by impure blood. It is estimated by some that one-fifth of the human family are affected with Scrofula in some form.

When the Blood is pure you are not so liable to any disease. Many impurities of the Blood arise from impure discharges of large cities. Eradicate every impurity from the fountain of life, and good spirits, fair skin and vital strength will return to you.

KOSKOO AS A LIVER INVIGORATOR

STANDS UNRIVALED.

BEING THE ONLY KNOWN MEDICINE

that efficiently stimulates and corrects the hepatic secretions and functional derangements of the Liver, without debilitating the system. While it acts freely upon the Liver, instead of copious purging it gradually changes the discharges to a perfectly natural state.

SYMPTOMS OF LIVER COMPLAINT AND OF SOME OF THOSE DISEASES PRODUCED BY IT.

A sallow or yellow color of the skin, or yellow-brown spots on the face and other parts of the body; dullness and drowsiness, sometimes headache; bitter or bad taste in the mouth; internal heat; in many cases a dry, teasing cough; listless appetite; sometimes sour stomach, with a raising of the food; a bloated or full feeling about the stomach and sides; aggravating pains in the sides, back or breast, and about the shoulders; constipation of the bowels; piles, flatulence, coldness of the extremities, etc.

KOSKOO:

is a remedy of wonderful efficacy in the cure of diseases of the Kidneys and Bladder. In these affections it is as near a specific as any remedy can be. It does its work kindly, silently and surely. The relief which it affords is both certain and perceptible.

DISEASES OF THE KIDNEYS AND BLADDER.

Persons unacquainted with the structure and functions of the Kidneys cannot estimate the importance of their healthy action. Regular and sufficient action of the Kidneys is as important, nay, even more so, than regularity of the bowels. The Kidneys remove from the blood those effete matters which, if permitted to remain, would speedily destroy life. A total suspension of the urinary discharges will occasion death in from thirty-six to forty-eight hours.

When the Urine is voided in small quantities at the time, or when there is a disposition to Urinate more frequently than natural, or when the Urine is high-colored or scalding, with weakness in the small of the back, it should not be trifled with or delayed, but Koskoo should be taken at once to remedy the difficulty before a lesion of the organs takes place. Most of the diseases of the Bladder originate from those of the Kidneys; the Urine being imperfectly secreted in the Kidneys, proves irritating to the Bladder and Urinary passages. When we recollect that medicine never reaches the Kidneys except through the general circulation of the Blood, we see how necessary it is to keep the Fountain of Life pure.

KOSKOO

Meets with great success in the cure of

DISEASES OF THE NERVOUS SYSTEM.

Almost nine-tenths of our people suffer from nervous exhaustion, and are, therefore, liable to its concomitant evils of mental depression, confused ideas, softening of the brain, insanity, and complete breaking down of the general health. Thousands are suffering today with broken-down nervous systems, and, unfortunately, tobacco, alcohol, late hours, over-work, (mental and physical), are causing diseases of the nervous system to increase at a fearful rate.

The symptoms to which diseases of the nervous system give rise may be stated as follows: A dull, heavy feeling in the head, sometimes more or less severe pain or headache; periodical headache, dizziness, noises or ringing in the head; confusion of ideas; temporary loss of memory; a sensation of spirits starting during sleep; bad dreams; fluctuation in answering questions; dullness of hearing; twitching of the face and arms, etc., which, if not promptly treated, lead to Paralysis, Deafness, Insanity, Impotency, Apoplexy, etc., etc.

KOSKOO

is not a secret mark remedy. Formulas around each bottle. Recommended by the best Physicians, eminent Divines, Editors, Druggists, Merchants, etc. The

J

NEW ORLEANS MARKETS.

From the N. O. Price Current.
The general movement has been interrupted since our last issue by the intervention of the fourth of July, on Monday, when the banks and public offices were closed, and business generally suspended, but on Saturday and Sunday about the usual limited summer business was done in the general market, without any marked change in prices in any department. Sugar has continued in steady request, and commanded full prices, and Western produce has exhibited no material change.

The accounts from the country are rather less discouraging. From some points they are quite favorable, but from others we hear of continued heavy showers, and in others again the planters are making vigorous efforts to clear out the grass, and give the crop the full benefit of a more auspicious spell. The fields which have been thrown off or plowed up are, of course, gone, but with a fair supply of labor to thoroughly cultivate the remainder, it may yield as much as the whole would have done under slovenly tillage. It is a common saying that July makes the crop, and a few weeks more will afford a reasonable basis for determining whether there will probably be any general increase on last year's yield, and if so, to what extent. The accounts of cane continue encouraging.

The river is six feet eight inches below high water mark.

COTTON.—The following are the arrivals since the first instant:

Louisiana and Mississippi bales	1719
Mobile	52
Texas	3
Florida	32
Texas	27
Total	1833

On Saturday, under the depressing influence of a decline of 1-16d at Liverpool, and an unfavorable course of exchange, the demand was slack, and the sales were confined to 1,650 bales, at easier prices, requiring a partial reduction of 1/8c. in quotations. On Monday, the fourth, business was generally suspended, but a few buyers came forward and took 500 bales, at easier prices. On Tuesday the market opened with only a limited inquiry, and that mostly from buyers who were looking around for clean white cottons, which were scarce; but later in the day, on factors showing a disposition to meet the demand at further concessions, the demand revived, and 1,800 bales changed hands, at an average decline of 1/8c. to 1/4c. from Saturday's figures, and fully 1/4c. below Friday's. At the same time there was so little competition among buyers that sales could not be forced unless at still lower rates.

This makes an aggregate for the past three days of 3,450 bales. The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 1,121,780 bales, against 792,552 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 761,542 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 419,471 bales to Great Britain, of 113,483 to France, and of 112,387 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	14 to 15
Good ordinary	16 to 17
Low middling	17 to 18
Middling	18 to 19
Strict middling	19 to 20

Stock on hand Sept. 1, 1869, bales	770
Arrived past three days	1833
Arrived previously	1184209-1186042
1186312	
Exported past three days	4045
Exported previously	1117111
1137-1122473	
64339	

MOLASSES.—The supplies are light, and are selling readily, as received, at 25 to 55c. for inferior and common Louisiana, and 60 to 75c. for prime fermenting.

FLOUR.—The market has continued dull since our last issue, and prices have ruled lower.

SUGAR.—The market continues firm, with light supplies and a good demand, and we quote: 9 1/4 to 10c. per pound for common to good common, 10 1/4 to 10 1/2c. for fair to good fair, and 11 to 11 1/2c. for fully fair.

MONEY.—Gold, 111 to 111 1/2. American silver half dollars, 108 to 108 1/2. Mexican dollars at 3 per cent. premium in gold.

Nothing has been reported in bonds, except \$5,000 Consolidated City, on Tuesday, at 77 1/2.

City Treasury notes, 13 to 15 percent discount.

CATTLE MARKET.

NEW ORLEANS, July 5, 1870.

Special Notices.

WETUMPKA DISTRICT MEETING.

The District Conference for the Wetumpka district, Alabama Conference, will convene at Lowndesboro, Alabama, on Wednesday night before the fifth Sunday in July. The opening sermon on Wednesday night, by Rev. Robert S. Woodward, Pastors and delegates are earnestly solicited to be present at the opening of the session. Agents and other visiting brethren who expect to attend will please so inform Rev. S. A. Pilley, at Lowndesboro. Ample entertainment will be afforded.

W. M. S. TURNER, P. E.

DEMOPOLIS DISTRICT MEETING.

The District Meeting for the Demopolis district, Mobile Conference, will be held at the church near Lower Pond Tree Landing, on the Alabama river, commencing on Thursday, July 28. The official members of the church throughout the whole district are members of the District Conference, and are expected to be in attendance. The camp meeting for the same circuit, and in the immediate vicinity, will commence on Friday evening, the twenty-ninth—the day after—and will continue, in all probability, most of the next week.

A. H. MITCHELL.

JACKSON DISTRICT MEETING.

The District Conference for the Jackson district of the Mississippi Annual Conference will be held in Canton, beginning on Thursday, July 28, 1870. It is the duty of all the official members of the church in the district to attend, and the public are invited. Besides the usual public services, a number of essays on various subjects may be expected. Bishop Keener is expected to preside.

R. ABBEY, P. E.

STARKVILLE DISTRICT MEETING.

The Starkville District Meeting, North Mississippi Conference, will be held at Starkville, commencing on Thursday night, July 28, 1870. Bishop Paine will be with us. We invite brethren from other districts and conferences to attend. Brother K. A. Jones is at Starkville, and will receive all brethren and appoint them their homes.

F. M. FEATHERSTON, P. E.

BROOKHAVEN DISTRICT MEETING.

The ministers and members of the Brookhaven District Conference will please note that, owing to the failure to procure the presence of a Bishop at the time before specified, I have, at the earnest solicitation of a number of the brethren, concluded to defer the time of the conference till Wednesday, July 27, to embrace the fifth Sunday. It will meet in Brookhaven. We expect Bishop Keener to preside. Brethren will remember that all members of Quarterly Conferences are entitled to membership in the District Conference.

G. F. THOMPSON, P. E.

LAFAYETTE DISTRICT MEETING.

The District Meeting for the Lafayette district, Montgomery Conference, will be held at Lineville, Alabama, commencing on Thursday, July 14. All the members are requested to attend punctually. We hope to be favored with the presence of one of our Bishops.

F. L. B. SHAYER, P. E.

MERIDIAN DISTRICT MEETING.

The District Conference for Meridian district, Mobile Conference, will be held at Belmont, Alabama, August 11-14. A full attendance is requested.

J. T. HEARD, P. E.

Union Springs District Conference.

The Union Springs District Conference of the Alabama Conference will convene in Greenville, Alabama, Wednesday, July 27. Opening sermon on Wednesday night, by Rev. August Dowling.

J. W. SMOLES, P. E.

NOTICE.

To the Preachers of the Fourth Year, and Committee of Examination for the same, South Alabama Conference:

DEAR BROTHERS—The Conference year having so far advanced, you will be examined on the studies of the old course.

For mutual convenience I have taken the liberty to make the following distribution of labor among the members of the Committee of Examination, viz:

The Bible, generally, etc.; Powell on Succession; Whiteley's Logic—William Shapard.

Wesley's Sermons, vol. 4; Rivers' Elements of Moral Philosophy; Watson's Institutes, part I—E. M.monds. Discipline; Hymn Book; Ruter's Church History; Essay or Sermon—J. BANCROFT, Chairman.

SUNDAY SCHOOL INSTITUTE.

MONTGOMERY DISTRICT, ALABAMA CONFERENCE.—The third annual session of the Sunday School Institute for the Montgomery district, Alabama Conference, will commence on Thursday before the last Sabbath in July—the twenty-eighth—and include the Sabbath. A full attendance of the superintendents, teachers, preachers in charge and Sunday school workers is earnestly requested. A programme of the exercises and the place of meeting will soon be published by the Executive Committee.

O. D. SMITH, Secy.

Macon District, Mobile Conference.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, JULY 16, 1870.

NO. 26.

NEWS OF THE WEEK.

DOMESTIC.

New York, July 11.—A special to the Herald, dated London, tenth instant, says: Military operations were going on all last night in Paris. If the candidature of Prince Leopold is not withdrawn within the next twenty-four hours, the French ministers will be recalled from Berlin and Madrid, and war be declared. The conduct of France in forcing the issue, and refusing to leave the question of the Spanish throne to the people of Spain, is strongly condemned by all Europe, and Prussia's calm and dignified position approved.

New York, July 12.—A serious riot occurred to-day between the whites and blacks in the Eighth Ward. The police for a time were beaten off, but finally arrested the ringleaders. None killed.

New York, July 12.—Six vessels now at quarantine with yellow fever aboard.

Richmond, July 12.—To-night, at eight o'clock, an excursion train on the Richmond and Fredericksburg railroad, having on board the Sunday school of the Union Station Methodist Church, returning to this city from a picnic at Ashland, was thrown down the embankment, twelve miles from the city, by a tree which had blown across the track. Four cars, engine and tender were smashed. Douglas McClelland was instantly killed, John Clark had both legs torn off and a number of others were slightly wounded. The track was torn up for a limited distance. It will be repaired to-morrow morning, in time for the through Southern mail (which was delayed to-night) to go on.

Richmond, Va., July 12.—Last night, while twenty convicts from the State prison, who had been at work on the Chesapeake and Ohio railroad, were being marched to their cabins, one of them wrested a gun from one of the guards named Schwartz and shot him dead. A fight ensued between the guard and convicts, in which several of the latter were wounded. Only three convicts made their escape.

Warrenton, Va., July 12.—The Educational Convention, composed of teachers, professors and presidents of colleges and universities of the State of Virginia, convened here to-night. They held a preliminary meeting and adjourned over till morning.

Key West, Fla., July 12.—The ship *Neonatus*, from New Orleans to Liverpool, which was aground on Maryland Reef, got off, leaking badly, after discharging one hundred and twenty-nine bales of cotton.

New York, July 13, 1 P. M.—The cotton market is firm to-day. Sales for all this month are reported at 183.

Gold is active and feverish at 121. At the sale of government gold to-day, \$1,000,000 were awarded at 121 1/2-100.

Sterling has declined. Seligman & Co. are selling 60 day bills on London at 97.

Advices from Liverpool report cotton steady, and political affairs there.

I have information that the funding bill will pass, and the President will sign it.

FOREIGN.

It is estimated in well informed circles that, in answer to France, Prussia makes the following points:

1. Disclaiming all participation in the candidature of Prince of Hohenzollern.
2. That the Prince of Hohenzollern is not even a relation of the royal family of Prussia; and
3. That General Prim negotiated with the Prince of Hohenzollern, and he must be responsible, not Prussia.

It is almost certain this answer is not satisfactory to France, and the Duke Gramont has forwarded another dispatch to Berlin.

Paris, July 9, 8 P. M.—Two divisions of the army of Paris have been ordered to Chalons.

Madrid, July 9.—The *Epoca* of to-day says: "The dignity of Spain is yet safe. The cabinet alone is compromised. There is time yet for the ministers to listen to the voice of Europe, and stop in their perilous course."

Paris, July 9.—At a meeting of the diplomatic corps in this city, last evening, Duke de Gramont, who was present, said: While remaining within the limits of moderation, France would abandon none of her legitimate pretensions. He hoped that the collective efforts of the great powers of Europe would preserve peace, but France was decided not to depart from the line of conduct traced at first.

The *Moniteur*, the ministerial journal, says the abandonment of the Hohenzollern project is not enough now; she should demand the fulfillment of the treaty of Prague.

Berlin, July 9.—Baron Werther, minister of Prussia to France, has not been recalled.

In official circles here the situation is thought to be free from danger.

Bismarck is unimpaired in the Hohenzollern affair, Napoleon's attempt to hold him responsible is regarded as a pretext.

Paris, July 9, 10 P. M.—Duke de Gramont, minister of foreign affairs, announced to-day he had at last heard from Prussia. Count Benedetti, French minister at Berlin, informed the home government that he had an interview with King William at four o'clock this afternoon. The result of the interview, the Duke says, will be made known to the chamber on Monday.

The *Moniteur*, ministerial journal, in its issue this evening, says: "The abandonment of the Hohenzollern project on the part of Prussia is not enough now. France must prevent a recommencement of similar projects, and on the part of Prussia, demand an entire fulfillment of the treaty of Prague, namely: Liberty of South Germany, the evacuation of the Fortress of Mayence, the renunciation of military influence beyond the Main and the settlement of the Schleswig-Holstein question with Denmark."

London, July 9.—The following facts, rumors and additional opinions were gathered from many sources by telegraph to-day:

The North German Berlin Gazette, in its leading article to-day, says: "The French press is impudent and wild on the action taken by Prussia on the Spanish question. The selection of the Prince of Hohenzollern depends solely on the Spanish Cortes, and not on the wishes of foreign powers."

Paris is considerably excited to-day by the rumors that Prussia is actively arming at all the Baltic ports. The corps d'armee now operating against the rebels in Algeria, under General Wimpfen, has been recalled.

The *Gazette de France* (Paris) says: "Duke de Gramont's declaration in the Corps Legislatif recently in the equivalent to the French ultimatum. The present situation is the result of Bismarck's intrigues."

The *Journal des Debats* (Paris) says: "The policy of the French government on the Spanish question threatens to make all Spaniards unite on Prince of Hohenzollern."

Prime Minister Olivier yesterday assured the French Senate that the offer of the Spanish crown to a Prussian was the act of General Prim, and was not binding on the Spanish government.

The Paris bourse opened excited this morning. Rentes 70.25, or 25c. lower than the closing figures of last night.

The French minister of war has issued an order to all generals commanding, requiring them to report to the war office immediately the condition of the troops, arsenals, ammunition, etc., in their respective departments.

Later.—The excitement on the streets is increasing, and the bourse

is very much excited, rates declining. Last sales, sixty-nine francs and fifty centimes, or seventy-five centimes below the opening quotations and sixty-seven centimes lower than any figures made during the crisis here.

There is great activity at Toulon and other French ports on the Mediterranean, and a large number of transports are being fitted out to bring home the entire French army now at Algeria.

Paris, July 9.—Circulars have been issued recalling commandants and all officers and soldiers who are absent on furlough.

Large quantities of powder and war stores of all kinds are being conveyed to strongholds on the eastern frontier.

The government authorities of France have in their possession plans of all the fortresses, roads, canals and other public works in Prussia.

The government has taken measures to put the Garde Nationale and Garde Mobile on a war footing. Agents of the French government are now in Hungary purchasing horses and hay for the cavalry service.

The bourse is still excited, but closed at three P. M. a shade firmer. Rentes 69.52.

London, July 11.—The prevailing panic is attributed to the approaching settlement of political questions, and fears and entreaties that bankers will contract accommodations.

Dispatches from various European capitals this morning report the excitement increasing, particularly in moneyed circles. All sorts of securities have declined heavily.

The London Telegraph says: "Moneyed men known to be in Napoleon's confidence are heavy sellers of securities."

The London Times says: It is still possible to look calmly at the future, and diplomats must seek to impress France with the extravagance of her pretensions and susceptibilities in the absence of real danger. A similar jealousy passed without collision in 1858. The question of the balance of European power involved is undeserving of a thought. The real issue is the possession of the Rhine's left bank, and the contest when begun will last until the valor of the other is exhausted. Civilization has everything to lose in such a contest, and France is evidently in the wrong."

After further argument indicating Spain's right to choose her king, the Thunderer says: Neutral powers must act instantly and firmly to prevent collision.

The same edition of the Times, however, deprecates the probable injury to France by the enthronement of Hohenzollern.

London, July 11, Noon.—A panic prevails here and at Liverpool. Consols 92 1/2; 5 1/2 of 1862 heavy at 87 1/2; rosin firmer; turpentine dull and heavy.

Paris, July 11.—The *Moniteur* announces that it will no longer give publicity to the movements of troops.

Prussia's answer is still momentarily expected.

The Journal says in case of war the emperor will command in person, with the prince imperial on his staff.

The feeling is quieter, both here and at Paris, and the impression is gaining ground that the question between Prussia and France will be settled without resorting to extreme measures. Securities have advanced several per cent. since morning. The tendency is still upward.

American 6 1/2's, which were 86 1/2 at one o'clock, have just closed at 88 1/2. Other funds have advanced proportionally.

Much bitter feeling prevails at Paris.

On the bourse, at two o'clock, Rentes were 69 1/4, a very decided advance.

Madrid, July 11.—The Regency reiterates its declaration that its course was dictated by no hostility to France. Republican journals say the only solution of their troubles is the immediate declaration of a republic.

Berlin, July 11.—The North German Parliament has been summoned to answer France.

The reports of naval preparations on the part of Prussia are untrue.

The semi-official journal says: France still persists in the insult to Prussia by holding Prussia responsible for Hohenzollern's candidature.

Paris, July 11.—The strike at Mulhouse continues; sixteen thousand workmen are involved.

Rome, July 11.—The Holy Father has exercised no coercive pressure upon the infallibility dogma. The Journal di Roma says he has only shown patience and forbearance.

Madrid, July 11.—It is stated that Marshal Serrano told the French minister that he avoids all interferences with candidatures, lest it should be said that he desired the continuation of the Regency. In the Hohenzollern case he had acted as in all previous candidatures.

London, July 11.—In the House of Lords the Earl Granville said that France having announced her determination to resist in relation to the Prince of Hohenzollern, the queen's government, in conjunction with others, are using every means to preserve peace.

Paris, July 11, 2 P. M.—Bourse now firmer; Rentes 69.40.

London, July 11.—In House of Commons to-day Gladstone said Hohenzollern's nomination had taken the English government by surprise. France had threatened to proceed to extremities. Should France persist, her majesty's government would exhaust every means to prevent war upon a case so little warranting it.

London, July 11.—The Pall Mall Gazette thinks the case is complicated by the awkward consequences of Olivier's declaration to the Corps Legislatif of what France would and would not endure in regard to the nomination of Prince Leopold. It is difficult now for Prussia to withdraw or modify her policy.

Paris, July 11.—The *Gazette* says: The horses of the emperor have been sent to the frontier. It is asserted that France will not consent to a congress of the powers until Prussia has yielded on the question of Prince Leopold's candidature.

It is reported that a telegraphic dispatch which was yesterday sent from Ems to the emperor by Count Benedetti, was so altered by Prussian telegraphers that little of it could be deciphered. The only part which could be understood was to the effect that Prince Leopold had received the consent of the King of Prussia to his acceptance of General Prim's offer.

Prince Leopold is at Ems, and assists in councils held there by the king and his ministers.

Paul Darcourt left for Ems last night with the latest instructions for Minister Benedetti.

Count Benedetti complains of articles in the Constitutionnel.

It is claimed that the Dances are enthusiastically in favor of war against Prussia.

PLYMOUTH, ENG., July 11.—Several Prussian iron-clads, recently riding at anchor in this port, were ordered to the Baltic yesterday. These orders were countermanded to-day, and the vessels sail toward Cherbourg.

London, July 12.—Nothing complimentary of the recently reported Chinese massacre has been received, though late dates have come to hand. The report is, consequently, believed to be a hoax.

Paris, July 12.—The feeling to-day is quieter, though the bourse at midnight last night continued excited; Rentes 69.25.

The emperor has arrived at the Tuilleries.

The Prussian ambassador has returned from Ems.

Olivier declines to receive as a gauge of peace the king's withdrawal of his sanction to the Hohenzollern candidature, unless he does it as the King of Prussia, instead of as the head of the family.

London, July 12.—The Telegraph says: Were Prussia to reply precisely as France requires it would not guarantee peace.

Paris, July 12.—Michelet, in the *Rapporteur*, to-day, says: "The plebiscite means peace, and pleading for peace," and says if it is doubted let the vote be repeated.

The Spaniards are apparently unconcerned about the situation of affairs.

The position of Italy is uncertain. Prussia will establish an entrenched camp of twenty-five thousand men at Larrache.

CHEROKEE, July 12.—All the war vessels in the harbor have their fires kept up.

Paris, July 12.—The evening journals say the first Prussian army corps has been ordered to march on the frontiers on the Rhine.

A letter from General Prim, dated the eighth instant, says: "I never supposed that France could be so impressed in this matter, but Spain cannot without shame draw back; so, *En avant, et vive Espagne*."

It is stated the Orleans princes are active in Hohenzollern's candidature.

Paris, July 12, 2 o'clock P. M.—It is reported the Spanish question has been amicably adjusted. Bourse active. Rentes 70 and 55.

Paris, July 12.—The news that the difficulty with Prussia had been settled was founded upon an announcement that the father of Prince of Hohenzollern would refuse the crown for his son, even if elected by the Spanish people.

Minister Olivier, Duke de Gramont and the Prussian minister conferred this afternoon.

It was expected that the government would make another declaration to-day, as all the diplomats were invited to the chambers.

After the interview M. Olivier replied to the interpellation that information would be given at the proper time.

The panic on the bourse to-day was caused by the forced sales of speculators.

The Parisian journals have reports of immense movements of German troops toward the frontier. The roads are encumbered with men and wagons.

It is reliably stated that relays of transportation have been so arranged that thirty-five thousand infantry and five thousand cavalry can reach the frontier in one day.

Drilling and artillery practice is going on throughout Prussia.

It is stated an envoy has been to Vienna to propose an offensive and defensive alliance between France and Austria.

Austria's answer has not yet been published.

London, July 12.—There is no doubt that Prussian troops are concentrating at Baden and Mayence.

Paris, July 12.—The correspondent of the Pall Mall Gazette says that many news dispatches from Paris to the United States have been delayed and altered because they contained details of preparations for war. The Pall Mall Gazette reproduces the report of the *Gazette* that the emperor's horses, after a special training to accustom them to artillery fire, had been sent to the frontier.

Deputy Gambetta intends to make speeches in the corps in which he will demand that the government insist on the fulfillment of the treaty of Prague. Arago will oppose in the interest of peace.

Florence, July 12.—In the chamber of deputies yesterday Minister Verast, on being questioned on the general situation of Europe, the Spanish question and the relations of Italy thereto, said the Italian government co-operated with other powers in their efforts to maintain peace, but he declined to make any further explanations. He was still hopeful, however, of a favorable result of the endeavors of the powers.

London, July 12, 9 P. M.—A rumor is current that Hohenzollern has withdrawn from the candidature.

ASPINWALL, July 12.—The steamer *Ecuador* was lost near Lupe, by her boiler exploding. Seven persons were lost. The smallpox is spreading at Valparaiso.

PARIS, July 13.—The Constitutionnel, ministerial organ, says: The government of France has testimony that the candidature of Prince Hohenzollern has been withdrawn, and the peace of Europe will not be disturbed. We are satisfied that Hohenzollern will not reign in Spain. We demand nothing more, and rejoice at this pacific solution.

BRUSSELS, July 13, 10 A. M.—Warlike preparations continue in France, notwithstanding the withdrawal of Prince Leopold, and there is universal fear of war.

BERLIN, July 13.—The *Kreuz Gazette* says: Germany indignantly repels the measureless arrogance of France. Prince Leopold renounces the candidature because he is unable to reconcile the character of German soldiers with action involving Germany and Spain in war.

Bismarck is here.

Paris, July 13.—A questionable dispatch from Dusseldorf this morning says: Leopold accepts the Spanish crown on condition of an immediate declaration of war against France should the latter attack Germany.

London, July 13, Noon.—The government nearly monopolizes the cables leading to the continent with dispatches on the Spanish question; consequently business dispatches are delayed, and the transmission of private European war items compels the omission of much interesting matter.

London, July 13.—Measures are afoot to detect and punish the author of the Chinese massacre hoax.

CONSTANTINOPLE, July 13.—Another disastrous fire occurred here to-day, destroying over fifteen hundred houses, mostly occupied by the poorer classes.

PARIS, July 13, Evening.—The papers report that the ministers have all resigned.

VIENNA, July 13.—The papers denounce Prussia's arrogance, and invoke the mediation of England to prevent war.

London, July 13.—Paris telegrams show insecurity and distrust prevail. Troops are still moving to the frontier. Notwithstanding Prince Hohenzollern's withdrawal, there is no abatement of military activity throughout France.

Belgium is preparing for warlike contingencies. All furloughs have been withdrawn and troops have been ordered to the frontier, with orders to destroy telegraphs and railroads in case of an invasion.

PARIS, July 13.—The tone of the Constitutionnel is pacific, but the other journals are filled with warlike preparations.

The bourse to-night is agitated, Rentes falling to 69.75.

KNOWLEDGE UNDER DIFFICULTIES.

Mr. Lewis B. Carl, the young man who delivered the Latin salutatory and carried away the second honor at the Columbia College on Wednesday, deserves more than passing comment. Mr. Carl was born blind, and has always been so. When quite young he entered the institution for the education of the blind in New York, and graduated after studying there seven years. He then determined to take a collegiate course and entered Fairchild's Institution, Flushing, on Wednesday he graduated at Columbia College, as stated, receiving one of the highest honors of the institution.

Mr. Carl has labored under many difficulties in the pursuit of his studies, and not the least of which was being guided to and from college. He was compelled to hire a boy to do this, and to do so, the expense was of no small moment. One entire year he was unable to afford this, and consequently he was compelled to intern one year in college, which his friends claim, lost to him the first honor at the recent commencement.

An original method was adopted by Mr. Carl in gaining a knowledge of his studies. As the text books used in college are not prepared for blind, the lesson would be repeated to him, and he would, by a system of characters—his own—pick it out with a smallawl on the back of a sheet of paper. From one to six dots were used in the formation of each letter. Greek characters were more difficult; but Greek, as well as all the studies required, were mastered by his indomitable perseverance. Probably no student has graduated for years from Columbia College who is so well prepared to teach the profession which he has adopted. —*New York Standard*, July 2.

EXPERIMENTAL EVIDENCE.—An admirable defense of the doctrine of plenary inspiration is contained in the reply of a woman in Turin, who had a present of the Bible, and was reading it when a priest, passing by, asked her what she was reading. She told him, and he demanded of her how she knew it came from God. She replied: "God told her so." He replied: "Ah, you have seen God?" She said, looking up: "How do you know that that is the sun?" He replied: "If enlightens and warms me." "Ah, yes," she said, "so I know the Bible is from God; it enlightens and warms this heart."

AS FLOWERS never put on their best clothes for Sunday, but wear their spotless raiment and exhale their odor every day, so let your Christian life, free from stain, ever give forth the fragrance of the love of God.

The fireside is a school of infinite importance; it is important because it is universal, and because the education it bestows, being woven in with the woof of childhood, gives form and color to the whole texture of life.

The mind is heaven-born, and comes immediately out of the hands of God; so that, to speak properly, we are nearer related to the Supreme Being than to father and mother. —*Collier*.

Labour to keep alive in your breast that little spark of celestial fire, called conscience. —*Washington*.

The Christian Advocate.

SATURDAY, JULY 16, 1870.

THE IMAGINATION LANE.

There are brighter skies than these, I know—
Lands where no shadows lie—
Fields where immortal flowers bloom,
And fountains that are never dry;
There are domes where the stars are never dim.

Where the moon forever gleams,
And the music breath of the radiant hills
Sweeps o'er the crystal streams;
For often I've caught, in the time of sleep,
A gorgeous glimpse of this hidden deep,
Away in the land of dreams.

When night lets down her pall of mist
On slender cords of air,
And the purple shadows of dying day
Are teeming everywhere;
While unseen fairies chant a lay
In the lily's crimson cells,
And the solemn voice of the harmless winds
Breaks up the dreary still,
I know, by the cry of my soul within,
There's a place where they shut the gates of
Heaven,
And the God of glory dwells.

The wall of the wind, the river's voice,
The arch of western hill,
The beauty spread o'er the living earth,
In shimmering twilight still;
The yearnings of each human heart
For a better, better clime—
A higher life than this mortal course,
Bearing the seal divine!
Ah! sure there must be a beautiful land,
Where the white-robed millions ransomed
From the dark, dark, dark, dark,
Are changing their songs sublime.

PRAYER FOR THE MINISTRY.

There is nothing more certain
than that God has made it as much
the duty of the laity to pray as he
has made it the duty of the minis-
try to preach.

Pray for their call to preach. Said
the "Shepherd and Bishop of Souls,"
"Pray ye, therefore, the Lord of the
harvest that he will send forth lab-
orers into his harvest." If we are
not mistaken, prayer for men to be
called and qualified for the ministry
used to form a larger element in the
prayers of the church than now.
Why so? Is there less need? The
complaint of a want of ministers
comes up from every point of the
compass. The increase of popula-
tion makes an ever increasing de-
mand for ministers. The church
must "pray without ceasing" for
men to be called to the holy work.
Our old men are passing away.
Pray that their mantles may fall
upon worthy shoulders—that the
ranks of the militant host may be
filled with such as shall "urge the
restless strife."

The great Apostle to the Gen-
tiles, who was skilled in the learn-
ing of the Greeks—brought up at
the feet of Gamaliel, extraordinarily
called by the Lord Jesus, inspired
by the Holy Ghost, empowered to
work miracles, and caught up into
the third heaven—said: "Pray for
us." All ministers need the pray-
ers of the church.

In the Epistle to the Romans Paul
says to his brethren: "I beseech
you, brethren, that ye strive with
me, in your prayers to God for me,
that I may be delivered from them
that believe not in Judea." He an-
ticipated what afterward befell him
when the mob rose and sought his
life. But prayer was answered, and
he was delivered from them that be-
lieved not in Judea.

In his Epistle to the Ephesians
he exhorts them to pray for him,
that utterance might be given unto
him, that he might open his mouth
boldly to make known the mystery
of the gospel. To preach in those
perilous times was to hazard one's
life, and demanded no small meas-
ure of boldness.

In his Epistle to the Colossians
he exhorts them to continue in
prayer, that a door of utterance
might be opened unto the ministry.
In those pagan and persecuting
times the way of the gospel was
often shut up and hindered. Paul
longed to bear to distant lands and
strange nationalities the tidings of
the Saviour's love. He wished the
way opened for progress and ac-
cess.

In his Epistle to the Thessaloni-
ans he asks them to pray that the
word of the Lord may have free
course, or may run and have free
course—like one contending for the
prize at the Olympic games might
have free course, win the prize and
be glorified. Prayer in the congre-
gation is like the plow pulverizing
the soil and preparing it for the
good seed; otherwise it falls on full of food for head and heart,

hard, unbroken soil, like the trod-
den wayside, and is devoured by the
fowls of the air.

Prayer in the congregation sets
the moral atmosphere ablaze, and
when the holy archer draws his
bow the arrows, on their way to
the sinner's heart, take fire in their
flight, and bring many wounded and
weeping to the cross. When the
air of God's house is all aglow with
the spirit of prayer the minister
feels that he has an unction from
the Holy One. He rejoices as a
strong man to run a race, and ex-
claims: "The Lord of hosts is with
us! The God of Jacob is our refu-
ge." It is an easy, a delightful, a
soul-refreshing work to preach to
such a congregation. The sword of
the Spirit then is of double edge
and heavenly temper, keen, and
many are the slain of the Lord. All
faithful ministers unite to say: "Pray
for us." W.

TUSKEGEE FEMALE COLLEGE.

MR. EDITOR: This institution has
just closed its fifteenth session, and
one of the most successful in its
history. As the undersigned was
the only member present of the
committee appointed by the Mont-
gomery Conference, at its last ses-
sion, to attend the annual examina-
tion, I ask space in your columns
for this report.

Tuskegee Female College is lo-
cated at Tuskegee, Macon county,
Alabama, near the Montgomery and
West Point railroad. No city in the
South offers greater advantages as
an educational center. A healthy
atmosphere; the abode of good
morals, cultivated taste and ele-
gance; off the great thoroughfare a
few miles, yet of easy access—every-
thing is here that is necessary to a
vigorous and healthful development
of the physical, intellectual and
moral faculties.

The college is still under the direc-
tion of Rev. G. W. F. Price, assist-
ed, during the last term, by eight
thoroughly educated, experienced
teachers. These will be retained,
and to their number will be added
Rev. B. B. Ross, of the Alabama
Conference, and Miss Shelley, of
Talladega. Nothing more is neces-
sary to give satisfaction to all who
know these last named parties than
to announce them in connection with
the corps of teachers.

During the last session the ma-
triculars were one hundred and
seventy. The health of the pupils
has been remarkably good, and the
order excellent. No serious case
of discipline during the year. Val-
uable additions have been made to
the chemical and philosophical ap-
paratus, and the pianos have re-
cently been refitted. The curricu-
lum embraces all the elements of a
liberal education. The boarding de-
partment has been well managed.
Physical training, on scientific prin-
ciples, will hereafter form an im-
portant feature in the college course.

The examination began on the
thirteenth of June, and continued
to the twenty-third. It was thor-
ough and satisfactory. Both teach-
ers and pupils had done their duty.
One feature in the course of instruc-
tion struck me as peculiarly interest-
ing and important in female educa-
tion—the extensive and thorough
literary culture bestowed. Special
emphasis is laid upon this. The
course embraces the English classics,
from Chaucer to the close of the
Elizabethan period. The criticisms
of the pupils upon these great au-
thors showed that their acquaintance
with them was extensive, and that
their contact with them had been
most pleasant and profitable. If a
young lady has any literary taste,
this course of training will develop
and purify it; if a spark of genius,
it will kindle it. Special care is be-
stowed also upon the natural sci-
ences. The facility with which the
classes handled the apparatus, and
performed, in the presence of a large
audience, the various illustrative ex-
periments, showed that they had
been instructed practically as well
as theoretically.

The commencement sermon was
preached by Rev. Jesse Boring, M.
D., of the North Georgia Confer-
ence. It was a good gospel sermon,
good seed; otherwise it falls on full of food for head and heart,

wholly appropriate to the occasion,
and would have been equally appro-
priate in a camp meeting pulpit. It
was good to be there.

The art exhibition, on Tuesday
night, was a complete success. While
the specimens generally were highly
creditable, some of the paintings
manifested a very high order of
talent. On Wednesday the literary
address was delivered by Colonel W.
H. Chambers, of Russell county,
and fully met the high expectations
of the audience. Thursday was
commencement. Sixteen young lad-
ies received diplomas—sixteen edu-
cated females, radiant in all the
loveliness of youth, and "polished
after the similitude of a palace,"
were sent out to carry the rays of
scientific and moral truth into the
home sanctuary and into society.
What good may they not accom-
plish? Not least among those who
are working out the redemption of
society is the successful female edu-
cator. And if the modesty of Pres-
ident Price will not be offended, I
will here record the verdict long
since rendered by all who know him,
that among successful educators of
females he stands prominently in
the front rank.

I will say to all who have daugh-
ters to educate, that I know not
where they can do better than to
place them in the Tuskegee Female
College. The next session will open
on the fifteenth of September.
E. S. SMITH.

Whitworth College, Brookhaven, Miss.

MR. EDITOR: The scholastic year
of this popular and most excellent
female college closed on the twenty-
eighth of June, under very flatter-
ing circumstances. It enrolled one
hundred and sixty-five scholars the
last session of forty weeks—colle-
giate department, one hundred and
forty-seven; preparatory, eighteen.
Commencement exercises began on
Friday evening, June 24, by a concert.
On Sabbath, the twenty-sixth, the
annual sermon was preached by Rev.
James A. Godfrey, of the Mississippi
Conference, to a large congregation.
The sermon is said to have been
very good. On Sabbath night a
plain, practical and affectionate ser-
mon was preached to the young lad-
ies of the school by the president.
On Monday, the twenty-seventh, the
senior class was examined, in the
presence of an intelligent audience,
upon astronomy, moral science,
mathematics and chemistry. The
examination was impartial and thor-
ough, and evinced a perfection in
the knowledge of these sciences,
upon the part of these young ladies,
very rarely found in the senior class
in any college. In mathematics all
the propositions in each of the first
five books of geometry were written
down on separate slips of paper and
put into a hat by spectators. When
a young lady's name was announced
one of these spectators drew from
the hat and announced one of these
propositions, and the young lady
proceeded to the blackboard, and
demonstrated it in a few minutes.
Thus these five books were passed
through, and a failure in one propo-
sition only, and that only a partial
one, the young lady claiming she
could finish it.

The examination in astronomy,
moral science and chemistry was
equally thorough and satisfactory.
The self-possession, readiness to an-
swer, and the clear, distinct manner
of answering, showed that these
young ladies had not only studied
books but principles; had not studied
to be examined, but to know these
sciences. The audience, and es-
pecially the critics, were much grati-
fied, and said that was as near per-
fection as any examination they had
ever witnessed. This thoroughness
of instruction is the great secret of
successful mental culture and
scholar-making. It is the only cor-
rect mode of furnishing the mind
and developing its resources.

On Monday night there was a
brilliant concert in the large new
chapel—a large audience delighted
with good music, well executed upon
the instrument, and charmingly ut-
tered in song. At appropriate in-
tervals well written and well read
compositions were listened to from
the junior class, which indicated
considerable culture in thought and

style. Tuesday, the twenty-eighth,
was commencement day.

A large audience assembled early,
and the exercises were opened by
the choir in the use of that sublime
old hymn: "Before Jehovah's awful
throne." The prayer, by Rev. M.
Borges. We were then delightfully
entertained for more than three hours
by the music and compositions of
the graduating class.

These compositions were finely
written and gracefully read, and
evinced a maturity of thought and
thoroughness of mental training
rarely found among those so young.
The valedictory was touchingly elo-
quent, and brought down a shower
of tears, and threw over the closing
moments of this interesting occa-
sion a softening, subduing, eloquent
influence, which made us better, and
strongly indicated the wealth of
affection which has grown up be-
tween these jewels and those by
whom they were polished.

The degree of Mrs. of English
literature was then conferred upon
seven interesting young ladies,
their diplomas delivered, and the
large and highly gratified audience
dispersed. At five o'clock in the
afternoon Miss Ella Barnes, an alums-
na of the school, read an elegant
essay to the society of the alumni
and others present, which was
warmly applauded.

A very large number of persons,
young and old, assembled at the
chapel and college at night for so-
cial enjoyment, and spent several
hours delightfully.

Now, Mr. Editor, allow the writer
to say that he thinks we have, in
Whitworth College, of Brookhaven,
Mississippi, one of the best literary
institutions for the education of our
daughters to be found in the South-
ern States.

It is home-like in its character—
where there is father and mother,
sister and brother who thoroughly
instruct and govern and watch over
this large family of over a hundred,
with parental solicitude and care.
This is the reason of the strong af-
fections existing between Brother
and Sister Johnson and the young
ladies who live in the school, and
the cause of the sobs and tears when
the last farewell is heard.

They are assisted by an excellent
corps of teachers. The importance
of having the right men and women
in such institutions is unspeakable.
Those who are committed to them
for instruction and training are to
be the wives and mothers of coming
generations.

Woman, with a well cultivated in-
tellect, with Christianity enthroned
upon her heart, and the open Bible
in her hand, is one of the mightiest
forces to bless and regenerate soci-
ety of all the activities of this fallen
world.

Thus prepared with lever and ful-
crum, she can move the world as she
pleases.

We look to this school as one
whence shall go forth many such to
illuminate and purify society.

WM. B. HINEA.

CRYSTAL SPRINGS, Miss., July 6, 1870.

MANSFIELD FEMALE COLLEGE.

MR. EDITOR: The examination at
Mansfield Female College came off
at the appointed time. Your humble
servant will report, as in duty
bound, some of his observations on
the occasion.

He attended the examination of
nearly every class, on each of the
subjects studied, for three successive
days. The examination was strict
and impartial. The different classes
showed they had been well taught.
Their attainments were very fair.
Bating a pardonable solicitude in
one or two teachers to aid in em-
barrassment, nothing was observed
of which rigid criticism could justly
complain. Earnestness, fullness and
accuracy of instruction were evinced
by every class examined. In ob-
serving the faithful, careful, honest
dealing with the young ladies in
their education, I could but con-
gratulate the church, the commu-
nity and the country at large in
having so good a school.

Those parents are favored who
can avail themselves of such ad-
vantages for their daughters. The
young are indeed blessed who are
subjected to a system of training so

well adapted to draw to healthful
development their mental and moral
powers. In all fairness and candor
we must place Mansfield Female
College among the very best edu-
cational institutions of the land. If
there is any achievement in which
the Louisiana Conference and the
friends of real mental and moral
progress have been concerned, of
which they may feel elation, surely
Mansfield Female College, brought
up as it is to its present state of
efficiency, must be esteemed one of
the noblest and most valuable.

It is an institution, "me judice,"
in which all its friends and patrons
may justly feel confidence. Here
are healthful mental and moral de-
velopments.

The sermon preached on Sunday,
June 26, to the young ladies, by
Rev. John Wilkinson, of the Lou-
isiana Conference, was well chosen
for the occasion, chaste, solemn and
impressive; and exhibited the su-
perior loveliness of character formed
on the Christian model. The ex-
amination on Monday was followed
by an exhibition of attainments in
music by the several students of
music. It showed proficiency in
pupils and diligence in instructors.
The young ladies and their instruc-
tors manifested a commendable zeal,
for which I thank them, to give
pleasure to their friends and patrons
by varied performances with voice
and instrument; but I could not help
feeling that much time and labor
are lost in striving to make musi-
cians of those who have neither love
nor aptitude for the art.

Passing from particulars to gen-
eralities, I could not think what a
burlesque on humanity that the
divine art of music should be re-
duced to a trade, and be fitly repre-
sented by a lame child hopping
about and squealing with a burnt
finger. Under the present style of
music the tall trees will not bow,
nor the rivers stop in their courses,
nor the wild beasts forget their
ferocity. For one, I do want the
grand refrains of sacred melody to
find expression in our institutions
of learning.

On Tuesday night a musical en-
tertainment was given by the ladies
of the college for the purpose of
enlarging the funds to supply the
college with a complete chemical
and philosophical apparatus. The
subject: "Romance of the Forest."
A success in the performance. One
said, "Rich, rare and racy," and
this shall be my description. The
proceeds were over \$325.

The little girls, in their girpsie at-
tire, presented a striking tableau.
Their varied amusements with dolls
and needles, fans and flowers, kept
the attention alive, without distract-
ing too much from the main actors
around them. Some old carpers
thought the girls were learning
passes at love full soon, without
drill in college life, and that the
time and effort might have been
more wisely employed. In despite
of complainers it was a beautiful
exhibition, and the fruits will be for
others coming after to enjoy. The
exercises on Wednesday, commence-
ment day, were very interesting,
and were witnessed by a very large
and appreciative audience. The
literary address was delivered by
Major Ashton, of Shreveport, Lou-
isiana. It was a beautiful and ap-
propriate production, well delivered.

The several essays of the mem-
bers of the graduating class, of
which there were four, were finely
conceived and gracefully delivered.

The valedictory by Miss Annie
Stewart was superior of its kind. I
am indisposed to make distinctions
in the graduating class as to sub-
jects and performances, when all
were appropriate and highly credi-
ble. The apologetic tone, in regard
to one subject chosen for an essay,
seemed to say that the young ought
not to cherish reminiscences of the
sad past. The theme was appropri-
ate. The deeds of noble men of the
past and of the living present, who
are compelled to feel the iron in
their souls, are appropriate themes
for the orator, the poet and the es-
sayist. Let their deeds be out-
spoken by the young of the land.
Let their warm hearts take fire, and
pour forth burning thoughts until
the virtues of the dead shall be re-
produced in the living.

May the day never come when
the young shall forget the noble
past and cease to draw inspiration
from the examples of our own sunny
South. Miss Porter Parsons was
right in her sentiments of apprecia-
tion of worthy deeds of countrymen
and friends. The exercises closed
with the announcement by Pres-
ident Stewart that the past year had
been most prosperous of any for
Mansfield Female College, under
his administration; and the next
session would begin on the twenty-
eighth of September, 1870.

B. CLEGG.

GREENWOOD, LA., June 30, 1870.

"I WISH I HAD CAPITAL."—So we
heard a great, strapping young man
exclaim the other day.

You want capital, do you? And
now suppose you had what you call
capital, what would you do with it?
You want capital! Well, haven't
you hands and feet, and muscle,
and bone, and brains, and don't you
call them capital? What more
capital did God give anybody?
"Oh, but they are not money,"
say you. But they are more than
money, and nobody can take them
from you. Don't know how to use
them? If you don't, it is time you
were learning. Take hold of the
first plow or hoe, or jackplane or
broadax, you can find, and go to
work. Your capital will soon yield
you a large interest. Ah, but there's
the rub? You don't want to work?
You want money on credit, that
you may play gentleman and specu-
late, and end by playing the ven-
bond. Or you want a plantation,
with plenty of hirelings upon it to
do the work, while you run over the
country and dissipate; or you want
to marry some rich girl who may be
foolish enough to take you for your
good looks, that she may support
you.

Shame on you, young man. Go
to work with the capital you have,
and you will soon make interest
enough upon it to give as much
money as you want, and make you
feel like a man. If you can't make
money on the capital you have, you
could not make it, if you had a
million dollars in money. If you
don't know how to use bone and
muscle and brains, you would not
know how to use gold. If you
what capital you have lie idle, all
waste and rust out, it would be the
same thing with you if you had
gold; you would only know how to
waste.

Then don't stand about idling
a great helpless child, waiting for
somebody to come and feed you,
but go to work. Take the first
work you can find, no matter what
it is, so long as you can do it well.
Yes, whatever you undertake, do it
well; always do your best. If you
manage the capital you have, you
will soon have plenty more to man-
age; but if you can't or won't man-
age the capital God has given you,
you will never have any other to
manage.

Do you hear, young man?

TO THE POINT.—The fellow
from the Christian Era has more
than the usual amount of good
vice in so small a space. As it
brief it can soon be committed to
memory. It would be well if every
church member would attempt it.
A more difficult task would be to
put it in practice. It is worth try-
ing.

"DEAR BRETHREN: I suggest that
you pray for your minister. Be-
guard his reputation carefully, let
him preach weekly, listen to his
word wakefully, treasure it up care-
fully, practice it faithfully, both
individually and collectively, and
constantly, support the Saviour's
school heartily, subscribe for his
liberally, pay him promptly, let
him a bit of meat and ball of bread
occasionally, call on him frequently,
but not ruddy, greet him cordially,
but not ruddy, and may the God
of all grace bless you abundantly
and add unto you daily such as may
be saved eternally. Amen."

THE CROWN OF THORNS.—An in-
teresting girl of six years lay on a
death-bed. Shortly before she died
this child of prayers and pious in-
struction said to her mother:

"Please, mother, when I am dead
don't put any roses round my head
when I lie in my coffin to be buried."
 Astonished at the singular request
the mother asked her the reason.
"Because," said the dying child,
"they crowned my Saviour's head
with thorns."

Montgomery was told of this
interesting incident, and was requested
to write some verses. He wrote
just these two, which beautifully
forth the dying child's request:

"Mamma, a little maiden said,
As she lay with her expiring sigh,
Put no sweet roses round my head
When in my coffin I shall lie."
"Why not, my dear?" the mother cried.
"What flower so well a corpse adorned?"
"Mamma," the innocent replied,
"They crowned my Saviour's head
with thorns."

The Christian Advocate.

SATURDAY, JULY 16, 1870.

NO TIME TO PRAY.

No time to pray!
O who so fraught with earthly care
As not to give to humble prayer
Some part of day?

No time to pray!
What heart so clean, so pure within,
That needs not some check from sin—
Needs not to pray?

No time to pray!
Mid each day's dangers, what retreat
More needful than the mercy seat?
Who must not pray?

No time to pray!
Must care or business' urgent call
So press us as to take it all
Each passing day?

No time to pray!
Then sure your record falleth short;
Excuse will fall you as resort
On reckoning day.

What thought more dear
Than that our God his face should hide,
And say through all life's swelling tide:
No time to hear!

Cease not to pray;
On Jesus as you all rely—
Would you live happy, happy die?
Take time to pray!

LIFE IN MARS.

In a book far more entertaining than any modern novel Mr. Proctor has given us, among a number of other studies of worlds in physical conditions widely different from that of our own, a chapter of the highest interest on "Mars the Miniature of our Earth"—the specific interest of the essay being the very close analogy it proves in the physical condition of Mars to that of our own earth, so that we have a far larger basis of similarities from which to draw our inferences to other similarities which we can, as yet, only conjecture, than we have in the case of the moon, or even the planet Jupiter, or Venus or Mercury—worlds in all of which there is some vast fundamental difference of condition which must affect the whole course of nature there. In the moon there is the fatal difference of no atmosphere, and none, therefore, of the enormous variety of phenomena—evaporation, clouds, colors, vegetation, lungs, etc.—dependent thereon. In Mercury and Venus, if there is not, as we should suppose on the first look, an amount of heat which would make those planets quite intolerable to the various races of creatures inhabiting our earth, we have at least no right as yet to assume that there is not, and no evidence at all really demonstrating the existence of these general physical conditions on which alone we can base an argument from analogy. In Jupiter there is pretty clear positive evidence that the conditions of existence are quite inconsistent with life as we know it. In all probability the body of the planet is still a glowing, uncondensed mass of molten matter, with an atmosphere heavily charged with boiling vapor; and if there be life at all of our kind in the Jovian system, it must in all probability be on the satellites, and not on the planet itself; and even they are composed of so light a material, as compared with the earth or the moon, as to suggest a very different general physical condition. Of course there is nothing to prove that intellectual beings, like ourselves in reasoning powers, may not exist in the fiery furnace of the sun or on the colder which we call the moon, or indeed in empty space itself; but there we come into the region of pure conjecture, and the argument from analogy wholly fails. Nothing is beyond pure conjecture. A hundred thousand intellectual beings like myself may be dancing on the paper on which I am writing, for anything I know; but I have no reason to think so, and I have very little more reason to think that such beings exist either on the sun or on the moon, for the only circumstance which favorably distinguishes these positions from empty space, for the abode of beings like ourselves, is the existence of a force of gravity there, more or less resembling the force of gravity which keeps us rooted to the earth; and even that circumstance as regards the sun can hardly be said to furnish an analogy, for at the surface of the sun, to say nothing of the difficulty of living in a furnace, the force of gravity itself would be so enormous as to crush any one with the body of a man. While, therefore, there is nothing to prevent our conjecturing inhabitants for all the suns in space, there is precisely as little reason for doing so as for conjecturing inhabitants for the intervening celestial vacuum. The mere attraction of our attention to these particular points in space, by the lights suspended there, ought no more to suggest living beings in any degree like ourselves than the shining of a candle should suggest to a moth that in the flame of that candle

living beings like itself exist. In point of fact, the moth would be much nearer the mark if it peopled the dark intervening spaces with moths, and excluded them from the various luminous points visible to it; and so as regards solar worlds, not only have we no reason to single them out for conjectural inhabitants, but as far as we can reason from analogy at all, we have special reason to single them out as localities in which creatures like ourselves are even more unlikely to exist than in the empty celestial spaces themselves. No doubt it is perfectly reasonable to suppose that there may be planetary systems for most or all of the solar worlds, like that to which we belong, and that there, if beings more or less like ourselves do not already exist, preparation may be making for them. But what we want to insist on is, that so far as we can reason at all in this matter, we can reason only by analogy; and that argument, as distinguished from mere conjecture, fails us, just so far as we have no tangible analogies of physical condition on which to build.

Now in the case of the planet Mars, and in the case of the planet Mars alone, our astronomers have really established the existence of a similarity of physical condition, which gives us the strongest positive grounds for inferring that even such creatures as we now are could somehow make shift to live there, though, of course, not without a certain amount of preliminary discomfort while we were trying to acclimatize ourselves. Mr. Proctor's graphic account of these similarities, and his delightful chart of the planet's continents and waters, suggest to us to discuss one or two of the known differences of condition, in their relation to the probable results upon the history and civilization of the Martians. First, let us briefly say that the Martians have a world less in area than one of our hemispheres to explore—that, in spite of this, it has not very much less land than the earth, a much less proportion of its surface being occupied with water than of the globe—that its seas are of the general type of the Baltic and the Mediterranean, for the most part narrow, straggling, inland seas—that the greatest seas are in the neighborhood of the cold South pole of Mars, which has a climate far severer than the North pole; that there is a world of perpetual snow at each Martial pole, which can be seen to diminish as the summer returns to each hemisphere, and to increase again as winter comes back; that in spite of the preponderance of land, a vast deal of rain falls on Mars, especially in winter, clouds often hiding the configuration of the continents from our astronomers, and then suddenly dispersing, and leaving the continents clear again—a clearing up, which usually happens about the hour of noon in Mars, just as our weather so often changes as the sun passes the meridian; that the length of the Martial year is nearly twice as long as ours; and that the force of gravity on Mars is much less than half what it is with us, so that, as Mr. Proctor expresses it, "a Daniel Lambert on Mars would be able to leap easily to a height of five or six feet, and he could run faster than the best of our terrestrial athletes."

The general result, then, of the telescopic observations on Mars, and the deduced calculations, may be said to be—(1) with certainty, that the weight of objects of the same mass in Mars is much less than half what it is here, and that consequently there would be a far greater range of activity for creatures of the same size; that falls would be less dangerous; that the strain on walls, or columns, or any other supports would be much less, and that therefore roofs, arches, and structures of that kind might be easily set up on a much larger scale by creatures of equal skill with ourselves; but, on the other hand, that friction, which is more or less proportional to pressure, and therefore, in the case of piles of stones, etc., to weight, would be far less than on the surface of the earth, so that any violent lateral disturbances, such as hurricanes, would exert a still greater effect than on our earth in destroying such structures, since there would be less solidity, and, therefore, less frictional resistance to overcome in overturning them. Again, the vastly diminished weight of given masses would give a very great advantage to all kinds of engines of draught. Carriages, carts and railways would attain a vastly greater speed than on our earth, and the sledging on the snow fields of Mars might be as swift as the wind. All these inferences are matters of certainty, so far as they go. But (2) there seems a very great probability that the atmosphere of Mars is relatively considerably denser than ours, since at a distance from the sun so much greater than the planet probably receives directly less than half the light and heat we receive, there seems no sign of any arctic severity, and clear evidence that the atmosphere holds vast

quantities of watery vapor, even in winter, which points to a general temperature considerably higher than our world would have if removed to the same distance from the sun, especially when one considers how much less water to supply vapor, and how much greater a proportion of land than the earth, Mars contains. Again, the rapidity with which storms clear off from a big continent and leave the outline clearly marked after being all enveloped in mist before, seems to show the existence of very rapid currents of air; and this, no doubt, the greater inclination of the axis of Mars, giving a greater range to the northward and southward journeys of the sun, would promote. Putting these facts together, then, we should infer that the atmosphere of Mars is, in proportion, heavier than that of the earth, and therefore a warmer envelope for the planet; that its winds are more violent; and that the great difficulty of the architects of the planet is more likely to be the strengthening of their structures against lateral forces—hurricanes, for instance—than against the strain of gravity. Their outer walls would have to be comparatively much more solid—their difficulty in raising broad arches and spacious roofs would be much less; and locomotion on Mars must be much more easy and speedy, *ceteris paribus*, than locomotion on the earth.

If this be so, we may see a fitness in the much larger proportion of land in the planet and the comparative narrowness and smallness of the seas. Probably life in Mars is faster than it is here. It is very improbable that the civilization of the different continents there is divided by periods extending over thousands of years. There is probably no one of the great continental tracts of Mars known there as "the New World." If great migrations of conquering races have taken place on Mars as on the earth, they have probably succeeded each other faster, having a less surface to move over, less obstacles, perhaps in the way, and greater advantages in locomotion. We should not be surprised, too, if the Martians had got greatly ahead of us in respect of navigating the air. We know that the density of the planet as a whole is less than three-fourths of that of our earth, so that it seems likely that the tissues of the body of a Martialist, which must be fed from the substance of the planet, are on the whole intrinsically lighter than those of man's body. But if the Martians' bodies are intrinsically lighter, and their atmosphere a good deal heavier than ours, aerial transit may be a very easy matter to them, and it is quite conceivable that their normal mode of locomotion may be through the air.

Again, if we are right in supposing the currents of air in Mars to be of more than usual violence, while the solidifying force of friction which resists them is much smaller than here, it may be a reasonable inference that "natural selection" has already weeded out the loftier-growing trees, which would stand less chance in encounters with hurricanes than our own, and it is not improbable that the tendency of the great facilities for motion, and the greater velocity of life in Mars altogether, would be that all its animal inhabitants range wider for their food, and obtain less on a given area than on our earth. We should be disposed to conjecture that it is a world in which speed is greater and of more importance than even on the earth, and if so, it seems likely enough that the difficulty we have supposed as to the solidity of walls exposed to the atmospheric currents of Mars, is got over as the difficulty of building durable structures is generally got over in our own tropics, where earthquakes are so common—by not building durable structures at all, but only very light and fragile ones—a process which would, of course, be much easier where all the materials were lighter and all motion swifter than with us. In a word, it seems likely that the distinctive feature of life on Mars is velocity, that the creatures there live faster, move oftener, undergo more change, just as the planet itself passes through a far vaster orbit (though its orbital velocity is not quite so great as ours) in one of the Martial years. But that such a characteristic would tend to quicken the progress of the mind and of discovery is doubtful. With us civilization has never advanced rapidly till it had become tame and, so to say, plodding; and the excitement of local change at least had become few. But the great seasonal changes on Mars—especially in the southern hemisphere, where the winter and summer are aggravated by the enormously increased distance of the sun at that period when his rays are least direct, and his nearness at that period when his rays are most direct—contribute to confirm the impression we have drawn from other considerations, that physically, at least, the life there has far more of rapid change in it than we can easily conceive; but whether that has de-

veloped or arrested the mental and moral progress of the Martians is a question, of which the elements are altogether too conjectural for serious discussion.—Every Saturday.

BIOGRAPHICAL.

MELISSA JANE WILSON.

Died, in Summit, Mississippi, June 8, 1870, Melissa Jane, wife of J. B. Wilson, and daughter of Mrs. Nancy and the late Hardy Thompson. The ties of relationship instituted by our heavenly Father become stronger and dearer by years, and give to this life most of its pleasures. When these ties are broken up by death the deepest sorrow extends through the family circle, and those who survive shed bitter tears over those who die. But of all the losses which human nature is called to weep over, few are more sad than the death of a young wife and the mother of a family of children. When the mother dies the friend and guide of our youth departs, the sharer of our prosperity and adversity, the partner of our joys and sorrows; our kind companion and adviser is laid in the grave, to be seen no more on earth. Truly this is death "in the midst of life." Raised by pious parents, she was early taught that "Christ is the way, the truth and the life," and at the time of her death was a communicant of the Presbyterian Church. She was the only daughter left to a widowed mother, whose heart and home are indeed made desolate by her early death, leaving an aching void which can never be filled. To her bereaved husband, brothers and many relatives she was very precious, and it is hard to realize the sad truth that in all the uneven paths of life we shall meet her no more. Her welcome footsteps, her dear familiar voice will fall net upon our ears, nor her kindness, sympathy and love into our hearts. Young and hopeful of life, she has passed away while the freshness of youth still lingered around her. Her disease was of fearful violence, yet she bore her suffering with patience, and gave full satisfaction to all present, at that solemn hour, of strong faith in the Lord, and entire resignation to his will. May heaven smile graciously on the orphan children, and sanctify the affliction of the bereaved husband.

ONE WHO LOVED HER.

WILLIAM H. STAFFORD.

Died, May 5, 1870, at his residence, near Tuskegee, Alabama, William H. Stafford. He was born in Wayne county, Georgia, January 16, 1809, came to Tuskegee among the first settlers of the place, established himself in business, and by his integrity of character soon won the confidence of all who knew him. In 1837, when the church here was in its infancy, he united with it as a seeker of religion. Soon after, while riding alone along the road on horseback, he was powerfully converted. The joy of his heart so lighted up his face that a friend, meeting him a few moments afterward, observed the change, and inquired the cause before he had time to tell the glad tidings. Happy he whose conversion is so strongly marked by time, place and circumstances, that no entrance is left for doubt. Brother Stafford never doubted his. He entered at once upon a life of consistent, active piety. He was always willing to pray and work, and give to further the interests of the church. "He is a good man" was the word of praise afterward awarded him by all classes. No praise is so high as this. If not providentially vacant, his seat in the sanctuary was always filled. It was easier to preach when he was present. His last illness was distressingly painful; but he was more than patient and resigned—he was triumphant. To him death had no terror—over his future hung no cloud. To the writer he said with the emphasis of a victorious faith: "I know in whom I have believed, and that he will safely keep that which I have committed into his hands." Calling his family around him one by one, he left with them his parting blessing. May they follow him as he followed Christ!

Advantages of Compressed Asphalt for Roadways.

An American gentleman, residing in Paris, has furnished us with some important information relative to the use of asphalt for public and private roadways, walks, etc., from which we draw the facts and conclusions embodied in this article.

Our readers will recollect an illustrated description of the process of preparing and putting down asphalt so as to form roadways as practiced in Paris, published not long since in this journal. The article was extensively copied in English journals, and the information it contains was obtained directly from Paris, together with the drawings from which our engravings were prepared. It appears, from the information that which we are now in possession of, that the compressed asphalt has by its incontestable advantages obtained the approval of all engineers of the municipality of Paris, and of a great number of provincial cities; in fact the hardest working streets of Paris are now paved with it, and the question is now seriously discussed in the Council of Administration of extending the asphalt system to all the streets and boulevards. It is highly probable that this will be done as fast as the present road surfaces wear out.

It is so solid in wear that it is superseding granite paving even in places where this stone is abundant and cheap; as, for instance, in Geneva, in the very center of easily worked granite quarries, and Grenoble, in the center of the French Alps. Both these towns have used and are using asphalt pavements extensively.

A very great advantage in the use of asphalt is the rapidity with which it can be laid. It is not unusual to construct five hundred square miles per diem, and the larger the undertaking the more rapid in proportion may the work proceed. The pavement laid is ready for use the next day, so that thoroughfares are not kept obstructed.

The same is the case when repairs are needed, as they can be done in sections, each section being ready for use on the next day succeeding repair.

Horses' feet and wheels of vehicles make scarcely any noise on this pavement, and it always possesses a slight elasticity, manifesting the latter quality rather more in warm than in cold weather.

It is kept perfectly clean by the use of beams, and washing with hose, so that it produces neither mud nor dust; and, as it has no cracks or crevices in which animal or vegetable matter can accumulate and decay, its sanitary qualities are of the highest order.

We are informed that its first cost would be less than stone paving in nearly all countries, and that the cost of maintenance is very much less than that of macadamized roads, and generally less than that of any other modern pavement. It is also stated that it is positively free from all the disadvantages of other pavements.

Slipperiness, which has been charged against it, is, we are assured, not essentially a fault of this pavement, it only being observable when mud has been carried upon the asphalt from adjacent macadamized roads, and entirely disappearing when the mud is washed off.

It has also been objected that these roads need frequent repairs. On this point we are assured that complaints have only been heard within the last two years; and that they have had their origin in the imperfections of experimental pavements constructed of other and inferior material from that of the first class asphalt roads. The material known as the asphalt of the "Val du Travers" was that originally employed, and has never given any cause for complaint. It contains a much larger proportion of bitumen than any other, and this renders it superior to other varieties for this purpose.

A preparation of asphalt, called liquefied asphalt, has been used for sidewalks, terraces, basement floorings and yard pavements, and is highly recommended.

It is a mixture of bituminous calx or asphalt proper with purest bitumen, the latter serving solely to complete the fluidity of the asphalt, or, so to speak, as a flux for melting it. The mastic thus obtained is mixed again with a certain proportion of sand, and then run over the surface.

It is stated that the majority of cities in France have adopted this system, and that its use is extending to other countries. It has been employed in Paris since 1838. A single workman can put down from seventy to eighty square yards of this surface per day, and it is ready to be used two hours after it is down. It rarely needs repairs, and when necessary these are the work of only a few minutes. Used in this way it gives a waterproof and perfectly clean surface, and its use in sidewalks in Paris has shown an average duration of fifteen years for a

layer three-fourths of an inch thick. It is very much cheaper than flagged walks, not costing more than one-fourth to one-half as much, according to the quality of flags employed.

These facts seem to us worth considering in connection with the subject of pavements in this country, perhaps a question of as great present and general importance as any engineering problem of the time. That the importation and use of asphalt may be the solution of this problem seems at least possible enough to lead to thorough experiment in this direction.—Scientific American.

Prof. Gould has found that the velocity of the electric waves through the Atlantic cables is from seven thousand to eight thousand miles per second, and depends somewhat upon whether the circuit is formed by the two cables or by one cable and the earth. Telegraph wires upon poles in the air conduct the electric waves with a velocity a little more than double this, and it is remarked, as a curious fact, that the rapidity of the transmission increases with the distance between the wire and the earth, or the height of the support. Wires buried in the earth likewise transmit slowly, like submarine cables. Wires placed upon poles, but slightly elevated, transmit signals with a velocity of twelve thousand miles per second, while those at a considerable height give a velocity of sixteen thousand or twenty thousand miles.

The Giornale di Napoli of March 26 states that on the occasion of a royal visit to Pompeii, on the preceding day, some excavations were made in some houses situated on the right of the Via Stabiana, and a variety of treasures were found, namely: a large number of objects in terra-cotta, iron and bronze; a beautifully chiseled silver cup; a very rare glass oil lamp; a still rarer and perhaps unique object, consisting of a small terra-cotta cup with a metallic cup inside, containing a night lamp, like those in modern use; a large gladiator's sword, with the metallic portions of the scabbard; many copper and silver coins of the time of Vespasian, and an amphora, full of small enions, near the skeleton of a woman. The skeleton of a man was also discovered, holding a pickax in one hand, an iron bar in the other, and with many bronze objects scattered at his feet, near a wall which had been partially broken through.

UNSPEAKABLY GLORIOUS.—Glorious was the scene when Enoch was translated; or when Elijah's chariot of fire and horses of fire appeared in the whirlwind and took him to his glory; yet more glorious was the scene when, surrounded by his disciples, the risen Saviour slowly and majestically ascended by his own glory, before them, while blessing them, and a cloud received him out of their sight. How unspeakably glorious, then, will be that full result of his resurrection and ascension, when crowding from every country, in glorious resurrection bodies shining as the sun at one and the same moment, the myriads and myriads of his saints, of every age, are all gathered into his presence, where is fullness of joy, and are ever with the Lord.—Bickerstaff.

A SINGULAR event has just occurred at Kaethen, in the principality of Anhalt. A middle-aged man, entered the gaming rooms and sat down at the table. After a time he gained one thousand ducats. The croupier passed the money over to him and asked if he wished to continue, but as no answer was returned one of the assistants touched him on the shoulder. The individual still remained immovable, for it turned out that he was dead! The man in charge of the table then raked up the gold, saying that it belonged to the bank, as no engagement could have been entered into with a corpse. The heirs of the deceased are not convinced of the soundness of this reasoning, and they have commenced an action for the recovery of the sum.

DRESS MAKES THE MAN.—A man is first judged by his dress, afterward by what he turns out to be. There is the story of the celebrated painter and poet, Buchin, who, walking out one day in very shabby clothes, became more an object of derision than regard. He was mortified and went home, and, arraying himself in his best, again walked out, to receive on every hand obsequious attention. His mortification turned to anger; and, going home, he threw his gold-laced coat on the floor, and stamping on it, exclaimed: "Art thou Buchin, or am I?"

WHILEST just government protects all in their religious rites, true religion affords government its surest support.—Washington.

FLATTERY is often a traffic of mutual meanness, where, although both parties intend deception, neither are deceived.—Colton.

* Other Worlds than Ours. The Plurality of Worlds studied under the Light of Recent Scientific Researches. By Richard A. Proctor, F. R. S. A.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, JULY 10, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—Rev. LINES PARKER, 112 Camp street, New Orleans, La.

AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINES PARKER, D. D.

To Subscribers.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber, upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

Agents are requested, when practicable, to invest and remit funds in a Post Office Order, Draft, or by Express. If this cannot be done, Remittance in the letter will be accepted. When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

BACK AGAIN.

Our readers are under great obligations to Brothers White and Walker for their efficient services, during the past month especially, and we hope to be under further and continual obligations to them and others for contributions to the columns of this paper. Our friends will pardon the appearance of one or two more installments of editorial correspondence. People can travel in these days a great deal faster than they can write.

DEVISING LIBERAL THINGS.

We learn that the citizens of Clinton, Louisiana, have proposed to bestow upon Bishop Keener a most eligible and delightful home, if he shall find it practicable to reside among them. This is a salubrious locality, beautifully situated, and the character of its society needs no further endorsement. We are glad to notice such hearty and practical appreciation of the Bishop, but we do not intend to give him up.

EXPECTED.

Mr. Editor: I see that brethren announce that they expect my attendance at certain points—some of them simultaneously. Knowing that I am acting somewhat in behalf of Centenary College, I can account for this wish for my presence; for the whole of Methodism in Mississippi and Louisiana is walking up to the importance of that noble institution. But I cannot be responsible for appointments which others make for me. I expect to attend district meetings at Garlandville, Mississippi, at Hamburg, Arkansas, at Mobile, Alabama, at Fletcher chapel and at Port Gibson during the next two months.

Yours truly,

J. C. KEENER.

THE BOTTOMS' HORSE POWER IMPROVED GAS GRILL.—Attention is called to the advertisement of this great improvement. We have seen testimonials from the most reliable and practical planters, and have no doubt that it is all that the agent represents it to be. We know the agent, Mr. W. Forss, well, and can cordially commend him to the confidence and patronage of our friends. His address is 69 Magazine street, New Orleans. Every planter who has a gin or mill to run by horse power will save many times the cost of the improvement in a single season. With it one mule will do the work of four.

To persevere in one's duty and be best, is the best answer to calumny.

EDITORIAL CORRESPONDENCE.

EASTWARD.

The mists and spray of Niagara are remembered regretfully through the hot and dusty day which covers the interval between the falls and Albany. It is about three hundred miles, and for the most part a rich and flourishing country. The farm lands adjacent to the New York Central railroad, from one extremity of the State to the other, are rarely worth less than \$100 per acre, and are often at a much higher figure. The value of lands throughout the North is a matter of wonder. Nearly every part of the country, we may safely say nearly every neighborhood, is reached by some railway, and lands quite remote from the great centers and thoroughfares are rarely held at less than from \$50 to \$75. We are at a loss to know how any reasonable *per cent.* can be realized from investments at these prices; but the people grow richer every year, and the country prospers. The products on these high-cost farms would seem not to be particularly profitable. Corn, hay, wheat, potatoes and fruit are the chief, and these appear to be cultivated in patches rather than fields. Labor is comparatively high, laboring men receiving by the month as much as \$25 or \$30. Work by day in harvest and other emergencies is very much higher.

Scarcely any wood land is left in central New York, and nearly every available rood is made in some way to contribute to the support of a teeming population. The whole country is like a scattering village, and every few miles are towns and cities. This Central road is a living stream flowing along its double track and filling its frequent trains. At every station multitudes are received and dismissed, and miles of freight cars are met in a day. It happened to be in the midst of haying and harvesting, and we were often passing through the fields, where we were regaled with the smell of the new-mown hay and the fragrant clover. The cultivation of the corn and other crops was also going forward, and every variety of crop and tillage was within view at once. The improved labor-saving implements are everywhere at work. There is a man moving through his corn with a silky plow, seated comfortably and enjoying his ride. Here are the haymakers doing everything by machinery. Mowing, spreading and raking are done by so many different implements, and each man rides at his toil. These folks have reached that gracious condition where labor is rest, and much of what used to be toil is recreation.

We were surprised during this day's journey, and afterward, to see women at work in the field. In some instances they were in the hay-field, and in others they were engaged in hoeing corn and potatoes. Strange, is it not, that just as the colored women of the South have given up "the shovel and the hoe," their fair sisters of the North should begin to use them? At the stations and in the towns we noticed a few negroes, but they appeared like exiles in a strange land. We saw them rarely at work in the field, but usually in the towns, and there in the capacity of waiters at the best hotels. Such of them as we met in holiday attire seemed to move in a gang by themselves, and to be socially ignored and shunned by the whites. In many instances their capacity as servants is duly appreciated, but they are not sent to the Legislature.

The valley of the Mohawk is a region of singular beauty. An afternoon from Utica to Albany gives opportunity of beholding it in the perfection of its loveliness. The cars are generally on the left bank of the river, and the canal on the right. The bottoms on either side are covered with luxuriant harvests, the hills in the background attain the height and dimension of mountains, and are clad with the bright and varied robes of wood-land, meadow and grain fields. In some instances the hills are clothed with flocks of freshly shorn sheep, and the pastures are covered with herds. The river, shallow, wide and clear,

is studded with islands, and broken into rapids by rocks which lift their heads above the surface, and is occasionally spanned by bridges of much grace and symmetry. It is rarely, indeed, that a scene more pastoral or more romantic is realized in this world of manifold beauties. It is a valley in which almost every mood of nature is displayed, from that of sweet and rural repose to the wildness and ruggedness of precipitous cliffs and noisy waterfalls.

We spent a summer's day on the Hudson. The Daniel Drew is a glorious boat. These Hudson river boats, for grace of model and for comfort and speed, are not excelled; and as seen moving amidst the highlands they are things of beauty, and in harmony with the scenes which surround them. Until we sight the Catskill mountains, in the vicinity of Catskill landing, the scenery is interesting but not remarkable. Our first glimpse of the mountains through the lazy atmosphere was such as to startle. What we had for some time taken as a dark cloud, far beyond the hills and high above the distant horizon, was the summit of the Catskills. It was such a view as this, doubtless, that led the Indians to call them the "Mountains of the Sky." It was some time before the eye could connect these imposing and awful forms with the hills which crouched at their feet. A belt of russet and purple atmosphere separated them from the lower world, and they seemed to hang in mid air, and to float upon the smoky zone which hid their bases from us. As we proceeded, mountain, hill and toward united, and formed a vast and impressive tableau, whose scenes varied at every turn in the river, only to awaken new emotions of delight and wonder. Just below Newburg, and about sixty miles above New York, we pass into the heart of the highlands, and for ten miles we have views in series and clusters of indescribable magnificence. The mountains come down to the water's edge, hemming and enfolding the river, and shutting out the view of distant objects. In places there are openings and vistas through which the blue outlines of the distant Catskills, and the lofty top of Beacon Hill, the Storm King and other royal eminences appear. In this region is the Idlewild of Willis, the scene of Drake's "Culprit Fay," also St. Anthony's Face, now knocked off by a profane powder blast, and Mount Tannas.

Towns and points of historical celebrity are passed as we get further down the river. Among these are West Point, Forts Clinton and Montgomery, Verplanck's Point, Haverstraw Bay and Tarrytown. Then there is Irvington and the home of Washington Irving, whose writings have done so much to invest these regions with the interest of classical romance. No spot was more carefully scanned than Rhinebeck and the home of Freeborn Garrettsen. There the old house which he built stands, plain and old-fashioned as compared with the modern mansions and villas which now gem the Hudson. A broad and well kept lawn is in front, and the surroundings indicate that this classic ground of Methodism has not fallen into neglect. Beneath that roof did Asbury, Jesse Lee and other captains of "the thundering legions" find repose in their warfare, and from the sloping lawn they drank in the varied beauties of the scene. The proprietor of such a home must have been moved by a mighty conviction of eternal things when his zeal was not abated by its attractions. The celebrated Palisades begin about thirty miles above New York. They are an unbroken wall of columnar trap rock, stretching along the right bank of the river for twenty miles. Generally they rise perpendicularly from the water's edge to a height varying from three hundred to five hundred feet, and the tops are crowned with a heavy growth of timber. On the opposite side of the river is an almost unbroken series of picturesque villas and towns. Here the influence and taste of New York have been expended in the most exquisite devices of art. The resources of

architecture have been exhausted in the plan and embellishment of these homes of wealth. Nature has contributed her utmost. The Palisades form a series of unrivaled grandeur, and the dells, gorges and undulations need but little assistance from art to make them enchantingly beautiful. We marked Piermont, Dobbs' Ferry, Hastings, as points to be remembered; and Yonkers above all, on whose heights every mansion and villa are as so many pearls, and gorgeous as so many gems. Yonkers is the nothing beyond of suburban taste and embellishment. Rapidly passing Fort Lee, we bid farewell to the Palisades, and in less than half an hour the spell of the Hudson is broken by the smoke and bustle and roar of the great metropolis.

THE NEW DISCIPLINE.

The book editor and the book agent are entitled to the thanks and commendation of the church for the dispatch with which the new Discipline has been issued. Their work also appears to have been well done. This edition contains not only the changes made in the text and the additions, but is an entire new arrangement of the matter in the order of the various subjects, chapters and sections. The present orderly and systematic arrangement will give great satisfaction, and most of the changes made by the recent General Conference will meet with the approval of our people.

The two historical chapters in the old Discipline, reciting the origin and organization of the Methodist Episcopal Church and of the Methodist Episcopal Church South, have been left out. The new book opens with "the Articles of Religion." In the General Rules the long preface, containing an account of their nature and design, and of the rise of "the United Society," has been wisely left out, and the rules only are inserted. The Conferences, general, annual, district and quarterly, are all thrown into one chapter and in appropriate sections. The district conference appears in the Discipline for the first time, and is now a part of our church organization. It is to be held annually, to be composed of the traveling and local preachers of the district, and of laymen, "the number of whom, and their mode of appointment, each Annual Conference may determine for itself." The church meetings are entitled "church conferences." There is no change respecting them except in the name. Everything concerning ministers and church officers appears in chapter 3. Under appropriate sections we have: "Of the trial of those who think they are moved by the Holy Ghost to preach," of the election and consecration of Bishops and their duty, of presiding elders, preachers in charge, admission of preachers on trial and into full connection, and exhorters, stewards and trustees are all treated of in this same chapter.

A short chapter is devoted to "the membership of the church." It is refreshing to see a section here headed: "Of the children of the church." The language is guarded both in this section and in the ritual for the reception and recognition of church members; but such terms as "the children of the church," "that they be duly recognized as members of the church," "but as none who have arrived at years of discretion can remain within its pale or be admitted to its communion," show that as a church we are arriving at the only clear, consistent and tenable ground on the subject of the relation of baptized children to the church. Our children are in the church, and the careful and well chosen words of the Discipline speak of their recognition rather than admission, and of the condition upon which "those who have arrived at years of discretion can remain within its pale." Appropriately in the chapter on "the means of grace" there are sections devoted to public worship, prayer meetings, love feasts, class meetings, and finally a section on Sunday schools. Many will regret that some additions were not made to this section; but this will be in time, we hope. What the Discipline does say on the subject

can now be readily found. The section in the last Discipline which treated of colored members does not appear in the present edition. The chapter on "the administration of discipline" is devoted to church trials. The subjects of appeals and credentials are treated of in separate chapters. We have noted no changes in the administration of discipline; but the new arrangement is a decided improvement, which pastors and presiding elders will appreciate.

The membership of the quarterly conference is enlarged by the admission of the trustees. The section treating of stewards is considerably enlarged and improved. The duties of recording and district stewards are laid down under distinct questions, and the mode of appointing them is elsewhere declared. All the stewards are to be elected annually. Nothing appears in reference to Conference boundaries, and the section in the former Discipline treating "of the publication of books and periodicals" is left out. The subject of ministerial support, and the building of churches and parsonages, remains as it was, only in better form. Chapter 13 contains the ritual, and appropriately closes the book. Here we note some changes and additions. The form for the reception and recognition of members is vastly superior to any contained in the former Discipline. The following question and answer occur:

Ques. Will you be subject to the discipline of the church, attend upon its ordinances and support its institutions?
Ans. I will endeavor so to do by the help of God.

These much needed forms of laying the corner-stone and of the dedication of a church are published in our Discipline for the first time. We acknowledge the reception of copies of the new Discipline from Dr. Redford, and from R. J. Harp, of the New Orleans Depository. The Publishing House at Nashville and the Depository at New Orleans are prepared to fill orders. A copy of this *model Discipline* should be put into the hands of every member, and should be carefully studied by the preachers.

THE WAR CLOUD.

In our news department will be found tolerably full accounts of European affairs up to the time of going to press. War seems to be imminent, and a war which is likely to involve the great powers of the Old World. The recent abdication of Queen Isabella was to make the way clear to the Spanish throne for her son, the Prince of Asturias. The French empress is related to the prince, and he is probably Napoleon's choice. To place the Prince of Asturias on the throne would be ruin to the leaders of the revolution and to the revolution itself. With this French intrigue disclosed, is it strange that Prussia and his coadjutors looked to Prussia, and that the nomination of Prince Leopold of Hohenzollern was resorted to that they might be saved from France and the Bonapartes? Prussia and France are the great national rivals of each other. Neither is willing to see Spain under the controlling influence of the other. The preparations for war are actively going forward. Their war steamers have their fires lighted, their armies are on the move, and hundreds of thousands of armed men await the signal to begin the fray. But after all the bluster and threatening display of military armaments, to-morrow's dispatches may announce the danger over.

THE SUNDAY SCHOOL VISITOR.

Mr. Editor: We request all superintendents of Sunday schools, or other persons who may subscribe for the Visitor, to make their subscriptions only till the close of the year, so that all may begin January 1, 1871, with our new series, about which we will make announcements in due time. We will furnish the Visitor from the first of August till the close of the year, embracing five double numbers for semi-monthly distribution, at the following rates: Eight copies for \$1, this being only \$12 50 per hundred.

A. H. RUPP, Agent.

CORRECTION.

We cheerfully insert the following note from Rev. Mr. Hilgen, also the general denial of the American Churchman. We sincerely hope that there was no foundation for the statement taken from the Milwaukee paper.

VESTRY ROOM of FIRST CHURCH, July 12, 1870.

ED. CHRISTIAN ADVOCATE: Looking over your last issue I was deeply pained at reading your editorial bearing upon the action attributed to the Council of the Episcopal Church in Wisconsin. I must beg you to correct the statement, for it is without the slightest foundation. I inclose a clipping from the American Churchman, which I earnestly hope you will publish. I am, dear sir, yours fraternally,

C. W. HIXON.

"In the Episcopal Diocesan Council for Wisconsin, a day or two ago, the following canon was adopted: 'Every communicant of the church marrying outside of our communion, or married by any other than a clergyman of the church, shall stand *facto* excommunicated.'

"The above item has been going the rounds of the secular press for the space of about a week. It first occurred, we believe, in a Milwaukee evening paper, whose report of the council was even more indelicately absurd than such reports usually are. Of course no such canon was adopted, nor even seriously considered by the council, and no person with any knowledge of the church, and a belief in the sanity of the delegates to the council, will believe that it did."—*American Churchman*, June 30.

REVIVAL IN JEFFERSON, TEXAS.

The following account of this remarkable work is taken from the Home Advocate, an excellent paper published in Jefferson:

The revival meetings at the Baptist and the Methodist churches still continue, and hardly a day passes without one or more conversions at both places.

The meeting at the Baptist church is now in its sixth week. Rev. Mr. Blitch, of Marshall, has been preaching regularly for about a week, and is still rendering valuable service; seventy-six conversions are reported, and one hundred and eleven additions to the church.

At the Methodist church the meeting is in its third week. Rev. T. W. Rogers, of Marshall, rendered valuable service for several days since our last issue, and left for home on Wednesday morning. During this meeting, up to the time of writing, about fifty are reported converted; twenty-four additions to the Methodist Church and nineteen to the Cumberland Presbyterian Church.

Rev. G. W. Cottingham, of Marshall, arrived on Wednesday night. We have not intentionally omitted to mention any ministers from abroad who have assisted in these meetings.

Truly a wonderful change has been wrought in the community, and it is believed by many that the good work is but fairly commenced.

Annex.—The following notice of the address delivered by our young friend is taken from the Gazette and Comet, of Baton Rouge:

The address delivered before the Literary Society of the Collegiate Institute, at the Methodist Church, on last Friday, by William Walker, Esq., of New Orleans, was one of the most chaste and eloquent efforts to which we have ever listened, well worthy of his exalted theme, "The Nobility of Man." The views advanced by the speaker were striking in their originality, and the language in which they were clothed fluent and graceful. Mr. Walker is evidently one of the rising young men of our State, and unless we are very much in error he is destined to play no unimportant part in her future history—that is, if he makes a proper use of his talents and learning, and we have every reason to believe that he will.

We have received the annual catalogue of the Southern University, of Greensboro, Alabama, for 1869-70. It is a neat pamphlet, and contains all needed information concerning the course of studies, expenses and location.

We have also received catalogue of Columbus Female Institute, of Columbus, Mississippi, for the twenty-fourth annual session, ending June 28, 1870.

Fort Oscar religion has got ahead of shows in Jefferson. We see by the Jimplette that the Tyrolina Alpic Trompe failed to make money enough to pay the printer's bill, and stepped off easy, before we knew they had arrived. The editor of that paper was after them at last accounts. Hope he will get his money, but let the trompe pass on. Hope Advocate, Jefferson.

The Sunday School Secretaryship.

To the children of the Church and to our co-workers in their cause:

On Tuesday, May 24, the late General Conference passed the following resolution:

"Resolved, That in order to meet the various wants of our schools, the entire department of Sunday school literature and requisites, including Sunday school music, be placed under the superintendence of a competent man, to be elected by this General Conference, who shall be known as Sunday school secretary, and who shall devote his entire time to this work."

To this difficult and responsible work the undersigned was directed by the General Conference to devote himself. He shrank from the task; not that he lacked love for the cause; but because he was distrustful of himself. In entering upon the manifold duties of his office, (including the editorial management of the Sunday School Visitor,) he purposes, in God's fear, and by the grace of the Spirit, to "forsake and set aside all" other "cares," and to "draw all his studies this way."

Those who have carefully considered the amount and variety of work allotted to the Sunday school secretary will see at once how necessary it is for him to be "diligent in business," and how proper it will be for him to "make haste slowly." He would be happy did he know that the friends of the Sunday school cause in our church realized, as fully as he himself does, his dependence upon their prayers and co-operation.

It is yet too soon for him to say what his plans are: his first duty is to learn. He can only assure his friends that he will give his constant attention to each one of the items in the report adopted by the General Conference, and that he will religiously devote his best energies to the earliest practicable accomplishment of all its recommendations.

It will be as gratifying to the church as it has been encouraging to the secretary, to have the assurance of our very worthy and efficient book agent, Rev. Dr. Reilford, that no pains or expense shall be spared to meet the wants of our Sunday schools. We may be assured that if the plans of the General Conference fail of success, it will not be the agent's fault.

The undersigned earnestly solicits the aid and sympathy of the entire church. He asks the assistance and countenance of our Bishops and presiding elders, of every traveling and local preacher, of every church authority, of every member of the church, and of every child in our Sunday schools. He knows full well how much he needs such assistance; he feels that he has a brother's right to expect it, and believes that it will be given him.

To those brethren who have, in their words and letters, given him so much encouragement, he cannot be too thankful. He desires, at this place, to thank his honored friend, Dr. Summers—whose gifts and multifarious labors for the church are known of all men; and whose devotion to the children no subsequent successes or failures in this department can obliterate—for his cheerful assistance in bringing out the August number of the Visitor.

The children will be glad to learn that the agent has already ordered a large lot of new and beautiful illustrations, that will both please and instruct. In due time we will announce our plans for the publication of a monthly, a semi-monthly and a weekly edition of the Visitor, at such rates as will place it within the reach of all our schools.

The time has fully come when we should all address ourselves, with renewed consecration, to the great work of raising up, "in the nurture and admonition of the Lord," a Christian generation. May the enlightening and sanctifying Spirit of all grace lead us into a better understanding of the relation our children sustain to the gospel, and to a more perfect obedience of our Saviour's solemn charge to his pontiff and forgiven disciple: "Feed my lambs!"

ARTICLES G. HAYGOOD,
Sunday School Secretary.

NASHVILLE, July, 1870.

COLLEGIATE INSTITUTE.—We have received a catalogue of this institution. Our readers are aware that the institute is located at Baton Rouge, and that Prof. W. H. N. Magruder is at the head of it. The principal, we observe, is assisted by H. B. Magruder, A. M., R. M. Walsh, Esq., and J. W. Clinton, Esq. We learn that the recent commencement exercises were of great interest, and that the session just closed was eminently successful. There is no better institution for boys than this, and our people cannot do better than to give it their support and patronage. The exercises of the school will be resumed October 3, 1870.

COMMITTEES OF EXAMINATION.

NORTH MISSISSIPPI CONFERENCE.

Admission on trial—George Shaffer, John Bargeroff, A. C. Allen.

First year—W. P. Barton, R. J. Jones, M. H. Ford.

Second year—A. J. See, A. Kendall, M. H. Ford.

Third year—T. Y. Ramsay, F. S. Putney, E. E. Hamilton.

Fourth year—Isaac Elbert, W. T. J. Sullivan, J. H. Brooks.

MISSISSIPPI CONFERENCE.

Admission on trial—R. Abney, T. Nixon, J. G. Jones.

First year—J. L. Forsyth, W. H. Leith, J. M. Pugh.

Second year—H. T. Johnson, C. G. Andrews, J. T. Heard.

Third year—B. Jones, W. L. C. Himmieutt, W. Harrington.

Fourth year—H. H. Montgomery, J. A. Godfrey, Josiah Barker.

D. S. DODGERS.

RICHMOND, Va., July 6, 1870.

CAMP MEETINGS.

There will be a camp meeting held in Springville, Springville circuit, Louisiana Conference, beginning on the first of September next. Let the preachers come.

JESSE FULTON, P. C.

A camp meeting will be held at Lumbard, De Kalb circuit, Macon district, Middle Conference, commencing on Thursday night before the fourth Sunday in September.

U. L. THOMPSON, P. C.

We have a power to suspend the prosecution of this or that desire; this seems to me the source of all liberty; in this seems to consist that which is improperly called free will.—Locke.

KOSKOO.—This medicine is rapidly gaining the confidence of the people, and the numerous testimonials of its virtues, given by practitioners of medicine, leaves no doubt that it is a safe and reliable remedy for impurity of the blood, liver disease, etc.

The last Medical Journal contains an article from Prof. R. S. Newton, M. D., president of the Medical College, city of New York, that speaks in high terms of its curative properties, and gives a special recommendation of Koskoo to the practitioners of medicine. This, we believe, the first instance where such medicines have been officially inducted by the faculty of any of the medical colleges, and reflects great credit upon the skill of Dr. Lawrence, its compounder, and also upon "Koskoo" in the view of all other medicines of the present day.

Norfolk Daily Journal, Dec. 11, 1869.

Obituaries.

Died, in the town of Lexington, Holmes county, Mississippi, on the southwest of April, 1870, Mrs. Penina Smith, wife of Captain W. H. Smith, of Snider county, Mississippi, in the thirty-fourth year of her age.

Mrs. Smith was born in Nottoway county, Mississippi, March 13, 1837; completed her education at the Alabama College, Black Hawk, Mississippi, and was married to Mr. W. H. Smith in the year 1856. She professed religion and joined the Baptist Church at an early age. In after years she joined the Methodist Episcopal Church South, of which communion she remained an acceptable member to the end of life. She was never a prominent or conspicuous member of the church, but went quietly about her Master's work, as assigned her in her family and among her neighbors; a faithful and loving wife, a dutiful and affectionate mother. In the home of the afflicted she carried comfort and consolation, while her peculiar mission seemed to be beside the sick and suffering. So ready and cheerful in her ministrations, her presence carried sunshine to the couch of anguish.

Her sickness was long and tedious, rather wearing her out by its tenacity than closing her life with its neatness. She bore her affliction with a patience and fortitude becoming a Christian, and died as those who fall asleep in Jesus. She leaves an afflicted husband, and numerous friends to mourn her death, and three dear children, the oldest of whom is hardly of sufficient age to remember the face or affection of her mother.

"She looks well to the ways of her household, and catcheth not the breath of illness."

"Her children arise up and call her blessed; her husband also, and her household."—Prov. xxxi, 27, 28.

The righteous, it is said, shall be in everlasting remembrance; and in the language of inspired wisdom, as above written, it is proposed to preserve a memorial of the late Mrs. PENINA SMITH, who departed this life on the twenty-fourth of February, 1870, at the residence of her husband, Mr. Peter Kemp, in the parish of St. Helena, in the forty-eighth year of her age, in the faith and hope of the gospel.

Those who knew her intimately, but

are to know her no more in this life, will readily recognize her likeness as truthfully and beautifully drawn in the above verses. At her domestic home, now the desolate home of her much afflicted husband, Mr. Peter Kemp, she was known and appreciated, and there faithfully filled the sphere of life which has been assigned to her sex by the morning pen of divine inspiration. It was there that "she whose price was above rubies" had her place and name among the living.

Though passing through the deep, dark waters of protracted affliction and sorrow to the grave, death had lost its terrors and the grave its gloom. In the school of affliction she had learned the lesson of submission to the divine will; and patiently hearing the pains and sufferings of mortality, she left her earthly home, to return to it no more, for a home with the "blessed above," where there shall be no more death, neither crying nor sorrow, neither any more pain, for with her "the former things have passed away."

To those whom she has left behind—her numerous and sorrowing children, her bereaved husband, himself the subject of great bodily affliction—to her numerous kindred and friends she has left an example, bright and cheering, of a dying Christian whose "God was peace."

"Blessed are the dead who die in the Lord; yea, saith the Spirit, for they rest from their labors, and their works do follow them."

"When passing sorrow weeps the past, And musing the present pain, The sweet to think of peace at last, And feel that death is gain."

J. H. M.

LET THE DEAF HEAR.

Dr. W. L. DAVIS, No. 10 Rampart Street, gives his latest attention to afflicting sensations pertaining to the Ear, such as Deafness, Noise, and the like.

On Friday, Dr. DAVIS'S NEW METHOD can be had of STEED & CO., 72 Camp Street, opposite the Post Office; Ellis, opposite the Post Office; also by mail, of the author, Glass Box 200, New Orleans Post Office. Price, Forty cents.

NEW ADVERTISEMENTS.

THE BOTTOMS HORSE POWER.

IMPROVED GIN GEAR.

A complete chain of improvements upon the style of gin gear in common use; while it retains all of the simplicity of the old style, it is an improvement upon it in every form and section. The improvements in the construction were not to create new principles, but by new arrangements to utilize and save the power that is largely lost in other styles of gear. Some of the

POINTS OF IMPROVEMENT.

1. Insuring the same length of lever the gear gets and saves double the proportion of power. 2. On account of its arrangement, giving much greater speed. 3. The same length of the lever is not required, hence the same gear is much less laborious than the old method. 4. The weight and bearing of the gear is much less. 5. The friction is greatly improved by means of adjustment of the bearings and the use of rollers. 6. The gear is much more durable. 7. It costs less than the old style of gear. 8. It is very durable, and any ordinary one-story building can be used for a gin house with it. The following are a few of the testimonials.

TESTIMONIALS.

[From Hon. Judge H. S. Bland of Montgomery.]

MONTGOMERY, June 1, 1870.

To the planters of Alabama I would say, from long experience and much observation, I have felt that great improvements were needed in cotton ginning gear, and from a year's experience in the use of the Bottoms Horse Power gin, and seeing that work, as well as from universal testimony, I am convinced that the invention is a WONDERFUL CHAIN OF IMPROVEMENTS, and is all that is CLAIMED FOR IT, AND JUST WHAT A PLANTER NEEDS.

B. S. BLAND.

[From the Montgomery (Alabama) Daily Advertiser.]

The exhibition of the Bottoms Horse Power gin gear, on Tuesday evening, drew great crowds, which were much interested. It really accomplished results much more than the proprietors have ever claimed for it, though their claims are fully justified. At a distance of one mile, showing its perfect adaptability and great usefulness for this kind of machinery, it was applied to a six-saw gin with crushing apparatus, and it was used without the least jar or noise, and the gin was running in the field or elsewhere, which Mr. Charles Kendall, of the Whiting place, gained his crop with last year, and which required eight miles to run. Two months ago, when the gin was taken out, when one mile had no difficulty in propelling it with a good roll of cotton, and all the machinery ordinarily propelled by eight and the company present, which was composed of many of our best planters and mechanics, with general consent, decided that the Bottoms Horse Power is better than its competitors have ever claimed for it, and while it is so simple, and its movement so easy, and it must be very durable. It would be economy for every planter to take down his old gear and replace it with this, even though he did not expect to gin but one crop.

The Bottoms Horse Power gin gear is now in use at the fully equipped plantation in the further test yesterday. One mile run the machine, ordinarily run by eight, with greater speed, which was variously estimated by different gentlemen who figured on it. The lowest estimate that any one made was three hundred and ten revolutions per minute for an ordinary gin, which is much more speed than any common ginning gear.

[From the Magnolia Telegraph and Messenger, November 24.]

Bottoms' Horse Power was tested yesterday before the Committee on Machinery. The committee expressed themselves highly pleased with the machine, and decided to purchase a forty-saw gin, with a good roll of cotton, with great speed. It has not only the best premium and honorable mention at Rome and Charleston and here.

MORRIS'S PLANTATION, March 2, 1870.

REMARKS: The Bottoms Horse Power will gin two miles of cotton with one mile in a day, which is a great improvement upon the old gear, which takes two miles in a day.

The gin is a big machine, with two miles in a day.

twenty years, and of the old style. With the improved gin I believe I could gin from five to six bales per day with two men, thus doing with one mile the work of four. I would not be without it for \$500. If I had any other gin I would tear it down and put the Bottoms Horse Power in its place.

F. M. YOUNG.

THOMASVILLE, GA., March 2, 1870.

I have known Mr. F. M. Young for years, and know him to be a planter of long experience, and a man of high character. Integrity and truthfulness, and his statements are entitled to full credit.

J. A. ALEXANDER, Judge S. C.

ALB. H. HANSELL, Judge C. C.

COLMAN, A. T. MCINTYRE.

M. C. SMITH, Esq., and others.

ALBANY, GA., Sept. 11, 1869.

MESSRS. BOTTOMS & HENRY.—Sirs: I am running one of your improved horse powers, with the roller well placed. I have also the roller with two miles, which I found heavy and killing upon four last year. It gins much faster. I think it gins double the amount with the same power.

J. M. CUTLIFE.

[From the N. O. Times.]

Notwithstanding the rather tedious weather yesterday, we made it a point to be present at the Bottoms Horse Power exhibition.

The first part of the exhibition consisted in running the horse power in connection with the justly celebrated Coleman's gin mill.

The mill operated was a fourteen-inch stone, and was readily and easily run by the horse power, with a single mile of roller, and in less than five minutes of time and a half to four bushels of the ground meal per hour, both the horse power and mill working freely, and demonstrating their truly superior merits for their respective purposes to the perfect satisfaction of all present. After thoroughly testing the utility and value of the horse power in driving the roller mill, it was next attached to the Emory "Universal" cotton gin and condenser.

The gin used was fifty saws in size, and the same as generally used heretofore by four horses on the gear commonly in use. This gin and condenser was used under the open shed, with no flat roof, and was readily driven up to its average capacity with a full team, which, when driven only once, applied the power. The great advantage of portable outfits in saving and economizing the space and cost of necessary machinery, and of erecting buildings and gin houses, was made clearly apparent to all present.

The whole exhibition was of a most satisfactory character to all who were interested or who participated.

[From the N. O. Times, July 6, 1870.]

Our attention has lately been more particularly attracted to that new arrangement in machinery known as the Bottoms Horse Power, and from the manifest great superiority in the nature of class gear, and all construction, and of friction, and its great simplicity and consequent small cost of construction, and its great adaptability, which we found it to all practical business men.

In another column we have found many testimonials in its favor from gentlemen well versed in machinery.

Testimony of the manufacturers of the justly celebrated GILLETTS' GIN, one of whom, Mr. H. B. GILLETTS, is an eminent machinist.

NEW ORLEANS, July 1, 1870.

Dr. HENRYSON.—Dear Sir: Your Horse Power gin gear is much better adapted, better proportioned, and much better adapted than any other horse power gear I have seen. I have found it to be the best I know of. And inasmuch as the styles of gear in common use on an average do not give a gin more than one hundred and seventy turns, and many I have counted give as few as one hundred and fifty, it is preferable to speed as well as in less friction, and I judge, in durability. Yours runs gins at least double and security on an average.

B. D. GILLETTS.

ALBANY, N. Y., July 2, 1870.

Dr. J. W. HENRYSON: The Bottoms Horse Power will run our five-saw gin, with full work, with two mules; therefore I think it a great improvement in gin gear.

T. P. GILLETTS, M. D.

As orders are rapidly accumulating, those who wish to secure the invention for this year's ginning will do well to send in their orders early, as the number of machines to be used in a common two-story gin house, or on the ground under the gin house, or in an ordinary building, or in the field, accompanied by instructions as to who will receive any help, and how to use it.

Personally I refer by permission to the following prominent and most extensively known Cotton Factors in this city:

MESSRS. BISHOP & MAY.

MESSRS. C. L. WALMSLEY & CO.

MESSRS. LUDMAN, ROGERS & CO.

The Child's Corner.

A HOUSEHOLD LESSON.

BY REV. PHILIP J. FULL.

Oh, dear! that careless, wicked child!
In mischief new I find him;
He's up the stairs like one run wild,
With track of mud behind him.
And, as he's thus from day to day,
At something or another,
I feel, whenever he's away,
It brings relief to mother.

I know a home, the street across,
Where dwelt a child and mother,
A husband and a father's loss
Had left to one another;
I heard the church bell toll to-day—
Mother and child are parted;
Her darling sings on high, they say,
But she is broken-hearted.

My careless pet I kiss and kiss;
I fondly bend above him,
And count it now but blessed bliss
To labor for and love him.
His muddy footprints on the stairs
I'll sweep away to-morrow;
I'd rather have ten thousand cars
Than know that mother's sorrow.

Oh, let us learn the lesson well,
Which seems divinely given,
And from those homes, where dear ones
Dwell,
Let frowning clouds be driven,
Tis strange that we, with children blest,
In life so coldly hide them,
And only learn to love them best
When grave-yard mosses hide them.

N. C. Advocate.

TOM'S CAPITAL JOKE.

Tom Devan had just thought of such a capital joke.

The treasurer was passing round the contribution box in the Sunday school, when the good joke came into Tom's mind, and the joke was to drop a counterfeit bill into the box. Tom's father, the night before, had taken a bad fifty cent bill from his pocket, saying: "There, I must throw that away. If I am not careful I shall pass it on some one who cannot afford to lose fifty cents as well as I can."

But Tom had picked up the money and kept it. He had shown it to the boys in his class, not letting them have a very good look at it, lest some of them should detect the cheat. As Tom's father sometimes gave his son considerable money to put into the box, the boys did not take much notice when Tom put it in, except when he said, "That was my money," the boy next to him made a face, and said, "Oh!" as if he did not believe a word of it. Just then the bell rang to close the school, and nothing more was said about it.

Mr. Barnes, the treasurer, as he was going home late after school, took the contribution money and put it into his pocket. Happening to want some small change, he took some from the envelop of the Sunday school money, and put a bill in its place, using the change he wanted, and putting the rest in his vest pocket. One of the small bills he took out was Tom's counterfeit fifty cents. It remained undisturbed for a couple of days. One afternoon about dusk, as he was visiting a poor woman in a rickety tenement house, she told him of a poor family in great want down stairs. The oldest child was a boy about eleven years old, just about Tom's age, but he was not so large. Mr. Barnes gave him Tom's fifty cent piece, and told him to get some wood for a fire and some supper. Little Will picked up his ragged cap, and buttoned his ragged jacket close around him, and ran out into the cold night. His bare feet were chilled by the cold stones, and the night wind whistled through his jacket, but he held the money tightly in his hand and ran to the baker's. There was a new man there, and poor Will, shivering with the cold, held out the money and asked for some bread. The baker shoved two loaves toward him and took the money. He handed it right back, saying: "That's bad; give me something else."

"That's all I have," said Will. "Give me back that bread, then," said the man roughly; "I believe that you knew the bill was counterfeit."

"Indeed, I did not," began Will, but the man stopped him, saying, "Come, be off." As Will opened the door to go, he added, "take care of your counterfeit money."

A policeman standing near heard the last remark, and followed Will down the street as he walked off. Will did not notice the policeman; he was saying to himself: "That gentleman couldn't have given me bad money. I'll try another place." Here he was refused, and went almost in despair into a grocery store. The policeman, who followed him, entered, and in spite of the child's crying took him off to the station-house for trying to pass bad money. "A gentleman gave it to me," said Will.

"I've no doubt of it," answered the policeman; "I guess you know more about it than you pretend to."

Meanwhile, Willie's sick mother and little brothers and sisters waited for him. He did not come. An hour passed, then two, and no Will. By and by they heard a man's step

on the stairs, and when they opened the door, there stood Mr. Barnes with some food and clothing for them. Instead of the happy faces that he hoped to see around a little fire, they sat in the dark, and the little ones had cried themselves to sleep on the floor.

Bad news travels fast. It did not take Mr. Barnes long to find out what had become of poor Will. While the children warmed themselves by a bright fire, and ate the supper that Mr. Barnes had brought them, he went to the stationhouse to find Will. He tried to think, as he went, how Will could have got counterfeit money, and finally concluded that it must have been some of the Sunday school money.

Poor Will had to stay all night in the stationhouse. In the cell that was next to the one he was locked up in was a drunken man, who swore and shouted and sang drunken songs till toward morning. There were others, thieves and drunken men, that Will was taken into court with, but Mr. Barnes was there and got him liberated immediately. It was not very pleasant for Will to hear a great ugly boy that lived in the same house with him, call out in the street: "Why, Will, how long have you been out of jail?"

Next Sunday Mr. Barnes told the superintendent of the school that he wanted to speak to the boys. "Boys," said he, "there was a large piece of money put into the box last Sunday; can you tell me who put it in?" Tom did not feel inclined to tell, but one of the boys near him, who thought it very nice that one of their class should have given so much, answered, "Tom Devan."

"Stand up, Tom," said Mr. Barnes. "Did you put fifty cents in the box last Sunday?"

"Yes, sir."

"Was it a good bill?"

"I only put it in for fun," said Tom; "the other boys put in buttons sometimes."

Then Mr. Barnes told the whole story.

How would any of you have liked to be in Tom's place?—*Christian Union.*

The Farm and Garden.

HORSES.

The following was read at a recent meeting of the St. Louis Farmers' Club:

MR. PRESIDENT AND GENTLEMEN OF THE FARMERS' CLUB: Of all the animals furnished man by the beneficent Creator of the universe, the horse ranks pre-eminently first and highest. In discussing his merits we do not propose to disparage other useful animals, as each occupies an important place in the animal economy. As an animal of material wealth he is unsurpassed. The horse has been admired for his sterling qualities in all ages of the world. His beauty and power have been extolled. The grandeur of his style and fleetness of his movements have excited the multitude into bursts of rapturous applause. In a recent discussion a member of the club referred to a description of this noble animal, to be found in the oldest writing extant. He pronounced it the best description, and justly, too. The description can be found in the book of Job, in the Bible, thirty-ninth chapter, which I transcribe:

"Hast thou given the horse strength? Hast thou clothed his neck with thunder? Canst thou make him afraid as a grasshopper? The glory of his nostrils is terrible. He paweth in the valley and rejoiceth in his strength; he goeth on to meet the armed men; he mocketh at fear and is not affrighted; neither turneth he back from the sword. The quiver rattleth against him, the glittering spear and the shield. He swalloweth the ground with fierceness and rage; neither believeth he that it is the sound of the trumpet. He saith among the trumpets, ha, ha; and he smelleth the battle afar off, the thunder of the captains and the shouting."

Solomon's kingdom, with more than oriental splendor and magnificence, would have been incomplete without the horse. The royal monarch imported horses from Egypt at a cost of one hundred and fifty shekels each, being \$93 75 each. The historian informs us that Alexander the Great was an admirer of the horse, and that while quite a youth he performed a remarkable equestrian feat. After a battle, in which Napoleon was victorious, in passing over the battlefield when men and horses literally covered the ground, he remarked to one of his marshals: "This is a great pity; these were fine horses; they cost \$120 each." The same authority stated that he made no mention of his dead soldiers.

There are two million horses in the United Kingdom of Great Britain, and about eight million horses in the United States. The value of the horses in our country, estimating the average price, at \$75

each, would be \$600,000,000. Under a high state of physical development or perfection, which can be produced by judicious breeding, the horse can be improved so that his value will average at least \$50 more than he obtains now, thus adding \$400,000,000 to the aggregate material wealth of the country. The treatment of the noble animal under consideration should receive the careful consideration of the club, as well as every friend of this noble servant of man. The gladiatorial exhibitions in Rome were inaugurated for the entertainment of a debased, demoralized public sentiment. The bull fights in Spain were held in the plaza to furnish amusement for a semi-enlightened people. Our horse-racing on the course, and exhibitions in the amphitheater at our great fairs, are a modified type of the same debased, demoralized public sentiment, and while the exhibition affords sport for the multitude, it is cruel treatment of the noble horse.

In the nineteenth century, under the influence of an enlightened Christian civilization, we expect that even the animal creation should receive kind and humane treatment from the lords of creation. Nevertheless, we find that such is not the fact. For our illustration we take a single employment where the horse is treated with the utmost cruelty. I refer to the street railroads; here the horse is driven, I may say, literally to death. Were the proprietors of street railroads under the influence of the divine law, and permit the horse to rest on the Christian Sabbath, it would, in some measure, extenuate the diabolical cruelty practiced on the horse. The poor horse is doomed to toil seven days in the week; engaged in transporting pleasure seekers from point to point on the Sabbath, and lazy church members, including ministers of the gospel, to and from the church.

The well broke and trained horse is always ready to remunerate his owner for anything except his maintenance; therefore his treatment should be kind and humane—well stabled, well fed and groomed. WALLACE SIOBERSON.

DEEPLY AND THOROUGHLY BREAKING

LAND.—Do farmers in general reflect upon and practice enough of what we have headed this article? We think not. We know to do so takes time and labor. But cultivators are now much aided in preparing properly their land by great improvements in labor-saving machines and implements. How much plows, for instance, have been improved the last thirty years, both for common plowing as well as subsoiling. Also in cultivators, harrows and clod-crushers. How wonderful are the results now proved by subsoiling, draining, trenching and pulverizing. All these operations take time, and therefore money. But do they not well repay the cost? Is it not capital well laid out? The subsoil plow is very valuable. By its use the soil, of course, will be less wet in great rains and more moist in great drouths. Generally, where the subsoil and draining are practiced, in comparison with only the common plow, the yield will be fifty per cent more, and the crop in dry weather always green; but if the subsoil is a stiff clay, it should be turned to the surface only gradually. Many farmers are destroying the productiveness of their farms by shallow work. As they find their crops are diminishing they think only of extending their acres of surface, as they suppose their deeds, only give them a right to six inches of earth. But the law has in reality given them three furrows instead of one, if they only will, in some way, work deep.

HOUSEKEEPERS' DEPARTMENT.

SUGGESTIONS ABOUT SOUP.

The basis of a soup par excellence is a clear, strong broth, which is designated in the cook vocabulary as "stock;" to this is added such vegetables, herbs or grains as will give to it the peculiar flavor or character desired. Skill in the preparation of soup should be considered one of the necessary points in household education.

To attain perfection in this art, as in others of the culinary department, it is well to observe the rules and method adopted by such teachers as Carime, Soyer, Dr. Ketcher, and our present eminent Prof. Blot, who have made the subject of cooking a scientific matter, to be governed by chemical principles.

In the present day clear soups are preferred for a company dinner, while any well made broth is acceptable at the family board. A number one soup should be made of very fresh meat, for the reason that the fibers toughen after it is killed. Calves' head and ox tail make superior stock. Next in value come good ox beef, veal and poultry; last of all should be chosen mutton—that is, in regard to appearance. All scraps and trimmings of meat, poultry and game are useful ingredients for the soup pot. The water in which meat or poultry has been

boiled should never be thrown out, as it will serve for soup stock or gravy. Even the water from corned beef may be converted into a very passable soup by diluting and adding vegetables. Soups made from remnants of cold meat will answer very well, if the meat was not overdone.

To insure a strong, clear soup plenty of time should be allowed; therefore it is much the better way to prepare the stock the day before it is to be used.

For a fine quality of broth a pound of lean meat must be used for every quart of water; when there is much bone less water should be used.

Bone is an essential ingredient. To prepare the meat: Cut it in small pieces and break the bones, add cold water and place the pot where it will come very gradually to the boiling point; thus the fibers will become relaxed and the gelatin dissolved. Keep the pot closely covered, else the flavor and a portion of the broth will be lost. Throw in salt, a little at a time, occasionally during the first hour; stir from the bottom with a wooden spoon, and skim frequently. If necessary to add more water, be sure it is hot. Eight or nine hours of close, steady boiling will furnish an unexceptionable broth.

It is almost impossible to have a good soup for dinner if made the day it is to be used.

A simple stock—that is, one of which it is designed to present a variety of soups, as is the case in families where it is in daily requisition—should consist of broth simply seasoned with pepper and salt, the other ingredients may be added as it is to be used.

Thick soups require more seasoning than thin. Never allow the soup to stand in an iron pot a moment after it is removed from the fire; strain immediately through a cloth laid in a cullender into a clean stone jar. When it is necessary to use a soup the same day, to facilitate the process of separating the grease dip the cloth in cold water.

To make soup transparent beat the whites of two eggs with their shells with a little cold water, (this will clear a gallon of broth,) and add by stirring hard. As soon as the broth is sufficiently cooled remove the "top pot," as the fat is called. This may be taken off in a cake, and is particularly useful for frying purposes.

For thickening soups you may use bread crumbs, flour, potatoes, peas, beans, rice or eggs. They should be added before the soup is strained, that the consistency may be uniform.

To give body to a clear soup, use gelatine, tapioca or eggs.

For a rich brown soup, use burnt sugar. Grated carrots make a very handsome colored broth.

Sippets of bread cut in the shape of diamonds and fried a bright brown are often thrown in to clear soups.

Vegetables should be cut in small dice and added just long enough before the time for seasoning to cook them.

An onion stuck full of cloves gives dark soups a rich flavor.

Below we give a recipe for an excellent soup of gumbo or okra, which is a delicious ingredient and one which may be easily raised and will keep for winter use if sliced thin, strung and dried; soak it over night and it will be ready for use. This vegetable is now so popular in our city markets that it would be well to raise some for profit as well as for home use. It does not require a particularly rich soil. Plant the seeds thinly, about three feet apart; they grow large and produce an abundance of pods. In Turkey they form an essential in all national dishes, and have long been much used in our Southern States. Who has not heard of the favorite dish called "gumbo," which consists of stewed chicken, rice and okra.

GUMBO SOUP.

Fry a light brown two pounds of the round of beef with four sliced onions; put into the soup pot with four quarts of water, half a can of tomatoes or a dozen fresh ones, one teaspoonful of sliced okra and one green pepper; boil slowly five hours and put through the cullender. Throw into the tureen some sippets of fried bread and serve at once.

This soup is sufficiently rich and healthy to form the basis of a family dinner, and will, if the members are not over particular, take the place of a roast.—*The Household.*

Just praise is a good thing and well to be bestowed. More of it is withheld by envy than by judicious concern for the welfare of the praiseworthy. It may, however, be said that they who deserve it the most need it the least.

HUMILITY is truth, and pride a lie: the one glorifies God, the other dishonors him. Humility makes men to be like angels, pride makes angels to become devils.—*Taylor.*

Actions, looks, words, steps, form the alphabet by which you may spell character.—*Lawler.*

BELLS—BELLS.

CHURCH BELLS. CHURCH BELLS. We are prepared to furnish Church Bells, of Steel Composition, having a rich, deep tone, at the following prices, which place it within the power of all Churches to be provided with a good Bell:

Weight.	Wt. of Bell.	Price.
24-inch Bell...	250 lbs	\$65.00
30-inch Bell...	650 lbs	135.00
40-inch Bell...	1000 lbs	175.00
48-inch Bell...	1200 lbs	265.00

These Bells are warranted for one year against breakage in ordinary use.

TILOS, H. BOILEY & CO.,

"These celebrated Bells (not Cast Iron or 'Amalgam') rival in purity and volume of tone those of copper and tin, are durable, and cost only one-third as much." Send for descriptive circular. 25c 1y

MISCELLANEOUS.

BROOKS' IMPROVED PATENT

WROUGHT IRON REVOLVING

COTTON SCREW PRESS.

Patented by R. M. Brooks, of Georgia, April 14, 1868.

It took the first premium at the Louisiana State Fair, at New Orleans, April, 1868, over eleven competitors; also at the Tennessee State Fair, at Memphis; and more recently at the Mississippi State Fair, at Jackson; and again at the recent State Agricultural Fair, at New Orleans, April, 1870, in a contest with fourteen Cotton Presses, embracing the most approved patents from different States of the Union, North and South.

The following is the certificate of some of the principal cotton factors and merchants of New Orleans. In our circulars can be seen the certificates of practical planters and seedling cotton from several Southern States in regard to the admirable principle and practical working of this Press.

We, the undersigned, purchased last season from Messrs. J. B. Jennings & Co., the Brooks Revolving Cotton Screw Press for our cotton, and so far have heard from them, they have given entire satisfaction. Messrs. Greenwood & Son, Warren, Crawford & Co., C. I. Walmesley, Irlby, McDonald & Co., Frank & Daniel, Campbell & Strong, Clapp Bros. & Co., E. F. Golan & Co., R. S. Walker, Violet, Black & Co., Black Bros., Wright, Allen & Co.

Circulars, giving cuts, with full description, price list, etc., sent by mail on application to J. B. JENNINGS & CO.,

Proprietors, 14 Union street, New Orleans.

GEORGE B. HOLZACH'S

PATENTED IMPROVED

MOVABLE WINDOW SHADE.

This improvement relates to a new and simple manner of so arranging window shades—that light and air can be admitted into the room through the upper part of the window without raising any portion of the shade; and when the window is furnished with the combined screens its usefulness and comfort in warm weather, when a good current of fresh air is so welcome, cannot be surpassed.

Parties, dining rooms and bed rooms, the latter especially in time of sickness, are by this improved combination thoroughly ventilated and lighted at pleasure, without the slightest inconvenience to the sleeper or patient, or exposure to the passer-by.

It can be attached to any window with but little alteration and at moderate expense. Orders solicited and promptly attended to. State Rights for sale by

GEORGE B. HOLZACH,

Inventor and Patentee,

404 3m 61 Camp street, New Orleans.

BRACES AND TRUSSES.—**DR. JOHN C. BANGELL** informs the medical profession and others that he has constantly on hand and for sale a complete assortment of BANGELL'S TRUSSES, Spinal and Shoulder Braces, and other appliances for the prevention, relief and cure of general debility, vocal weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, spinal weakness and neuralgia, dyspepsia and nervous affection, constipation and chronic diarrhoea, female derangements and extreme displacements of the womb, RETRACTION, PILES, prolapsus-ani, and weakness of the male and female system.

These light, cool and springy auxiliaries are the special favorites of the profession; are intensely common-sense and rational in their action; supply a missing link in treatment; place the above affections in a new and more hopeful light, and often complete cures where medicine can only mitigate, many more than it can cure a hernia or dislocated joint.

He specially desires an examination of these appliances by the profession and sufferers. Where necessary the professional application of the above braces will be under our supervision or that of the family physician.

These valuable appliances are sanctioned by a large number of the medical profession in the United States and Europe as the best adapted to fulfill the purpose for which they are intended, and the Trusses and Braces are adopted by the United States government for the use of the army and navy. Terms cash. Consultations free. Send for your pamphlet; it is better to call.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD

NOW IN USE.

THE FASHION.

We call especial attention to this Stove, which has been produced at great expense, comprising all the new and important improvements; also to the extra heavy Enamel under the fire chamber, the Patent Air Chimney, Front Doors, and Patent Wills Enamelled Iron Knobs, the improvements in the covers and centre pieces, all of which have been covered by Letters Patent, and are used in no other stove. They are warranted to stand fire, or others sent free of charge in all cases. We have all sizes of this justly celebrated Stove, both

PLAIN AND EXTENDED BACKS,

the Extended Back with cast Iron Enamelled Reservoir and Faucet, Tin Warming Closet, Gridiron Cover, etc. The part of the top supporting the Reservoir is raised so that the fire is above the top plate, instead of below, as is the case in most of the Stoves now used, and the heat is forced directly against the whole surface of the bottom of the Reservoir. The Reservoir, being detached from the pipe, can be removed at pleasure, thereby forming a six-hole Stove—the best in use, as the back holes will heat as well or better than the middle ones. For sale by

G. W. W. GOODWYN,

62 Camp street.

ALSO, THE MOST

Complete and Perfect Cooking Stove

FOR BITUMINOUS COAL OR COKE

The Christian Advocate.

SATURDAY, JULY 16, 1870.

THE BATTLE OF THE GREEKS.

We have capped as above a few pages from Bishop Marvin's Life of Caples, reporting a sermon of Caples on baptism. The reader will equally admire the skillful wit of the author and of the sketcher of the sermon.

I have said that he never indulged his wit in the pulpit. I never heard of but one exception to this. It occurred at Savannah. Elder Higgins, of the Campbellite Church, had been carrying on a meeting for some time, and had immersed great numbers of people. The preaching had been largely, of course, on the mode of baptism. A popular fervor was raised on the subject of immersion. Methodists and others insisted that Caples should preach a sermon to meet the current. He was reluctant, but at last yielded. For once he determined to preach *ad captandum*. The result was a sermon altogether unique, and such as he alone could make. No one else need ever attempt one on the same plan, unless he wishes to make himself ridiculous. But he could do it to perfection. The sermon was allegorical, the basis of allegory being a military campaign. My account of it was from his own lips.

First came the preliminaries—efforts on both sides to secure the alliance of the Greeks. At this point he reviewed the controversy on the meaning of such Greek words as are involved in the baptismal contest. The result was a firm alliance with the Greeks. No trouble about soldiers now. The Greeks love to fight. They will enlist to a man, if need be, and take the front in every battle. The army now organized, every phalanx takes the field. Active operations begin.

He is at no loss where to find the enemy, who is in force at the *ford of the Jordan*. The argument on John's baptism was here gone over, and the Greeks, all in phalanx, with spear and buckler, fresh, confident, invincible, make the charge. There is desperate courage in the immersionist ranks. This ford is the key of their position. They are conscious of it. This lost, disorganization and overthrow are imminent. They fight like heroes. But one phalanx after another, imperturbable as truth itself, bears down upon them, until they waver, their columns break, and they fly. The retreat is rapid, made in some disorder, and in the direction of *Enon*.

He predicts that they will rally at *Enon*. There is water there, much water; and the line of the Jordan lost, this point is vital. Taking no time to breathe, he marches his Greeks, flushed with victory, upon *Enon*. As he expected, the immersionist forces are massed here. No time is lost. The attack is brought on at once and furiously. Here he gave the argument on this passage. The enemy makes a better stand than he expected. He had calculated upon their being disheartened from defeat and the loss of their most important line of defense. But they fight with absolute desperation now. They "fight for their firesides and their altars."

They seem eager to die. But on come the Greeks; they never falter. Truth knows no pity. Whoever stands in its way must be run over. The phalanx of truth receives no check in the desperate bloodshed that stains all the springs of *Enon*. At last the shattered columns of the enemy break. They fought till hope was gone—long after it was gone they still fought—fought from sheer desperation and from the instinct of fighting. Immersionists are all born fighters. But it avails nothing. What the maddest bravery could do has been done. All goes for nothing. *Enon* is lost. Nothing remains now but to surrender at discretion or maintain a hopeless, desultory warfare for awhile. The last line of defense is lost. A sound discretion would dictate peace on any terms in such a situation. But who ever knew an immersionist to surrender? Like the Mamelukes, they keep slashing with their swords while they are dying.

At last they fly. The Greeks hold *Enon*. The retreat is precipitate. With a little delay as possible he brings on his forces in pursuit. The enemy has fled to the desert toward *Gaza*. There is, however, no difficulty in following. The desert is strewn with abandoned impedimenta, and with the exhausted, the wounded and dying. He hastened forward and soon came upon them. They had found water in the desert; probably not much—possibly enough to cover a man. At any rate it was water. The Jordan lost, and *Enon* lost, every little puddle in this scarce country was worth a fight. Here, accordingly, was another battle, and another defeat of the enemy. In this case it was an utter rout. It would seem that this must end the unequal conflict. Yet he would make thorough work of it, so he led his Greeks forward. Not an enemy was to be found. They had certainly

disbanded and given up in despair. He goes into camp, however, prudently resolving not to disorganize his forces, for he dreads guerrilla operations. Beating around the country in search of any trace of the fugitives, he hears a melancholy voice—a sort of wail. "It is a voice from the tombs," said he; "they have taken to the tombs! Hark! Do you hear that? 'Buried with him in baptism.' I knew it. They have intrenched themselves in the tombs."

Deprecating the violation of the tombs by the din of war, but determined at all costs to secure the fruits of so many victories, he made the last attack and took the tombs. It is not to be understood that this allegory constituted the staple of the sermon. Argument, illustration, exposition of Scripture, formed the substance of the discourse. The allegory, managed as he alone could do it, secured a popular effect, kept attention on tiptoe, and well disposed his audience to receive the more important and substantial matter which he gave them.

I feel in this, as in every instance, that I have given no just idea of the vivacity, vigor and taking character of his public efforts. It is not in me to do it. Indeed, if they had been taken down, word for word from his lips, the printed speech would give no idea of the spoken speech. Voice, face, that peerless eye, the very attitude of the man, gave more meaning than the words did.

INDIA RUBBER.—"Where do they get India rubber?" said a chubby little girl one morning as she pulled on her over-shoes before starting for school.

The caoutchouc (koo-choek) or India rubber tree is in the East Indies and in South America. It grows to the height of forty or fifty feet without branches; then, branching, it runs up fifteen feet higher. The leaf is about six inches long, thin and shaped like that of the peach tree. The trees show their working by the number of knots or bunches, made by tapping; and a singular fact is that when most tapped they give most milk or sap.

As the time of operating is early day, before sunrise the tappers are at hand. The blacks are first sent through the forest armed with a quantity of soft clay and a small pickax.

On coming to one of the trees the black forms a portion of the clay into a cup, and sticks it to the trunk. He then strikes his pick over the cup, and the sap oozes out slowly, a tree giving out daily about a gill. The tapper continues in this way, tapping, perhaps fifty trees, when he returns, and with a jar, passing over the same ground, empties his cups. So by seven o'clock the blacks come in with their jars ready for working. The sap at this stage resembles milk in appearance, and somewhat in taste. It is also frequently drunk with perfect safety. If left standing now, it will curdle like milk, disengaging a watery substance like whey.—*The Household*.

TORTURES IN DRESS.—A writer in Chambers' Edinburgh Journal thus details them: About a hundred years ago a lady went about with shoes that raised her heels three inches above the floor, and threw her whole person out of its proper balance; occasionally, of course, a severe strain upon certain muscles, attended by constant pain.

A little later a tower of hair, pomatum, flour, pins and pinners, had been reared on the head, such as an inquisitor might have considered himself very ingenious in devising. In more recent times we have seen the entire sex submitting to torture in the waist, with an equal degree of magnanimity. Or, taking the form of a monstrous prolongation of skirts, the fair martyrs act as scavengers upon every street in which they promenade.

In a form of bonnet for summer wear the front comes only to about an inch behind the forehead, so as to leave the face fully exposed to the attacks of the sun. A great number find it absolutely indispensable to add to this abbreviation of a bonnet a sort of supplement of silk, called "an ugly." A couple of inches added to the bonnet itself would serve the end; but such a thing is not to be thought of.—*The Household*.

REPTILES CURED. With an experience of more than twelve years' practice in the treatment and cure of RHEUMATISM, I will guarantee more perfect relief, comfort and security, and a more rapid improvement than can be obtained of any other person or appliance in the South, without regard to the age of the patient or length of time afflicted.

Also instruments for the cure of every species of human deformity on hand or made to order. Call on or address, with stamp for circular, Dr. T. ST. C. FERRISS, office No. 16 St. Charles street, up stairs. Hours from 10 A. M. to 4 P. M.

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS.

PUBLISHED BY CHARLES SCRIBNER & COMPANY, 654 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books. "Incomparably superior to anything published."—*Agassiz*. Introduction to the Study of Geography. Elementary Geography. Intermediate Geography. Common School Geography.

Guyot's System is approved and endorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenney, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that it will be the pupils of this generation, obtain a clearer, more definite and extended knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

FELTER'S POPULAR SCHOOL ARITHMETICS. First Lessons. (Illustrated.) Primary Arithmetic. (Illustrated.) Intellectual Arithmetic. Intermediate Arithmetic. Grammar School Arithmetic. Practical Arithmetic.

PROF. COOLEY'S WORKS ON NATURAL SCIENCE. A Text-book of Chemistry. A Text-book of Natural Philosophy.

PROF. SANDOZ TENNEY'S NATURAL HISTORIES. Natural History of Animals for the Young. A Manual of Zoology. Natural History Tablets.

PROF. HENRY N. DAY'S WORKS. Introduction to the Study of English Literature. Art of Composition. Art of Dissection. Elements of Logic. American Speller.

PROF. SHELTON'S WORKS ON OBJECT-TEACHING. Manual of Elementary Instruction. Lessons on Objects. First Reading Book. Phonetic Reading Charts.

GRAMMAR AND COMPOSITION. Dalglish's Grammatical Analysis. Harper's Practical Composition.

PROF. GUYOT'S WALL MAPS FOR SCHOOLS. Large Series.—Wholesale list price, per set, \$71. Intermediate Series.—Wholesale list price, per set, \$38.60. Common School Series.—Price, \$25. Primary Series.—Price, \$18. Classical Series.—Wholesale list price, per set, \$45.

PERCEE'S MAGNETIC OBJECTS. One dozen Magnetic Objects, representing men of different races, ships, steamers, light-houses, and various animals, accompanying each Globe, without additional cost. Lessons on the Globes. Illustrated by Percee's Magnetic Globe and Magnetic Objects. By Mrs. Mary Howe Smith.

Extra Magnetic Objects for Percee's Globes. I. Animals of all Climates. II. Nations. Flags.

Descriptive catalogues and mammoth circulars of testimonials forwarded free of postage to any address. Most favorable terms afforded to school boards or teachers desirous of introducing the above Text-books.

MEDICINE—MEDICINE.

KOSKOO.....KOSKOO.

THE GREAT REPUTATION which Koskoo has attained in all parts of the country

AS A GREAT AND GOOD MEDICINE, AND THE LARGE NUMBER OF TESTIMONIALS

which are constantly being received from physicians, and persons who have been cured by its use, is conclusive proof of its remarkable value.

As a Blood Purifier it has no Equal, BEING POSITIVELY

THE MOST POWERFUL VEGETABLE ALTERNATIVE YET DISCOVERED.

DISEASES OF THE BLOOD. "The life of the flesh is in the blood," is a Scriptural maxim that science proves to be true. The people talk of bad blood—as the cause of many diseases, and like many popular opinions this of bad blood is founded in truth.

The symptoms of bad blood are usually quite plain. Bad Digestion causes imperfect nutrition, and consequently the circulation is feeble, the soft tissues lose their tone and elasticity, and the tongue becomes pale, broad, and frequently covered with a pasty, white coat. This condition soon shows itself in roughness of the skin, then in eruptive and ulcerative diseases, and when long continued results in serious lesions of the Brain, Liver, Lungs or Urinary apparatus. Much, very much, suffering is caused by impure blood. It is estimated by some that one-fifth of the human family are affected with Scrofula in some form.

When the Blood is pure you are not so liable to any disease. Many impurities of the Blood arise from impure diseases of large cities. Radiate every impurity from the fountain of life, and good spirits, fair skin and vital strength will return to you.

KOSKOO AS A LIVER INVIGORATOR STANDS UNRIVALED.

BEING THE ONLY KNOWN MEDICINE that efficiently stimulates and corrects the hepatic secretions and functional derangements of the Liver, without debilitating the system. While it acts freely upon the Liver, instead of copious purging it gradually changes the discharges to a perfectly natural state.

SYMPTOMS OF LIVER COMPLAINT AND OF SOME OF THOSE DISEASES PRODUCED BY IT. A sallow or yellow color of the skin, or yellow-brown spots on the face and other parts of the body; dullness and drowsiness, sometimes headache; bitter or bad taste in the mouth; internal heat; in many cases a dry, teasing cough; unsteady appetite; sometimes sour stomach, with a raising of the food; a bloated or full feeling about the stomach and sides; aggravating pains in the sides, back or breast, and about the shoulders; constipation of the bowels; piles, flatulence, coldness of the extremities, etc.

KOSKOO is a remedy of wonderful efficacy in the cure of diseases of the Kidneys and Bladder. In these affections it is as near a specific as any remedy can be. It does its work kindly, silently and surely. The relief which it affords is both certain and perceptible.

DISEASES OF THE KIDNEYS AND BLADDER. Persons unacquainted with the structure and functions of the Kidneys cannot estimate the importance of their healthy action. Regular and sufficient action of the Kidneys is as important, nay, even more so, than regularity of the bowels. The Kidneys remove from the Blood those effete matters which, if permitted to remain, would speedily destroy life. A total suspension of the urinary discharges will occasion death in from thirty-six to forty-eight hours.

When the Urine is voided in small quantities at the time, or when there is a disposition to Urinate more frequently than natural, or when the Urine is "high-colored" or scalding, with weakness in the small of the back, it should not be trifled with or delayed, but Koskoo should be taken at once to remedy the difficulty before a lesion of the organs takes place. Most of the diseases of the Bladder originate from those of the Kidneys; the Urine being imperfectly secreted in the Kidneys, proves irritating to the Bladder and Urinary passages. When we recollect that medicine never reaches the Kidneys except through the general circulation of the Blood, we see how necessary it is to keep the Fountain of Life pure.

KOSKOO Meets with great success in the cure of DISEASES OF THE NERVOUS SYSTEM. Almost nine-tenths of our people suffer from nervous exhaustion, and are, therefore, liable to its concomitant evils of mental depression, confused ideas, softening of the brain, insanity, and complete breaking down of the general health. Thousands are suffering to-day with broken-down nervous systems, and, unfortunately, tobacco, alcohol, late hours, over-work, (mental and physical), are causing diseases of the nervous system to increase at a fearful ratio.

The symptoms to which diseases of the nervous system give rise may be stated as follows: A dull, heavy feeling in the head, sometimes more or less severe pain or headache; periodical headaches, dizziness, noises or ringing in the head; confusion of ideas; temporary loss of memory; depression of spirits; listlessness during sleep; bad dreams; hesitation in answering questions; dullness of hearing; twitching of the face and arms, etc., which, if not promptly treated, lead to Paralysis, Delirium, Insanity, Impotency, Apoplexy, etc., etc.

KOSKOO is not a secret quack remedy. FORMULA around each bottle is recommended by the best Physicians, eminent Divines, Editors, Druggists, Merchants, etc. The Best and Most Popular Medicine in Use.

PREPARED ONLY BY J. J. LAWRENCE, M. D., ORGANIC CHEMIST.

SCHOOLS AND COLLEGES.

J. W. BLACKMAN'S

COMMERCIAL COLLEGE,

61 CAMP STREET, Corner Commercial Place, N. O.

Open day and evening the entire year. Penmanship, Book-keeping, Mathematics and Languages are practically taught by experienced professors. Persons from twelve to fifty years of age attend. The instruction is private to each student. Persons who have neglected their education can here speedily qualify themselves for good situations in business. Some from the country may obtain board in the family of the principal.

William Walker, a late graduate of the Southern University of Alabama, and son of the Rev. Dr. J. B. Walker, of New Orleans, has charge of the Mathematical department. Terms: Ten to twenty per cent. less than other colleges in this city.

A liberal deduction made when three or more enter together. The principal, as a practical teacher in New Orleans since 1851. For circulars, giving terms, etc., address J. W. BLACKMAN, New Orleans.

LOUISIANA STATE UNIVERSITY,

(Name changed from Louisiana State Seminary.)

BATON ROUGE, LOUISIANA.

Founded and supported by the State of Louisiana.

The ninth session, now in progress, will close last Wednesday in June, 1870. The next session will begin first Monday in September next, and will continue ten months.

The Academic Board consists of a full corps of able instructors in all branches of Literature and science usually taught in the best Colleges and Universities.

The Course of Study embraces a Preparatory and an Academic Department, including a Literary, Scientific and Optional Course, a Special School of Civil Engineering and a Commercial School.

Library, Apparatus and Cabinets are well selected and valuable. The Geological and Mineralogical Cabinets, etc., the largest and most complete in the South, embracing the extensive collections of the late Col. Wallace, of Mississippi, and the Cabinets of the Topographical, Geological and Botanical Survey of Louisiana.

Admission granted to cadets not under fifteen years of age, who know arithmetic, English grammar and geography.

Expenses of every kind, except clothing, for ten months, \$350; \$250 payable in advance, balance February 1; or by accepted draft, at eight per cent. for ninety days. Payments may be made through the Canal or Citizens' Bank.

Cadets received at any time during the session and charged from date of entrance.

Discipline, military, under the care of a battery of four guns will afford facilities for instruction in artillery. Uniform of cadet: Gray cloth, to be had at the institution at a cost of \$25 per suit.

For further information address D. F. BOYD, Superintendent, Baton Rouge, La.

Office of the University in New Orleans, at Swarthick & Co.'s, 59 Camp street.

*Until the rebuilding of the College edifice, lately destroyed by fire, the institution is temporarily located at Baton Rouge, in the Deaf and Dumb Asylum. Location very healthy, and accommodations ample for a large number of cadets. Number this session, 170. J214

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES.

VOL. XVI.

NEW ORLEANS, SATURDAY, JULY 23, 1870.

NO. 27.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, July 15.—General McClellan has been elected chief engineer department of docks, New York city.

Peter Negley was confirmed assistant treasurer at Baltimore.

The cabinet held a session to-day at the capitol.

Baron Geralt declared in diplomatic circles to-day that Prussia was fully prepared for the war.

The Senate confirmed Mr. Frelinghuysen as minister to England, vice Mr. Motley.

The President has signed the Georgia bill. All appropriation bills have been signed.

There will be no special legislation by Congress. Congress adjourned sine die this evening.

WASHINGTON, July 19.—Minister Washburne to-day telegraphed Secretary Fish from Paris that he had returned to that city.

The cabinet meeting to-day was only informal, and the conversation was mainly upon European complications. The government has no official information.

Secretary Fish telegraphed Minister Washburne, at the request of the North German government, asking permission for the American legation to extend to the subjects of that kingdom the same degree of personal protection as we extended to French subjects in Mexico by our legation there—the request coming at that time, just three years ago to-day, from Baron Monnier, their minister for foreign affairs of France.

WASHINGTON, July 20.—Prevost Paradol, the new French minister, committed suicide this morning, at one o'clock, by shooting himself with a pistol while deranged from heat and overwork.

NEW YORK, July 20, 10 A. M.—Gold opens at 121½.

NEW YORK, July 20, 10.30.—Gold 121½.

NEW YORK, July 20, 11 A. M.—Gold 122½.

NEW YORK, July 20, 11.30.—Gold 123½.

RALEIGH, N. C., July 20.—The habes corpus case of the citizens arrested by Kirk in Alamance county was continued before the chief justice to-day, and will be argued tomorrow, when it is expected the arguments will close.

Later advices from Caswell county state that one hundred and fifty to two hundred citizens were kept in the courthouse from one o'clock P. M. until 5 P. M.

W. D. Bowe, of those arrested, demanded to know why he was arrested without a warrant, when he was knocked down and dragged off.

Another prisoner, Mr. Wiley, was plowing in his field when arrested. He refused to go with them without a warrant, when he was knocked down, put on his own horse, with his feet tied under the horse's belly, his hands tied behind his back, and carried to Kirk's court.

The sentinels under the windows of Judge Kirk's prison amuse themselves by cursing and reviling him. Ladies insulted, and with children are flying to Virginia for protection.

Among other arrivals of Holden's troops here last night was a company of negroes, commanded by negro officers.

Both political parties are denouncing these outrages as unlawful, despotic and unnecessary.

FOREIGN.

LONDON, July 14.—General uneasiness still pervades the feelings of the people throughout Europe. The tone of French official papers is pacific, but that of the balance of the press seems hostile and warlike.

The resignation of the French ministry is asserted and denied, and no definite information regarding the matter has been obtained.

The French people and the press do not seem disposed to accept Hohenzollern's candidature as a finality.

Peace without a direct acknowledgment from Prussia would be more shame than surprise.

The Paris Press thinks the settlement precarious and dangerous to France, and simply enables Prussia to choose a better opportunity.

The newspapers *Liberte*, *Moniteur*, *Pays* and *Opinion*, as well as the public generally, are very bitter on the ministry for primary arrogance and subsequent timidity.

De Grammont announced to the Corps Legislatif the withdrawal of Hohenzollern from the candidature, but stated that negotiations had not yet terminated, and asked the corps to wait until Saturday for a full exposure.

The Telegraph says that a formal reply from Prussia is the only thing that can restore confidence.

BRUSSELS, July 14.—Napoleon is dissatisfied with the mere withdrawal of the Hohenzollern candidature. He insists that Prussia formally disavow the candidature, which King William refuses to do, on the grounds that such an accession would produce more extravagant demands from France.

ROME, July 14.—The infallibility dogma was carried through the Eccumenical Council yesterday, by a vote of 450 to 88.

ENIS, Prussia, July 14.—The French ambassador to-day demanded an audience of the King of Prussia to exact that Prince Hohenzollern's renunciation be made perpetual, and that the royal veto be applied to any fresh approach on the part of the prince to the Spanish crown.

The king declined to receive the ambassador, and answered him through an aid-de-camp that he had no further communication to make.

PARIS, July 14.—The King of Prussia refuses to fully comply with French demands. Napoleon came from St. Cloud by express, and consulted ministers. The presiding officers of the Senate and Corps Legislatif have been notified that they would soon have an important message.

It is supposed this message will be a declaration of war.

BRUSSELS, July 14, 2 P. M.—England, Russia and Austria are making energetic efforts to prevent a rupture, but have made no progress. The situation remains unchanged.

Advices received from Madrid are of a pacific character. Prince Hohenzollern's declaration of the candidacy of the Spanish throne has been announced.

PARIS, July 14, 5 P. M.—It appears that the King of Prussia has refused to receive Count Benedetti, or to sign the promise required of him by the French government.

The emperor left St. Cloud this morning by a special train, and arrived at the Tuileries at noon. The ministers having been summoned to meet him, were all at the palace, and a council was held immediately after his arrival. At half past three this afternoon the presidents of the Senate and Corps Legislatif, which bodies were then in session, were informed that the government would have a communication to make to these bodies before the close of their sitting.

It is generally believed that this communication will be a declaration of war.

It is positively asserted that Count Benedetti has been ordered to return to France, and that he only waits the departure of Baron Von Werthier, the Prussian minister, from Paris.

PARIS, July 14.—Advices from Madrid are pacific, as far as Spain is concerned. The Spanish minister of the interior has sent envoys to the different courts of Europe, to inform them of the acceptance by Spain of Prince Leopold's renunciation.

PARIS, July 14, 3.30 P. M.—Great panic on bourse; routes have fallen to 67½.

The journals say the French cabinet, having received as first concession the personal renunciation of the Spanish crown by Prince Hohenzollern, have agreed to continue negotiations to obtain from the King of Prussia his official renunciation, now and forever, of all pretensions to the throne of Spain on the part of any of the members of the Hohenzollern family.

The agitation throughout the city is immense.

The majority of the evening papers maintain a warlike tone, and the groups of people in the streets seem to be strongly in favor of war.

PARIS, July 14.—The Madrid correspondent of the *Siecle* predicts that General Prim will be supported by Señor Sealla or General de Cordoba.

PARIS, July 15, 3 P. M.—The Corps Legislatif declared war against Prussia at ten minutes before two o'clock P. M.

Holland will remain neutral, and the belligerents have engaged to respect the neutrality of Belgium; yet troops are rapidly concentrating at Antwerp and other strategic points.

The specie and bullion in the National Bank at Antwerp have been removed to the citadel, and the issue of paper money is announced.

LONDON, July 15.—The French declaration of war is based on the following causes:

1. The insult offered at Ems to Count Benedetti and its approval by the Prussian government.

2. The refusal of the King of Prussia to compel the withdrawal of Prince Leopold's name as a candidate for the Spanish throne, and

3. The fact that the king persisted in giving the prince liberty to accept the Spanish crown.

The extra Constitutional charges that the action of Prussia in relation to these matters awakened the slumbering recollections of 1814. Let us cross the Rhine and avenge these insults of Prussia by victories that will survive that of Jena. The excitement in Paris is intense.

PARIS, July 16.—The emperor returned from St. Cloud after the council with ministers yesterday.

A French fleet is watching the Prussian fleet in the British Channel, awaiting orders to attack.

Sweden will remain neutral. Denmark, the key of the Baltic, offers to join France.

Austria will remain neutral. Russia remains neutral.

Italy is friendly to France, and has written a letter to the emperor.

Spain will be friendly. General Prim has written a letter to Napoleon. England will be neutral.

Rome, the key of the Mediterranean, is under French control. The French army sing the *Marseillaise*. Unusual enthusiasm prevails.

LONDON, July 16.—The Times intimates that the recovery of Alsace and Lorraine, containing the modern provinces of Moselle, Murtel, Meuse and Vosges on the upper and lower Rhine are the real objects of the war on the part of Prussia, and in that she has the sympathies of mankind.

The Times hints that English intervention is probable. In case of Prussia's losing strength, the neutrality of England would be difficult, and perhaps impossible; and dishonorable, should Holland and Belgium become involved in war.

The Prussian fleet of Prince Adalbert, which has latterly been in these waters, sailed to-day for Kiel.

BERLIN, July 16.—King William arrived here to-day. His progress from Ems was a continued ovation, and over one hundred thousand people awaited him at the station.

He made a short address, expressing the hope that they would be as brave elsewhere.

PARIS, July 16.—The government is sustained by the Corps Legislatif in voting war supplies by 246 to 10.

The Senate approved the action of the government without division.

PARIS, July 17.—The expected session of the High Court is indefinitely postponed, and general amnesty issued.

The *Moniteur* has positive advices that Spain will avoid complications.

After session yesterday the Senate proceeded in a body to court.

Rouher, addressing the emperor, said: "Monarchical combinations injurious to prestige and security of France have been mysteriously favored by Prussia and were defeated by your prompt protest against Hohenzollern's candidature. Your majesty has been compelled to draw the sword. The country is with you, eager for and long prepared for the contest you have awaited. You have raised to perfection the military organization of France. By your care France is prepared."

An engagement is reported to have taken place near Forbach, in which three thousand Prussians and two thousand French were killed. No verification of the fight has been received.

The emperor has issued a reassuring proclamation to the South German States.

The war feeling has entire control of the people.

Offensive demonstrations have been made in front of Thiers' residence, on account of his anti-war speech, followed, however, by demonstrations in his favor.

The report that the French troops have been recalled from Rome is contradicted.

Holland and Italy will maintain absolute neutrality.

LONDON, July 18.—Any violation of Belgian territory will end England's neutrality.

The steamer *Leipsig*, advertised from Baltimore, will not sail.

LONDON and Liverpool stock markets are purely nominal. No genuine transactions. The panic arises from the rumor that the Emperor of Russia has espoused the cause of Prussia, and has issued orders mobilizing the Russian army. This rumor paralyzes everything in the way of business.

LONDON, July 18.—All Prussian

vessels in English ports have discharged their crews and laid up.

The Times, in an editorial this morning, says: We expect to be obliged to chronicle Prussian reverses at first, owing to the superior preparations and efficiency of the French army. Prussia needs at least another fortnight to get altogether in readiness.

In another editorial the Times says: France, without a shadow of excuse or justification, plunges Europe into a war of which no person now living may see the end.

ZURICH, July 18.—Switzerland declares for armed neutrality.

COPENHAGEN, July 18.—The neutrality of Sweden has been officially declared, the government having previously communicated with France.

PARIS, July 18.—France demands a decision from the South German States by noon to-day, as to the course they will adopt in the coming contest.

BERLIN, July 19.—Last evening King William made a speech to a great crowd of the people of Berlin, who came to congratulate him. He said he was not responsible for the war which had just broken out. He might personally have been passive under the outrage, but Germany, even from beyond the seas, had spoken. Sacrifices, he said, were sure. Prussia had been spoiled by her rapid victories in two wars, and perhaps a worse fate would attend her now. He, however, knew what to hope from a good army and people.

ROME, via PARIS, July 19.—The council held a public session to-day, at which five hundred and thirty-eight fathers were present. The schema *De Ecclesia Christi* was adopted by a vote of 536 to 2, and was approved as a constitution of the church by the Pope, who pronounced a short allocution.

BERLIN, July 20.—All Germans in the service of the French have been ordered to return forthwith.

The Prussian government has announced that the merchantmen of the enemy will not be interfered with on the high seas, unless for causes which would expose neutrals to seizure.

General Wiedel, adjutant general of Hanover, has been arrested at Weimar as a spy.

King William, in addressing the Reichstag to-day, said: Prussia had no interest in the Hohenzollern candidature beyond its bringing peace to Spain. Prussia nevertheless furnished the emperor with a pretext for war unknown to diplomacy; and, scorning peace, Napoleon used language to Germany which could have been only prompted by a miscalculation of her strength, but Germany was powerful enough to resist such language and repel such violence. He said so in all reverence, knowing the event was in God's hands.

PARIS, July 20.—In the Corps Legislatif to-day Duke de Grammont announced war had been declared with Prussia and her allies, in the following words:

Messieurs: The expose presented to you on the fifteenth instant made known the causes we have for war against Prussia. According to the rules and usages of nations, and by order of the emperor, I have requested the charge d'affaires at Berlin to notify the cabinet of Prussia of our resolution to seek with arms the guarantee we could not obtain by discussion. This has been done, and I have the honor to make known to the Corps Legislatif that, in consequence thereof, a state of war exists since the nineteenth instant between France and Prussia. This declaration applies to the allies of Prussia who give her armed assistance.

PARIS, July 20.—The Bank of France has increased the rate of interest to 3½ per cent.

VIENNA, July 20.—Turkey has called on her reserves and cut off telegraphic communication.

LONDON, July 20.—Great demonstrations have been made in Dublin in favor of France.

PARIS, July 20.—No fighting yet in the front.

One of the last acts of Congress was to grant Mrs. Lincoln her pension of \$3,000 for life. The bill was promptly approved by the President, and henceforth that national scandal is at rest. The persistence with which the widow has pressed her claims, in defiance of all consideration of modesty and of public opinion, has at length proved successful. "O, the widders, the widders!"

NEWS FROM THE CHURCHES.

STOCKTON, BALDWIN CO., ALA.,
JULY 20, 1870.

MR. EDITOR: We have just closed an interesting meeting in Stockton, Alabama Conference, which resulted in the accession to the church of thirty-five members. The most of them were happily converted to God. The meeting lasted eleven days. Our presiding elder, D. M. Hudson, was with us two days; and Brother Robinson, a local preacher, and Brother McGowan, a licensed exhorter, did us good service. The meeting closed without any abatement of interest. That night two more were added to the church, and a great many penitents at the altar. The work is still going on. Prayer meetings are regularly kept up by the brethren, and the spirit of God is still moving upon the hearts of the people.

P. L. MARTIN, P. C.

WEST PASCAGOULA CIRCUIT.

MT. PLEASANT CHURCH, MOBILE DIST.,
JULY 13, 1870.

MR. EDITOR: By the mercy of God we are in the midst of a glorious meeting at Mount Pleasant. Great interest is manifested by all. The church is alive and at work. On every occasion the house is crowded by earnest listeners. Persons living fifteen and twenty miles away are in attendance. At every call for penitents the altars are crowded. Some trembling with age and blooming for the grave are crying: "What must we do to be saved?" Strong men, overpowered with conviction, prostrate themselves before the altar and beg for mercy.

On last night many came forward and promised to serve the Lord. Ten came out from among the ungodly, and joined the church. We feel thankful to God for the success that has crowned our efforts at this appointment. We have received into the church, at this appointment, sixty members, and baptized over fifty children and adults. To God be all the praise. May the Lord continue his blessed work until the entire community be converted and added to the church.

We have just followed to the tomb little Mary Arrington, one of the Sunday school scholars. On the Sabbath before her death we met her in the school. She sang for us her last song on earth. It was that beautiful hymn:

"There is a fountain filled with blood,
Drawn from Immanuel's veins."

She returned home and died before the next Sabbath. From her testimony, she is now in heaven. May her death be a blessing to her family.

U. B. PHILLIPS.

COMMITTEES OF EXAMINATION.

NORTH MISSISSIPPI CONFERENCE.

Admission on trial—George Shaeffer, John Barrett, A. C. Allen.

First year—W. P. Barton, R. J. Jones, M. H. Ford.

CAMP MEETINGS.

There will be a camp meeting held in Springville, Springville circuit, Louisiana Conference, beginning on the first day of September next. Let the preachers come.

JESSE FULTON, P. C.

A camp meeting will be held at Linwood, DeKalb circuit, Macon district, Mobile Conference, commencing on Thursday night before the fourth Sunday in September.

U. L. THOMPSON, P. C.

THE SOUTHERN REVIEW.

There being much anxiety felt by the members and friends of our church to know whether Dr. Bledsoe would accept the terms as offered by the late General Conference, we published a card on the subject in the last number of the *Baltimore Episcopal Methodist*. To allay that anxiety, and at the same time to afford the relief which Dr. Bledsoe sought, we deemed it important to make the announcement with as little delay as possible. In assuming the publication of the *Southern Quarterly Review* the undersigned will confidently expect the ministers and members of our church especially to give to this great work a generous and hearty support. Every minister should possess a copy, and every layman who can afford to pay the small sum of \$5 will certainly avail himself of the best quarterly review in America. With the cooperation of our Bishops and ministers, and the friends of the highest standard of Christian literature, we shall confidently expect to commence the next volume with a largely increased addition to its list of subscribers. In so responsible an undertaking our friends will see the importance of at once giving to the enterprise a prompt and generous support. It is desirable to know as early as possible that a sufficient number of paying subscribers have been obtained to place the *Review* beyond the reach of any conceivable contingency. We believe it is destined to be an incalculable blessing to the church and a priceless acquisition to the periodical literature of the country.

JOHN POISSAT,
S. S. ROZELL,
And others.

ORDERS FOR THE SOUTHERN REVIEW.

Orders for this work will be received at the office of the *Baltimore Episcopal Methodist*, No. 49 Lexington street, Baltimore. Those who desire to commence with the number for July will please order it immediately.

Subscribers will be particular to note the number with which they wish to begin.

Terms, \$5 per annum. To clergymen, \$4 a year. Single copies, \$1.25. Invariably in advance.

The *Review* is superbly printed in large type and on handsome book paper, each number containing 246 pages, making a volume of 992 pages.

RELIGIOUS INTELLIGENCE.

The Church of Jesus Christ of Latter-day Saints, in Illinois, claims to be the original Mormonism, unadulterated by polygamy.

In VIENNA six hundred and eighty persons of both sexes have abjured Christianity and embraced Judaism within less than two years.

A MOVEMENT in Hungary, headed by Prof. Sebwick, looks toward the establishment of a Hungarian National Church, independent of Rome.

THERE are in India six hundred missionaries and two thousand native preachers. About \$1,500,000 is expended in this field by twenty-five societies.

The Chinese Sunday schools in San Francisco are ten in number, having three hundred and one teachers, and an average attendance of seven hundred and sixty-four pupils.

Rev. Dr. Elliswood, late one of the editors of the *New York Evangelist*, has accepted an appointment as secretary of the "Five Million Memorial Fund," proposed to be raised by the Presbyterian Church.

The Southern Presbyterians have three theological seminaries—the Union Theological Seminary, of Virginia, with four professors and thirty-five students; and the Columbia (South Carolina) Seminary, with thirty-one students.

The Roman Catholic clergy of England have increased the past year from one thousand six hundred and ninety to one thousand seven hundred and twenty-seven. The churches and chapels have increased from one thousand three hundred and twenty-nine to one thousand three hundred and fifty-one. During the year there were sixty-nine ordinations.

Rev. C. H. Malcott, of Rhode Island, has sent out a circular inviting Baptists to sign its declaration of faith in the general Baptist doctrines, but allowing "entire freedom to each church to fix its own terms of communion." He says that some thirty ministers, nearly all Baptists, including one or two college presidents and four doctors of divinity, have signed this paper.

The Christian Advocate.

SATURDAY, JULY 23, 1870.

I'M GROWING OLD.

BY JOHN G. BAKER.

My days pass pleasantly away,
My nights are blessed with sweetest sleep.
I feel no symptom of decay,
I have no cause to mourn or weep;
My foes are impotent and shy,
My friends are neither false nor cold;
And yet of late I often sigh—
I'm growing old!

My growing talk of olden times,
My growing thirst for early news,
My growing apathy to rhymes,
My growing love of easy shoes,
My growing hate of crowds and noise,
My growing fear of catching cold,
All tell me, in the plainest voice—
I'm growing old!

I'm growing fonder of my staff,
I'm growing dimmer in the eyes,
I'm growing fainter in my laugh,
I'm growing deeper in my sighs,
I'm growing careless of my dress,
I'm growing frugal of my gold,
I'm growing wise, I'm growing—yes—
I'm growing old!

I feel it in my changing taste,
I feel it in my changing hair,
I feel it in my growing waist,
I feel it in my growing hair,
A thousand hints proclaim the truth,
As plain as truth was ever told—
That even in my haunted youth—
I'm growing old!

Ah me! my very laurels breathe
The tale in my reluctant ears;
And every boon the hours bequeath
But makes me debtor to the years;
Even flattery's honeyed words declare
The secret she would fain withhold,
And tell me in "flow young you are!"
I'm growing old!

Thanks for the years whose rapid flight
My somber muse too gladly sings;
Thanks for the gleams of golden light
That tint the darkness of their wings;
The light that beams from out the sky,
Those heavenly mansions to unfold,
Where all are blest and none shall sigh—
I'm growing old!

SIN A WRONG TO THE SINNER.

How is it that sin is a wrong to the sinner? How is it that it works misery and death? It is thus: God has constituted our bodies and souls, and the whole universe, in short, on certain principles, and these are "holy, just and good." Our souls and bodies must be governed by and live in harmony with these laws; otherwise we come in collision with them to the destruction of our well-being. The track and the train are made to correspond to each other, and the train must move upon the track, or else, running off, it runs into ruin. The body must have sufficient and suitable food and drink, or weakness and pain must be the result; or if the subsistence is unsuitable, or is taken in excess, disease and death must ensue, because we have sinned against God and against the constitution of our nature. The glutton, with his bloated body, his dyspepsia and gout; the drunkard, with his foul breath, grog-blossomed face and horrid train of ills, are notable and sad illustrations of the wrong men do themselves by sinning against God.

When men sin in a moderate degree they often fail, for a time at least, to realize the fact that sin is a wrong to themselves, and indeed often think if such and such an action were not forbidden that indulgence would bring profit, perhaps pleasure. We are aware that the book makes mention of "the pleasures of sin." The glutton and the inebriate no doubt, in the first stage of their excesses, feel a certain pleasurable excitement. But the book adds that these pleasures are "but for a season," for presently the penalty of the violated law is upon them. No doubt these pains are intended to prevent excess and ruin.

These laws, made for the conservation and well-being of the body, illustrate the operation of those higher laws made for the government and happiness of the soul. The soul is constituted to be happy and attain its highest good in the laws which God has enjoined for its observance. Therefore it is that in violating these laws we wrong ourselves.

These penalties for sin are often promptly inflicted on the soul, as we have seen they are upon the body. We are often punished here and now. For example, one cherishes the sinful feeling of envy at the wealth, the talents, the popularity or beauty of another. This immediately reacts upon the mind, and renders him miserable. Another

cherishes wrath and a spirit of revenge. So long as he does a fire burns in his own bosom, and, like Cain, he roams the earth a miserable man. Another cherishes the all-grasping covetousness, and in doing so condemns himself to perpetual want. His possessions, no matter how large, afford him no satisfaction. In the midst of abundance he pines like a pauper with want. Such was the condition of Abale. A royal palace, with its ample territory and his kingly revenues, gave him no satisfaction. He is miserable because he does not own also the humble vineyard of Naboth.

Let a man commit a dishonorable, a felonious crime, and he fancied each look is a glance that detects and reads his guilt. Each coming footfall is pursuing him, and every noise in the night fills him with painful apprehensions. Sin often brings degradation and public shame, so that the sinner is shunned by his fellow-men as if he were a leper. He has no friends. No roof offers to shelter him, no door opens to invite him in, no board spreads its hospitality, no smile of recognition cheers him, no friendly hand greets him, no kindly voice bids him welcome.

Sin often brings prompt and terrible remorse, wringing the heart with agony, driving sleep from the wretched soul. Sometimes the heart, too full to hold its woe, seeks relief in confession and bitter self-accusation, while the heaving breast, the flushed cheek and streaming eye proclaim more of woe than words can utter. Sometimes, under the crushing weight of remorse, the reason reels, and the wretched soul flies to seek relief and hide its shame, like Judas, in the suicide's grave; and sometimes society, in the execution of just laws made for the protection of all, arrests the criminal and consigns him to a felon's doom. But sinners sometimes sin for years, and sin with apparent impunity, and because judgment is not speedily executed against them for their sins they encourage themselves that they shall never suffer any penal consequences. But this is an unwarranted and precipitate conclusion. We know that the bodily excesses and sins of youth do not sometimes overtake the sinner for a score of years; but though the penalty is slow, it is sure. So certain as temperance and self-denial are a savings bank from which we draw strength in the decline of life, so certain it is the intemperate man is heaping up wrath against the day of wrath. His sins shall overtake him, shall find him out, just as certainly as Achan's or David's sins found them out, secretly and darkly as they were committed. So sins of the mind—pride, envy, dishonesty and revenge—will find us out, and bring punishment. We always reap what we sow.

Sin must injure us, no matter how mild its type or respectable its character, for we cannot sin without resisting truth and stifling the voice of conscience. This hardens the heart in evil, and more and more indisposes to purity, to penitence and to God. It is sin that makes death appalling, and sin that makes God's presence dreadful and the final judgment unspeakable, awful. If we would not wrong ourselves, let us not sin against God.

MINISTERIAL EDUCATION.

Mr. Editor: At the last session of the Mississippi Conference, held in the city of Jackson, Mississippi, considerable interest was manifested upon the subject of this article. Our brethren of the laity took charge of this interest specially—formed an association, adopted a constitution, elected officers for the year, and the Conference passed sundry resolutions, pledging themselves to act promptly and earnestly in this matter. Since then I have neither seen nor heard anything of this very important movement. I am sure there are worthy young men who would gratefully accept the aid this association proposes to give. The church needs their services. They feel called of God to preach, and even one year's study, under the direction of competent instructors, would fit

some of them to enter the ministry; but they are poor and have not the means to support themselves at school even for that time. Will the preachers of the Mississippi Conference exert themselves, as they have promised, to aid this association? I suggest that Brother Thomas Reid, of Fayette, Mississippi, the worthy president of the association, issue a circular through the Advocate at once, setting forth the importance of this matter, and reminding the preachers of their pledges. Let us act.

The Baptist brethren in Mississippi have a special agent traveling in the interest of a similar enterprise. He has succeeded wonderfully. There are now thirteen young men being educated for the ministry at their college at Clinton, Mississippi. We ought to do as much or more. We can do it. Again I say, the church needs the services of educated young men.

H. J. HARRIS.

The Social Festival of Methodism, Clinton, Louisiana.

Mr. Editor: At the last session of the Mississippi Conference it was "Resolved, That we will hold, on the first Sunday in June of each year, the social festival of Methodism, for the purpose of rehearsing the wonderful history of Methodism," etc.

Pursuant to that resolution we held the festival in Clinton, Louisiana, though we have not heard of another church in these parts doing so.

Our festival began on Saturday before the first Sunday in June, with a Sunday school picnic. The children and friends of the school assembled at the Methodist church at ten o'clock in the morning, where, after singing and other exercises, they were addressed by the pastor and the Sunday school superintendent. We then repaired to the woods and partook of a bountiful repast prepared for the occasion.

On Sunday morning a large audience was addressed by K. A. Cross, Esq., on "The Progressive Characteristics of Methodism," previous to which the sacrament of baptism was administered to eight children.

On Sunday night we had a lecture on "The Origin of Methodism" from Rev. David Piper, after which the sacrament of the Lord's supper was administered to a large number of communicants.

Thus passed the first social festival of Methodism in Clinton, Louisiana, under the resolution of the Conference, with good results.

The speech of Mr. Cross was an able effort. Any attempt to give a synopsis of it and do it justice would be in vain; hence I forbear.

L.

Stonewall Institute Commencement.

Mr. Editor: Commencement at the Stonewall Institute closed June 24. I had the pleasure of being present, and was much gratified with the exercises of the occasion. Indeed general satisfaction was expressed by all in attendance. The students were subjected to a rigid examination, and all acquitted themselves with much credit, evincing not only close application during the session by the pupils, but that they had been most accurately and thoroughly instructed. The promptness with which problems were solved and explained showed that the mind had been logically trained, and that the principles of this important branch were well comprehended. In the languages the reading and pronunciation were clear and distinct, and the recitations perfect, doing full justice to their able preceptor in this his ruling talent.

Pennmanship, that much neglected accomplishment, receives in this school its proper share of attention. Each pupil is taught, I might say compelled to write, an elegant hand. Last of all in the order of exercises came oratory. The original speeches were very fine indeed. The subjects were well chosen and skillfully handled. Those who delivered extracts displayed good taste in selection. As to declamation it was perfect, and all seemed imbued with a cheerful, easy self-possession which rendered it a pleasure to listen to them. Altogether, I think I am justified in saying that this school

has few equals, and is excelled by none.

The health of the location, together with its freedom from temptations to intemperance and all vices which generally beset the pathway of the young student, render it a desirable place for those who wish to surround their sons with circumstances favorable to a moral as well as literary education. In addition to this there is an excellent Sabbath school, frequent lectures and preaching. These all look to the moral training; as to the mental it has uncommon advantages. Prof. D. C. B. Connolly is a man of rare abilities. Native refinement, ripe scholarship, together with a long experience in teaching, well fit him for his responsible office. Intuitive comprehension of human nature, an indomitable will, untiring energy and perseverance, with a deep sympathy for his pupils, make him successful even with the duller minds.

B. D. GAYLE.

PERRYVILLE, ALA., July 3, 1870.

Collegiate Institute, Baton Rouge.

Mr. Editor: One of the most prosperous terms known in the history of this flourishing institution was closed on the first of July. The examination evinced the competency and industry of the teachers, and the aptness and diligence of the pupils. It is not exaggeration to say that no school in the country, North or South, can show a more gentlemanly set of boys than the Collegiate Institute; and its veteran and distinguished principal, Prof. W. H. N. Magruder, who stands at the head of his profession in this State, can with perfect propriety point to his students as giving indisputable evidence of his fitness not only for cultivating the mind of the young, but also for developing in them those moral and social virtues which elevate and refine society. In this institute an education is imparted to students not superficial or merely ornamental, but one in which high intellectual training goes hand in hand with the development of the pupil's whole powers, and the acquisition of social accomplishments which will fit him for the highest and most honorable walks of life.

The closing exercises were introduced on Friday morning in an address delivered before the literary societies of the institute at the Methodist church, by Mr. William Walker, of New Orleans, son of Rev. Dr. J. B. Walker, and a former pupil of this institute. Subject: "The Nobility of Man." It was one of the most eloquent and eloquent efforts that we ever heard, well worthy of his exalted theme, and made a profound impression not only upon the young gentlemen to whom it was particularly addressed, but upon the audience in attendance.

At night not less than a thousand persons were present at the exhibition, and the strict attention paid to the exercises throughout, as well as the excellent order preserved, was of itself flattering testimony to the high esteem in which the Collegiate Institute is held by the people of this community.

The exercises consisted almost entirely of declamation by the pupils, together with some original speeches, the latter of which would have done no discredit to much older heads. During the evening Miss Carrie Young and several young ladies from Readville Seminary entertained the audience with choice selections of vocal and instrumental music; and at the close Prof. Magruder delivered a short address to the students, full of emotion and expressive of earnest solicitude for the temporal and spiritual welfare of "his boys," as one affectionately termed them, of whom he had such good cause to be proud.

The course of instruction at this institution is as thorough as that offered by any first class school in this or any other State. Of its principal we need say nothing, for he is well known throughout Louisiana and Mississippi as the first among the best teachers in the country. He is assisted by teachers of ripe scholarship, and earnestly devoted to their high calling, and

the facilities for acquiring thorough instruction in all the branches of a finished education are equal to any in the country; and as such is commended to the attention of parents and guardians everywhere.

We hope the Collegiate Institute will open with an increased number of students on the first Monday of October next.

R. S. T.

BATON ROUGE, July 4, 1870.

Mansfield College Commencement.

Mr. Editor: Before a single trace has lost its freshness on the page of memory, would we transmit to you our impressions of the commencement exercises of the Mansfield Female College, which closed on Wednesday, the twenty-ninth of June. These exercises opened on Thursday, the twenty-third of June, by the examination of the several classes by the faculty. To one who has attended an examination of this institution it is unnecessary to state that it was thorough in the last degree; but to the honor of the young ladies and their instructors, it may be said that they passed this fiery ordeal with more than usual success. The public evinced their interest by a large attendance during the five days these exercises were continued.

On Sunday, the twenty-sixth, the sermon before the graduating class was preached by the Rev. Mr. Wilkinson, of Shreveport. His subject was well chosen, being the reply of the Saviour to the petulant inquiry of Martha, recorded in the forty-first and forty-second verses of the tenth chapter of Luke. His style was piquant and pleasing; his enunciation silvery and distinct; his delivery calm and deliberate. The delineation of his characters was bold and intrepid, and the deductions from his premises rapid and exhaustive. In tones of tenderest regret did he tell us of Martha's "anxious and troubled" spirit; but with what glad fondness did he dwell on the "good part" Mary had chosen; on the purity of her character, and her sweet humility as she nestled at Jesus' feet. Well might the responsive "amen" come from every heart to his closing words, that "few might be" the Marthas and many the Marys that should come forth from the Mansfield Female College.

After the interval of the Sabbath the examination was again resumed on Monday, and concluded on Tuesday evening with the same unmitigated success. On Monday evening the usual concert of the school was given. Who is not charmed by music? And sitting there drinking in those strains of harmony, called into existence by beings so fresh, so pure, so blooming, who did not think when the "swallow" had twittered her last note, that time on his airy feet had danced too rapidly away? On Tuesday evening the public were entertained by the "Romance of the Forest," a special musical entertainment, the proceeds of which are to be strictly appropriated to the purchase of apparatus for the college. When the beautiful band of gypsies came forth how startled was the imagination! Thrust from its common track, it fled across the sea, and poised itself in Spain—Spain, land of romance and of poetry, of passion and of love. It seemed as if an enchanter's wand had summoned before us some Andalusian scene. There were the rich green woods and the intoxicating delights of that sunny clime; and even the mystic tribe of gypsies wandering through the groves, beautiful with their fantastic dress, their full, crimson lips, their glowing cheeks, flowing hair and dark lustrous eyes.

The count defied his fortune, told by a gypsy maid; but when he sees the gypsy queen, intoxicated by her beauty, and fascinated by her nightingale voice, nobility and wealth fly to the winds, and he woos her hand as gently as that of a high-born maid.

Wednesday was commencement day. At an early hour the hall was crowded by an eager and impatient audience. After the reading of the Scriptures and prayer by Rev. Mr. Clegg, Major Ashton was introduced, and made his address to the gradu-

ating class. His theme was "The Battle of Life." In his introduction the speaker's mind reverted to his own school days; and the tidal wave of his emotions rose high as the memory of his own commencement day and its bright associations rushed over him. With touching tenderness he blessed the sacred ashes of that college, long since devastated by a ruthless foe. With what martial ardor did his eyes flash as he paid the most gallant tribute to the memory of his old professor, the honored dead, "the immortal Stonewall Jackson!" It needed no word from his lips to tell us that he had followed his professor from the college walls to the great war school; for while the one had offered up his life, the other, as Muscivora Seavola, had not failed to lay his sacrifice on the altar of his bleeding country. How could he fail successfully to delineate the moral warfare, "The Battle of Life," when he so lately had mingled in the gory scenes of literal and horrid war? Beautiful and striking were the illustrations he drew therefrom; and by following his directions the young ladies may rest assured that

"In the world's broad field of battle"

there shall await them the victor's wreaths, the conqueror's palms.

After a few minutes' interval, during which we were regaled by music, the audience was entertained by a most beautiful essay from Miss M. F. Gny, on "The Sunset of Life." May the sun of her life, just rising in "cloudless brilliancy," pursue its course unshaded to its splendid zenith; and when it declines on the western horizon may the sunset be as glorious and sublime as the sunrise is beautiful and propitious. More music, and we were listening to "Dream of the Future," by Miss A. V. Reeves. Her dreams were not the wild fabrication of a wild imagination, but, as night dreams sometimes are, were based on the outlines of reality. Fair dreamer, dream on until your visions of Mansfield are startled by the shrill whistle of that self-same cur, as it rattles into the depot, bringing a mighty stream of wealth and emigration to our beautiful village. Our thoughts were suddenly called from dream-land by "The Charge of the Crescent Regiment," an essay by Miss Porter Parsons. We were transported in a moment by the words of the fair speaker to a battle-field not far distant, where not long since the clash of arms resounded. Two hostile armies are contending, the roar of musketry is incessant, and at intervals the cannon belch forth their deadly missiles, while a canopy of sulphurous smoke envelops the issue in painful uncertainty. Suddenly above the din of arms is heard the stentorian voice of the commander: "Crescent, charge!" * * * The tide was turned. Before this irresistible sweep the serried ranks of hostile legions ingloriously gave way. Music again lulled our excited thoughts, and brought them back to the present. The diplomas were now conferred with a short, pithy speech from the president. We were now invited to listen to the valedictory address by Miss A. H. Stuart. In tones distinct and clear, yet sweet, she severed one by one the ties of friends, schoolmates, managers, teachers and classmates. We may well believe this task was a sad one; but with firmness and admirable self-control she completed it, while the audience was filled with admiration at her calm and becoming address. We were then dismissed by the benediction, pronounced by Rev. Mr. Wilkinson.

SOLA.

COUS.—The pain occasioned by corns may be greatly alleviated by the following preparation: Into a one-ounce phial ask the druggist to put two drachms of muriatic acid, and six drachms of rose water. With this mixture wet the corns night and morning for three days. Soak the feet every evening in warm water without soap. Put one-third of the acid into the water, and with a little picking the corn will be dissolved.

HE THAT IS sensible of no evil but what he feels has a hard heart; and he that can spare no kindness from himself has a narrow soul.—Collier.

The Christian Advocate.

SATURDAY, JULY 23, 1870.

A LESSON.

I read of faithful hearts
By suffering sorely tried,
That feared not persecution's flame,
But braved the pang, the cross, the shame;
And mine within me burned the while,
To do as they had died.

I heard of holy men
Who counted all things nought,
So that they might to Jesus win
Souls long in ignorance and sin.
The wish, like them, his word to teach
Became my constant thought.

I read the sacred strains
Poured from a noble mind,
That rendered back to him who gave
Talents too pure for earth to have,
Until I longed for such high thoughts,
In such high words enshrouded.

I cast upon the word of God
A wondering, restless eye;
His Spirit fixed that wavering look,
And turned from his blessed book:
"Like Mary, sit at Jesus' feet,
And learn humility."

Moderation—Total Abstinence—Intemperance.

It has come to my knowledge, from several reliable sources, that some of my friends are greatly disquieted at my article on "Moderation"—a moral obligation. This information greatly surprised me, as I think complaints are all ardent friends of temperance, while in my article I was warning against the immoderate use of tobacco, and that only in as far as Methodist preachers were involved, which led me to say that while I thus denounced this immoderate use of tobacco, still I would neither join nor advocate an anti-tobacco association, with the pledge of total abstinence as a condition of fellowship annexed, whether as to ministers or members. This I did because of a sound Scriptural principle of action, on the question of practical moral obedience. I did not see if tobacco could be used at all without infracting moral law—if used always in moderation—how any one could fulfill this specific rule of moderation by a vow of total abstinence. Total abstinence is not practical moderation; therefore practical moderation, as a Christian virtue, cannot be compassed by a vow of total abstinence. The injury being done to the man himself by the narcotic poison of tobacco, and the injury done to other unwary lovers of the quid and pipe, may be averted by a vow of total abstinence, and great good result, provided its advocates take the ground that the total abstinence policy is not adopted to fulfill the law of practical moderation and temperance in the use of things lawful; but as a guarantee against all the evils induced by the abuse of things lawful.

Herein is the ground and reason for temperance pledges and associations. Not that total abstinence from all intoxicating drinks is practical, personal temperance—which religious rule of faith and practice doubtless refers chiefly, if not exclusively, to those things which may be used, but also can be utterly given up without detriment or wrong doing. Such are all our luxuries, such, for instance, as tea, coffee, wine, and such like. Strong drink I do not allow to be classed among the luxuries of human life. It is an intoxicating, delusive charm, by reason of its violent narcotic action on the nerves and brain. It is one of the wanton inventions of man, consequent upon his fall from primeval uprightness. I do not believe so of pure wine. It is the juice of the grape, without any concentration of the deadly alcoholic principle. I can never classify pure wine with distilled spirits as a luxury, so long as the miracle of turning water into wine by Christ's own will and power at a marriage feast is before my eyes. I know Christ never set an example that should be ignored now, nor fed an appetite which ministered to indulgences evil in themselves. And this creation of wine was no delusion, for the governor of the feast pronounced it choice wine. It is very certain, I think, that Christ drank wine among the publicans and Pharisees. For it would have looked very strange, after opening his miracle-working power in the creation of wine to be drunk as part of a marriage feast, that he should have set himself up for total abstinence from wine—the pure juice of the grape—when used as he had just made it to be used. Indeed, the reproachful charge against him, that he was a glutton and a wine bibber, was no doubt predicated of the fact that he did eat flesh and drink wine, according to the authorized practice of the Jewish economy. It being always understood, as our great example, that he never did anything because it was of the world, but because it was of the Father—assuring his disciples and us that he was not of the world, and declaring that in the same way, that as he was not of the world so his disciples must not be of it.

I confess that those things, which have turned up in the way of divine

development and gone to record as specimens for historic persons, make their distinctive impression upon my mind as landmarks not to be wholly ignored by us in our warfare upon a gross and base intemperance. As, for instance, John came neither eating nor drinking, and they said he had a devil. Here was a man abstemious enough, one who drank no wine. But his abstinence was construed into diabolical possession. The Son of man came eating and drinking, and they said, Behold a man gluttonous and a wine bibber, a friend of publicans and sinners. My inference is that we are not required to waive those things which the unreasonable enemies of good men will seize upon to damage their reputation—things which custom and usage have settled as right, and which are done in full view of the practical obligation of temperance and moderation. From these things, I say, we are not bound to abstain on account of the presence of false accusers. If Christ used the wine of Palestine because it was a part of the usual meal and of course divinely sanctified, he did it knowing that these enemies and informants would report him as a wine bibber—perhaps to justify themselves in intemperate wine-bibbing—which was simply the abuse of a blessing, instead of the right use of it—which use of it Christ evidently intended to sanction.

My dear disquieted friends will say, What does the doctor mean? Well, he replies that he means to rescue temperance, if he can, from all false and mislabeled premises, and place it on a self-sustained basis.

The true basis of temperance pledges and associations is found in Paul's definite determination that the lawfulness of a personal liberty is not the measure of it. It must be measured and determined by the expediency of it. Now the law of expediency is the fitness of things to bring to pass the end aimed at, or to accomplish some good in others—in view of which we ourselves are to live as examples to them. What avails it, then, if a man prates about philanthropy—the love of mankind—and still lives for himself, eating and drinking irrespective of all possible influence which his example might have upon unwary minds, minds already ensnared in the dangerous love of intoxicating drinks? What though he should stilt himself on the plea that all that I indulge in, my wine or champagne, or what is far worse, my brandy—is lawful for me, and then go on and prove his premise true, on the ground of practical temperance (moderation), as between himself, his conscience and his God. Do his obligations to his race rest here? No; the true Christian philanthropist, who loves mankind not merely on account of race, but because of the great love wherewith God hath loved him—counting a man's value from the estimated value of the soul, in its purchase price in Jesus the crucified—says, my liberty as a Christian philanthropist is not measured to me entirely by the personal lawfulness of what I do, but by the relative effect of my example upon all conditions of human life. If, therefore, my lawful use of wine can be so quoted and so used as to be the occasion of betraying any one into intemperance, my lawful indulgence becomes fearfully inexpedient. Fearfully inexpedient in this, that if I am looking after the best interests of my race as a Christian philanthropist, and the question comes up, in view of the desolations of intemperance, whether it is safest for me to govern myself, by a pledge of total abstinence from intoxicating drinks in view of the greatest good to mankind, or to plant myself abstinently, and of course selfishly, upon the ground that all these things are lawful for me; the answer will be right off, I should of course take the pledge of total abstinence, because total abstinence is insurance against drunkenness, while indulgence is paying the way into it. Hence expediency becomes the law of moral responsibility to me; not because the indulgences I eat on by my voluntary vow were unlawful, but because an indulgence in them was inexpedient, and as a means to inaugurate universal sobriety. Therefore, lest this liberty of mine should become a stumbling block to others, I voluntarily vow not to use the liberty, because it is inexpedient for me to do this while I seek to bring about universal sobriety. By total abstinence from all intoxicating drinks, in as far as my duty in this human effort is involved, I will discharge it on the principle that the most available expediency ever tried against intoxicating drinks is the non-use of all intoxicating drinks.

The divine declaration that no man liveth unto himself, is the divine declaration that none of us ought to live unto ourselves. The mind that was in Christ Jesus is the mind that must be in us also. This was the mind which cheerfully submitted to the greatest amount of self-sacrifice, when sacrifice was expedient for the good of others. This is the animus of every sensible

man who enters into a strict temperance alliance—especially those who enter in not merely to break from the fowler's snare, but to keep mankind from ever being ensnared therein. And this every one will assuredly accomplish who takes the temperance pledge and keeps it.

It is lawful here—although it is painful to allude to it—to say that there are millions of ruined souls, now in hopeless despair, that would have escaped ruin if in early life they had taken the vow of total abstinence from intoxicating drink and kept it. But being unwittingly deceived from this only safe anchorage ground—perhaps by a father's morning dram and dinner toddy, or by falling into the hands of speechless young companions—they became habitual drinkers, until the love of liquor made drunkenness their hell here, and their doom of woe hereafter. For "no drunkard shall inherit the kingdom of heaven."

And now, dear doctor, if you will publish this article in our dear old Advocate, while it will perhaps not satisfy some disquieted friends, it will set me right before my readers as to my views on temperance associations, and my warm affiliation with them. I take the ground openly that no man can be less than an injurious member of society, civilly, socially or religiously, who in any way patronizes the use of intoxicating liquor as a beverage, whether he does it by manufacturing it, trading in it, treating customers with it, or drinking it. Governments will never be right with God, nor protective of the country's wealth, so long as they allow the distillation of unfermented spirits, just as they do the manufacturing of cotton goods. Whatever ministers to the country's hurt must be suppressed by government, or else so far the country has no proper government.

And last, and saddest of all, even church men deal in this mischievous, deadly, damning traffic as complacently as they do in vinegar. Now, therefore, as the government licenses liquor dealers to help kill and damn poor deluded inebriates, and the churches have grown too loose upon the liquor question, let me say unto you, ye temperance soldiers, fight on. If you give up the ship all may be lost; but if you hold on the youth of the country will join your army, and victory will crown your noble enterprise.

L. FERRIS.

MISSIONARY.

DELEGATES FROM FOO CHOW TO THE

EVANGELICAL ALLIANCE.—During the week of prayer, in which the missionaries of the several boards were represented, the meeting appointed Rev. S. L. Baldwin, of the Methodist, and Rev. S. F. Woodin, of the American Board, delegates to the alliance; as both of them were expected to be in the United States at the time of that great meeting.

SUMMARY VIEW OF PROTESTANT MISSIONS.—If the pastors and missionary committees who have neither Rev. J. C. Lowrie's "Manual of Foreign Missions," nor Dr. Anderson's late work on foreign missions at hand, will cut out and keep the following figures, they may find valuable and convenient help:

	Protestant, Native, Total.
Ordained missionaries	1,577 521 2,104
Assistant missionaries	1,894 3,772 5,667
Communicants	2,514,000
Schools	294,905

THE CHINESE REPOSITORY.—Up to the February issue of the current year this monthly, published at Foo Chow, China, had been under the editorial supervision of Rev. S. L. Baldwin. In the February number Rev. Justus Doolittle, of the American Board's mission, being editor, says, in concluding his salutatory: "We shall not fail soon to make the Chinese Repository surpass the Chinese Repository (which it succeeded) in the variety, value and interest of its articles."

The distinguished and successful missionary, the venerable Robert Moffat, is about to return to England. He entered upon his foreign missionary life in 1818, under the direction of the London Missionary Society, and in January of that year he arrived and entered upon his labors in South Africa. He has been in the foreign missionary work fifty-two years. He is now seventy-six years of age. He has turned many to righteousness. He is the father-in-law of the celebrated Dr. Livingstone, whose fate seems involved in mystery.

MORAL CONQUEST OF AFRICA.—The Repository quotes this paragraph from the National Baptist:

"A generous friend of Africa, Robert Arthington, of Leeds, England, in an able article on 'Moral Conquest of Africa,' has proposed, 'in order to destroy the slave-trade throughout Africa, and spread the blessings of the gospel everywhere throughout the land, to form a chain of colonies across the breadth of Africa.' He not only proposed, but has himself generously defrayed the expense—more than seven thousand dollars—of sending out the first company, composed of seventy-nine persons. This

missionary band of colonists, known as the 'Arthington Company,' reached Liberia on the nineteenth of December, 1869, and proceeded up the St. Paul's river, to establish themselves near the falls or rapids of that river. We hope that the prayers of American and English Christians may be offered in behalf of this company of pioneers of civilization and Christianity. Their settlement will form a base of action for future efforts. Others are ready to follow them. Shall the means be wanting?"

SUNDAY SCHOOL CONVENTION.

Mr. Evron: The Sunday School Convention for the Union Springs district met in Fort Deposit, July 7, 1870. In the absence of the Rev. W. G. Perry, the Rev. J. W. Shores preached the opening sermon, on Thursday night, from Micah text: "My people are destroyed for the lack of knowledge." The subject was presented in that clear and lucid manner so characteristic of the presiding elder of the Union Springs district.

At nine A. M. on Friday the convention was opened. There were present ministers, superintendents and delegates from the Pine Level, Rocky Mount, Fort Deposit, Sandy Ridge, Greenville, Rutledge and Troy churches. After transacting some miscellaneous business the importance of infant instruction was discussed by Rev. A. Dowling in a manner delightful and pleasing to all. In the afternoon J. A. Padgett, Esq., a young man of much promise, spoke with much edification on "The Graduation of Sunday School Instruction." The subject was further discussed by several members. At night the Rev. W. F. Norton, a young preacher of much promise, ably spoke upon "Christianization the Ultimatum of Sunday School Instruction." Discussion continued by several of the members.

On Saturday morning Captain T. C. Bragg with much earnestness and eloquence discussed the subject of the "Relation of the Sunday School to the Family." We are sorry to know that the Sunday school at Fort Deposit will soon lose the captain as its superintendent; but we are well assured that its loss will be another's gain. After some miscellaneous business the "Relation of the Church to the Sunday School" was ably discussed by the Rev. W. M. Motley. In the afternoon the question of the best method of teaching in the Sunday school was taken up and extensively discussed by W. A. Duke, Esq., Revs. Norton, Dowling, Jennings, Shores, Spangler, and W. C. Menefee, Esq. At night Dr. Spangler, on "The Influence of the Sunday School upon the well-being of Society," gave us an impressive and instructive address.

The Sabbath exercises consisted of lectures to the Sunday school by Captain Bragg and W. C. Menefee. Preaching at eleven A. M. by Dr. Spangler, at four P. M. by Rev. A. Dowling, and at night by Rev. W. F. Norton. A resolution was adopted to secure the benefits of gradational instruction to the Sunday school, and another looking to the placing of religious literature of a high character in the hands of our children in Sunday school.

On reorganization, Rev. J. W. Shores was elected president; J. B. Cottrell and Judge P. O. Harper, vice presidents; Rev. J. C. Avant, Dr. J. C. Kendrick and Rev. J. W. Glenn, directors; W. C. Menefee, secretary. A resolution of thanks to the citizens of Fort Deposit and vicinity was adopted by a rising vote. We were pleasantly regaled with music of a high and cultivated character by the choir and Sunday school. Its cheering sentiments and enlivening notes will long linger in memory's closet to remind us of the pleasant days spent in Fort Deposit.

W. C. MENEFEE, Sec.

UNION SPRINGS, ALA., July 13, 1870.

UNINTERMITTING sunshine would parch our hearts; we want shade and rain to cool and refresh them.

Let friendship creep gently to the heart; if it rush to it it may soon run itself out of breath.—Fuller.

True goodness is like the glow-worm; it shines most when no eyes, except those of heaven, are upon it.

BIOGRAPHICAL.

REV. ELISHA CALLAWAY.

Died, in Macon, Noxubee county, Mississippi, June 21, 1870, at the residence of his son-in-law, Judge J. J. Beauchamp, Rev. Elisha Callaway.

This man of God was born in the State of Delaware, January 8, 1792, and had reached the seventy-ninth year of an eventful and laborious pilgrimage. Early in life our sainted Father Callaway moved to Hancock county, Georgia, and was received into the traveling connection in January, 1818. In the autumn of the year 1834 he was transferred from what was then the South Carolina to the Alabama conference, and the following year traveled the Noxubee circuit. During the three years immediately following he labored as presiding elder in the Mobile district, which then embraced a portion of country two hundred and fifty miles in length.

In the year 1840 he was elected a delegate to the General Conference, which met in the city of Baltimore; and in 1845 he was selected by his brethren as a suitable representative to the memorable convention, which met in the city of Louisville, Kentucky, to organize into a separate ecclesiastical body the Methodist Episcopal Church South. He was again elected and sent as a delegate to the General Conferences of 1846 and 1850, the former holding its session in the city of Petersburg, Virginia, and the latter in St. Louis, Missouri.

For the space of fifty-two years our sainted father was connected with the itinerant ministry of the Methodist Episcopal Church South, thirty-five of which were spent within the bounds of the Mobile and Alabama Conferences.

In every field of labor, whether as circuit preacher, in charge of mission or district, or sitting among the chief counselors of the church, the ministerial and official record of our venerated father not only stands without the slightest blemish, but it is singularly marked by a noble and uncompromising devotion to the great principles of faithfulness, equity and truth. Though his circuits and districts extended over a large area of territory, yet the congregation was never disappointed because of the voluntary absence of the preacher, nor were they ever kept waiting if it was possible for him to reach the post of duty at the appointed time.

Indeed such was his uniform devotion to the dictates of punctuality and faithfulness that he would have preferred crossing an intervening and swollen stream, by doubtful fording or downright swimming, than to "miss an appointment."

Duty to God and the church was his watchword, and fidelity in its performance his spirit and practice.

About the year 1828, when laboring on some circuit near Columbia, South Carolina, Bishop Andrew was his presiding elder, and Bishop Wightman, I am informed, had the good fortune of spending either his first or second year of his ministerial life as "junior preacher" with this faithful prophet of God.

Both these esteemed and honored servants of the church, who yet survive their former "yoke-fellow," are, I doubt not, ready to attest the fidelity and purity of his life, and have the name of Elisha Callaway sweetly embalmed in their memories.

As a preacher he was remarkable for his earnestness and boldness. While preaching, the priceless value of the soul and its awful exposure to the perils of eternal ruin seemed ever upon his mind and heart, and in the offer of Christ as a present sufficient Saviour to the imperiled soul, every word and movement appeared to say: "We pray you, in Christ's stead be ye reconciled to God."

His prayers were also not unfrequently marked by a spirit of glowing fervor and earnestness, at times seeming to grasp the very arm of Omnipotence itself, and reminding one of Jacob at Bethel, wrestling with the angel, and exclaiming: "I will not let thee go until thou bless me."

Such was his boldness as a preach-

er that it may truly be said of him that he did not fear the face of man, but promptly denounced sin wherever found, so that many a guilty sinner and time-serving professor have often trembled and writhed under the power of his righteous reproofs. He sincerely and ardently loved Methodism, and adhered with much tenacity and love to all her peculiar institutions for progress and improvement in religious life.

In social life he was ordinarily a man of few words, but no undue severity of temperament ever marked or impaired his social character. The friends of Jesus always found a hearty welcome into his presence, and little children felt free and happy when about his knees. The smile of cheerfulness which often shone upon his face attested that the light of a resigned and hopeful spirit lived within. Indeed the beautiful history of this godly life was most visible amid the quiet and sacred surroundings of his home, so that he gave light unto all that were in the house.

For several years previous to his death he was much hindered from going abroad among the churches by a disease which at times completely prostrated him, and was the cause of severe pain and suffering. But amid it all he evinced a spirit of complete resignation to the divine will, and acquiesced fully in the dealings of Providence with him, thus affording to all a most beautiful and striking instance of calm and patient suffering. Though possessing a temperament which naturally led him to prefer to engage in scenes of activity and vigorous toil for the Master, yet through all the years of his superannuation and comparative retirement from the active campaign, "the ornament of a meek and quiet spirit" ever adorned him.

Such, indeed, were the brightness and beauty of his old age that the verdure and fragrance of the spring-time linger upon his name; and so cloudless was the evening of his life that a halo of golden light will long mark the sun-setting of his mortal day. Thus he bids us follow where he has gone.

His pastor, Rev. E. V. Lovett, writes thus concerning his last illness: "I have never seen such an example of patience. Generally calm, sometimes very joyful, some few times assailed by the adversary, and a momentary gloom beclouded his spiritual vision; but on directing his attention to a few appropriate promises his confidence was re-established. On Sunday last, while sitting by his bedside, he said he felt no appetite. On my remarking he would soon be where he could obtain such food as he relished, that he was almost through the wilderness, and would soon feast upon the grapes of Canaan.—'Oh,' said he, 'that is joyful news!'"

Farewell, revered and dearly beloved Father Callaway! We hope soon to join your redeemed and happy spirit amid the glories of the celestial city. May God have the surviving members of the family in his most gracious keeping, and may they present an unbroken circle around the throne of God in heaven!

J. BARNETT.

Southern Christian Advocate will please copy.

The revenue returns for 1869 show that the catch of pearls and shell for the past year on the gulf coast of the territory granted to the Lower California Company amounted to \$78,000. This, of course, is the valuation of the pearls given by the divers and speculators, and is consequently very much below the actual value of the catch. A pearl is sold frequently for \$20, which, resold at Panama at \$200, brings \$1,000 in Paris; and in many cases much greater profits have been made on very fine gems. Not over one-half the catch is ever reported to the government, and the yield of the gulf for 1869 may be safely estimated at \$300,000 in gold.

A MINISTER who was generally able to keep his congregation wide awake, on one occasion—it was a sultry summer day—observed numbers of them asleep. He resolved to nip the evil practice in the bud. So taking a good survey of the scene before and around him, he exclaimed: "I saw an advertisement last week for five hundred sleepers for a railroad. I think I could supply at least fifty, and recommend them as good and sound!"

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, JULY 23, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—REV. LINUS PARKER, 112 Camp Street, New Orleans, La.
AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAPARD.
REV. J. R. COTTRELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, REGISTER the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

FLORENCE WESLEYAN UNIVERSITY. The advertisement of this institution appears this week. We very earnestly desire to see the university built up, and permanently established as a center of light and power for the church and the country. Dr. Anderson has every qualification to be the head of this first class institution, and he is assisted by an able faculty. The location is healthy, and all the conditions are such as to invite an extensive patronage. We urge our people to rally to the support of our own schools and colleges. Let us work for them, endow them, patronize them. Our young men must be educated.

Rev. T. O. SUMMERS, D. D., received the honorary degree of LL. D. at the recent commencement at Emory and Henry College, Virginia, an honor to which his varied learning fully entitles him.

BISHOP EARLY.—We learn that the health of the venerable Bishop still continues feeble. In good weather he is able to walk out and enjoy the company of his friends. The interests of the church occupy his thoughts more than anything else, and he would joyfully go forth into the midst of the harvest if strength permitted. Let the church pray for the fullness of grace to sustain him in the evening of life.—*Richmond Advocate*, July 7.

THE REV. GEORGE W. DEEMS, of Baltimore, father of the Rev. Dr. Deems, died in Baltimore, on Sunday, July 3, in his eighty-first year. Dr. Deems, at the time of his father's death, was conducting religious services at his church in New York. His sermon was preached upon the text, "Blessed are the dead who die in the Lord," when he, the telegraph brought the intelligence that this aged pilgrim had entered into rest, and was already at home with God!

NORTH ALABAMA CONFERENCE.—The Rev. R. A. TIMMONS, Gadsden, Alabama, wishes the presiding elders to furnish him at once the names of all the preachers, local and itinerant, and also the laymen, who expect to attend the session of the conference at that place, November 16. It is a matter of great importance to him, as he has to furnish homes for all these parties. He says: "Attala is the nearest point to Gadsden on the A. and C. railroad, and the railroad from Attala to Gadsden is now in course of construction, and doubtless will be completed by the first of September. There will therefore be no difficulty in getting from there to this place. There is a daily hack line from Jacksonville to this place. None from Guntersville to Attala. Gadsden is able to support the members of the conference, and ample provision will be made for all. We hope, therefore, to have a full attendance."

EDITORIAL CORRESPONDENCE.

NEW YORK.

Two days in New York amounts to very little in the way of sight-seeing. One of those days was the Sabbath, and both were exceedingly hot, so that what time our eyes were open they were but indifferently employed. The hot weather in this latitude is brief, but oppressive beyond anything we know of in Louisiana. All the oppressive days of our trip were not more than four or five. During these days and nights the mercury was in the neighborhood of one hundred degrees, and the effect such as almost to preclude active exertion of any kind. The same temperature here is more prostrating apparently than in the South; the electrical conditions are evidently different, and the balm and tone of our southern wind are wanting. Fainting with heat one day, an overcoat was in demand then. One night the thermometer persisted in standing at about ninety-five degrees, and the next blankets were indispensable to comfort. It was a time of sunstrokes, and many were reported daily.

We worshiped at John street in the morning, and heard a very good sermon on "The Temptation." This is the spot where the first Methodist church in America was built. The site was leased in 1768, and in October of that year the house was dedicated by Embury. A considerable portion of the ground, which was purchased just one hundred years ago, has been sold, and the original structure was torn down and replaced by a much finer one in 1818. The present building is the third which has occupied this honored ground, and was dedicated by Bishop Hedding in 1841. It is an unpretending edifice, without a steeple, and hardly as large as our Moreau Street church. The front is all that can be seen of the exterior, as the last inch on either side has been appropriated to business houses. The interior is neatly frescoed and comfortably furnished. After service we looked at the mural tablets commemorating several of the great characters of Methodism, among them Philip Embury and Barbara Heck, and descended to the basement that we might see and touch the very ground wherein our foundations were laid. The room is used for Sunday school purposes and as a lecture room, and is by no means as light and cheerful as we could wish. The Wesley clock hangs upon the wall behind the desk, and was the most interesting object in the place. This clock was sent over by Mr. Wesley as a present to the John Street Society nearly one hundred years ago, and is precisely as it was when received, except that a coat of varnish has been put upon it. The courteous steward assured us that it was still a perfect time-piece, always going, and a standard for accuracy. It has been ticking in this place, though in three different houses, ever since the foundation of American Methodism. This church is evidently sustained more for its historical value than from any local demand. Nobody lives near it, and the official members come from a great distance. It is supported and maintained as a monument of connective importance, and as a relic that must be devotedly cherished. Mammon has encroached to the last line, and is pressing the venerable pile to the uttermost. Covetous eyes are looking at it daily, and the billows of trade surge around it, but thus far in vain. The morning congregation was small, the people very plain, and we noticed one or two ladies with the old time Methodist bonnet. Is this the last refuge of primitive Methodism in Gotham?

A few hours of secular time in the streets and Central Park impressed us with the giant strides of this mighty city. It looks like all the world were striving to get into one place, and this effort at condensation is everywhere manifest. The buildings are in some instances as many as eight and ten stories high, and we heard of basements and sub-basements, besides cellars, and the principal streets are excavated so that the pavements sound like a

bridge. A subterranean world has been dug out, and people walk and ride over untold values of merchandise and treasure. They have also a railway set up overhead on iron posts, so as not to interfere with the sidewalk underneath. This is rather a doubtful experiment as yet, but it will come to something in time, perhaps. The underground railway, already realized in London, will not be long wanting here. This effort at condensation, this drawing of people and business to a single focus, reminds us of the old speculation about how many angels can dance on the point of a cambric needle. Starting from where the clock of old Trinity looks down into Wall street, a few minutes in this noted center of business makes a sober man's head swim. From collar to attic every building swarms with bankers, brokers and dealers in stocks, and the boulevards are alive with anxious-faced pedestrians dodging in and out, and hurrying hither and thither. And this is a dull day! What a scene must have been here during the gold panic, and more recently when the European war was declared?

We saw that great host of New York, the Central Park, as fully as a drive of one or two hours could reveal it. Eight hundred and forty acres improved to the very uttermost by all the resources of engineering, and by all that money could command, and with a regiment of nearly a thousand men to keep it in order, it ought to be a considerable affair, and it is. The cemented walks and paths embrace a distance of over twenty miles, and the macadamized roads for carriages occupy nearly two hours of ordinary driving. The large Croton reservoir, which supplies the city with water, has the dimensions and appearance of a lake, and the lakes on which ducks and swans are gracefully floating are such as the maids would covet. There are bridges, grottoes, caves, dells and bowers; fountains throwing their jets high in the air, and cooling the atmosphere with their spray, and sylvan solitudes, and secluded nooks where the summer sunbeam scarcely ever intrudes. A boon to man, it is also the favored asylum of birds and insects. Here none are permitted to molest or make afraid. The breath and hum of insect life is heard in the grass, and the robin and sparrow hop across the path at your feet. There is no greater earthly transition, and none more pleasing and complete than that which is felt in passing in a few minutes from the jostle of Broadway to these quiet shades. Art and nature are here as happily married as it is possible for them to be; but still the pleasure of "the pathless woods" and the "rapture on the lonely shore" are wanting. The show and pageantry in the afternoon dispel the illusion of rural tranquility and of rustic simplicity. Wealth and fashion are out in their strength, and the finest teams and the most costly and brilliant equipages are flying past at every curve in the beautifully graded roadways. Here are horses that have a national reputation going through their best paces, and men whose names are familiar in London, Paris and New Orleans, in their expensive and showy turn-outs, and a miscellany of men and women of richer and poorer, rolling along in every style of conveyance.

It is a short day from New York to Boston by way of Springfield. As far as New Haven we occasionally sight the blue waters of the sound, and inhale the refreshing salt atmosphere. From New Haven our way is up the pleasant valley of the Connecticut as far as Springfield. In this valley a familiar Southern staple met our eyes. The tobacco plants appeared to be thriving, and a good deal of this fertile soil is devoted to the culture of the Indian weed. From the ado made about tobacco in their Conferences and religious papers, we had supposed that the people had long since discontinued its cultivation. From Springfield to Boston we have the genuine old New England scenery. Meadows, pasture lands, stone fences, apple orchards, barns and farm houses looking like they dated from the

time of the Revolutionary war, and hills and rocky boulders looking like great warts upon the face of the landscape. And finally the metropolis of Yankeeedom meets our view, and ere the set of sun we are, for the time being, most comfortably at home in this most crooked and cleanest of cities.

CALL TO THE MINISTRY.

We copy some reflections of Bishop Marvin upon this subject, from his *Life of Caples*. We had thought of writing an article on this topic, but these observations of the Bishop are better. Our pastors ought to keep this matter before them, and our Sunday school workers. In the sermon frequent allusion should be made to the ministerial call, and an occasional sermon entirely devoted to the theme would not be out of place in the congregation. There are boys in every Sunday school, and young men in every audience, who may be called to preach, but this conviction needs to be awakened and developed. It follows the law of other religious convictions, and requires instruction, guidance and encouragement. There is no reason to doubt that God does his part, and if our ranks are thin it is because we do not employ the appointed means of replenishing them. There are young men in every part of the church seriously exercised in reference to their duty, who would speedily be led to a final decision if the requisite light and encouragement were given them.

CALL TO THE MINISTRY.

How, then, is a young man, under an impression that he is designated to the work of the ministry, to judge of the character of his impressions? How is he to know that it is from God?

1. Let him live near to God. Let him by prayer—earnest, constant prayer—put himself in God's hand to be guided whithersoever he will. Let pride and self-will be thus cast out. When he is, in fact, ready for God's will to be done he will be led by a way he knows not. If he is really a chosen vessel, and gives himself up to be anything or nothing, as it may please him that called him, God will "set his feet in the way of his steps."

2. Where there is a call to the work of the ministry there will be a corresponding Providence opening the way. The good man's steps are ordered of God. The inward spiritual prompting will find corresponding opportunity and encouragement in outward conditions. There will be an open door.

3. The church will find out her messengers. There is a wonderful intuition among the people of God in such matters. I have never known it to fail. Often the young man designed by the Head of the Church for the ministry of the word is pointed out by the church before he has any definite conviction in himself. Where there is a truly spiritual church, and the members concur in the selection of a young man, it is very strong proof of his vocation.

4. The Discipline contemplates a period of apprenticeship. There can be nothing more repugnant to modesty and good sense, not to say Christian feeling, than the custom of making young men preach *trial sermons*. The effect must be bad—bad on the candidates and on the church. Rather let him hold prayer meetings and exhort, as occasion may serve—not under circumstances where he will expect criticism, but with a view of doing good. In this apprentice work, often awkward and embarrassed enough, the heart of the church will respond to the voice of the true worker. The questions of the Discipline can then be answered: "Has he gifts? Has he grace? Has he fruit?" The fruit may not have ripened into great results. It may appear more in serious congregations and in the comforting of the church.

Where there is any sense of duty, an open door and a concurrent selection by the church, it may be safely understood that the man is chosen of the Lord to bear the message of salvation to the lost.

At the same time, when the harvest is white and the laborers few, as now, it becomes the church to be on her knees. We must pray the Lord of the harvest to send forth laborers.

GREAT MEN AND CHRISTIANITY.

The death of Mr. Dickens has provoked a good deal of discussion in reference to his religious belief and experience. Some, like Mr. Fulton, of Boston, do not hesitate to class the distinguished novelist among those who, "having rejected the gospel, are suffering the penalties of a violated law, the wrath of an avenging God." While Mr. Fulton's Baptist brethren inclined to the opinion that he had acted unwisely in his pulpit reflections on Mr. Dickens, they nevertheless affirmed their unshaken belief in "the future punishment of all who die in impenitence and unbelief." On the other hand many very ingenious vindications of the great author's Christianity have appeared. Among others we notice a communication in the Independent, from the pen of William Lloyd Garrison, in which the writer frames a most adroit apology for the conflicting opinions which exist on the subject. "Nobody need be told what Mr. Garrison thinks. He is not puzzled at all about the matter. In his apprehension of the question Mr. Dickens was a model believer, the very foremost Christian of his times. Two or three sentences give the general drift of his vindication. "But the profession of it (Christianity) in the nineteenth century is a wholly different matter from what it was in the first." "It seems to me that we should feel far more concerned in never having our Christian character questioned than in being regarded as out of its pale on the part of its facile and dogmatic professors."

What is the animus and cause of all this ado about the religion of great men? Is it the concern that good people feel in their eternal welfare, or is it the conviction that Christianity stands in need of their testimony? When Webster died a great deal was said concerning his faith and salvation, although his life was anything but exemplary, and his dying words, as recounted by Curtiss, do not impress us with the feeling of Christian triumph and peace. Humboldt, the great and the good, as everybody concedes, in life and in death, seems to have been studiously silent in reference to the direct and personal claims of the Christian religion, and yet he is sometimes claimed as a witness of the truth. The gospel does not need the support of these great minds, and this labored effort to secure their testimony, and to number them with the redeemed, may do immense dis-service to the cause of Christ.

Where so much investigation and argument are elicited, we may doubt. Our religion ought to be so clear that room for discussion among godly people is ruled out. If an old sinner repents and finds mercy on his death-bed, we should rejoice with trembling; but if this last assurance is denied us, perhaps as good a way as any is to leave the matter, without remark, in the hands of God. The same economy of grace applies to the great and to the obscure. The responsibility of the former is immeasurably greater than the latter, and if a clear and luminous profession is required in any, it is in the case of the distinguished and influential. The spiritual experience in every class must reach the point of a new creature in Christ Jesus. In this respect there is no royal, no select path to heaven; and if Dickens and other magnates in the world of literature, science and statesmanship failed to receive the kingdom of heaven as little children, we see no reason to conclude that they have entered therein.

DEATH OF REV. ALEXANDER W. WALKER.—The Christian Neighbor of June 30 gives the intelligence of the death of the brother named above, and says: The death of this genial-spirited brother minister, long a member of the South Carolina Conference, for the last eight or ten years ineffective by reason of affliction, makes four of our brethren who have died since last session. Brother Walker was well known and much beloved as a good man and true. He died in peace, at his home in Spartanburg, on Monday night, June 20, at twelve o'clock.—*Southern Advocate*.

NEW PUBLICATIONS.

THE OLDEST AND THE NEWEST EMPIRE: CHINA AND THE UNITED STATES. By William Speer, D. D., corresponding secretary of the Presbyterian Board of Education, formerly missionary in China and to the Chinese in California. Cincinnati, Ohio: National Publishing Company. Chicago, Ill.: Jones, Junkin & Co. 1870.

This is a large octavo of six hundred and eighty-one pages, large type, with numerous engravings, and substantially bound in cloth. It is the most satisfactory work on China that we have met with, and especially the most complete and exhaustive on the now absorbing topic of Chinese immigration and labor. There is a full description of the Chinamen at home, also of their conduct and system of labor in California, and of their mental, moral and physical characteristics as a people. The author takes strong ground in favor of John Chinaman, shows his good traits to the best advantage, and advocates the policy and principles of Chinese immigration and labor. While Dr. Speer vindicates the Chinese character, he does not disguise its defects and deformities. Although an extremely favorable exhibition of the great question which now agitates the public mind, the book is evidently written in the interest of truth and with reference to what the author regards as the best interests of the country and of Christianity. Without indorsing its views on the subject of immigration, we can recommend the work as replete with interest and instruction, and as containing the latest information in reference to the people who are shortly to constitute an important element of our population.

SERMONS PREACHED AT BRIGHTON. By the late Rev. Frederick W. Robertson, the incumbent of Trinity chapel. New edition. New York: Harper & Brothers, publishers. 1870.

This is a volume of eight hundred and thirty-eight pages, and is a complete edition of the author's sermons, preached at Brighton. Mr. Robertson was a minister of the Church of England, and died in 1853, at the age of thirty-seven. His works, including lectures and sermons, have been variously published. Some of his sentiments were violently denounced by religious journals and persons outside of his congregation during his lifetime. The sermons before us are many of them fragmentary and mere sketches; others are produced with tolerable fullness. In them all we have living thought and most eloquent utterance. There is great freshness and originality, and every paragraph glows with quickening and suggestive paragraphs. The author's divergence from high church standards on some subjects—as, for instance, on church unity—is evident; while his efforts to conform to them, as in the sermon on absolution, is also painfully apparent. We have received the work from the publishers through George Ellis, of New Orleans.

THE CHRISTIAN RULE OF MARRIAGE. By Howard Malcom. Philadelphia: J. B. Lippincott & Co. 1870.

A neatly printed 12mo of one hundred and twelve pages. The subject of marriage is discussed from a single point of view: the Christians are not at liberty to contract marriage with unbelievers. To support this view the author adduces such arguments as: The Old Testament rule; conjugal happiness impossible; the conversion of the irreligious party improbable; apostasy probable; opinions of great and good men, and express prohibitions in the New Testament. For sale by Eyrich, 130 Canal Street, New Orleans.

A TREATISE ON MARRIAGE. Doctrines of Marriage. By Hugh Davy Evans, LL. D. With a biographical sketch of the author. New York: Hurd & Houghton. Cambridge: Riverside Press. 1870.

The volume is elegantly bound, printed on cream-tinted paper, and contains a complete index; pp. 385. The author of this work was a lawyer of distinction and a citizen of Baltimore, who died in 1868. The subject is discussed in all its phases, and with special reference to the

doctrine of the Scripture. The writer displays the thoroughness, patient investigation and deference to authorities which characterize the legal fraternity. He also betrays his sympathy, as a churchman, with the semi-papal views of some features of his subject. We regard some of his conclusions as utterly untenable, but are greatly impressed with the learning, research and thorough earnestness of the honored and lamented author.

OLD AND NEW. July. Roberts Bros., Boston. \$4.

A portly magazine. The table of contents is inviting. With such a bill of fare one may feel regaled during the intense heat of the summer solstice. Table of contents: Old and New; Quakers in New England; Talk about the Tea Table; Common-places; American Bishops on Infallibility; Woman Question; Life and Life Force; Hidden Hemisphere, etc. From the long and able list of contributors we judge the value of the articles.

THE NINETEENTH CENTURY. July.—Nineteenth Century Co., Charleston. \$3 50.

This monthly keeps up its reputation.

THE OLD GUARD. July. Van Eyrie, Horton & Co., New York. \$3.

AMERICAN ARCHITECTURE. July. Orange Judd & Co., New York. \$1 50.

Ably conducted.

THE HOUSEHOLD. July. Brattleboro, Vermont.

An admirable monthly.

THE SOUTHERN FARMER. July. M. W. Phillips & Co., Memphis. \$2.

We are pleased with it.

GOOD WORDS FOR THE YOUTH. July. J. B. Lippincott & Co., Philadelphia. \$2 50.

It certainly is a charming monthly for youth. It is full of illustrations and reading matter to suit.

THE DISTRICT CONFERENCE.

As some time may elapse before the new Discipline reaches many of our readers, we publish the enactment of the General Conference by which the district conference is made a part of our church organization.

Question. What directions are given concerning district conferences?

Answer 1. There shall be annually, in each presiding elder's district, a district conference, at such time as the presiding elder may designate, and at such place as the conference may select.

Ans. 2. Said conference shall be composed of all the preachers in the district, both traveling and local, and such number of laymen, to be appointed in such manner as each Annual Conference may determine for itself.

Ans. 3. A Bishop, and in his absence the presiding elder, shall preside; and if both be absent, the conference shall elect a president.

Ans. 4. The conference shall elect a secretary, who shall keep a record of all its proceedings.

Ans. 5. It shall be the duty of the district conference to inquire particularly into the condition of charges in the district:

1. As to their spiritual state, and the attendance upon the ordinances and social meetings of the church.

2. As to their financial systems, their contributions to church purposes, and the condition of houses of worship and parsonages.

3. As to Sunday schools and the manner of conducting them, and as to education generally.

4. As to missions within the district, where new missions should be established, or what missions should be raised to circuits and stations.

Ans. 6. The district conference shall elect annually, by ballot, from the district, four delegates to the ensuing Annual Conference; provided no member of the Annual Conference shall vote in said election.

Ans. 7. At these conferences prominence shall be given to religious exercises, such as preaching, prayer meetings, love feasts and the administration of the sacraments.

REVIVALS.—The revival meeting at the Baptist church closed on last Sunday night, having been in progress six weeks, resulting in one hundred and eighteen accessions to the church—eighty by conversion and thirty-eight by letter.

The meeting at the Methodist church, participated in also by other denominations, is still progressing in its fourth week, with a number of penitents and almost daily conversions. Between fifty and sixty have been reported subjects of converting grace.

At Kellyville a meeting commenced last Saturday, under the management of Rev. R. P. Thomp-

son, which is still going on. We had the pleasure of being present on last Wednesday night, and hearing a very impressive discourse by Father Baker. Quite a number of penitents presented themselves at the altar. Several were converted, and many Christians blessed.

A better prospect for a general revival we have seldom seen. The members of the church are spiritually minded, and seem disposed to do their whole duty in the premises. We shall expect a good report.

This wonderful visitation in converting and reviving power ought to greatly encourage the church, ministers and members, to pray for and expect grand results all over the country this summer and fall. The very opposers of Christianity are yielding to its benign influence, and will many of them become its warm supporters. What may we not expect if Christians are true to their professions and vows? Ask largely, and expect the full measure. Also, "Let your light so shine before men that they may see your good works and glorify your Father which is in heaven."—*The Home Advocate*, July 13.

WILLIAM GILMORE SIMMS.—In the overshadowing loss of the great English novelist, the death of the noted Southern writer, William Gilmore Simms, was but half noticed. This accomplished scholar, poet, historian and novelist was born in Charleston, South Carolina, April 17, 1806. He was left an orphan and in poverty at an early age, but self-reliant and courageous and strong-hearted, he studied, toiled and wrote until he became noted throughout the country as the author of "Martin Faber," after which success seemed always to attend his literary efforts.

Simms was a most voluminous writer. His histories, orations, poems, lectures and novels would form a library of themselves. His best works are "Martin Faber," "Atlantis," a poem, and a "History of South Carolina." In regard to his powers as a writer of fiction Edgar A. Poe said of him: "He has more vigor, more imagination, more movement and more general capacity than all our novelists (save Cooper) combined." Daychick, than whom there is no cooler critic, says of Mr. Simms: "As a novelist he is vigorous in delineation; dramatic in action, poetic in his description of scenery, a master of plot, and skilled in the arts of the practiced story teller."

Mr. Simms died at the residence of his son-in-law, in Charleston, South Carolina.—*Lexington Observer and Reporter*.

KEEP THINGS MOVING.—A presiding elder writes us: "Keep things moving down there, and we of the far West will do what we can." We shall have no difficulty in keeping things moving, with the help of enough brethren like this writer, who says: "At the close of our conference I had the amount assessed to our conference divided among the districts. I have divided the amount placed to my district among the various charges, and I think we will raise the entire amount."

ABOUT eighty colored people who removed from Opelousas to Hayti, in 1860, for the purpose of enjoying freedom and independence under a negro government, without any limitations as to race, color or previous condition, have just returned to this city, poorer and wiser than when they went away. They say that the native Haytiens are much fonder of whisky than of work; that they are improvident and reckless, and that the island is by no means as fruitful as Louisiana. The discontents intend to return to Opelousas.

EDUCATION does not commence with the alphabet; it begins with a mother's look; a father's nod of approval, or his sign of reproof; with a sister's gentle pressure of the hand, or a brother's noble act of forbearance; with a handful of flowers in green and daisy meadows; with a bird's nest admired but not touched; with pleasant walks in shady lanes; and with thoughts directed, in sweet and kindly tones and words, to nature, to beauty, to acts of benevolence, to deeds of virtue, and to the source of all good—to God himself!

THERE is a greater depravity in not repenting of sin when it has been committed, than in committing it at first. To deny, as Peter did, is bad; but not to *weep bitterly*, as he did, when we have denied, is worse.

Married.

At Wesson, Mississippi, July 1, 1870, by Rev. Robert B. Downer, Mr. C. H. Thomas to Mrs. Sarah A. Pines, all of Wesson.

July 14, 1870, at the residence of the bride's mother, in Black Hawk, Mississippi, by the Rev. Charles B. Galloway, Mr. Walter S. Trueman, of Winona, Mississippi, and Miss Anna Streinens.

At Kellyville a meeting commenced last Saturday, under the management of Rev. R. P. Thomp-

Obituaries.

Died, on the twenty-sixth ultimo, ANNE PAGE, infant daughter of Joshua G. and Mrs. Lou. Clarke.

Died, June 30, 1870, MARY ELGA, daughter of Rev. John W. and Martha Chevis, aged four years and four months.

"Leaves have their time to fall, Flowers to wither at the north wind's breath, And stars to set; but all, Then hast all seasons for thine own, O Death!"

Sister PERMELIA CAROLINE HARRISON was born in Tennessee, April 5, 1824. Her parents moved to Alabama when she was about six years old. She was converted and joined the Methodist Episcopal Church South while very young. She was married to J. W. Harrison (who died some years ago, leaving her a widow with two children) in her nineteenth year. They moved to Louisiana in 1848, and settled in Claiborne parish, and were among the founders of the Alabama Church on the Farnerville circuit, of which she remained a member until her death, April 27, 1870.

Sister Harrison was more than an ordinary Christian. She fostered on heavenly beauties, and realized what is meant by "perfect love," "sanctification" and "complete salvation."

During her last illness, which continued eight days, she demonstrated that the grace of God can sustain in sickness, yea, in death—"that he is a very present help in time of trouble." She seemed to be unconscious that her earthly career was so near its end until she was told, a day or two before her death, that she could not live long. This did not alarm her; and although she expressed a desire to be with her children, yet she said: "I know that it is the will of God that I should go, he will take care of them." She called them to her, blessed them, and told them that she was about to die, and requested them to be good children, love God, and meet her in heaven.

On the morning of the day of her death, just before day, she began to sing that sweet old song, "Home, sweet home," but finding that she was too weak, she requested those in the room to sing it. It was not then sung, but during the day she again requested them to sing it, and while it was being sung she became very happy, and praised God, exclaiming: "Hallelujah! Glory to God! Bless the Lord, O my soul!" She exhorted her relatives and friends to love God and do his will, and meet her in heaven. She talked a great deal of religion to those about her, exhorting them to be faithful.

Her brother noticed her at one time gazing upward, and asked her what she saw. She said: "I see heaven; I see angels; I see Jesus." She became speechless that evening, and died that night. The warfare was ended. During life she had been victorious, and in the last battle she was gloriously triumphant, and rested in the arms of her dear Jesus. Another substantial witness has passed in at the door. May her testimony be received and her example followed by those behind.

LET THE DEAF HEAR.

Dr. W. L. DAVIS, No. 10 Rampart street, gives his whole attention to afflicting sensations pertaining to the Ear, such as Deafness, Noise and the like.

Observe.—Dr. DAVIS' NOTES ON DEAFNESS can be had of Steel & Co., 72 Camp street; Eyre, 130 Canal street; Ellis, opposite the Post Office; also by mail, of the author, Glass Box 399, New Orleans Post Office. Price, Forty cents. my14 U

NEW ADVERTISEMENTS.

OUR NEW CHURCH MUSIC BOOK.

THE PALM—THE PALM.

BY C. M. WYMAN.

The unprecedented circulation and popularity of the "Timpiti," coupled with a general desire for a new work of the same size, induces us to issue this our second large book of church music—THE PALM. In undertaking this work we have spared no labor or expense; and entertaining the belief that he who would lead others in sacred song should first feel the spirit of sacred things himself, and that he who would show others how to teach should himself be an experienced practical teacher, we have great satisfaction in announcing as the editor of the work Mr. C. M. WYMAN, of Boston, who is undoubtedly to-day the foremost man in the convention work of New England. Price, \$1 50 single; \$13 50 per dozen. For sale by the trade generally.

ROANOKO COLLEGE, SALEM, VA.

Next Session Begins September 5.

This institution has a full corps of instructors, a thorough course of studies, and admits of a high grade of scholarship. Its superior educational advantages, moderate expenses, healthy location, and excellent mail, traveling and telegraphic facilities, render it well worthy the attention and patronage of the South.

Expenses for session of ten months, about \$210 00. This estimate includes board and tuition, embracing modern languages. A slight advance on the above for students boarding in private families.

For further particulars, catalogues, etc., address H. E. F. FLETCHER, D. D., President of the College. Jy14 2m

NEW ADVERTISEMENTS.

FLORENCE WESLEYAN UNIVERSITY.

FLORENCE, ALABAMA.

W. H. ANDERSON, D. D., PRESIDENT.

This institution of learning, so widely known through the South, will begin its next session on Wednesday, September 14, 1870. The Faculty is composed of men of experience and ability. The course of study is comprised in the Literary Department, Law Department, Department of Biblical Literature and Commercial Department. The advantages of this University are seen in its healthy and attractive location, thorough course of study, excellent discipline, the character and success of its instructors, and the reasonable rates at which board and tuition are furnished.

Students in the ministry and sons of ministers in the regular work are admitted to reduction on paying the incidental fees.

EXPENSES PER SESSION OF FIVE MONTHS.

Tuition in the University classes..... \$30 00
Tuition in Grammar School..... 25 00
Tuition in Law Department..... 40 00
Incidental fee..... 2 00
(Tuition and incidental fee required in advance.)

Chemical fee, paid once..... 5 00

Boarding can be had in the best families at from \$16 to \$20 per month.

Fall Session for 1870 Begins Monday, September 5.

The classes of this institution rest on the style, extent and thoroughness of its instruction. The climate is favorable for study, the only magic that makes scholars. It offers to its patrons, including distinguished educators and gentlemen of the highest rank in the professions, a thorough and complete education.

For particulars see circular, or apply to the president, Rev. Dr. Anderson, or to Hon. W. H. Wood, (Geo. W. Foster, Jy23 4P

WALTHAM WATCHES.

The extensive use of these Watches for the last fifteen years by Railway Conductors, Engineers and Expressmen, the most exacting of watch-wearers, has thoroughly demonstrated the strength, steadiness, durability and accuracy of the Waltham Watch. To satisfy that class in all these respects is to decide the question as to the real value of these time-keepers.

More than 450,000 of these Watches are now speaking for themselves in the pockets of the people—a proof and a guarantee of their superiority over all others.

The superior organization and great extent of the Company's Works at Waltham enable them to produce Watches at a price which renders competition futile, and those who buy any other Watch merely pay from twenty-five to fifty per cent. more for their Watches than is necessary.

We are now selling Waltham Watches at less prices in greenbacks than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said.

These time-keepers combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watchmaking originating in this country or in Europe, only those were finally adopted which severe testing by the most skillful artisans in our works, and long use on the part of the public, demonstrated to be essential to correct and enduring time-keeping.

Among the many improvements we would particularize:

The invention and use of a center plunger of peculiar construction, to prevent damage to the train by the breakage of main springs, is original with the American Watch Company, who, having had the refusal of all other contrivances, adopted Fogg's Patent Pinion as being the best and faultless.

Hardened and tempered hair springs, now universally admitted by watchmakers to be the best, are used in all grades of Waltham Watches.

All Waltham Watches have dust-proof caps, protecting the movement from dust and lessening the necessity of the frequent cleaning necessary in other Watches.

Our new patent stem-winder, or keyless Watch, is already a decided success and a great improvement on any stem-winding Watch in the American market, and by far the cheapest Watch of its quality now offered to the public. To those living in portions of the United States where watchmakers do not abound, Watches with the above mentioned improvements, which tend to insure accuracy, cleanliness, durability and convenience, must prove invaluable.

Every Watch guaranteed by the Company. To prevent imposition, buyers should see that every Watch should bear either of the following trade marks:

American Watch Co., Waltham.
Appleton, Tracy & Co., Waltham.
P. S. Bartlett, Waltham.
William Ellery, Waltham.
Home Watch Co., Waltham.

For sale at retail by all respectable dealers. A descriptive circular, giving much useful information, sent to any address on application.

BACHELOR'S HAIR DYE.

NEW ORLEANS MARKETS.

From the N. O. Price Current.

We have no improvement to notice in the general market, which continues extremely dull. The disturbing influence of the Franco-Prussian war has been sensibly felt in cotton and flour, as well as in money, gold and exchange. Our leading staple has sold to a limited extent, but mostly for Great Britain and the North. Notwithstanding a material advance in gold, with a nominal improvement in foreign exchange, prices have ruled still more in favor of buyers, and the market closed unsteady at nominal quotations. French and continental buyers appear to have withdrawn for the present, awaiting further developments of European complications. Sugar has been in good request, at full prices, but exhibited only a limited movement, operations being restricted by light receipts and a reduced stock. Operations in Western produce have been mostly confined to the local trade, at about previous rates, but there has been some speculative demand, especially for flour, which has commanded advanced prices. On Tuesday the improvement was quite general, prices stiffening under accounts from the West.

The weather has been rainy, with showers every day. Last week we stated that it was highly favorable to the growing crop, and that if it extended throughout the cotton-growing region it would afford planters a fair opportunity of cleaning out the grass and repairing the serious damage suffered from the previous protracted wet spell. The rains since have weakened these hopes, and the accounts from the country are again of a discouraging tenor.

The river is now nine feet eight inches below high water mark.

CORRIGENDUM.—The following are the arrivals since the fifteenth instant:

Louisiana and Mississippi bales. 1157

Mobile. 28

Lake. 1

Florida. 33

Total. 1219

On Saturday the influence of the foreign news still further unsettled prices and restricted operations, but 650 bales, nevertheless, changed hands, mostly at a further decline of $\frac{1}{2}$ ¢, good ordinary closing nominal at 15 $\frac{1}{2}$ ¢ to 15 $\frac{3}{4}$ ¢, low middling at 16 $\frac{1}{2}$ ¢ to 16 $\frac{3}{4}$ ¢, and middling at 17 $\frac{1}{2}$ ¢. On Monday several buyers came forward, mostly for Great Britain and the North, and took 1,300 bales, at about previous rates for low middling down, and easier prices for the better qualities, middling closing nominal at 17 to 17 $\frac{1}{2}$ ¢, and strict middling at 18. On Tuesday the market opened with a very limited inquiry, but as buyers found that factors were willing to make further concessions, the demand improved, and the business embraced 750 bales at a pretty general decline of $\frac{1}{2}$ ¢, low middling alone ruling at Monday's rates. At the same time many factors were unwilling to accept the ruling rates, anticipating a favorable turn from the course of gold and exchange. In addition to the sales the stock unsold has been reduced since last report by shipments of about 800 bales.

This makes an aggregate for the past three days of 2,700 bales. The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 1,135,560 bales, against 793,695 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 777,489 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 451,278 bales to Great Britain, of 122,925 to France, and of 117,532 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary. 15 to 15 $\frac{1}{2}$
Good ordinary. 16 $\frac{1}{2}$ to 16 $\frac{3}{4}$
Low middling. 17 to 17 $\frac{1}{2}$
Middling. 17 $\frac{1}{2}$ to 18
Strict middling. 18 to 18 $\frac{1}{2}$

Special Notices.

WOODVILLE DIST. CONFERENCE.

The Woodville District Conference will convene in Liberty, Mississippi, on Thursday, the first day of September, at eleven o'clock A. M. Pastors will please prepare full reports of the condition of the churches under their charge. Local preachers will be expected to present reports of their appropriate work as such. Each steward will please present to the conference an exhibit of the amount collected by him for church purposes this year, with such other facts as he may think proper to report to the conference. Delegates to the Annual Conference will be elected. Brethren, we expect you all.

Jas. A. Godfrey, P. E.

WETUMPKA DISTRICT MEETING.

The District Conference for the Wetumpka district, Alabama Conference, will convene at Lowndesboro, Alabama, on Wednesday night before the fifth Sunday in July. The opening sermon on Wednesday night, by Rev. Robert S. Woodward, Pastors and delegates are earnestly solicited to be present at the opening of the session. Agents and other visiting brethren who expect to attend will please so inform Rev. S. A. Pilley, at Lowndesboro. Ample entertainment will be afforded.

Wm. S. Turner, P. E.

DENOPOLIS DISTRICT MEETING.

The District Meeting for the Denopolis district, Mobile Conference, will be held at the church near Lower Peach Tree Landing, on the Alabama river, commencing on Thursday, July 28, 1870. The official members of the church throughout the whole district are members of the District Conference, and are expected to be in attendance.

A. H. Mitchell.

STARKVILLE DISTRICT MEETING.

The Starkville District Meeting, North Mississippi Conference, will be held at Starkville, commencing on Thursday night, July 28, 1870. Bishop Paine will be with us. We invite brethren from other districts and conferences to attend. Brother K. A. Jones is at Starkville, and will receive all brethren and appoint them their homes.

F. M. Featherston, P. E.

BROOKHAVEN DISTRICT.

The ministers and members of the Brookhaven District Conference will please note that, owing to the failure to procure the presence of a Bishop at the time before specified, I have, at the earnest solicitation of a number of the brethren, concluded to defer the time of the conference till Wednesday, July 27, to embrace the fifth Sunday. It will meet in Brookhaven. We expect Bishop Keener to preside. Brethren will remember that all members of Quarterly Conferences are entitled to membership in the District Conference.

G. F. Thompson, P. E.

MERIDIAN DISTRICT MEETING.

The District Conference for Meridian district, Mobile Conference, will be held at Belmont, Alabama, August 11-14. A full attendance is requested.

J. T. Heard, P. E.

Union Springs District Conference.

The Union Springs District Conference of the Alabama Conference will convene in Greenville, Alabama, Wednesday, July 27. Opening sermon on Wednesday night, by Rev. Angus Dowling.

J. W. Shores, P. E.

NOTICE.

To the Preachers of the Fourth Year, and Committee of Examination for the same, South Alabama Conference:

Dear Brethren:—The Conference year having so far advanced, you will be examined on the studies of the old course.

For mutual convenience I have taken the liberty to make the following distribution of labor among the members of the Committee of Examination, viz:

The Bible, generally, etc.; Powell on Succession; Whatley's Logic—William Shalpard.

Wesley's Sermons, vol. 4; Rivers' Elements of Moral Philosophy; Watson's Institutes, part I—E. M. Bonds.

Discipline; Hymn Book; Luther's Church History; Essay or Sermon—J. Bancroft, Chairman.

New Orleans Dist., Louisiana Conference.

THIRD ROUND OF QUARTERLY MEETINGS.

VOL. XVI.

NEW ORLEANS, SATURDAY, JULY 30, 1870.

NO. 28.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, July 16.—The following is the text of the income tax law:

There shall be levied and collected annually, as hereafter provided, for the years 1870 and 1871, and no longer, two and a half per centum upon the gains and profits and income of every person residing in the United States, and of any citizen of the United States residing abroad, derived from any source whatever, whether within or without the United States, except as hereafter provided; and a like tax annually upon the gains, profits and income derived from any business, trade or profession carried on in the United States by any person residing without the United States, and not a citizen thereof, or from rents of real estate within the United States, owned by any person residing without the United States and not a citizen thereof, there is an exemption of \$2,000, and also the amount paid for rent of dwelling houses. For the purpose of allowing the deduction allowed by law from the income of any religious and social community holding all their property and income therefrom jointly and in common, each five of the persons composing such society, and any remaining fractional number of such persons less than five, shall be held to constitute a family, and a deduction of \$1,000 shall be allowed for each such family. Any taxes on the incomes, gains and profits of such societies, now due and unpaid, shall be assessed and collected according to this provision; and the tax upon dividends of insurance companies shall not be deemed double such dividends are payable in money or otherwise, and money returned by mutual insurance companies to their policy holders, and annual or semi-annual interest allowed or paid to the depositors of savings banks or savings institutions shall not be considered as dividends.

WASHINGTON, July 18.—The State Department to-day received a dispatch from Mr. Hoffman, the acting minister at Paris, stating that France has decided to respect the treaty of 1856, which establishes the principle that the goods of an enemy are free from seizure under a neutral flag, unless they are contraband of war, and neutral goods not thus contraband are not liable to capture even on board an enemy's ship. Similar advice from Bismarck are also at hand. The following, however, is the definition of the treaty referred to, and to which the leading European powers give their assent: The United States, unwilling to give up the right of privateering and to issue letters of marque and reprisal, never became a party to the compact, which is:

1. Privateering is and remains abolished.
2. The neutral flag covers the enemy's goods, with the exception of contraband of war.
3. Neutral goods, with the exception of contraband of war, are not liable to capture under an enemy's flag.
4. Blockades, in order to be binding, must be effective; that is to say, maintained by a force sufficient really to prevent access to the port of the enemy.

Advices received here from North Carolina are of somewhat an alarming character. The Governor of the State has proclaimed martial law and suspended the writ of habeas corpus in several counties, and placed in command of a disorganized and disorderly body of men, called the State militia, a Colonel Kirk, who was somewhat notorious in the Tennessee troubles. Some of the conservative citizens, who are merely charged with being connected with the so-called Ku-Klux, have been arrested without process of law, confined in jail and denied a hearing even. It is telegraphed that the Raleigh Standard of yesterday announced on the authority of Robert Douglass, the President's private secretary, that these proceedings have the full approval of General Grant, who will, on application of the Governor, order United States troops into North Carolina. The Conservatives charge that the whole trouble is manufactured in order that the radicals may carry the election next month.

Both political campaign committees are organizing here for the fall elections. Senator Wilson, chairman of the Republican committee, is writing an address reviewing the work of the session just ended, claiming that it reduced taxation

eighty millions, restored the last of the reconstructed States, etc., and ought to be indorsed in October and November.

The Democrats will issue no address beside that already signed by the Democratic Senators and members of Congress on the twenty-fourth of June, but will distribute campaign documents, etc. The latter committee desire the name and post office address of the chairman of every Democratic State and county committee, and of all Democratic and Conservative candidates for Congress. These may be sent to Hon. Samuel J. Randall, chairman, in this city.

WASHINGTON, July 23.—The attention of the administration has been called to the condition of things in North Carolina. Hon. Bedford Brown, of that State, who was formerly United States Senator, returned this morning to North Carolina after an unsuccessful effort to induce the President to take some steps that would prevent the wholesale arrest of citizens of that State without process of law, and the refusal to allow them bail or a trial by the courts. He informed the President, on the evening of his departure for Long Branch, that there was no more of an insurrection in North Carolina than there was in Washington, and that the whole movement of martial law was for effect on the State and Congressional elections to be held one week from Thursday. The President said that he had been informed by the Senators from North Carolina that the reported outrages on white and colored citizens in several of the counties in North Carolina were true, but in any event it was not his duty to interfere in the absence of a request made by the Governor or Legislature of the State.

ASTORIA, July 25.—Reports from the frontier detail news of serious outrages and state that the country is fairly occupied by the Indians. Horses are carried off by droves, and scores of families are abandoning their homes, and in many instances they are reduced to destitution.

The Indians are breaking up everything in the vicinity of San Saba.

GALVESTON, July 26.—A special train from Waco to the News says: Captain Ballentine, from Fort Richardson, reports that on the fourteenth instant Major McClellan, with fifty members of the Sixth Cavalry, while scouting, met Indians numbering two hundred and fifty, who gave battle, forcing the cavalry back eight miles, killing ten and wounding eleven, among whom was Surgeon Hatch. They also killed nine and wounded twenty horses. Fifteen Indians were seen to fall. The cavalry were compelled to call assistance from the fort to get back to their post.

The Indians were armed with Henry and Spencer rifles and six-shooters, and were commanded by an able chief. They are believed to be on a general marauding expedition, and are all warriors. Major McClellan says they were the best appointed body of warriors he ever saw. He believes they were Camanches and Kiowas from the reservation.

NEW YORK, July 27.—The Cambria reached Sandy Hook at 3.45 P. M., and the Dauntless at 4.55 P. M. The English yacht Cambria arrived this evening at 3.30. The Dauntless was sighted at 4 o'clock. The steamer Scotia takes \$2,500,000 in specie.

BALTIMORE, July 27.—Arrived: Steamer Cuba from New Orleans.

NEW YORK, July 27.—Nine hundred Prussians owing army duty have reported to their consuls. Five hundred have departed for home on neutral ships.

General Sheridan sailed on the steamer Scotia to-day.

Two hundred and eighty Mormons for Salt Lake arrived, and four hundred more are en route from Liverpool.

NEW YORK, July 27.—Dr. Hopkins, president of Williams College, is to be entertained by the alumni to-night.

CINCINNATI, July 27.—All the space at the disposal of the officers of the Industrial Exhibition, which is to be held here in September, has been engaged by exhibitors. Other buildings will be erected immediately to make room for future applicants.

SAN FRANCISCO, July 27.—Nearly ten thousand votes were polled yesterday at the Democratic primary election.

Some excitement reported at the Chinese convention, which was in

session here to-day, in regard to the recent circular of working men and other subjects.

THE CURRENCY BILL.—The currency bill, as it has now passed both houses of Congress, and received the signature of the President, contains the following as its chief features: 1. A provision for the issuing of \$54,000,000 of new national bank notes in States and Territories having less than their share. 2. A provision for the redistribution of \$25,000,000 of the present national bank circulation, after the census of 1870, in the South and West, not now applied with their proportionate share of this circulation. 3. A provision for the redemption and cancellation of \$45,000,000 of three per cent. legal tender certificates, which are required to be withdrawn and canceled at the end of each month in an amount equal to the issue of new bank notes during the preceding month. 4. A provision for free banking on the basis of gold coin, without any restriction of its extent.

Such are the salient features of this bill, which is the result of a compromise between the two houses of Congress. It is a decided modification of the bill of Mr. Garfield as it passed the House of Representatives. That bill proposed to add \$95,000,000 to the present amount of our national currency; and also to remove banks to the amount of \$25,000,000 of currency from States which now have an undue proportion of circulation to those which have less, while providing for the redemption of \$45,000,000 of the three per cent. certificates as the new currency is issued. The Senate declined to adopt this bill, and proposed a conference committee; and the result is the bill which has now become a law.

FOREIGN.

LONDON, July 22.—The following details of affairs at Forbach, which has been variously reported as battle and skirmish between customs patrol, has been published here to-day.

Two regiments of French hussars, and a body of Uhlans German troops, commonly armed with lances, met on the frontier. The French immediately made preparations to receive the attack. At length one of the Uhlans came forward, the French allowing him to approach, regarding him as a deserter, or expecting a parley. On coming near the Uhlans fired at the commander of the French, but missed his mark, and turned and fled amid a shower of bullets.

LONDON, July 23.—The manufacturing of the Lancashire district will soon be put upon short time system. The trial of Jones, who murdered the entire family at Luxbridge some months ago, terminated to-day. The prisoner was sentenced to death.

PARIS, July 23.—Last evening Mme. Essas repeated the Marseillaise at the Grand Opera. The scene, as before, was one of the greatest excitement and enthusiasm. The following is the allocation delivered by the Pope on the occasion of the promulgation of the infallibility dogma:

"The activity of the sovereign pontiff has been great, but it does not destroy, it builds. It does not oppress, it sustains and it often defends the rights of our brethren; that is, the rights of the bishops and of some who have not voted with us. Let them feel that they have voted in error, and let them remember that a few years ago they thought as we do. Have they, then, two consciences—two wills on the same subject? Heaven forbid! We pray, then, that God, who alone makes miracles, will illumine their hearts and minds, that they may return to the bosom of their father—that is, the sovereign pontiff—the unworthy vicar of Christ, and work with us against the enemies of the church. Let it so be that we may say with St. Augustine: 'Lord, you have given your admirable light, and now we see.' May heaven bless you all!"

PARIS, July 23.—A ministerial decree, published this afternoon, forbids from this day publication in any way accounts of the movements of the French army or navy.

The Patrie this afternoon says a dispatch has been received from St. Petersburg containing the following: The Czar addressed a note to the French government to-day. He regrets the precipitate measures taken on both sides, and that the opportunity was not allowed Russia and other powers of Europe to aid in favor of peace. The Czar, while regretting the calamity of a war,

will remain neutral so long as the interests of Russia do not suffer.

ROME, July 24.—A pamphlet, which has been ascribed to Archbishop Kendrick, of St. Louis, entitled, "What has Passed in the Council," made its appearance to-day, and causes profound sensation. Formal complaint has been lodged against it, signed by five cardinal legates and other dignitaries.

LONDON, July 25.—A secret treaty which was projected between France and Prussia monopolizes the attention here of the public press and Parliament.

Intense indignation is manifested at the duplicity of the powers concerned. The action of Napoleon is considered insulting to England.

Complete ignorance of the negotiation is professed at the French embassy.

A dispatch from Brussels states that the account of the treaty projected between France and Prussia, which was printed in the London Times this morning, is perfectly authentic. The Belgian government knew of its existence only a short time ago.

In the House of Lords, Earl Granville, in reply to questions from Lord Stratford de Redcliffe, said he was unable to state where the Times obtained the text of the treaty. After the announcement of the existence of such a remarkable document, it would be the duty of France and Prussia, immediately and spontaneously, to explain the matter to Europe.

ROME, July 26.—The Liberte promises documents that will create a sensation. They show that the Italian government has not even asked for the withdrawal of the French troops, but France has taken the initiative to that end.

COPENHAGEN, July 26.—The government of Denmark has issued a proclamation of neutrality in the war between Prussia and France.

Sailors and pilots, subjects of Denmark, are warned against rendering any assistance to the belligerents.

TORONTO, C. W., July 27.—Terrific storms are constantly occurring throughout the Dominion. Many houses have been unroofed, and the crops are lying flat.

BERLIN, July 27.—The Correspondence to-day prints the text of the treaty offered by the French emperor to Bismarck.

In its comments the Correspondence says the emperor waived all opposition to German unification, provided Prussia would abet the French acquisition of Luxembourg and the reduction of Belgium.

The minutes of the proposed treaty, in Count Benedetti's autograph, are preserved in the war office at Berlin.

Before the war of 1866, between Prussia and Austria, Napoleon had offered to aid Prussia with an army of three hundred thousand men, with which to attack Austria, as an equivalent for the cession to France of the territory on the left bank of the Rhine.

PARIS, July 27.—All the organs represent that the secret treaty was not seriously proposed by France, but rather as an attempt to test Bismarck.

LONDON, July 27.—Revolutionary intrigue is rife in Rome and Italy in view of the probable French evacuation.

Secret deposits of arms in Genoa have been seized.

The Pope is deeply concerned by the projects and plots of the party of action.

The French prelates, who were absent at the final vote, are sending in their adhesion to the infallibility dogma.

TREVES, July 27.—The French yesterday violated Luxembourg soil; one hundred crossed at Schlegel, singing the Marseillaise.

PARIS, July 27.—La Liberte has the following from the front: The Prussians evacuated Weissenburg and have but two squadrons of cavalry at Treves. They are concentrating at Mayence, where King William arrived last night.

A skirmish is reported to have occurred, wherein thirty Germans were killed and eighty captured.

LONDON, July 27.—The Times holds that its publication of the secret treaty has secured the neutrality of Belgium, which, without this warning, would have been liable to violation any moment.

Those who in the day of sorrow have owned God's presence in the cloud will find him also in the pillar of fire, brightening and cheering the abode as night comes on.

VERSES FOR A HOT DAY.

Oh for a lodge in a garden of cucumbers!
Oh for an iceberg or two at control!
Oh for a rule, which at midday the dew chambers
Oh for a pleasure trip up to the Pole!
Oh for a little one-story thermometer.
Oh for nothing but zeroes all ranged in a row!
Oh for a big double-barreled thermometer.
To measure this moisture that rolls from my brow!

Oh that this cold world were twenty times colder!

(That's irony red hot, it seemeth to me.)
Oh for a turn of its drowsed cold slumber!
Oh what a comfort an acre would be!

JOY IN HEAVEN.—You remember the occasion when the Lord met with thee. Oh, little didst thou think what a commotion was in heaven! If the queen had ordered out all her soldiers the angels of heaven would not have stopped to notice them. If all the princes of earth had marched through the streets, with all their jewelry and robes and crowns, and all their regalia, their chariots and their horsemen; if the pomp of ancient monarchs had risen from the tomb; if all the might of Babylon and Tyro and Greece had been concentrated in one great parade, yet not an angel would have stopped in his course to smile at these poor tawdry things; but over you, the vilest of the vile, the poorest of the poor, over you angelic wings were hovering, and concerning you it was said on earth and sung in heaven, Hallelujah, for a child is born to God to-day.—Spurgeon.

CIRCULATION OF THE BLOOD.—Says the Cincinnati Commercial, of the thirtieth ultimo:

Dr. Landon Rives, at the urgent request of Drs. Blackman and Dodge, gave at Avon Hall, Avondale, yesterday noon, an exhibition of the circulation of the blood by the solar microscope. This wonderful instrument, which is the only one of the kind in America, exhibits the flowing of the blood through the blood or capillary vessels. This is the first exhibition of the kind ever given in this city or vicinity, save to a favored few medical students and professors. This truly wonderful instrument was manufactured by a scientific German optician of this city, and is pronounced to be the finest specimen of workmanship ever produced in this country.

FABER'S speaking machine is attracting attention in Germany. It pronounces each letter distinctly, and even laughs and sings. German philologists have heretofore declared it to be impossible to imitate the letter I (as pronounced in German) by artificial means, but this machine speaks the word Mississippi very plainly. During a performance at Berlin, a slip of paper, containing the words, "Long live King William of Prussia," was handed to Mr. Faber, and correctly pronounced by the machine, whereupon there was a great deal of applause.

DR. DUNCAN, a professor in the New College, Edinburgh, was a very absent-minded man. The doctor was coming out of the college, one day, when a cow brushed slightly against him. He mechanically lifted his hat, and muttered, "I beg your pardon, ma'am." He was a good deal rallied about this, and a day or two afterward, as he was again coming from his class, he stumbled against a lady, and at once exclaimed, "Is that you again, you beast?"

A MOVEMENT has begun in Massachusetts to organize the children of the Sunday schools into a cold-water army. The plan is to divide the towns and cities into districts, each school to be a company of the temperance advance guard, with a constitution pledging the members to total abstinence from liquor, tobacco and profanity; the superintendent of the Sabbath school to be commander and the teachers to be lieutenants.

LITERAL ANSWERS.—A lady noticed a boy sprinkling salt on the sidewalk to take off the ice, and remarked to a friend, pointing to the salt:

"Now, that's benevolence."
"No, it ain't," said the boy, somewhat indignantly, "it's salt."

"So, when a lady asked her servant girl if the hired man cleaned off the snow with sincerity, she replied:

"No, ma'am, he used a shovel."

FAME is an undertaker that pays but little attention to the living, but bedizens the dead, furnishes out their funerals, and follows them to the grave.—Colton.

MISSIONARY.

Letters from our brethren in the Indian Mission Conference indicate that the missionaries in that important and interesting field are suffering for the common necessities of life. I am glad to report that the board has been able to send partial relief; only partial, however, as the state of the treasury is low. Would that we could double the amount at once; indeed, double would only bring them up to the regular quarterly installments now due. If these brethren do not get help they will be compelled to abandon the work to provide bread for their families. I make a most pressing appeal. Besides, our brethren in the German work in Texas need help very much; and many fields are being lost on the frontiers of the States for want of cultivation. Our Bishops could employ scores of laborers in new fields if they only had the means of support.

The old debt is not yet all paid; this rests like a mountain-weight upon us, and cripples our operations. Who will come to our help? Reader, go to your closet and ask God if you have done your duty; and then from your knees go to your pocket and transmit something to the treasury of the Lord for the relief of his church. Your fields are full, your harvests abundant, your flocks and herds are fat and flourishing—how can you withhold from your Master, your precious Saviour, that which he demands? You can spare \$100, \$50, \$20 or \$10; or perhaps only a smaller amount at present; but whatever be the amount, great or small, send it on. Remember that the Lord loves a cheerful giver, and that the liberal soul shall be made fat. Moreover, we are encouraged in this work. Here is the report from a single presiding elder's district in the Indian Mission Conference. The Rev. J. H. Walker writes that since the last Conference, October, 1869, on the Chickasaw district, up to June 28, 1870, he had preached one hundred and four sermons; baptized two hundred and thirty-nine adults, and two hundred and fifteen infants; received into the church four hundred and seventy-five members; thirty-four had died, and the brethren on the district had contributed \$145 65 missionary money. What hath God wrought!

Let the church hold up the hands of her servants, and cheer their hearts by prayers and contributions.

J. B. McFARLAN, Sec'y.

MISSION ROOMS, July 20, 1870.

Delegates to the Annual Conference.

MR. EDITOR: At the district meeting on Mount Carmel district, Mississippi Conference, the following brethren were elected delegates to the ensuing Annual Conference:

Delegates: Isaac M. Applewhite, Dr. J. D. Terrill, William C. Warren, Rev. W. G. Evans. Alternates: Dr. J. D. Finches, T. J. Fozell, Lemuel Lewis, J. W. Williams, of Handsboro.

H. P. Lewis, P. E., Mount Carmel, Miss.

CORRECTION.

MR. EDITOR: In the biographical sketch of Rev. Elisha Callaway the name of "Peniel" should occur in place of "Bethel."

J. BANCROFT.

MOBILE, July 26, 1870.

BISHOP McTYMME informs us that the Western Conference is to be held Sept. 8, instead of 7; St. Louis, Sept. 23, instead of Oct. 5; Illinois, Oct. 12, instead of Oct. 19.—Nashville Advocate.

THE Southern Christian Advocate announces the peaceful death of the Rev. P. N. Maddox, an aged local preacher, in Pike county, Georgia, July 11.

"SAY IT."—A famous preacher once gave some good advice to a young minister, who asked him for some good rules for preparing sermons. "Young man," said the old preacher, "two rules are enough: have something to say, and say it."

A great trouble with most preachers is, that they go a very roundabout way to say anything. Sometimes those who desire to be very eloquent come to the end of their speech suddenly.

MAN must have occupation, or be miserable. Toil is the price of sleep and appetite; of health and enjoyment. The very necessity which overcomes our natural sloth is a blessing.

The Christian Advocate.

SATURDAY, JULY 30, 1870.

GROW NOT OLD.

BY MRS. LOUISA J. HALL.

Never, my heart, wilt thou grow old!
My hair is white, my blood runs cold;
And one by one my powers depart,
But youth sits smiling in my heart.

Down hill the path of age! O no!
Up, up with patient steps I go.
I watch the skies, fast bright'ning there,
I breathe a sweeter, purer air.

Beside my road small tasks spring up,
Though but to hand the cooling cup;
Speak the true word of hearty cheer,
Tell the lone soul that God is near.

Rest on, my heart, and grow not old!
And when thy pulses are all told,
Let me, though working, loving still,
Kneel as I meet my Father's will.

Old and New.

CLAIBORNE PARISH.

OUR PREACHER.—SOME OF HIS WORK.—HOMER CIRCUIT.—COMPARATIVE WEALTH OF CLAIBORNE.—HOME PRODUCTIONS.—MINDEN AND THE MINDENITES.—HOMER AND THE HOMERITES.—LIFE ASSURANCE.—CHOIRS.—SERMON ON BAPTISM.—REV. N. A. CRAVENS, ETC.

EDITOR ADVOCATE: Even before the Rev. T. J. Upton came this year to Homer circuit your (our) paper had considerable circulation, but since his advent the circulation has been greatly increased. In Claiborne parish parlance "he is the out-workingest man alive."

I have never yet heard how that great question, discussed in the Jackson (Mississippi) district conference, viz., "Are our church papers sufficiently laudatory of living ministers?" was decided. If I knew that it had been decided negatively I would just here write down many, very many good things of our circuit preacher. As it is, I can only say that he visits every family in his charge and prays with them; tells them the CHRISTIAN ADVOCATE must be taken by our people; that the Discipline should be in every house, and industriously circulates our publications.

Only one circuit in the Louisiana Conference reports a larger membership than this, viz., Alexandria. I suppose the actual membership of this charge to be about four hundred. It is the wealthiest circuit in the Conference, and on many accounts the most desirable appointment. Homer circuit embraces the central portion of the parish—includes Homer, the county town. The parish is the richest in the State. I do not mean that the lands are the richest, but I mean to say that the real solid wealth, the unencumbered wealth, exceeds that of any parish in the State. Our river parishes were, in the main, bankrupt at the close of the war; and in truth banks and commission merchants owned them principally before the war. Not so here. Just as the war closed a few planters met together and put up an immense cotton factory, seven miles from Homer; and in doing this some of them scarcely touched their available means. Some as fine farms as can be found in the State are in this parish. Fine residences dot the parish all over. Here we grow our own corn (until cotton went up to such a price), most of our own wheat, and have splendid flouring mills to grind it. We raise our own hogs, and most of our stock of all kinds; and even before the cotton factory came to our assistance we made our own cloth, except a little calico for our wives and a Sunday suit for ourselves. As a fruit country it is unsurpassed—apples, pears, nectarines, plums of every sort, apricots, quinces, peaches which are not excelled either as to quality or variety; melons of all sorts. We have apples beginning with May and continuing to ripen until frost, and plenty to be kept all winter. Except a very small portion of the parish—the western portion, on the Bayou Dorcheate—this is without doubt the healthiest portion of Louisiana, if not of the entire Southwest. We enjoy here almost a complete exemption from climatic diseases. Give us a railroad, and we have a country affording and combining as many advantages as any that can be named.

We have too many towns. Now to enumerate: Minden, Homer, Dutchtown, Hayneville, Arizona, Gordon, Lisbon, Colquitt, Tulip. I believe that is all. Now could we have a gentle earthquake to shake them all up into one, we should

then have one town which would be respectable as to size, at least. Claiborne would make two good sized parishes.

Minden is the principal town of the parish in point of business. The population is less than that of Homer. I suppose the trade of Minden exceeds that of all other points in the parish combined. It is the general shipping point for all this part of the country when the Dorcheate is navigable. There are at Minden several churches, some pretty residences with flowers and shrubbery, those certain evidences of cultivated taste. Indeed it is said that Minden is unsurpassed by any town in the State in point of intelligence. Churches, schools and society render Minden a most desirable place to live.

Homer, as I have already stated, is the county town—the capital of Claiborne—one of the loveliest sites for a village I have ever seen away from the mountain regions. It has been but little more than twenty years since the first house was built here. This place was chosen as the seat of the Methodist male college for north Louisiana. The college buildings are sufficiently commodious, and handsomely located. There were about one hundred students last year. The school is under Rev. J. E. Cobb, late of the Little Rock, now of the Louisiana Conference. Prof. Cobb is a man of fine scholastic attainments, and everywhere noted for his deep, earnest piety, and earnest zeal as a Christian minister. We have great hope of constant improvement in the school. Here, too, there is a large female school—say one hundred and thirty pupils—under Prof. L. R. Wilcox, who taught here previous to the war. The Masonic fraternity control this school, and it is therefore necessarily non-sectarian. It is now understood that Prof. Nicholson, of the Arizona school, will next session enter Homer Male College as professor of mathematics. If this arrangement is consummated fifty additional pupils will come in with the opening of the next session. This gentleman has acquired great reputation not only in mathematics, which is his peculiar delight, but also as a fine disciplinarian. He is a native of Claiborne parish, and greatly esteemed.

We have at Homer only two houses of worship—Methodist and Baptist. The Presbyterians worship in the Methodist church. Rev. J. T. Davidson, the pastor, has resided near Homer for many years. Perhaps no minister has ever enjoyed a greater degree of personal popularity than Mr. Davidson. He is the friend of all, and all are his friends. But the houses of worship here are shameful. The richest circuit in the Louisiana Conference has the poorest houses of worship! And in Homer, with mercantile houses comparing favorably with some of the best in your city, a little cramped up, half painted house uninclosed, with old unpainted pine plank benches, windows without blinds, and every rude boy that passes makes an experiment to see how many panes of glass he can demolish at one throw. And then these missing panes! Ah, their absence is painful to contemplate! And then they are likely to be absent so long. The Baptists have a larger house, unfinished and sadly out of repair. Indeed Homer circuit, with all its wealth, has not a single respectable house of worship. I predict, however, that the end of four years will show a different state of things.

Several of the storehouses are large, showy and elegant. The dwellings in the main are neat; hardly one could be called fine; all of them too small; but, like the houses in Jackson, Louisiana, seem to be made of India rubber; for when our colleges are closing and the crowds come swarming in, there is always room enough for all, and for a few more of the same sort.

I suppose the census will show a population of eight hundred. For universal quiet, orderly deportment, our Sabbath or week-day Homer ranks any place of its population. A fine of \$50 is imposed for opening the door of a business house on

the Sabbath. No rows occur upon the streets, no reeling drunkards startle ladies in their promenades. Our business men, our lawyers, our doctors and our judges are sober men, and almost without exception total abstinence men. Can you beat this?

The temperance reform has wrought a great good all over this country. Old and young, men and women, all have been swept along by its resistless power, and even those who have not joined the societies are sober for want of somebody to drink with. And the work goes bravely on.

The crop prospects have never been more flattering. Abundant rains thus far give us now almost the full assurance of corn in plenty. The worm and the frost have the cotton to look after. Our people are working quietly and peaceably. No disturbances occur. The fifteenth amendments are perhaps working better than since the surrender.

Life assurance is the great business. Agents swarm in town and country. As Bishop Keener remarked in his Alabama letter last winter: "Whereunto will this thing grow?" I stopped a few days since at an old gentleman's house, and as soon as I had told him where I lived he struck the life assurance question in this way: "Is menmy of um tuck out a policy whar you live?" "A policy of what?" said I. "A policy of onshorunce," replied he. "Oh, yes," said I, "a good many." "Well," continued he, "a right smart of um tuck out in the colliny down here; but I'm a thinkin these shorunce companies all bust up, so menmy's a jinin. Ef I was onshored I'd be mighty oneasy, I would." Like to see an agent strike that cnsioner. But so it goes. The learned and ignorant, rich and poor, men and women, discuss this question of "onshorunce." You are perpetually bored with it. A man gave me a figurative illustration of the numerical strength of these life agents in one town. Said he: "I was walking the street, slipped, and was only saved from a severe fall by being caught in the arms of three life insurance agents."

Rev. N. A. Cravens, though appointed this year to Minden, still resides in Homer, which is very pleasant, both on account of having him with us now and then, and his lovely family all the while. I should be glad, by the way, to see that sermon of his on baptism issued from our Publishing House. This is one of the clearest expositions of the mode of baptism I have yet found. The author has piled up some blocks in the path along which immersionists tread to get down into the water, which they cannot get over, cannot get around; nor are they strong enough, with all the forces they can muster between this and the river Jordan, to roll these blocks out of the way. They must take the highland route to heaven, or throw the Bible aside. This, however, they have practically done already.

You have no regular correspondent in this region; your paper circulates extensively; I do not trouble you often. These facts will justify this long letter, the last you may have for many a day from

PILGRIM.

CLAIBORNE PARISH, LA., JULY, 1870.

MR. GILMORE is getting up a grand international jubilee for next year, which is to eclipse all his former efforts. He purposes collecting not only a chorus and orchestra of unparalleled bigness, but military bands from all the principal countries of Europe, and famous European musicians to conduct them. There is really good reason to believe that he will succeed. His original purpose was to have it in New York, at the time of the World's Fair, in 1871. But Boston offers to subscribe unlimited dollars if he will have it at the Hub; and as New York as yet has shown no sign of subscribing, why, Boston, we suppose, will carry the day.

Mrs. J. L. L. lives should be like the day, more beautiful in the evening; or like the summer, aglow with promise; and the autumn, rich with the golden sheaves, where good work and deeds have ripened on the field.

It is the greatest of all blessings to know the blessedness that is to be had in the Lord Jesus Christ.

The One Great Romish Falsehood.

MR. EDITOR: All the errors of popery grow plausibly, if not legitimately, out of one single falsehood. That falsehood is that the church, the Christian church, that which everybody calls church, originated in the days of the Saviour's incarnation as a corporation. I use the word corporation because it is the best I know of to describe the idea. I mean by it that on some occasion several persons say the twelve apostles, and perhaps some others, organized themselves, or were organized, into a society for the promotion of Christianity, under some positive laws for the perpetual government of the association. Before this day they were not thus united. This church did not exist. It began to exist that day. Its law required perpetual existence by taking in qualified persons and excluding unfit ones. That was the beginning of the Christian church. The society, or compact—call it a church—was thus set up by or under the authority of Jesus Christ or his apostles, or some of them.

That is, I believe, what everybody means by Christ organizing his church; and so we hear of the "original church," the "primitive church," the "first church," when the church "began," that it "was formed on the model of the synagogues," etc. Now this idea of the church's origin, or any such sort of origin, with whatsoever details, is what I call the great Romish falsehood.

The thing is both historically untrue and philosophically impossible. Not only did no such thing, nor nothing like it, ever take place, but it is impossible the church could have originated in such a way. Such a corporation, begun and established upon such principles, would not be, could not be a church. No matter by what authority it was done, human or divine, in the nature of things it could only be a human society for the promotion of religion. If the members were personally immaculate then it would be so.

There are only two ways by which that or any other supposable or possible thing can be disproved. First, That no history mentions it or alludes to it. Second, That it would be incompatible with what was known and admitted. On the first point it is only necessary to say that in the New Testament there is not the slightest historic allusion to the formation of a church—any kind of church. Matt. xvi, 18 has more the appearance of such a thing than any other passage; but only speaks of a new feature which the church must ever have after that time. This new feature is naturally and unavoidably necessary, whether the Saviour or any one else had said so or not. His saying so did not make it so. He merely reminded the apostles of a natural and necessary truth—a necessary deduction from a great and vital fact. That fact was that Jesus was Christ. The necessary truth growing out of it was that ever after that time, and not before, true religion, the fundamental church principle, must rest, grow or be built upon that fact, viz: The Christship of the man Jesus. The church must now, as in the nature of things it could not do before, rest, grow, be built or build itself on that great truth.

A new church is incompatible with many known and admitted things. It is notorious that both Jesus and the apostles lived and died in the church of their fathers. Paul was still "a Pharisee," and a Jew or Hebrew, in the very last years of his life. No one in that age changed his ecclesiastical relations except the denying or apostatizing Jews. The "myriads," to use a Scripture term, of Jews who accepted Jesus as Christ, and stood firm and still more firmly by him, certainly did not. We are sometimes told that the Christian church (or churches) was built after the model of the synagogues. Model, indeed! They were exactly the synagogues themselves; the very identical houses then and always called synagogues. In process of time the Christiansynagogues—that is, those and by those Jews that acknowledged

the Christship of Jesus, to distinguish them from "the synagogues of Satan," the houses of the repudiators—came to be called by other names, which we now call "church." But the notion of a new church, another church or a Christian church, in contradistinction to the then existing church, the church of the prophets, is not only false in fact, but is the greatest, most mischievous and unfortunate ecclesiastical falsehood that ever marred the peace of the church of God. May it die and not live! It is not only the greatest and worst, but it is the only fundamental falsehood that I know of that is justly chargeable against popery. The others, commonly complained of, are only the plausible or legitimate fruits of this primary error.

Step into the channel of any of our ecclesiastical troubles, and trace it upward, and you will find it to originate right there in this supposed origin of the church. It is wonderful what a sea of trouble has flowed from this single point.

R. ABBEY.

CENTENARY INSTITUTE.

REPORT OF THE BOARD OF TRUSTEES.

The attention of the public is respectfully called to the existence of two large schools in the immediate vicinity of Selma, which have been successfully conducted for more than thirty years under the fostering care of the Methodist Church in Alabama. Their location is Summerfield. The female department, under charter as a college, has educated and graduated scores of young ladies, who are among the most cultivated women of the State. Many of these are the daughters of Methodist preachers, whose services in the cause of the church have been recompensed in part at Summerfield by the gratuitous education of their children. Others have received all the advantages of Centenary Institute without cost to parent or pupil; and since the foundation was laid no boy or girl has been denied admission or refused an education on account of poverty. Familiar with the school, and with the people of Summerfield, we have known many instances in which the houses of the citizens have been thrown open to young men struggling for an education, and board and lodging cheerfully furnished them.

These institutions still live after the death struggle of the past five years, and now command, by thoroughness of culture in all the branches of a solid, practical education, and by the achievements of the last quarter of a century, the substantial support of the country made tributary to Selma by the various railroads concentrating here. Appreciating this convergence of the railroad system of Alabama to Selma, the Board of Trustees are scattered all along these various lines, and meet annually to watch over the interests of Centenary Institute, and provide for its development and progress. In view of the demands made upon them by the requirements of the age for an eminently practical education, they have placed Prof. W. J. Vaughan at the head of the female college, and Prof. John Massey in charge of the male department—both graduates of the University of Alabama—both accomplished scholars, and whole-souled, honest-hearted gentlemen, with as little humbug or clap-trap about them as ever fell to the lot of a college president. These gentlemen are aided by a full corps of assistants in their respective departments.

In the appointment of these gentlemen the Board of Trustees was governed by an intimate knowledge of the men, and their peculiar fitness for the responsibilities and duties of educators of Southern youths, now and here; and they take pleasure in indorsing the wisdom, management and capacity of President Vaughan and Prof. Massey.

The boarding department is admirably and sumptuously conducted for the young ladies by Mr. and Mrs. John J. Heard.

The young gentlemen are provided for by Prof. Massey and the citizens of Summerfield.

The board was gratified at the exercises of the late commencement

occasion. The speeches of the young gentlemen evinced a sternness of purpose and maturity of thought that left no fears in regard to their performance upon the stage of active manhood life.

It was refreshing to hear the young ladies recite their compositions. All were impressed with the beauty and richness and expressiveness of our language by the exact rendering of Tuesday and Wednesday. Mrs. Vaughan deserves all the credit of the training, we heard it whispered. But President Vaughan received especial praise for the perfect pronunciation and recitation of the Latin and French compositions. The sad and touching valedictory closed the scene.

We look to the future with hope and faith, relying upon the good sense and progressive spirit of our people, upon the living witnesses of the worth of Centenary, and above all upon the justice and benevolence of him to whom this institution was dedicated, who still presides over the destinies of the youth of Alabama, doubt it as you may.

B. M. WOOLSEY,

Rev. J. BARKER,

Committee.

OPELIKA HIGH SCHOOL.

MR. EDITOR: Although the Opelika High School does not belong to the Conference, it is, nevertheless, emphatically a Methodist institution, and deserves notice in the organ of the church. This school is in every sense closely identified with all the interests of the church in this city. Rev. E. D. Pitts is a member of the Alabama Conference, and his entire corps of teachers are members of the Methodist Church, and devoted laborers in the Sabbath school. The annual examination exercises began June 30, and closed July 5.

On Sabbath the annual sermon was preached by Rev. A. Means, D. D. of Georgia, to a large and appreciative audience.

The singing on Sabbath by the choir and children, led by the mellow tones of the organ, was delightful. To hear more than a hundred sweet little voices, all mingling together in sweet strains of music, was enough to attract the admiration of angels.

Sacred music is taught in this school, and too much praise cannot be awarded the female teachers for the great care they have bestowed in this department.

The speeches by the young men, and compositions by the young ladies, on Monday and Tuesday, could not have been more interesting.

The annual literary address by Rev. William Shapard, of the Alabama Conference, and the prize delivery addresses by Hon. W. H. Barnes, of Opelika, and Major A. M. Allen, of Columbus, Georgia, were all excellent, and well adapted to the time and occasion.

From the beginning to the close the whole of the exercises were interesting, and the community feels greatly in debt to Rev. E. D. Pitts for such a feast of fat things.

This closes the eighth annual session of this valuable institution, and the past session has been more prosperous than any preceding one—numbering one hundred and fifty-four pupils.

The next session opens August 15, and we urge all the patrons and friends of the institution to rally to its help and make the incoming year still more prosperous.

To the people of east Alabama we can most heartily recommend the Opelika High School. Opelika is easy of access; tuition as low as in any school of the same grade in the country, and board can be obtained in the best families at from \$15 to \$20 per month.

OPELIKA, ALA., JULY 19, 1870.

There is some of sadness as well as reproach and expostulation in these words of the divine Saviour: "Ye will not come to me." They were addressed to a crowd of his bitter enemies—the self-righteous, bigoted and hardened Jews, by whom all his gracious offers of salvation were despised, all his claims to be the Son of God were ridiculed as those of an impostor, and by whom with deeper guilt all his wonderful works in attesting those claims were ascribed to the promptings and assistance of the Devil.

The Christian Advocate.

SATURDAY, JULY 30, 1870.

TOWARD EVENING.

Father, the shadows fall
Along my way;
The past the dream of day.
My "wondering soul" tells that the eye is near;
I know, but feel no fear,
And loved ones have gone home—
A holy band.
I hear them call me from the spirit land;
A gentle call;
Yes, dear ones, I shall come.
O not alone I though now
I lead the van.
And with uncovered head
Press on where others lag.
Where my young life began.
I am not left alone,
Though they are gone;
Sweet voices of the past,
And of to-day—
The loved that round my way
Still twine around my heart.
Tell me how good thou art.
O holy Light and Love!
Beam on my soul,
My latest life control;
Then may each pure thought spring,
And peace, with gentle wing,
Brood like the dove.

Monthly Review.

NEWS FROM THE CHURCHES.

MARTINSVILLE CIRCUIT, MISSISSIPPI CONFERENCE.

Mr. Editor: We have just closed our first protracted meeting on the Martinsville circuit, Brookhaven district, Mississippi Conference. It was at old Providence camp ground, on Pearl river, among the oldest Methodist churches in southern Mississippi. It was among the best revivals I ever attended, though the number of conversions did not likely go over forty, and twenty-eight accessions to the church. It was a time of gathering in of the old members from the circuit. I don't know that they ever were together at a revival meeting before, or will be again, but they made the welkin ring. A large portion of the converts are young men—escaped the perils of the war, came home and married, and engaged in agriculture. We have already some noble, pious young men on the war path, well prepared for the fight, and will be at the next Conference, ready to go anywhere the Master bids. Others will be called, no doubt. It makes my heart glad to see so many young men out in the farming districts being converted to God, and that in the old Methodist style—converted all over.

A. B. NICHOLSON.

To the Alumni of Lagrange College and Florence Wesleyan University.

At the recent reorganization of the Alumni Association of the Florence Wesleyan University we were appointed a committee to address the absent alumni. We desire, therefore, to call your attention to a plain statement of facts.

1. The association which we represent includes all the graduates of Lagrange College to the time of its formal removal to Florence, in 1851. In the adoption of the constitution, by-laws, etc., of the original association, this fact was made prominent as early as 1855. The action of the Board of Trustees acknowledged the same fact by a unanimous resolution. The present president of the association is a graduate of Lagrange College, as is also the vice president. It is also the fact that after the action of the Conference, removing Lagrange College, it was created into a military academy, which was burned by the Federal troops during the war. The Florence University, then, claims all the graduates of the old institution as its alumni, and we recognize that claim.

2. The University is fully reorganized, and has entered again with hopeful prospects upon its career of honor and usefulness. The Rev. W. H. Anderson, D. D., is president. He is a gentleman of large experience, and of rare and elegant accomplishments. By his refinement and polish, his learning and elegance, his piety and zeal, he has made the finest impression upon the community, and proves to be worthy to follow successfully in the work commenced so gloriously by the late Bishop Paine, more than forty years ago. He is assisted in the literary department by Prof. Meek and Rice, the former of whom is a classical scholar of extraordinary elegance, accuracy and depth. He has charge of the department of ancient

languages, and we feel assured that the chair was never better filled. Prof. Rice is well known to us, having been connected with the institution for more than sixteen years. The law department is conducted by Hon. Wade Keyes and Hon. W. B. Wood, gentlemen widely known as accomplished lawyers and jurists. The repairs on the noble building are rapidly approaching completion, and soon the classic halls and grounds will again, in attraction and elegance, be second to none in the country. The trustees are determined to make haste slowly, but expect to add another officer to the faculty by the beginning of the next term.

3. Our association passed a resolution to aid in the increase of the patronage of the University. We resolved that each alumnus should endeavor to send one pupil by the opening of the next session. This we regard as a most important move in the right direction, and we invoke your most cordial co-operation. Let this resolution be carried out, and the University will at once renew its youth, and re-enter the lists with the first institutions in the land.

4. We now call your attention to the most important action of our association. We determined to make a strong and united effort to endow a chair, to be called "The Alumni Professorship." If each alumnus can raise \$100, the work is done. The Rev. Joseph E. Douglass, an alumnus of 1838, proposed to subscribe \$100, and pay ten per cent. interest annually, until the principal should be paid. This proposition met with favor, and was liberally responded to by those present. We earnestly urge this great enterprise on your consideration. Can you not become one of this number?

The prospects of our Alma Mater are brightening. Her faculty and trustees are greatly encouraged, and we think we can safely say: "The night is far spent, the day is at hand." If energy, enterprise, liberality and zeal on the part of the trustees, learning, ability and determination on the part of the faculty, and a hearty, earnest co-operation on the part of the community, can usher in that day, then it will break upon the University on the fourteenth of September, without a cloud to obscure its brightness, and without a fear as to its future glory.

J. E. DORGLASS.

FLORENCE, ALA., July 7, 1870.

A SINGER AMONG THE LYRISTS.—On the day of Miss Clara Louise Kellogg's recent concert in Utica, New York, it was proposed to show that young lady the State Lunatic Asylum. While there she kindly sang to a roomful of the more quiet patients, very much to their surprise and delight. Not content with gratifying these, however, she begged that she might be allowed to visit the more unbalanced patients. "Let me sing to the mad people," she pleaded. Winning consent, and accompanied by some of the faculty, their ladies and the matron, she proceeded to the wards where the most noisy and destructive subjects were confined. One would think her voice would have failed her at the dreadful sounds that greeted her entrance, at the glaring eyes turned upon her, and the indications of wrath in those poor, ungoverned faces. Not so. The brave-hearted girl knew her power. In an instant all discord and tumult was hushed under the spell of that marvelous voice. It rose and floated above the poor, distracted creatures like a blessing; then seemed to fall upon their upturned, listening faces in a soft, refreshing shower of musical rain. The effect was wonderful. The souls of those stricken women were not so utterly out of tune, after all, but that they could respond now. Some smiled, some nodded, and some gazed at her with streaming eyes. "She is an angel!" cried one. "Yes, she is an angel!" echoed others, as they crowded about her, eager but to touch gently her hand, her gown; or even her feet, while she, happy and fearless, made no effort to escape.

"She is my girl! my Estelle!" cried an old woman, suddenly. "She looks like her! She sings like her! Let me kiss her!" and Louise Kellogg bent and kissed the poor crazed creature, almost as if she were indeed Estelle.

RELIGIOUS INTELLIGENCE.

FROM THE Episcopal Convention reports we learn that the past year the Bishop of Pittsburgh confirmed 766 candidates; Bishop Huntington, of central New York, 1,066; and Bishop McVane, of Ohio, 906.

At the "children's service" in the Universalist church in New Haven, Rev. Phebe Hanford "dedicated" eighteen children on a late Sabbath, after preaching a sermon explaining the object of this new observance.

LOSSES TO ROMANISM.—A Roman Catholic paper, called the Universe, says that two hundred thousand Irish children are lost to the Catholic faith in this country every year. Catholic children are very largely reached by our Sunday schools, though probably a great deal more might be done in this way of losing the children to Romanism and gaining them to Christ.

A RITUALISTIC wedding in St. John's church, East Hartford, Connecticut, makes some small stir. The Eucharist was administered, the wedding-ring blessed, and the sign of the cross made over it and over the elements when administered; a procession was headed by a crucifer with a silver cross; lighted candles were employed, and white satin crosses and embroidery decked the ushers and rector.

The populace in Peking has risen against the French Catholics, destroying the French cathedral and government buildings, and killing some priests and sisters of mercy. The Russians have also suffered to some extent. We do not hear that the Protestants have been involved; though it is not improbable. The Imperial College, of which Dr. Martin is president, is under official protection, and has probably escaped.

The American Baptists are unwilling to abandon the idea of establishing their own mission in Spain, because their missionary in Madrid, Prof. Knapp, has connected himself with the Presbyterians. The Executive Committee of the Missionary Union have decided to take immediate measures to establish a Baptist mission in Spain, and have instructed the corresponding secretaries to open a correspondence with Prof. Knapp on the subject.

The Paris correspondent of the London Guardian says that at the meeting between Dr. Dollinger and Pere Hyacinthe, who spent three weeks visiting at the former's house, there was much discussion of the position to be taken if the council should decree infallibility; and that the decision was not voluntarily to quit the church, but to make no secret of their repudiation of some of its doctrines, and await the issue of tolerance or of excommunication.

The rigor with which the Russian government has lately been pressing the attendance at the national churches of Catholics and Protestants on occasions when prayers are especially offered for the reigning family has excited considerable opposition. M. de Pressance, of the Evangelical Consistory of Paris, lately by appointment visited the Emperor of Russia to plead for the Russian Protestants. The meeting is said to have been satisfactory, as relief was promised.

WE SEE in the Valparaiso Record an account of a meeting of Protestant churches in Chile, at which five pastors were present, one church being unrepresented. The chaplaincy in Callao will soon be vacant, and a request has been sent to the South American Missionary Society requesting that a Nonconformist be sent out to fill the vacancy. At Talca the new Protestant burying-ground received as its first interment the remains of a Polish Jew, the Protestant missionary offering prayer at the grave.

The rumor gathers force that the Marquis of Bute will soon leave Rome for the Church of England. They say that reading Disraeli's "Lothair" converted him. There is a hitch in the purchase of property in St. Giles, which the Marquis intended to buy for a Roman Catholic cathedral. He has paid only the deposit money, and hesitates to carry out the project. Recent proceedings at Rome have compelled several other late converts to reconsider their position; and very likely they will go back to the English church.

The Interior has a table giving the strength of the Presbyterians in various States.—Over one-half of the churches (2,671) are found in the four States—New York, Pennsylvania, Ohio and Illinois. New York has 730, Pennsylvania 319, Ohio 580, Illinois 446, Indiana 710, Iowa 286, New Jersey 214, Missouri 158, and Michigan 150; making, with smaller amounts, a total of 4,100. Of the cities, Philadelphia has 63, New York 39, Brooklyn 23, Chicago 16, Newark 15, Cincinnati 16, Baltimore and San Francisco 11 each, and Washington and Pittsburgh 10 each.

Rev. H. H. Jessup, of Beirut, says that the Mohammedans in Syria are coming more under Christian influence.

He has several Moslems in his Bible class. The governor-general of Syria was recently telegraphed to from Jerusalem, to know whether a Damascus Moslem, then in Jerusalem, who had become a Christian, should be imprisoned. He telegraphed back, giving orders to set the man at liberty, as the conscience is free in the Turkish empire. A Moslem woman became a Christian lately in Beirut, with the approbation of the governor of Lebanon, and the city authorities, who comprise Moslems, Greeks and Maronites.

AN EXTRAORDINARY sale has just taken place at Saragossa, in Spain. The Roman Catholic archbishop of that city, having been anxious to restore the celebrated cathedral of "Our Lady of the Pillar," and being short of funds for that purpose, hit upon the expedient of selling by auction a portion of the votive offerings of the pilgrims to the cathedral during the past century. Among the lots offered was a beautiful pendant by Cellini, which, after severe competition between an English and a French gentleman, was knocked down to a native for a sum of about \$5,000. An emmeled watch presented by Philippe the Fourth, diamond pins by Marie Christine de Bourbon, and some splendid specimens of cinque cento work secured high prices. It was the first public sale ever held in the south of Spain.

The Augustana Swedish Lutheran Synod has met in Andover, Illinois. The Andover church is the oldest in the country, having been organized in 1850, through the munificent aid of Jenny Lind. It then had ten communicants, including the pastor's family; and now has 999. There are now not far from fifty Swedish Lutheran pastors in the country, and thirty-three new churches, applied for recognition to the synod. The single Swedish Episcopal church in Chicago is even older than the Lutheran one in Andover; and, like that, owes its existence to the liberality of Jenny Lind. It remains but one, and has been able to continue in existence only by adopting the Lutheran Prayer Book. At this meeting the Norwegians separated from the Swedes, as had been arranged two years ago, forming the Norwegian Augustana Synod. The final separation was an affecting one.

THE IRISH CONFERENCE.—The committee meetings, preparatory to the assembling of Conference, were held at Dublin, commencing Wednesday, June 15, the Rev. Dr. Johnson, president, occupying the chair. The several districts were represented, and, after some deliberation, a draft of the statutes was made out.

On Thursday, the sixteenth, the committee for the revision of circuits met and accomplished its work, after which the Rev. James Tobias, secretary of the Conference, announced the number of members in the society to be 19,963, being an increase of 304. There are on trial 830. The number of emigrations has been 121, and deaths 364.

In the evening the General Education Committee met. To this committee is confided the care of both Sunday and daily schools. The report respecting the former exhibited several features of an encouraging character. They number 267—increased, 13. The teachers employed amount to 2,193—increased, 164; and the scholars on rolls are 19,931—increased, 705.

The hundred and first Conference assembled on Tuesday, June 21, under the presidency of the Rev. Dr. Johnson. The Rev. Joseph W. McKay was elected secretary, and the Rev. John Dwyer assistant secretary.

On Wednesday, June 22, inquiry was made respecting the young men recommended as candidates for the ministry, and nine were accepted.

A MARRIED REBUKE.—The editor of the National Baptist, present at the convention recently held in Louisville, rebukes thus mildly the reprehensible practice of chewing tobacco in church: "Perhaps we had no right to be shocked by an object so common as tobacco juice, but we were rudely roused from our meditations above suggested by the incessant recurrence of short and sharp spits all over the house, like the firing of miniature musketry. The explanation, we soon discovered, was in the fact that we were in the midst of a company of tobacco-chewers, and that, without thought of irreverence or uncleanness, they were, each for himself, firing their saliva and their 'quids' under the seats in front of them. Many a poor spittoon was the target for multitudinous shots, which only missed their mark to spatter their filth upon the floor and furniture. Little lakes of tobacco saliva were numerous over the fine carpet, under the pews, and around the pulpit, and the excellent and hospitable hosts of the Walnut Street church, if they fed as ladies usually do about such matters—must have been almost disgusted with some of the habits of some of the guests."

TEMPERANCE.

The cause of temperance is making more progress in Texas at this time than in any other State of which I have any knowledge. About six months ago, or a little more, the Rev. James Young, late of Virginia, and formerly a temperance lecturer in Kentucky and portions of Tennessee, came into this State under commission from the Supreme Council of the Friends of Temperance, holding its headquarters at Suffolk, Virginia—a Southern institution—and commenced his labors in Houston. After three lectures on the subject he formed Houston Council No. 1, with 150 members. From this place he proceeded into the interior towns, and wherever he has gone he has met with most astonishing success. At Waco, Waxahatchie and several other places his councils, including a Band of Hope for the juveniles, number largely over 300 members each. At last accounts from him he had organized 75 councils in our principal towns, and expected to increase the number to 85 or 90 by the fourth of July. Allowing the councils to average 150 members each, which I think is not too high, we have not less than 13,000 names enrolled upon our temperance pledge, under a very perfect and efficient organization. This speaks well for Texas!

On the fourth of July we are to hold a great temperance convention in the city of Waco, for the purpose of organizing a State council, in which all the subordinate councils are to be represented. When this is accomplished we shall be prepared to push our organization into every part of the State. I have to-morrow to attend this convention, 200 miles distant. On my return I hope to be permitted to remain quietly at my home, attending to the duties of my station.

With five Annual Conferences in Texas, four or five colleges, male and female, in successful operation, the Sabbath school cause everywhere in a flourishing condition, and a temperance organization of 13,000 members, I think Texas may justly assert her right to take rank with almost any State of equal population as a civil and religious commonwealth.—Rev. Dr. Kavanaugh in St. Louis Christian Advocate.

DIVIDING FAMILY GOVERNMENT.

What ought, what can a mother do when a good, pleasant, careless husband constantly thwarts all her efforts to teach or govern the children, and yet cannot be made to see or feel what he is doing?

Let us illustrate and sketch from memory, not imagination:

"Mamma, please give me a piece of pie?"

"No, darling, no piece is enough."

"Half a piece, please, mamma?"

"No, Freddie, no more."

"A very little piece, mamma dear?"

"No, Freddie, no."

"Do give the child a little piece. I'll risk its hurting him."

"And the mother gave it."

"Mamma, may I go out and play?"

"It is very chilly, and you have a cold; I don't think it is best."

"Bundle me up warm, mamma, and I won't take cold."

"I fear you will. You must play in-doors to-day."

"Just a little while, please, mamma?"

"No, Freddie, you must not go out to-day!"

"Do let the child go. What a girl you are making of him. Women never were fitted to bring up boys. Dress him warm, and let him run; it will do him good."

And Freddie went out.

"May I have my blocks in the parlor, mamma?"

"No, Willie, make your block house in the dining room. Miss L. is an invalid, and I want the parlor very quiet."

"I will be very quiet."

"You will intend to be, but you cannot help making some noise; and as Miss L. very rarely goes anywhere, I fear she will be very tired at best; so be a good little boy and play in the dining room this afternoon."

"I won't make a bit of noise, nor tire her one speck."

"You must play in the dining room, Willie, and not say any more about it."

"Nonsense; it will do her good to see a happy little face. It will give her something besides her own pains and aches to think of. Let him bring his blocks in the parlor."

And he brought them in.

"What a torment that boy has got to be! It's tease, tease, tease, tease, from morning till night. It's enough to wear out the patience of Job. If you won't whip him, I will."

And he whipped him.

Query—Who ought to have been whipped?—Mother at Home.

Bad thoughts are worse enemies than lions and tigers; for we keep them in the way of wild beasts, but bad thoughts win their way everywhere. The cup that is full will hold no more; keep your hearts full of good thoughts that bad thoughts may find no room to enter.

HEALTH HINTS.

Dr. HALL says "picking the ears" is a most mischievous practice. In attempting to do this with hard substances, an unlucky motion has many a time pierced the drum; nothing sharper or harder than the end of the little finger, with the nail pared, ought ever to be introduced into the ear, unless by a physician. Persons are often seen endeavoring to remove the "wax" of the ear with the head of a pin; this ought never to be done, first, because it not only endangers the rupture of the ear by being pushed too far in, but if not so far, it may grate against the drum, excite inflammation and an ulcer which will finally eat all the parts away, especially of a scrofulous constitution; second, hard substances have often slipped in, and caused the necessity of painful operations to fish or cut out; third, the wax is manufactured by nature to guard the entrance from dust, insects and unmodified cold air, and when it has subserved its purpose it becomes dry, scaly, light, and in this condition is easily pushed outside by the new formations of wax within.

There are probably few persons who have not at some time in their lives had, if not for more than a moment, palpitation of the heart. The disease is dependent on over-excitement of the nerves of this organ. Where not caused by disease of the heart or its valves, it is not a dangerous affection. The best treatment is perfect quiet and composure in a recumbent posture. If it continues long, apply hot compresses over the region of the heart, changing them often. To prevent their occurrence, avoid over-exertion, tight clothing, nervous excitement, a crowded or unventilated room, and, above all, loading the stomach with indigestible articles of food.

There is no such thing as a good stimulant, so there can be no best stimulant. Stimulants are all bad. What is a stimulant? It is a poison. To stimulate means to goad, to excite. Alcohol is a stimulant. When alcohol is taken into the stomach the vital powers, recognizing it as a poison, are excited to resist it and throw it out, which they do with all the force they are capable of exerting, and this action to rid the system of poison is stimulation. Stimulation is really poisoning, and nothing else; therefore, if there is a best poison, there is a best stimulant.

WIRZ.—Scrap of History.—The New York World, in criticizing Judge Black's defense of Stanton in the Galaxy, introduces the following incident:

"Nor is it amiss here to state a fact not generally known, but susceptible of proof, that when, on trial of Wirz, Judge Ould, the commissioner of exchange, came to Washington as a witness under subpoena to prove the facts as we have stated, Stanton sent him word that if he did not return home at once his parole would be determined. He went away and Wirz was hung!"

To which we would add the additional fact, not generally known, that General Robert E. Lee and General Howell Cobb were also subpoenaed and ordered to Washington as witnesses for the accused, but were subsequently met en route by dispatches from the government ordering them not to come on. General Cobb got as far as Savannah, and receiving his dispatch turned back. The prosecution had both these gentlemen rejected as witnesses on the ground that having engaged in the rebellion they were personally infamous and not to be believed on oath!

We may also state, as an interesting fact in this connection, that General Cobb, who was in command at Macon during the year 1864, had been allowed to reach Washington, would have testified that upon receipt of a very large number of wounded Confederates from a recent battle, more than could be accommodated in Macon, he wrote to Andersonville to have a quantity of lumber that had been collected there sent up immediately, to be used in the construction of temporary hospitals. Wirz refused to let it go, alleging that he had been trying long, and had procured it with great difficulty in order to shelter his prisoners. We have this circumstance from General Cobb's own lips.

Thus it was that witnesses for the defense were silenced by that blood-thirsty court, and poor Wirz, innocent though he was, sent to his last account. Stanton has gone to meet him before a higher tribunal, where no witnesses will be required.—Savannah Republican.

—Remember God's day of salvation is now, as it respects both justification and sanctification, yet it would be fully and presumption to expect an unawakened sinner to believe for the pardon of his sins. So, as it regards the believer; if there be not the hungering and thirsting after his righteousness, he cannot be filled. "The kingdom of heaven suffereth violence, and the violent take it by force."

bers of the Northern Presbyterian Church twenty-two and a half per cent. take one of their own papers. In the Southern States the percentage of subscribers to communicants is as follows:

	Per cent.
Presbyterians	27
Methodists	20
Episcopalians	15
Baptists	14
Roman Catholics	14

More than one in four of all the Presbyterians in the South take a Presbyterian paper, and as every paper has on an average four or five readers, very few of our people do not read their church papers. In the Roman Catholic Church, on the contrary, less than one in sixty take a church paper. What a striking commentary on the spirit and tendencies of the two systems! What will be the future of this country if Rome should ever obtain the immense supremacy for which she is so earnestly struggling? Let papal Italy and Portugal, and priest-ridden southern Europe, with its poverty and rags, answer. These statistics show that the tendency of Romanism in the United States is the same as elsewhere.

NEW PUBLICATIONS.

FREE RUSSIA. By William Hepworth Dixon. New York: Harper & Brothers, publishers. 1870. Type and binding most satisfactory, and three hundred and fifty-nine pages of reading matter as fresh and spicy as William Hepworth Dixon can make them. The author's chief reputation was made by a work of great popularity: "Her Majesty's Tower." Free Russia is the Russian of to-day—since the Crimean war, and especially since the emancipation of the serfs. The government, the religion and social condition of this vast empire are particularly described. Incidents of travel are described in a lively and often humorous vein, and roads and forests and manners are portrayed in a graphic manner. The chapters on New Seats and Disent are unusually entertaining and instructive. We have received the work through George Ellis, near the post office, New Orleans.

THE ROYAL OF THE JORDAN, NILE, RED SEA AND GENSSEMET, ETC. A canoe cruise in Palestine and Egypt and the waters of Damascus. By J. Macgregor, M. D. New York: Harper & Brothers, publishers. 1870.

Here are between four and five hundred pages, and every page worth reading. The author had a little boat built for the express purpose of exploring the celebrated rivers and lakes of the East, and he sailed in it on the Nile, the rivers of Damascus, the Jordan, the Sea of Galilee. Since "The Land and the Book," by Thomson, we have met with no work of Eastern travels at all to be compared with this. It is embellished with numerous engravings, and contains some valuable maps. The narrative is sprightly, and the author seems to be in full sympathy with the sacred scenes which he describes. It is a good book for the Sunday school library. For sale by George Ellis, New Orleans.

THE WRITINGS OF ANNE ISABELLA THACKERAY. With illustrations. New York: Harper & Brothers, publishers. 1870.

An octavo of four hundred and twenty-five double column pages, and elegantly bound in green cloth. In the table of contents we note "The Village on the Cliff; From an Island; Fine Old Friends; The Story of Elizabeth; Soli and other stories."

MAN AND WIFE. By Wilkie Collins. With illustrations. New York: Harper & Brothers, publishers. 1870.

Another octavo, and said to be the author's best. **KILMERY.** By William Black. New York: Harper & Brothers, publishers. 1870.

We have received the three above mentioned works of fiction through George Ellis, New Orleans.

STERN NECESSITY. A novel. By F. W. Robinson. New York: Harper & Brothers, publishers. 1870.

GWINDOLESE'S HARVEST. A novel. New York: Harper & Brothers, publishers.

The above works have been received from the publishers through George Ellis, opposite the post office, New Orleans.

ARTHUR'S HOME MAGAZINE for August, and the Children's Hour, have been received. Both are choice numbers. We have had occasion

heretofore to notice the excellent moral tone of Arthur's publications. The Home Magazine has contained some of the best temperance literature we have met with anywhere.

LIPPINCOTT'S MAGAZINE for August is most richly and tastefully illustrated. We shall aim to give our readers frequent samples from its welcome pages. The article on Southern Society, though open to objections, will be read and pondered with thoughtful interest.

EXCELSIOR AND HOME MONTHLY. The Home Monthly is now united with the Excelsior, and is published in New York. The number for July is before us, and is filled with the instructive and entertaining, also the humorous and the poetical. Its pages are embellished with engravings and a piece of music. We wish the editors and publishers success. The new magazine is published by C. S. Van Allen, 171 Broadway, New York.

THE GALAXY FOR AUGUST. This number has an engraving of the great humorist, Mark Twain; and among other articles of interest contains: "Bread and its Adulterations," "Diplomatic Incidents," "How Napoleon the First Managed a Theater," "Edward Bulwer, Lord Lytton," "The Vaccination Question," "Drift Wood," and finally, "Nebula," by the editor.

THE ATLANTIC MONTHLY for August. In this number we have the usual varied and entertaining literary repast. "Joseph and his Friends" and "The English Governess at the Siamese Court" are continued. We have also among other articles worthy of special notice: "The Burden of the Day," by Bayard Taylor; "The Grand Traverse Region of Michigan," "Mr. Hardhook on the Sensational Literature and Life," "Color Blindness," "Some Memories of Charles Dickens," and reviews and literary notices in the Atlantic's best style.

The Rev. Dr. Sawrie informs us that he has rented a commodious frame building on the corner of Church and West Carroll streets, at the terminus of the Broad street railroad, which will be opened for preaching at three o'clock tomorrow afternoon, and at half-past four o'clock for Sunday school. This is to be the nucleus of the West Nashville church. A lot has been purchased on Church street, Hines' Addition, on which a large, handsome brick edifice is to be erected. We hope our friends will stir themselves, and build it without delay, as it is greatly needed in that growing part of the city. Brother Sawrie is still the chaplain of the penitentiary, where he has a Sunday school of three hundred and twenty-five scholars, and a congregation of five or six hundred hearers. Many of them give evidence of reformation—the gospel proving the power of God to their salvation.—*Nashville Christian Advocate*, July 23.

Rev. J. B. B. coming to the Missouri Conference from Georgia about two years ago, and last fall transferred to the St. Louis Conference and appointed to the Independence circuit, finds it necessary, in the condition of the health of himself and family, to return to a more southerly climate. A transfer to the Mississippi Conference was granted by Bishop McVey, but did not reach Bishop McVey, the presiding Bishop, during the session of that Conference. It has, however, been recognized by Bishop McVey, and Brother Bright has arranged with Rev. Dr. Marshall to take the circuit to which the latter was appointed. Brother Bright passed through the city week before last. We hope he may be cordially received and find a congenial climate and a fruitful field of labor.—*St. Louis Advocate*.

THE BOOK COMMITTEE has been in session this week. None of the members from abroad were present but Dr. Watson and Mr. J. S. Lithgow. Dr. Evans started for Nashville, but was recalled by the lamented death of a grand-son—the child of the Rev. G. P. Patillo, pastor of the church at Americus. We sympathize with our bereaved friend, and regret the absence of Brother Evans and the sad occasion. Mr. Dempsey Weaver, of the Third National Bank of Nashville, was chosen a member of the Book Committee, in place of the lamented W. H. Ellison, deceased.—*Nashville Christian Advocate*.

THE REV. W. P. HAMMOND, D. D., who was elected editor of the New Magazine, reached Nashville, July 19. He is in good health, and ready for his work. We hope the committee will rally at once to this new enterprise.—*Nashville Advocate*.

Married.

On the nineteenth instant, at the residence of Mr. Stephen Tinsie, in Yazoo county, Mississippi, by the Rev. A. B. Stewart, Dr. ROBERT B. CAISON and Miss A. E. LUSE.

Obituaries.

TRIBUTE OF RESPECT.
CARONDEL STREET SUNDAY SCHOOL,
July 24, 1870.

At a special meeting, called this day, the following preamble and resolution were unanimously adopted:

WHEREAS, God in his wise Providence has called from time to time our young friend, J. WELLINGTON WATKINS, who was for many years a member of our Sunday school; therefore be it

Resolved, That we as a Sabbath school do deeply sympathize with his bereaved family, and tender them our sincere condolences, praying that God may so sanctify this affliction to them that they may be able to feel that it is not in wrath but in mercy.

Mrs. AMANDA MONROE, formerly Miss Fogg, and long a resident of Summerfield, Alabama, and immediate vicinity, departed this life May 24, 1870.

Very unexpectedly the messenger came, but he found her all packed up and ready for the journey. Few of my acquaintances had more to live for than she. In the bloom of life, the mother of an infant child, happy in her married relations, a member of a most harmonious and affectionate family, from the midst of such a scene as this she was called to lay down her charge and render up her account to God. Her testimony was firm and decided. "To depart and be with Christ is far better. For me to live is Christ, and to die is gain."

While a school girl at Summerfield she sought and obtained that religion which made her so cheerful and happy in all the relations of life, which gave her such a peaceful and tranquil hour, in which to die, and from whose principles she never once swerved from the hour of her espousal to God till the Master said: "It is enough; come up higher."

In the department of wife and mistress of her own home perhaps the virtues of the deceased shone most conspicuously, as her stricken husband testified to me when he requested me to write this obituary notice. Her husband is a physician, and with what winning ways she could beguile the long moments he could snatch from his laborious profession to spend in the bosom of his family no one knew but he; and now that all these beguilements, wife, home and all, are gone, who knows but he the power of that blighting, withering stroke? God grant him grace and strength to endure hardness as a good soldier of Jesus Christ.

Sister Monroe was also a member of an infant church recently established as Marion Junction, on the railroad, and just sprung into being. How the services of one so faithful and true, always at her post, night and day, in the prayer meeting, in the Sabbath school—how the services of such an one are to be dispensed with in the future operations of the church is a problem not to be solved by us. But faith says: "It is God's church, and he will provide." The workman may die, but the work goes on still. The church has lost another faithful working member, the family circle has been robbed of its brightest ornament; but heaven has gained another inhabitant, the angels have shouted: "Another pilgrim is home at last." O ye sorrowing sons and daughters of earth! dry up your tears, and hail the day when you shall meet your loved and lost in that world where you shall lose them no more forever.

A. H. MITCHELL.

Miss MARY WALSH, daughter of Margaret and Dudley Jones Warner, died of bilious fever, on the first day of July, 1870, after a brief illness, at the residence of Thomas Owen, in Catahoula parish, Louisiana. She was born in the parish of St. Tammany, Louisiana, and was twenty-five years old when she died.

Intelligent, discreet, amiable and affectionate, she commanded the confidence and love of all who knew her. Her sudden death was a severe blow to the loving relations with whom she had been residing for two or three years previous to her departure. It will rejoice her far-away friends to know that in her last sickness she was surrounded by those who dearly loved her, and that she received every attention which ardent affection could prompt. She had been brought up in the nurture and admonition of the Lord, and in her dying moments testified that she enjoyed the consolations of living faith. Shortly before her departure she said that the glory-hall was unveiled to her, and that she saw her departed loved ones, and was ready and anxious to go to them.

The sudden and unexpected death of this lovely young woman is well calculated to impress her bereaved friends with the solemn lesson that life is un-

certain and death is certain. May the remembrance of her untimely death ever be to them as a voice from the tomb, warning them to "watch and be ready," and inviting them, in sad, sweet accents, to a happy reunion in the brighter and better land. J. F. M.

LET THE DEAF HEAR.

Dr. W. L. DAVIS, No. 10 Rampart street, gives his whole attention to afflicting sensations pertaining to the Ear, such as Deafness, Noise and the like.

OSBRYE. Dr. DAVIS' NOTES ON DEAFNESS can be had of Steel & Co., 72 Camp street; Eyre, 130 Canal street; Ellis, opposite the Post Office; also by mail, of the author, Glass Box 399, New Orleans Post Office. Price, Forty cents. my14 ft

NEW ADVERTISEMENTS.

WANTED.—SITUATIONS IN FEMALE Colleges or High Schools, as **TEACHERS**, by three Young Ladies, sisters, daughters of a Southern Minister. They are graduates of Southern institutions, and are competent to take charge of any department of a literary institution. They would prefer to have charge of a Young Ladies' High School, where young ladies might find education. Address either Rev. G. BRIGHT or Rev. Dr. C. K. MARSHALL, Vicksburg, Miss. j330 2m

\$1,000 REWARD FOR ANY CASE of Blind, Bleeding, Itching or Clevered Piles that

DE RINGS PILE REMEDY

falls to cure. It is prepared expressly to cure the Piles, and has cured cases of over twenty years' standing. Sold by all Druggists.

VIA FUGA.

De Rugs' Via Fuga is the pure blood of Marks, Herbs, Roots and Herbs, for

CONSUMPTION.

Inflammation of the Lungs; all Liver, Kidney and Bladder diseases, Organic Weakness, Female Affections, General Debility, and all complaints of the Urinary Organs in male and female, producing Dyspepsia, Costiveness, Gravel, Dropsy and Scrophula, which most commonly terminate in Consumption. It purifies and enriches the blood, the urinary, glandular and secretory system; corrects and strengthens the nervous and muscular forces. It acts like a charm on weak, nervous and debilitated females, both young and old. None should be without it. Sold everywhere. LABORATORY—142 Franklin street, Baltimore, Maryland. j330 1y

CENTENARY FEMALE COLLEGE.

SUMMERFIELD, ALABAMA.

Next Session will begin on the First Monday in October.

PRICES AS LOW AS CAN BE MADE.

Every advantage offered to those seeking a thorough and substantial education.

The institution is the property of the Alabama Conference.

For circulars address

WM. J. VAUGHN, President.

CORONA.....CORONA.

Corona is a School designed for

The Higher Education of Women.

With a Faculty of ten able, experienced teachers, it is prepared to give young ladies a course of instruction equal in extent and thoroughness to that pursued in the best colleges for men. Best facilities in music. In the family of the principal young ladies will find the most kind and considerate of homes. The best rooms are large, airy, newly furnished and carpeted. Number of boarders limited to twenty-five. Apply early. Terms moderate. Session opens first Monday of September, 1870. Address

A. B. STARK, Principal, Lebanon, Tenn. j330 1m

WESLEYAN FEMALE INSTITUTE.

STATION, VIRGINIA.

will begin its next session September 20, 1870, and close June 22, 1871.

REV. WILLIAM A. HARRIS, President. With Thirteen Professors, Teachers, etc., etc.

Them this no College for Young Ladies ranks higher. System of teaching like that pursued in the University of Virginia. French and Latin taught in the order of the language. Professor in Department of Music has superior in any school; among others, is assisted by the distinguished vocalist, Madam Bertha Ruhl. This is one of the healthiest climates in America, and young ladies who come here from the south with feeble constitutions are entirely restored to health. The grounds are large and beautiful; buildings stately and elegant, famed by the purest breezes, overlooking the entire city, and commanding the most magnificent rural and mountain scenery for thirty miles along the beautiful Valley of Virginia, making it one of the most delightful college homes in the Union.

(From Judge John N. Hendren, M. A., University of Virginia.)

I regard the Wesleyan Female Institute in this place, under the management of Rev. William A. Harris, as one of the very best and most attractive schools in the State.

(From Hon. John B. Baldwin.)

The Wesleyan Female Institute is surrounded by influences which make it in all respects the most desirable place for the care and education of the daughters of Christian parents.

(From Prof. William E. Peters, LL. D., University of Virginia.)

Young ladies committed to the care of Prof. Harris will enjoy advantages of a liberal and moral training rarely found.

(From Rev. William E. Munsey, D. D.)

From personal knowledge I believe that it is the president of a female college. Rev. William A. Harris has no superior in the pursuit of his noble and useful career.

(From Bishop E. M. Marvin, D. D.)

The Wesleyan Female Institute is an honor to the church. Instruction is thorough. All classes stand high. In music advantages are offered of a very high order. The most talented professors are employed, and neither pains nor expense are spared to make the department excellent. The school is very prosperous, and deserves to be so.

TERMS FOR THE ENTIRE SCHOLASTIC YEAR: Board and tuition in the Collegiate Course, \$225. Music and other extra studies not included.

NEW ADVERTISEMENTS.

UNIVERSITY OF LOUISIANA,

Medical Department, New Orleans.

FACULTY.

A. H. CENAS, M. D., Emeritus Professor of Obstetrics.

JAMES JONES, M. D., Professor of Obstetrics.

WARREN STONE, M. D., Professor of Surgery.

T. G. RICHARDSON, M. D., Professor of Anatomy.

SAMUEL M. BEMIS, M. D., Professor of Midwifery.

STANFORD E. CHAILLE, M. D., Professor of Physiology.

FRANK HAWTHORN, M. D., Professor of Materia Medica.

JOSEPH JONES, M. D., Professor of Chemistry.

C. J. BICKHAM, M. D., Demonstrator of Anatomy.

The thirty-third annual course of instruction in this department will commence on MONDAY, November 14, 1870, and terminate on the second Saturday of March, 1871. Preliminary Lectures on Clinical Medicine and Surgery will be delivered in the amphitheater of the Charity Hospital, beginning on the eighth of October, without any charge to students. The Anatomical rooms will be opened at the same time.

The members of the Faculty are Visiting Physicians and Surgeons to the Charity Hospital, and give instruction daily at two hours of the sick. The practical advantages thus offered to students are invaluable.

FEES.—For all the Lectures, \$140; Maternity, \$5; Practical Anatomy, \$10; Dissection, \$30. Payment required in advance. For further information address

TUSKEGEE FEMALE COLLEGE.

TUSKEGEE, ALABAMA.

The Fifteenth Annual Session begins SEPTEMBER 15, 1870, and continues forty weeks; divided into two equal terms.

REV. GEO. W. F. PRICE, M. A., President. REV. H. B. GIBBS, M. A., Professor of Latin and Mathematics.

DR. S. M. BARTLETT, Director of Music, with Nine Assistants in the various departments of instruction and discipline.

The president calls particularly attention to the fact that Rev. H. B. Gibbs, of the Alabama Conference, has accepted the professorship of Latin and Mathematics in the institution. Brother Gibbs is a graduate of Lagrange College, Illinois. He was professor of Greek Mathematics in that institution for two years. Subsequently he was President of Tuskegee Female Institute. His classical education, his experience in the practical business of teaching, his acceptable character of character, his many excellent personal and social qualities, have secured him the confidence of our people.

The College has just closed a most successful year. Its prospects were never more flattering. The present organization of the institution combines all the best features for securing the thorough instruction and efficient discipline of its pupils. The Faculty contains none but tried and trained teachers, whose success has been tested by years of service. The boarding arrangements are superior, the immediate control of the president, who resides in the building, and supervises the social recreations and the professional duties of the pupils. The health of the girls is in charge of an experienced matron. The laundry and laundry are in charge of a thoroughly trained housekeeper, Miss Shelley, of Talladega, is the governess, and brings to the office high social position, experience as a teacher, liberal education, and matured Christian character. The pupils are trained in grammar and enlivened exercises, thereby developing their physical powers, strengthening their constitutions, and imparting grace and dignity to their movements. Religion is the basis of the system. The moral and civil virtues are taught, and the truth as it is in Jesus is the highest attainable wisdom.

CHARGES FOR SCHOLASTIC YEAR OF FORTY WEEKS.

Tuition, according to grade, from \$25 to \$40

Tuition in music..... 40 00

Tuition in art, from \$20 to..... 40 00

Tuition in languages..... 20 00

Board, washing and fuel..... 220 00

Instruction in vocal music, free of charge.

Change for board, tuition by day extended.

Use of models in art, free of charge.

Use of instruments for practice, free of charge.

Use of library of reference, free of charge.

Number of changes of any kind.

Tuition for each term payable in advance.

Address REV. GEO. W. F. PRICE, j330 1m President.

WINTHROP FEMALE COLLEGE.

BROOKHAVEN, MISSISSIPPI.

On the New Orleans, Jackson and Great Northern Railroad, one hundred and twenty miles north of New Orleans, and fifty miles south of Jackson, will reopen on

The 21st of September, 1870.

Thorough instruction in all the branches given.

Change for board, tuition in English, English text books, school-room stationery, washing, fuel, lights, medicine and medical attendance, \$25 for the term of forty weeks. The languages and music, extra. A deduction of \$50 made for pastors of churches.

Number of pupils last term, 165.

SILENT FAMILY SEWING MACHINE.

Always in order and ready to sew. Such is the simplicity and the ease with which it is understood that the child of six years and the grandmother of seventy can operate it successfully. The thread is used from the original spool, without rethreading. Every Machine is furnished with Feller, Hemmer and Thimble.

All the different first class Sewing Machines for sale. SLOATS celebrated Elliptic, and the HOWE Sewing Machine—the first invented; the one from which all others take their origin.

The Child's Corner.

HEATH'S WORK.

"I wish I were a fairy,
And had a magic wand;
To make you all so happy,
And fill the world with gladness."
"I'd change this old so humble
Into a palace fair,
And fill its walls so lofty
With treasure rich and rare."
"Papa should leave his workshop;
Mamma should live at ease;
And Ben should go to college,
The darling rough and lea."
"We'd have such heaps of silver,
With gold in plenty too!
Oh! would we were so merry,
With no more work to do!"

"My dear, the best of fairies
My little girl may be,
And she can bring us daily
Rich gifts most fair to see—
Kind looks, and smiles so loving,
And duties promptly done.
Oh! these would make our home-hest
As cheerful as the sun."

"Better than kingly palace,
Better than gold, my love,
These precious plants of kindness,
Which take their root above;
They'd lighten father's labor,
And soften mother's care;
And, twining round our heart-strings,
They'd bloom in beauty rare."

"I thank you, dearest mother;
I'll try your magic wand,
And be a real home-hest
Said little Nettle Bond."
"And if we can't have riches,
We'll have what's better far—
Hearts full of love and sunshine."
"My pet," chimed in mamma.

THE LITTLE BROWN SEED.

BY AMELIA E. DALEY.

It was only a little brown seed,
That the autumn wind had blown to
the widow's garden. It lay close
to her door-step, and before long
the loose earth blew over it.

The widow was very poor. She
tried to support herself and her
lame daughter. She used to plant
a few common flowers in her garden
for her daughter to look at, but she
could not bestow much time upon
her cultivation. On summer days
her daughter would sit by the win-
dow, and look at the morning-
glories and the scarlet beans that
climbed over the fence; at the grass
pinks and the pansies that grew in
one corner. In autumn she would
watch the marigolds and the "youth
in old age"—flowers that grow to
be large, as little children grow to
be men and women. While day-
light lasted her pale face was always
to be seen at the window. She had
never walked; her hands were al-
most useless, but she always seemed
happy.

The village children loved her,
and brought her flowers, the earliest
and the latest that bloomed. In
return she told them stories that
she said the flowers made her think
of. She knew the name of every
bird that flitted past the window or
hopped in the garden, seeking food.
She could tell by the sky what the
weather was going to be. She knew
the time when every tree blossomed,
and when every wild flower was
most abundant.

The little brown seed was so very
small that the lame girl did not
see it, neither did the hungry spar-
row that hopped on the door-step.
It lay where it had fallen, and when
winter came, it was snug and warm
under the snow.

Early one spring morning, as the
widow was sweeping her door-
step, she saw something green peep-
ing above the soil, at its side. She
thought it was a weed, and was go-
ing to pull it up, but her daughter,
who sat by the window, said:

"Oh, no, mother! Please let it
grow. If it is only a weed, its leaves
will be green and beautiful."

Summer passed by. The "weed"
grew taller and taller. It was very
graceful and was very unlike any
other weed that the widow and her
daughter had before seen. When
summer flowers were gone, and the
marigolds and the "youth in old
age" were in bloom again, the weed
threw out long, slender branches,
which in time became buds. The
buds opened, and soon the weed
was crowned with drooping branches
of scarlet. Before many days it was
one mass of scarlet. Oh! how that
brilliant flower beautified the win-
dow's garden!

One day several children were
gathered about the lame girl. It
was a warm afternoon, so her chair
had been drawn to the open door.
The sun shone on the scarlet flower.
The children made many exclaima-
tions of delight, and the widow's
daughter smiled to hear them.

"I wonder how it came here!"
cried one child.

"I think I can tell you," replied
the widow's daughter. "Many seeds
are so small and light that they can
be carried about by the wind. I
think the seed of this plant was
brought here in that way. It must
have been very small. Perhaps it
was blown from a beautiful garden,
full of rare flowers. Just think; so
tiny a seed for so wonderful a flower.
Do you know what it makes me
think of? It makes me think of a

man whom I saw a few days ago. He
was travel-stained, and worn, and
poor. He sat down to rest on a log
near our gate. While he sat there a
little girl went by. She had been to the
spring for water, and had her little
tin pail in her hand. When she
saw the weary man she stopped,
and said:

"Don't you want some water,
sir?"

"He held out his hand, and she
gave him the pail, saying:

"Drink all you want. The spring
is near."

"When the man stopped drink-
ing she took a little red-checked
apple from her pocket, and gave it
to him with a smile. Then she ran
back to the spring for more water.
The man looked after her, and
said in a low voice: 'God bless you.'"

"Then he rose and went away
with a more cheerful face, and I
heard him say:

"I won't be discouraged yet."
"How does the flower make you
think of that?" asked one of the
children.

"The child's kind action was as
small among actions as is the seed
of this flower among seeds. The
child, perhaps, does not remember
it. It was done as easily as the
seed was wafted here by the wind;
yet it came from a loving heart,
and love for the sorrowing and the
poor is born in heaven. One thing
more: do you think this flower
would look so beautiful if it were
surrounded by other as beautiful
flowers?"

"No," said the eldest of the chil-
dren. "I see what you mean. That
little action was a great deal to the
poor weary man; just as much as
this beautiful flower is to your gar-
den."

So the little brown seed, wafted
by the wind to a desolate place,
taught the widow's daughter and the
children a lesson for life.—*The
Bright Side.*

Like Jesus.—A dear little girl,
only six years old, was promised by
a friend, who kept a number of
fowls, some feathers for her doll's
hat. The next time the friend called
she brought with her not only
several feathers, but also some beau-
tiful patches, out of which to make
dresses for her doll. When the
friend had gone away the little girl,
who was very glad and grateful for
her presents, said to her mamma:

"Mamma, do you know what I
have been thinking about?"

"No, my dear."

"I've been thinking Mrs. Bell is
like Jesus, for she gave me more
than she promised."

Was not that a sweet saying for
so young a girl? She had found
out that the grace of the Lord Jesus
is exceedingly abundant, and that
he gives to them that trust in him ex-
ceedingly, abundantly above all they
ask or think.—*Children's Friend.*

BEAUTIFUL ALLEGORY.—Once on a
time a little leaf was heard to sigh
and cry, as leaves often do when a
gentle wind is about. And the twig
said:

"What is the matter, little leaf?"

"The wind," said the leaf, "just
told me that one day it would pull
me off, and throw me to the ground
to die."

The twig told it to the branch,
and the branch told it to the tree.
And when the tree heard it, it
rusted all over, and sent word back
to the leaf:

"Do not be afraid; hold on tightly
and you shall not go off till you
want to."

And so the leaf stopped sighing,
and went on singing and rustling.
And so it grew all summer long till
October. And when the bright
days of autumn came the leaf saw
all the leaves around becoming very
beautiful. Some were yellow and
some were scarlet, and some were
striped with colors. Then it asked
the tree what it meant. And the
tree said:

"All these leaves are getting ready
to fly away, and they have put on
these colors because of their joy."

Then the little leaf began to want
to go, and grew very beautiful in
thinking of it. And when it was
very gay in colors it saw that the
branches of the tree had no colors
in them, and so the leaf said:

"O, branch, why are you leaf-
colored and we golden?"

"We must keep on our work
clothes," said the tree, "for our
work is not yet done, but your
clothes are for a holiday, because
your task is over."

Just then a little puff of wind
came, and the leaf let go without
thinking of it, and the wind took it
up and turned it over, and then let
it fall gently down under the edge
of a fence among hundreds of leaves,
and it never waked up to tell what
it dreamed about.—*The Nation.*

A REAL CHRISTIAN loves close,
pointed, searching preaching, and
seeks not the ministry of those who
speak with enticing words of man's
wisdom.

There is only one thing worse
than ignorance, and that is conceit.
Of all untractable fools, an over-
wise man is the worst.

The Farm and Garden.

FATTENING HOGS IN THE FIELD.

As I have been feeding and fatten-
ing hogs for more than fifty
years, I wish to give you a little of
my experience.

Some years ago two of my neigh-
bors and myself took hogs to feed
by the pound. We took our hogs
to the same day and returned them to
the owner the same day. My neigh-
bors said to me, at the start, that
they were going to beat me in mak-
ing pork, so I did about as well as
I could. They had the first pick
from the herd, and selected about
ninety smooth, straight hogs. I
took one hundred and sixty.

My neighbors fed their hogs three
times per day, having rye ground
and made into slop for two of the
meals, and the third was of corn in
the ear. We commenced about the
first of September. My hogs were
put into stubble fields well set with
wheat, rye and corn stubble. They
gleaned over some one hundred and
fifty acres. I fed them some wheat
in the sheaf once a day, then oats
once a day for a couple of weeks. I
then cut up green corn and fed
stalks and all for ten days, at the
end of which time they were turned
into a five acre lot, then into a nice
fifteen acre field of timothy and
white clover.

In this pasture I placed five
troughs, in which I kept a good sup-
ply of bran, salt and wood ashes,
mixed together in the proportions
of say two bushels of bran, half a
bushel of ashes and half a bushel
of salt. I commenced feeding them
husking corn in the ear, scattering
it well over the sod, so that all
could get a chance to eat. I
gave them sufficient at a time to last
them eight or nine days. When
they had cleaned it up well, another
similar allowance was given them.
Having previously tested the time
it takes a lot of hogs, say fifty head,
to eat fifty bushels of corn, I found
that one bushel would last, fed in
this way, six days, so I easily got at
the allowance needed.

On the day of delivery my friends
weighed their hogs and found that
they had gained about two and one-
half pounds per day in the fifty
days they had been feeding them.
Mine showed a gain of one hundred
and eighty pounds per hog; so you
see where the best "came in."

Now for the philosophy of my
plan of feeding: I found by watch-
ing the habits of my hogs that they
would, when fed my way, get up
very early in the morning, and while
the dew was on, take a feed of grass,
return past the troughs and take
some of the mixture, then go to the
corn and make out a breakfast.

They would then take a sleep till
toward noon, when they would go
to the water, take a drink, then take
another feed of grass, and then corn
again, till about five o'clock; then
grass, corn and a sleep. At about
ten o'clock they would quietly get
up and take a feed of corn, then
sleep until about three o'clock in the
morning, when their fifth meal was
eaten. This manner of taking feed
was regular in good weather.—*Cor-
respondent of Prairie Farmer.*

Summer Management of Horses.

A member of the Royal College
of Veterinary Surgeons, writing to
the Times, exposes the fallacy of the
popular belief that a horse is bene-
fited by "a month's run." He says
that now pastures are beginning to
look green, and the weather promises
to become warm, owners are think-
ing of giving their horses a treat by
turning them out to grass. "I have
worked my horses hard," say they,
"and they need a summer's run. It
will rest their legs and feet; be-
sides, green food is the natural
providence for horses, and they will
enjoy a few months' rest at grass
and be all the better for it." It is
all very well for the young animal,
protected by long hair, lengthy
mane and tail, whose time, while
young, has to be got over one way
or another, and it is found con-
venient to let him forage for himself;
but with staid and "groggy" horses
requiring rest, and whose owners
turn them out with this object, the
matter is entirely different. "Rest,"
properly so called, is not to be had
in the pasture. In the simple process
of gathering his food the horse
walks many miles during the twenty-
four hours, if the pasture be bare,
and the same process obliges him
to throw extra weight on his fore
legs and feet, which it has been the
intention of the owner to "rest."

Besides, in the summer months,
witness the poor horses huddled to-
gether for shelter from the myriads
of insects which surround cattle
when grazing, and watch them
nervously tossing their heads, switch-
ing the tail, stamping, and thus jar-
ring the feet and legs, moving to and
fro in the vain hope of escape from
their tormentors, and ask if this be
"rest." When the sun is powerful
the feet become hot and parched,
the horn is rendered brittle, and
breaks off in pieces. Besides, noth-
ing throws a horse so soon out of
condition as green food. The con-
sequence, in eight cases out of

ten, is that the animal comes up
from the grass in much worse form
than when turned out "to rest"—if
he escapes getting staked or being
kicked by his companions. What,
then, is the best method of dealing
with horses in the summer, when
either rest is a necessity or other-
wise desirable? Put them into a
loose box or shed, well littered with
tan, bark, sawdust or straw, or all
combined; remove the shoes, and
rasp off the sharp edges of the crust
to prevent them breaking, supply
water without stint, give a liberal
allowance of oats, Indian corn and
bran, with-out chaff and hay, the
whole of which will be better for
being made ready damp with water.
If on the part of the owner there is
a predilection for green food, give
it in small quantities mixed by hand
with the hay, always remembering
that the fat which it invariably pro-
duces is so much lumber, not con-
dition, and that when the horse re-
turns to work the fat is thrown off
at the cost of additional wear in
the feet and legs.—*Country Gentle-
man.*

A DROVER ON FATTENING CATTLE.—
Mr. Bela S. Hastings, who is one of
the leading drovers from Vermont
in supplying cattle for the Boston
market, gave his experience and ob-
servation in relation to fattening
stock, at a late meeting of the Cal-
caldonia County Farmers' Club:

He said the main object of the
farmer was to get the most out of
his fodder. It does not pay to feed
grain to a poor creature, one that
does not take flesh on rapidly.
Farmers will do better to dispose of
such stock for what it will bring,
and procure animals of good style.
He believed that one-half of the
grain fed was wasted by not being
fed to good cattle. Another im-
portant point is, farmers do not feed
heavy enough. He would com-
mence with as much feed as they
could bear at first, and then increase.
In feeding twelve quarts of meal,
the last four quarts are worth twice
as much as the first four for fatten-
ing purposes. Some farmers com-
plain that they do not get pay for
the grain they feed out, but he had
noticed that it was only those who
fed light that had thus complained.
Whether the animal was to be fed
a long or a short time, he would
recommend heavy feeding. Mr.
Hastings said he knew nothing bet-
ter than corn meal. The cob is not
worth much, if anything. Those
persons of whom he purchased fat
stock, who were the most success-
ful, and made it most profitable,
were those who fed meal largely. If
a farmer has potatoes or other roots
it is well enough to feed those in
part, but a farmer will do better to
exchange some of his roots for corn
than to feed roots altogether. It is
important to feed regularly and not
too often, as the stock will eat
and lie down and ruminate. It is better
to feed cattle but three times a day,
and sleep but once.—*N. E. Home-
stead.*

RAISING TOMATOES.—*French Method.*
As soon as a cluster of flowers are
visible the stem is topped down to
the cluster, so that the flowers ter-
minate the stem. The effect is that
the sap is immediately impelled into
the two buds next below the cluster,
which soon push strongly and pro-
duce another cluster of flowers each.
When these are visible the branch
to which they belong is also topped
down to their level, and this is done
successively. By this means the
plants become stout dwarf bushes,
not above eighteen inches high. In
order to prevent their falling over
sticks or strings are stretched hori-
zontally along the rows, so as to
keep the plants erect. In addition
to this, all the laterals that have no
flowers, and after the fifth topping,
all laterals whatsoever are nipped
off. In this way the ripe sap is di-
rected into the fruit, which acquires
a beauty, size and excellence unat-
tained by other means.—*Horticultur-
ist.*

A MOUNTAIN OF SALT.—In Phari-
naga district, in the southwestern
part of the State of Nevada, distant
from Austin about one hundred and
eighty miles, there is a remarkable
mountain of salt, about seventy
miles south of the mines. It is re-
ported to be about five miles in
length, and six hundred feet in
height. The body of the salt is of
unknown depth. It is chemically
pure and crystalline, and does not
deliquesce on exposure to the at-
mosphere. Like rock, it requires
blasting from the mine, whence it is
taken in large blocks, and is as
transparent as glass. This would
afford an abundant supply to the
world could it be cheaply mined and
cheaply transported; but it now
stands in the wilderness, an object
for the admiration of the curious
and the inspection of the scientific.

It is believed that there is but one
other place on the globe where it
exists in such a state of purity in
workable quantities, and that is at
Czazow, Poland.

There are promises in Scripture to
help our weakness, but none to over-
come our wilfulness.—*Whitcomb.*

MUSICAL INSTRUMENTS.

PHILIP WERLEIN,
NOS. 80 AND 82 BARONNE STREET,

want demands

A GOOD SUBSTANTIAL
SEVEN OCTAVE PIANO FORTE,

embracing all the modern improvements,
such as a Rosewood Case, French Grand Ac-
tion, Harp Pedal, full Iron Frame, Over-
string Bass, etc., at

PRICES WITHIN THE MEANS OF ALL.

Now offer such an instrument at a price low-
er than any other reliable manufacturer.

These Pianos are made of the best mate-
rials, with great care, and by the most skill-
ful workmen, selected from the best factories
in this and the old country, and fully war-
ranted to stand in any climate, and to give
a good satisfaction in any Pianos sold for
\$1,000.

Our terms are NET CASH in New York; for
headquarters such terms are enabled to
sell at low prices.

We want Five Hundred Agents and Teachers
to introduce these splendid new Instru-
ments in all parts of the Southern States.
All orders must be sent direct to

PHILIP WERLEIN,
50 and 52 Baronne St., New Orleans.
Our General Agent for the Southern States,

28-inch Bell...	250 lbs	\$65 00
36-inch Bell...	650 lbs	\$135 00
40-inch Bell...	800 lbs	\$165 00
48-inch Bell...	1200 lbs	\$275 00

These Bells are warranted for one year
against breakage in ordinary use.

THOS. B. BODLEY & CO.,
1619 1/2 N. O. 9 Perdido St., N. Orleans.

BELLS, STEEL COMPOSITION,
For Churches, Schools, Etc.

BLYMER, NORTON & CO., Manufacturers,
Cincinnati, Ohio.

These celebrated Bells (and Cast Iron or
"Amalgam") rival in purity and volume of
tone those of copper and tin, are more durable,
and cost only one-third as much.
Send for descriptive circular. \$25 1/2

THE ARROW TIE.

FOR BALING COTTON THE ARROW TIE
is the most popular, being the best Cotton
Tie in use.

Planters and Cotton Press men everywhere
prefer it to all others.

THE ARROW TIE
was used to cover MORE THAN HALF THE
CROP OF 1869, giving entire satisfaction.

The patentee and manufacturer of the cele-
brated ARROW TIE, J. J. McComb, formerly
of New Orleans, now residing in Liverpool,
having control of the best and most exten-
sive Rolling Mills in Europe, is constantly
importing large stocks of this popular Tie,
manufactured of the very best quality of
English iron, to meet the increasing demand
for it throughout all the Cotton States.

Planters can buy or order the ARROW TIE
of all dealers in Iron Ties, and of country
merchants generally, at the lowest market
price; and we respectfully solicit the patron-
age of Planters and Factors everywhere.

H. T. BARTLETTE AND
R. W. RAYNE,
General Agents for the Arrow Tie,
161 1/2 124 Carondelet St., New Orleans.

CARPET AND OIL CLOTH WAREHOUSE,
J. M. ELKIN, 163 CANAL STREET, 165

NEAR BARONNE, NEW ORLEANS.

IMPORTERS OF ALL VARIETIES OF
ENGLISH CARPETINGS, RUGS, ETC.

Oil Cloths, Mantles, Curtains, Blankets,
Lace Curtains, Window Shades, etc.

—AND A—
Complete Assortment of Upholstery Goods.

MISCELLANEOUS.

BROOKS' IMPROVED PATENT
WROUGHT IRON REVOLVING
COTTON SCREW PRESS.

Patented by R. M. Brooks, of Georgia,
April 14, 1868.

It took the first premium at the Louisiana
State Fair, at New Orleans, April, 1869, over
every competitor; also at the Tennessee
State Fair, at Memphis; and, more recently,
at the Mississippi State Fair, at Jackson,
and again at the recent State Agricultural Fair,
at New Orleans, April, 1870, in a contest
with four other presses, embracing the
most approved patents from different States
of the Union, North and South.

The following is the certificate of some of
the principal cotton factors and merchants of
New Orleans. "In our circulars sent between
the certificates of prices of planters and sci-
entific artisans from several Southern States
in regard to the admirable principle and
practical working of this Press.

"We, the undersigned, purchased last sea-
son, from Messrs. J. B. Jennings & Co., the
Brooks' Revolving Cotton Screw Press, for
our customers, and, so far as heard from,
they have given entire satisfaction."

"Messrs. Greenwood & Son, Warren, Cran-
ford & Co., O. L. Wainwright, Irby, McDaniel
& Co., Frutkin & Daniel, Campbell & Stone,
Chapman & Co., E. P. Tolson & Co., R. S.
Walker, Violet, Black & Co., Black Bros.,
Wright, Allen & Co."

Circulars, giving, with full description,
price list, etc., sent by mail on application to
J. B. JENNINGS & CO.,
Proprietors, 14 Union Street,
New Orleans.

GEORGE B. HOLZACHS
PATENTED IMPROVED
MOVABLE WINDOW SHADE.

This improvement relates to a new and
simple manner of so arranging window
shades that light and air can be admitted into
the room through the upper part of the win-
dow, without raising or lowering the shade,
and when the window is closed, the shade
with the combined screens its usefulness and
comfort in warm weather, when a good cur-
rent of fresh air is so welcome, cannot be
passed.

In schools, dining rooms and bed rooms, the
latter especially in time of sickness, the use
of this improved combination thoroughly re-
frigerated and lighted at pleasure, without the
slightest inconvenience to the sleeper or pa-
tient, or exposure to the passer-by.

It is well adapted to any window, with but
little alteration and at moderate expense.
Orders solicited and promptly attended to.
State Rights for sale by
GEORGE B. HOLZACHS,
Inventor and Patentee,
61 Canal Street, New Orleans.

BRACES AND TRUSSES.—DR. JOHN C.
FANGELL informs the medical profession
and others that he has constantly on hand
and for sale a complete assortment of BAN-
NINGS' TRUSSES, Spinal and Shoulder
Trusses, and other appliances for the preven-
tion, relief and cure of neuralgic, rheu-
matic weakness and derangements of public
speakers and singers, palpitation of the heart,
bronchitis and weakness of the lungs, spinal
weakness and deformity, dyspepsia and nerv-
ous affections, constipation and chronic diar-
rhea, female derangements, extreme dis-
placements of the womb, RHEUMATIC PAINS,
prolonged and weakness of the male and female
system.

These light, cool and springy appliances
are the special favorites of the medical profes-
sion, and are extensively used in all the best
hospitals; they supply a missing link in treat-
ment; place the above affections in a new
and more hopeful light, and other com-
plicated cases where medicine can only mitigate
them, than it can cure a hernia or a dislocated
joint.

He specially desires an examination of
these appliances by the profession and suffi-
ciently to satisfy them of the value of the
application of the above braces, trusses, and
other appliances, or that of the family phys-
ician.

These valuable appliances are sanctioned
by a large number of the medical profession
in the United States and Europe as the best
adapted to fulfill the purpose which they
are intended, and the Trusses and Braces are
adopted by the United States Government for
the use of the army and navy. Terms cash.
Consultations free. Send for their pamphlet;

The Christian Advocate.

SATURDAY, JULY 30, 1870.

RHENISH PRUSSIA.

Rhenish Prussia, Napoleon's objective point, is divided midway by the Rhine, and comprises an area as large as the State of Indiana, containing five millions of people. It includes, on its left bank, the cities of Treves, Cologne, Cleves, Aix la Chapelle, Bonn and Coblenz. Passing down the Rhine, the first German city the traveler reaches on the left bank is Bingen. Just above Bingen a clearly defined spur of mountains, called the Scharlach, runs some distance on either side into Germany and France, forming the natural "divide" between France and Prussia. Westward, along this high land, runs the German jurisdiction and language, and from Bingen, down the Rhine, to Holland, the cities are and have always been largely German.

Coblenz, the fortified capital of the Prussian province of the Rhine, is a town of twenty-two thousand five hundred population, with a stone bridge across the Moselle and one of boats across the Rhine, uniting with the great fortress of Ehrenbreitstein on the right bank, constructed by Carnot and Montalibert, and capable of accommodating one hundred thousand men. Coblenz has so long been a point of refuge for French fugitives and emigrants that, for this season, it has more French blood than any other of the Rhenish cities.

We next come to Bonn, world-renowned for its great university, which has an unusual grant from the Prussian government of one hundred thousand thalers, whose university buildings are the finest in Europe, and whose library numbers one hundred and forty thousand volumes. No German city is more thoroughly German than Bonn, where Beethoven was born, Von Schlegel lived, and Niebuhr died. Its historic associations date back prior to the Christian era. From the terrible fortitude with which it has again and again been defended through eighteen centuries, it is no doubt, in any regular siege, would hold the largest army seriously in check. Under the dominion of the First Napoleon the university was closed.

Fifteen miles below Bonn, on the left bank, stands Cologne, or, as the Germans spell it, Koeln, so called because the Emperor Claudius, about twenty years after the death of Christ, planted a "colony" in honor of his wife, the Empress Agrippina, who was born here. It is a fortified capital, and contained in 1855, with the small town of Deutz, across the river, which is properly a suburb of Cologne, about one hundred and five thousand five hundred inhabitants. It is well known to us for its manufactures, the chief of which is the Kaule Cologne, and is attractive to travelers for its magnificent cathedral and works of art.

Dusseldorf lies upon the right bank of the Rhine, but so closely associated in its manufactures with Cologne and other towns on the left bank as to make the Rhine a bond of union and commerce between them, rather than a line of separation. It is chiefly celebrated as the center of the art union of Rhenish Prussia, and has been under Prussian dominion for centuries. In 1855 it contained fifteen thousand inhabitants, and was the capital of a district on both sides of the Rhine, numbering one million two hundred thousand.

The last Prussian town immediately on the left bank of the Rhine, before it enters Holland, is the half Dutch town of Cleves, the center of a "circle" of one hundred thousand inhabitants. It came into the hands of the house of Brandenburg (Prussia) in 1699, and has since so remained, except when conquered by France in 1805, and until receded to Prussia by the treaty of 1815.

The local subdivisions or provinces of Coblenz, Cologne and Dusseldorf lie on both sides of the Rhine. Off the Rhine the left bank is thickly studded with cities and considerable towns, including Treves, Dusseldorf and Aix la Chapelle. The last is near the border of France, and was the birth-place and residence of Charlemagne, and is the most nearly French in its associations of any of the towns of Rhenish Prussia.

CHEAP LIVING IN EUROPE.—Off the traveled routes everybody knows that one may live better and cheaper than in the United States, but in towns, large in population or frequented by strangers, almost everything depends upon adaptation to the customs of the people. Against these in none of the old countries can a contest be successfully waged. The customs (mores, in Latin) of a people represent its virtue, and they are sanctified by the traditions from the distant past. In London, for example, life in the same style—clothing, furniture, rents, food, servants,

horses and amusements being as near alike as the habits of the two countries will permit—costs less in New York or Philadelphia, Boston or Washington, provided the customs of those with whom you have to do are respected. The service rendered is the very best, the housewifery neat, attendance constant, cookery perfect, address respectful, and hours of work punctual. But your servants must have their table supplied separately from yours, and whatever rules may be adopted in the dining room, the kitchen has its four meals a day. The tea, sugar and beer allowed to each servant is commuted by a money payment on the Monday of each week. Your chamber or dressing maid claims the cast-off ladies' wearing apparel; your footman the gentleman's, your cook the drippings of the kitchen; and your coachman the manure of the stable. A new suit of livery must come to two of them on Christmas and a "Christmas box" be given to each of the others—a word meaning simply a money-gift of any sum made the day after Christmas. If you purchase or sell a horse your groom receives a sovereign, while if you buy a carriage and pair, your coachman expects five pounds, but himself settles with the groom and stable boy. You may not discharge a servant without giving a month's previous notice, nor may your servant quit you without the same. These and other like customs observed as every Englishman observes them, and the cost of living in London will be found less in the sum total than the cost of living in New York.—*Lippincott's Magazine.*

STORMS IN THE SUN.

Prof. J. D. Steele has communicated the following to the *Elmira Advertiser*:

There appeared in the *Advertiser*, some weeks since, a paragraph, copied, I believe, from a Michigan paper, declaring that a column of magnetic light is shooting out from the sun at a prodigious speed—that it already reaches half way to the earth, and that in all probability, by another summer, we shall have celestial and atmospheric phenomena beside which our roughest winter winds will seem like a "June morning in paradise." In fine, that when this big tongue of fire touches the earth, it will likely lap up the earth at one mouthful. Very many have made inquiry of me concerning this prodigy, and, with your leave, I will try to satisfy their curiosity, and perhaps allay their fears.

It has been known for some time that during a total eclipse red flames were seen to play about the edge of the moon. During the eclipses of 1868 and 1869 it was definitely settled that they were entirely disconnected from the moon, and were dark tongues of fire darting out from the sun's disk. By observations with the spectroscopic, and also by means of the wonderful photographs of the sun, taken by De la Rue during the eclipse of 1869, it was discovered that these fire-mountains consisted mainly of burning hydrogen gas. This was precious information to secure in the midst of the excitement and novelty, and in the brief duration of a total eclipse. It did not, however, satisfy scientific men. For two years Mr. Lockyer, aided by a grant from Parliament to construct a superior instrument, had been experimenting and searching in order to detect these flames at other times than at the rare occurrence of a total eclipse. On the twentieth of October, 1868, he obtained a distinct image of one of the prominences, which he afterward traced entirely around the sun. Astronomers can, therefore, now study these flames at any time.

Observations now being taken show that storms rage upon the sun with a violence of which we can form no conception. Hurricanes sweep over its surface with terrific violence. Vast cyclones wrap its fires into whirlpools, at the bottom of which our earth could lie like a boulder in a volcano. Huge flames dart out to enormous distances, and fly over the sun at a speed greater than that of the earth itself through space. At one time a cone of fire shot out eighty thousand miles, and then died away, all in ten minutes' time. Beside such awful convulsions the mimic display of a terrestrial volcano or earthquake sinks into insignificance.

There is nothing in these phenomena to alarm us. They have, in all probability, happened constantly for ages past. That we have now means of investigating their nature, and measuring their height and velocity, furnish no cause of anxiety. Rumors of these discoveries have crept into the papers, and exaggerated by repeated copying and sensational additions, have given rise to these mysterious and uncalled for predictions.

As a ship held by an anchor looks, as though it were going out with the tide, yet never goes, so some souls that seem constantly to be getting nearer to Christ never come, because they are anchored and held by some secret sin.

A WORD TO THE GIRLS.—Do our young women know what it is that strikes one who has been away from the country for a time the most unpleasantly on his return? It is not their faces, assuredly, which for regularity of outline, and delicacy, and freshness of tint, are unsurpassed—indeed, are not equaled by anything that one sees abroad, save in the finest pictures. Nor is it their forms, which are lithic, supple and graceful, with a spring in the step and a freedom of carriage that are always a delight to the eyes. Nor can it be said to be their dress; for though they dress too much, in colors too positive and decided, and are in this respect far behind the French women, they are yet in advance of all others, English, German or Italian. But it is the voice, and the management of the voice. After looking at our American girls, it is almost always a disappointment to hear them speak. What they say is perhaps well enough, but the tone and mode in which they say it is not well enough. Their voices are commonly too thin and shrill, and when they are not, are pitched in too high a key. Sometimes they come through the nose a good deal more than is desirable. They have a metallic ring, or at least a reedy quality, like the *tor humana* of the organs, and not that soft, low and gentle quality which Shakespeare proclaimed so "excellent in woman." Climate has no doubt a good deal to do with this result, for the fault is most perceptible at the North and East, but least perceptible at the South; but carelessness has quite as much to do with it. Our mothers and teachers, we suspect, do not take much pains to train their children and pupils into good habits of enunciation. They are carefully taught to sing, but they are not carefully taught to read and to speak. Yet more than half the charm of all social intercourse depends upon the agreeable or disagreeable use of the voice. How repulsive, when one has been lost in admiration of a beautiful face and a noble figure, to hear the mouth open like the grating of a hinge, or the "squawk" of a guinea fowl! How delicious when it opens with the sweet trill of a flute, or with the warble of birds, or with that deep, rich, mellow and sympathetic liquid quality which no other instrument but the human throat ever attains!—*Poet's Magazine.*

SCHOOLS AND COLLEGES.

FLORENCE WESLEYAN UNIVERSITY.

FLORENCE, ALABAMA.

W. H. ANDERSON, D. D., PRESIDENT.

This institution of learning, so well known throughout the South, will begin its next session on Wednesday, September 14, 1870. The Faculty is composed of men of experience and ability. The course of study is comprehensive, embracing the Liberal Arts, Law, Theology, and Medicine. The University is situated in a beautiful and healthy location, and is well equipped with all the modern facilities of learning. The expenses for session of five months, tuition in the University classes, \$30.00; tuition in Grammar School, \$2.00; tuition in Law Department, \$10.00; incidental fees, \$2.00. (Tuition and incidental fees required in advance.) Boarding can be had in the best families at from \$16 to \$20 per month. For particulars see circular, or apply to the President, Rev. Dr. Anderson, or to Hon. W. H. Wood, GEO. W. FOSTER, J. B. B. President Board of Trustees.

ROANOKE COLLEGE, SALEM, VA.

Next Session Begins September 3.

This Institution has a full corps of instructors, a thorough course of studies, and aims at a high grade of scholarship. Its superior educational advantages, moderate expenses, healthy location, and excellent mail, traveling and telegraphic facilities, render it well worthy the attention and patronage of the South. Expenses for session of ten months, about \$210.00. This estimate includes board and tuition, embracing modern languages. A slight advance on the above for students boarding in private families. For further particulars, catalogues, etc., address REV. D. F. BITTLE, D. D., President of the College, J. B. B. 3m.

TENNESSEE FEMALE COLLEGE,

FRANKLIN, TENNESSEE.

Fall Session for 1870 Begins Monday, September 5.

The claims of this institution rest on the best, extent and thoroughness of the culture it bestows. The climate is favorable for study, the only one that makes scholars. Teachers to its patrons, including distinguished educators and gentlemen eminent in the pulpit and in the professions. Catalogues sent on application. R. K. HARGROVE, President, J. B. B. 3m.

MORRY AND HENRY COLLEGE, VIRGINIA.

GALIA.

The Fall session begins August 18, and closes January 11, 1871.

One Hundred and Fifteen Dollars will cover the necessary expenses of the session, including tuition, board, fuel, room rent, washing and contingent fee. For catalogue or for other information address E. E. WILEY, President, Emory Post Office, Va. J. B. B. 3m.

A SUMMER TERM OF THE

Southern Methodist High School

will commence on Monday, the fourth day of July next. It is held in the city of Atlanta, Ga. The course of study is the same as in the regular term. The advantages are all that can be desired. For terms, etc., consult J. L. RAST, Principal, J. B. B. 3m.

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS

PUBLISHED BY

CHARLES SCRIBNER & COMPANY,

651 BROADWAY, NEW YORK.

Gay's Geographical Text-Books.

"Incomparably superior to anything published."—*Appassia.*

Introduction to the Study of Geography. Elementary Geography. Intermediate Geography. Common School Geography.

Gay's System is approved and indorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenney, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that one million (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System. For no other series of books ever published in America have ever secured so rapid and extensive an introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering into thousands schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Gay's series has marked a new and better era in the presentation of geographical science, that it is the result of this generation will obtain a clearer, more definite and exact knowledge of the world on which they live, and that it is so systematized as to render them well calculated to the attention of all interested in educational improvements and progress.

FLETCHER'S POPULAR SCHOOL ARITHMETICS.

First Lessons, (Illustrated.) Primary Arithmetic, (Illustrated.) Intellectual Arithmetic. Intermediate Arithmetic. Grammar School Arithmetic. Practical Arithmetic.

The Christian Advocate.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, AUGUST 6, 1870.

NO. 29.

NEWS OF THE WEEK.

DOMESTIC.

MOBILE, July 31.—On the eastern division (Mobile to Pascagoula) of the New Orleans, Mobile and Chattanooga Railroad the last rail was laid last night, and it will be opened for traffic this week, and the entire line to New Orleans will be running early in September. The great drawback at the Riglets is nearly finished. This road, though encountering great engineering difficulties, is constructed most thoroughly of any road in the South. Its equipment in every detail is first class. The road will be very fast, besides greatly facilitating commerce between Mobile and New Orleans, and will shorten the New York and New Orleans line several hours.

MEMPHIS, Aug. 1.—The steamboat Silver Spray, from New Orleans to Cincinnati, exploded her boilers, thirty miles above this city, at twelve o'clock last night. The boat immediately took fire and burned up.

About twenty-six lives are known to be lost, including A. M. Jordan, captain; Thaddeus Wirthling, clerk; Ash Taylor, second mate; Charley Jordan, steersman; William Batie, second steward; Alfred Comings, second cook; Boyd Smith, berth maker, and the colored chambermaid.

Fatally Wounded.—E. Long, barkeeper; Dick Cagle, cook; Colonel Porter; name unknown, and Geo. Williams.

Severely Wounded.—A. R. Singleton, second clerk; James Corcoran, mate, and Richard Nichols.

Slightly Wounded.—Edward Patterson, pilot; William Fay, W. S. Hayes and J. W. Gill.

The survivors swam ashore and were picked up by the City of Cairo, which turned back and brought them here. The wounded were sent to the hospital.

The boat was owned by Captain U. S. Patterson, of Newport, and was valued at \$15,000.

There were only ten passengers on board the Silver Spray at the time of the explosion, most of whom were saved; among them Heinrich Meyer, of New Orleans.

WASHINGTON, Aug. 1.—The debt statement shows a decrease of over \$17,000,000.

MEMPHIS, Aug. 1.—A dispatch has just been received by the chief of police from Cairo Junction, stating that two hundred armed negroes were marching on that place to release some prisoners, and asking for assistance.

A negro desperado, named Charles Wilson, attempted to kill his wife, at Buntyn's Station, yesterday. The woman flew to the house of her employer, Colonel A. J. Martin, and was followed by the negro. Mrs. Martin attempted to save her, when the fiend shot her, inflicting a severe and probably fatal wound, and then shot his wife through the body and fled. Citizens are scouring the woods in search of him.

Later accounts from Grand Junction state that the trouble grew out of the killing of a negro by a white man. The man was arrested. Negroes flocked to Grand Junction for the purpose of lynching him; but, through the exertions of Rev. Mr. Bryant, they were quieted, but still insist on an immediate trial.

CINCINNATI, Aug. 2.—The Democrats carried Covington and Newport in the election yesterday.

RALEIGH, N. C., Aug. 3.—Some Northern papers doubt the press telegram from here, that Kirk's men hung up men to make them confess that they were Ku-Klux. The statement was true; Berger, Kirk's subordinate, acknowledges it, and says there is no other way to make them confess. Others were treated in the same way. There were several arrests in Alamance county yesterday. Several of the parties were released to-day. Except the acts of the military, there is no disturbance in the State.

Both political parties profess to be confident of success in the election to-morrow. There will be a full vote polled, except in Alamance and Caswell counties.

In the decision of Chief Justice Pearson yesterday, he said he had no power to enforce the writ of habeas corpus in Caswell and Alamance or any county declared in insurrection by the executive, as though the writ was suspended.

WASHINGTON, Aug. 3.—The French minister has officially informed the government of the existence of war between France and Prussia.

Strenuous efforts are being made to secure the pardon of the Fenian General O'Neill.

The Northern Pacific Railroad has deposited the first mortgage bond, thereby securing the issue of their bonds. There was \$5,000 worth of revenue stamps attached to the document.

FOREIGN.

CONSTANTINOPLE, July 27.—The war demoralizes business. There have been many failures, and more are expected.

Official notification has been received by the Porte of Austria's neutrality.

LONDON, July 28.—A French cruiser is off the Isle of Wight, and is said to be boarding all merchantmen.

MADRID, July 28.—The indignation at Grammont's aspersion of Cortes is unabated and tends to avert the sympathies of many from France.

LONDON, July 28.—The old blockade runners are being sold for service in the Baltic. The steamer Darien has changed hands, and her name has been altered to Gernina.

PARIS, July 28.—The American Legion now forming here is to have a French commander, nominated by the French government.

PARIS, July 28.—It having been reported that several American officers desire to follow the French army in the campaign against Prussia, for the purpose of making observations for the use of the American government, petitions were lately filed with the government for necessary permission. The request was declined, the highest military authority of the empire repeating that no foreign officer, however high his rank, will be permitted near the French army.

LONDON, July 28.—Advices from Shanghai of July 14 show that the attack on foreigners at Peking was directed only against French, although other foreigners were accidentally killed. The house of the Sisters of Mercy was destroyed and its inmates ravished by Chinese.

BERLIN, July 29.—The Prussian government has declined to allow foreign military officers at army headquarters.

VIENNA, July 29.—The National Bank has been licensed to treat for foreign bills to the amount of thirty million florins as a portion of specie reserve.

VIENNA, July 30.—Austria consults Italy on the attitude to be pursued. She is said to contemplate giving notice to the Pope that the concordat will no longer be considered binding.

PARIS, July 30.—M. Olivier had an interview yesterday with the principal editors of Paris, during which he explained the position of the government on several questions relating to Prussia. He gave some explanation of the secret treaty project that Count Benedetti had previously given relative to measures taken by the cabinet some time since to effect a general disarmament. He said these efforts were merely intermediary to those of Earl Clarendon for a like purpose.

Count Von Bismarck replied to Earl Clarendon that King William refused absolutely to disarm.

M. Olivier said that he gave the honor of his name and that of his colleague, that no offer was made to Prussia other than that made by Earl Clarendon.

On the Rome question, M. Olivier said, it has seemed equitable and useful to the French government to evacuate Rome; equitable because Italy has kept her promises; and useful because keeping her promises unites us more closely with Italy and Austria.

LONDON, July 30.—In the House of Commons to-day, during a discussion on the low quality of the coal furnished to the British navy, suspicions of robbery were expressed.

ROME, July 30.—General Kautzer, of the War Department, proposes the fortification of this city.

The Pope's chaplain has gone to Paris to receive the Canadian defenders of the Pope.

LONDON, July 30.—It is now thought that the Prussian army will cross the Rhine from Baden into France, near Huningen, two miles below Basle. There is much activity in German military circles to-day.

The French press, regardless of politics, praise the emperor's address to the people.

PARIS, July 30.—The Journal Official this morning published Count Benedetti's explanation of the secret treaty affair. It is well known that Count Von Bismarck made France an offer before and

after the war with Austria. The substance of the offer was that France should take Belgium as compensation for the aggrandisement of Prussia. The emperor declined the proposition the very moment the treaty of Prague was concluded. Bismarck again betrayed his desire to restore the equilibrium, and made proposals to form combinations affecting the integrity of the States bordering on French territory. During one of these conversations Count Von Bismarck dictated to Count Benedetti this secret treaty project, which has just been made public, and which Count Von Bismarck has kept ever since. This accounts for the handwriting of Count Benedetti, who gave notice of the proposed treaty to the emperor and the government, but the proposition was promptly rejected. Count Benedetti adds that the King of Prussia was not favorable to Count Von Bismarck's plans.

PARIS, July 30.—To-day the emperor assumed the commander-in-chiefship of the army. He has been hard at work to-day with General Le Bon, arranging necessary details.

The prince imperial visited the camps to-day and was received with great enthusiasm.

The health of the army is perfect. There has been on serious engagement yet; rumors to the contrary are false.

It is reported on the best of authority that the recent mission to Vienna was a complete success.

Austria will not take umbrage at the presence of Italians in Rome, and will remain in accord with Italy.

PARIS, Aug. 1.—In addition to the revival of the passport system, applicable to all persons, the subjects of States fighting France must have the special permission of the minister of the interior to enter, leave or travel through France.

French citizens found in Baden were conducted to the frontier in chains, and compelled to pay for the places wherein they were locked up, to save them from the violence of the people.

Duke Cadore, now at Stockholm, goes to Copenhagen on a similar mission.

Liberte says the occupation of Belgium by England would unsettle Belgium, wound France, and probably draw Austria and Russia into the war.

The Belgian army of observation occupies the line between Liege and Aix la Chapelle.

ROME, Aug. 1.—Another detachment of the French army left Civita Vecchia for Marselles to-day.

BERLIN, Aug. 1.—The hesitation about the opening of hostilities and the delay in the imperial declaration of war is here ascribed to the consciousness on the part of Napoleon that the war would be long and painful, owing to the superiority of the needle gun over the chasspot, as has been already demonstrated in the encounters between skirmishers.

LONDON, Aug. 1.—British troops don't occupy Antwerp.

PARIS, Aug. 1.—A volunteer artillery corps for the defense of Paris, in case of need, is to be formed. Three o'clock—No serious engagements.

LONDON, Aug. 1.—No battles, though the streets are full of rumors, which are not credited, that the French fleet has attacked the defenses of Hamburg.

MADRID, Aug. 1.—Captain General De Rodas asks for fourteen thousand reinforcements for Cuba. In view of this demand several journals urge the government to seriously consider the situation of that island.

There is no day fixed for the assembly of the Cortes.

The French cabinet explained recent expressions regarding Spain, which are considered satisfactory.

PARIS, Aug. 1.—The Journal du Peuple was fined five thousand francs for an offense against the authority of the emperor. The chief editor was sentenced to three months' imprisonment and two thousand francs' fine for an article inciting insubordination among the troops. Rochefort has been notified that he will not be released until he has served out the several terms for which he was committed.

Pere Hyacinthe has written a letter against infallibility which creates a sensation.

CONSTANTINOPLE, Aug. 1.—The Viceroy of Egypt embarks to-day on his return to Alexandria.

FLORENCE, Aug. 1.—The treaty between France and Italy, for the evacuation of Rome by the French

troops, has been completed. Italy guarantees order in Rome.

The Pope has been advised by some people to go to Malta and by others to remain at Rome. It seems he has decided to remain at Rome.

The police have seized a quantity of arms, secreted in the city.

PARIS, Aug. 2.—Though the religious element takes no part in the present war, the sentiment of the Catholic population in neutral countries is adverse to Prussia, and by some it is feared that the advance of the French armies will be regarded in the light of a crusade.

PARIS, Aug. 2, Evening.—An official dispatch from Metz announces that to-day, at eleven o'clock in the morning, the French had a serious engagement with the Prussians. Our army took the offensive, crossed the frontier and invaded the territory of Prussia. In spite of the numbers and position of the enemy a few of our battalions were sufficient to carry the heights which overlook Saarbruck, and our artillery was not slow to drive the enemy from the town.

The plan of our troops was so great that our losses were slight. The engagement commenced at eleven o'clock and ended at one.

The emperor assisted at the operations, and the prince imperial, who accompanied him everywhere, received on this first field of battle his baptism of fire. His presence of mind and sang froid in danger were worthy of the name he bears.

The emperor returned to Metz at five P. M.

LONDON, Aug. 2.—Dispatches yesterday from Saarbruck report no important operations along the entire line.

A large body of French are moving on Forbach.

Replying to questions, Gladstone said in the House of Commons that the policy of the government was not one of armed neutrality, but of friendship to both combatants. He declared that the obligations of the Vienna treaty ended with the German empire. The government was doing everything to enforce the observance of neutrality, but British power was restricted to British waters. He also stated that all legal restrictions had been imposed on the sale of coal.

LONDON, Aug. 2.—The Times, this morning, has a long editorial on the war prospect. The writer thinks the delay in military movements on both sides can be ascribed to the demoralization of the troops from having been moved by rail. The French have also been delayed on account of the hesitation of the South German States, and are now necessarily confined to the narrow ground of the Saar valley. In fact, the entire preconceived plan of the emperor has been altered by unforeseen circumstances of this sort, and has acted probably to form a new one.

The Times argues that the aim of the French chasspot, on account of its fouling speedily, will be found to be infinitely less efficient than the needle gun, and the difference in this respect will probably be sufficient to govern the result of the war.

ROME, Aug. 2.—Italy is concentrating troops on the Roman frontier.

The French Chasseurs left Civita Vecchia yesterday.

LONDON, Aug. 2.—Evidence hourly accumulates of the superiority of the needle gun over the chasspot. The fact creates deep concern in France.

The Pall Mall Gazette estimates that the Prussian army on the frontier now numbers half a million.

There is extreme activity in English ports and dock yards. Extensive preparations are made to put coast defenses in condition to resist an attack.

FLORENCE, Aug. 2.—The Opinione says that England, though she remains neutral, declines to enter into engagements with other powers for the preservation of neutrality.

The statement in *Nazione* yesterday that England had joined Italy and Austria in an alliance of neutrality, was premature.

LONDON, Aug. 2, 3 A. M.—The impression prevails that the arrival of the French fleet in the Baltic alone prevented the advance of the Prussians through France to Paris.

BRUSSELS, Aug. 2, Noon.—A correspondent of the Independent Belge, writing from Metz, asserts that the first great battle will be fought on Saturday or Sunday next, or on Monday at furthest. He underscores the sentence following, viz: *This is sure.*

LONDON, Aug. 2.—Advices from

Prussian sources mention the prevalence throughout Germany of the unwavering assurance of ultimate victory.

VIENNA, Aug. 2.—Austria is mobilizing fifty thousand men to watch the Bohemian frontier.

METZ, Aug. 2.—The French troops passed the frontier at eleven o'clock A. M. They instantly encountered the Prussians, strongly posted on the heights commanding Saarbruck, which were carried by a few battalions. The capture of the town instantly followed, the artillery compelling the Prussians to evacuate it in great haste. General Frossard with one division defeated three divisions of the enemy.

The buildings in Saarbruck caught fire from French artillery and half the town was destroyed. The mitrailleurs were used for the first time and are reported to have worked wonders.

The emperor, on his return to Metz, after the battle, sent the following telegraphic dispatch to the empress:

"Louis has received his baptism of fire. He was admirably cool and little impressed. A division of Frossard's command carried the heights overlooking Saarbruck. The Prussians made brief resistance. Louis and I were in front where the bullets fell about us. Louis keeps a ball he picked up. The soldiers wept at his tranquility. Well on officer and ten men."

NAPOLEON.

Metz was illuminated last night in honor of the victory.

After the retreat of the Prussians from Saarbruck the French did not occupy the place.

LONDON, Aug. 3.—It is rumored that England and the United States are urging negotiations whereby Hamburg and Bremen will be kept open ports during the war.

BERLIN, Aug. 3.—King William has issued a proclamation at Mayence, assuming supreme command of the Prussian army.

LONDON, Aug. 3, Noon.—The following are details of the engagement at Saarbruck: The fight began at eleven o'clock yesterday forenoon, when the French passed the frontier in force. The Prussians were driven from their strong position by the sharp artillery fire of the French, the latter remaining masters of the position, which they had won without serious loss.

The emperor and prince imperial witnessed the conflict, and returned to Metz to dinner.

LONDON, Aug. 3.—A telegram from Amsterdam confirms the report of the French exploit at Saarbruck, but calls it a *coup de theatre* to act on Paris, and not a military success.

PARIS, Aug. 3.—The *Moniteur* says: All arrangements for the evacuation of Rome have been terminated between France and Italy. The latter government will issue a declaration, giving renewed force to the September convention. Affairs may now be considered as regulated to the satisfaction of all parties interested.

NEW YORK, Aug. 3.—A Paris dispatch, dated midnight, reports: A crisis is threatened in the Prussian and English cabinets.

The special envoy of France at Copenhagen has arranged an alliance between Denmark and France.

The report of a naval engagement in Prussian waters is untrue. The French easily shelled the Prussians out of Saarbruck, who retired to the hills in the rear of the town.

This capture opens Prussia to the full shock of the French invasion.

NEW YORK, Aug. 3.—The following dispatch has been received:

PARIS, Aug. 3.—Strong rumors are current of the consummation of an alliance between Austria, Italy and France.

The French government has issued five hundred million treasury notes.

NEW YORK, Aug. 4.—The following dispatch has been received:

LONDON, Aug. 4.—The statement of the News, yesterday morning, that the French government had declined the services of Generals Lee and Beauregard, was without foundation. No offer of service had been tendered by those gentlemen. Saarbruck is in ashes. The French captured three thousand prisoners.

It is proposed to expel the Germans from Paris.

The Rev. William H. Evans—brother of Dr. James E. Evans—an excellent minister of the North Georgia Conference, and pastor of Decatur circuit, died at Oxford

Georgia, July 20. A dispatch to that effect was received at Nashville, directed to his brother, who was expected to be in attendance at the meeting of the Book Committee on that day. He was seized with apoplexy at nine o'clock A. M., and died at one P. M. Dr. Haygood informs us that this is the third preacher in the North Georgia Conference who has died since the last session, and the thirteenth since the session of the Georgia Conference at Americus, when that Conference was divided. Not one has died in the South Georgia Conference during that time, unless some one has died recently. The venerable Dr. Pierce was reported very sick at Oxford last week. Thousands of prayers will ascend to heaven for the prolongation of his life. The death of our brother, William H. Evans, will be deeply deplored, especially in Atlanta among the old citizens, as he was their pastor in 1852-3, when the church was blessed with a glorious revival, whose fruits will long remain. Evans chapel, originated by him, destroyed during the war, and since reconstructed, and now a flourishing station, is a monument of his zeal and success. Verily, the works of such men do follow them! *Nashville Advocate.*

REVIVALS.

The Rev. J. Anderson writes as follows to the Southern Christian Advocate from Jacksonville, Florida: "It has pleased God to revive his work in this, the first charge. A few weeks ago my son was brought to Christ and joined the church. Last week quite a number sought and found the Saviour. Fourteen were received into church fellowship on last Sunday, some of whom were heads of families, and some were Sabbath school scholars. Three other applicants are yet to be received. About twenty in all have come out on the Lord's side. We look for gracious seasons when our district conference assemblies on the thirteenth instant. Praise be to God."

UNION CITY, TENNESSEE.—W. C. Brown, writing, July 20, says: "We have a glorious revival of religion here. Brother J. E. Book, our pastor, and Rev. J. W. Morrow, pastor of the Cumberland Presbyterian Church, commenced a protracted meeting the first Saturday in this month. There are over fifty persons who have professed faith in Christ, and there are yet over twenty-five penitents seeking peace. God's people have been greatly blessed." *Western Methodist.*

The Rev. T. L. Moody writes us that he supposes we have received the particulars of the commencement exercises of Florence Wesleyan University. But we have not. He favors us with the following interesting items: "There were two graduates in law—Messrs. Wood and Jones. The degree of A. B. was conferred on E. A. O'Neal, Jr.; that of A. M. on Messrs. Kennedy, Steinback and Moody; that of D. D. on the Rev. John G. Wilson; of Huntsville, and Rev. C. D. Oliver, of South Alabama; and that of J. L. D. on Prof. Chase, of Louisville, Kentucky. Brother Wilson preached the commencement sermon, and Dr. Rivers addressed the literary society, both of which were fine efforts. The examinations were close and thorough, and did credit to both faculty and students. All the exercises passed off pleasantly, and to the delight of all concerned. We were sorry you did not get to the district meeting on Thursday. The Sunday school day was a 'high day.' The fine, orderly crowd; the large arbor, with its comfortable seats—everything was decidedly ante-bellum. The Sabbath was another great day; it will be remembered as such not only at Oakland, but through the region round about." Many came from far to see a Bishop; and they saw one; Bishop Paine was 'himself'; early fire was in him; it blazed out into one of his happiest efforts at eleven o'clock on Sunday morning. And now you will be surprised when I tell you that after having delivered a Sunday school address on Thursday, in addition to the usual labors attendant on conducting a district meeting, this noble veteran preached twice on Sunday—with a distance of eight miles intervening, he came to Florence and preached at night. You will join me, I know, in saying: Remarkable man, grand old leader, long may such an example of quenchless ardor and tireless activity linger in blessing on those that come after!" *Nashville Advocate.*

The Christian Advocate.

SATURDAY, AUGUST 6, 1870.

THE COMING RAIN.

BY MIGNONETTE.

Midsummer sleeps upon the hills,
And high in heaven the red sun glows;
The languid wind scarce moves the scent
Of clover and belated rose.

The panting pine adown the air
His hot balsamic fragrance flings;
Upon the meadow's swaying reed
The scarlet-shouldered blackbird sings.

The shimmering fields are faint for rain;
The dew-damp marks the hillside road;
The shriveling leaf and puny bud
Show where the rose and lily glowed.

Far in the amber-havened south
A long, low, stammering shadow lies,
Like cloud and mountain softly blent,
And softly mingling with the skies.

It is the rain! A subtle touch
Lies in the south wind's languid palm;
A subtle prophecy floats down
The pine tree's fervid breath of balm.

With closed eyes, I hear the drip
Of raindrops in far forest shades,
The ringing laugh of brooks that leap
The mossy stairway of the glades.

I breathe the perfume, honey-sweet,
Of meadow blooms and vine-roofed bower;
The rich, moist incense of the woods,
The scent of new-born leaf and flower.

And see the sick fields growing green,
The lily cups all brimming o'er,
The daisies dancing, wild with glee,
Beneath the low cloud's steady pour.

And know that when the morrow comes
We, too, shall laugh to greet the rain—
To hear the mountains whisper praise,
And all the vales rejoice again.

So if thy life, O friend! does seem
To lie beneath a cruel sky—
If fondly you come to see
Each darling hope adrop to die—

Oh! wait and watch with heart of faith!
Beyond your small horizon press
The Bounteous Hands, all over-filled
With power to recompense and bless.

Heath and Home.

LETTER FROM WINNSBORO.

WINNSBORO, July 8, 1870.

MR. EDITOR: The church here is certainly not as well organized as it might be; but I truly believe that it will compare favorably with most other circuits and stations in the Conference. I find a good many who are ready to work in any way they can for the glory of God and the good of men. I find at every point large and attentive audiences, such as, in appearance, you do not see excelled, except perhaps in numbers, not even in the Crescent City. The members of these congregations seem kindly affectioned to one another, and devoid of that hateful hypocritical spirit so often found, and which is keen-eyed and ready-tongued against what don't agree with it. All the people, whether church members or not, seem to feel as if in some sense they were identified with the church. The Baptists, with their pastor, Rev. Mr. Nash, are as liberal and brotherly as you can find anywhere. There is a gentleman here who, though a member of no church, has built a beautiful house, and given it to the community as a church.

There are not many Advocates taken here. But I assure you it is a wonder to me that any are taken. The mails are so irregular that we can hardly count on one out of four. This prevents subscription to many periodicals, and stands an unanswerable argument in the way of an Advocate agent. I have succeeded in getting some to promise that they would write to their merchants to send the Advocate to them, and pay their subscription; but I wish some of your superior agents who get so much praise—deserved, I doubt not—would try in some of the places where some of their brethren have tried and failed. Depend upon it, Mr. Editor, many of us unsuccessful agents work harder to get the few we get than some of the brethren who get so many.

Franklin parish is full of rich farming land; never (i. e., most of it) overflows, and is not so sickly as is generally supposed. Land varies in price from \$1 25 to \$20 per acre. In many respects it is a desirable country to live in. In winter some of the roads are very bad; in summer they are all good. Game is abundant within a short distance of where I live—i. e., across the Macon, in the swamp. Bear, deer, turkeys and smaller game are obtained almost any day with a little trouble. There are lakes and bayous easily reached, where fine fish, such as

trout, perch, etc., are caught in abundance.

If there was a good parsonage here, and the mails were more regular, I would scarcely desire to live in a better country; and I know I could not find society that more nearly agrees with my notions of what good society is than I find here.

DANCING.

MR. EDITOR: The advocates and devotees of social and promiscuous dancing are not the exemplary and pious members of the church. They are not the devoted laborers in the cause of Christ. They are not the people found at the prayer meetings. They are not the light of the world to lead sinners to Christ. They are not the supporters of religious literature. They are not in sympathy with the Bible and missionary causes. They are not the people who have family altars on which the fire is kept burning all the while. They are not the people for whom you send to see you and pray with you when you are in trouble or sick, or think you are about to die. They are not the people to whom you look as examples worthy of imitation. They are not the people, though some of them, are members of the church, who are deeply interested for the conversion of the world. They are not the people who are self-denying and make sacrifices for the cause of Christ.

They are not the people to be relied upon in extending the cause of Christ. They are not the people who are cross-bearing and following the Saviour daily, under all the vicissitudes of life—in fair and foul weather, when encouraged and opposed, when the prospects are encouraging and discouraging.

Why, then, do any of you say anything to countenance or encourage the practice of dancing? When you have no confidence in the piety of dancers, why do you ever say or do anything that in any way encourages persons to dance?

Dancing is one of the most seductive weapons used by the devil to lead unwary souls away from Christ and heaven. It has always been the favored amusement of the licentious and profane. They are its firm supporters and constant attendants. Hence all Christians, whose paramount effort is to keep a conscience void of offense toward God and man, fly from the atmosphere of the ball room as from the breath of a plague.

WATCHMAN.

PLEASANT HILL, LOUISIANA.

MR. EDITOR: In looking over the Advocate of the twenty-fifth of June my attention was attracted by a letter written by J. P., one of your worthy correspondents, whose geographical, political and religious description of Shreveport district is quite gloomy, especially when he speaks of decaying foundations and broken pillars, and remarks that the only evidence of science and experiment, and that clabber supplies the place of breakfast bacon for the preacher. The Pleasant Hill and Manny circuit, more particularly alluded to, was once able, and did supply its preacher with meat and bread, as well as clabber. It is a fact too well known to repeat, that the people of this circuit have been stripped of their ability to supply their own families with the necessities of life, as well as their preacher.

The people of this circuit are in high hopes at this time. Already can they see the day of prosperity shooting forth its strengthening rays, and when the enemy shall have been vanquished, and the commissary replenished, they will be glad these old veterans of the cross will venture back and take with them a good bowl of clabber with the cream on it, as in the days of yore.

We have four hundred members of the Methodist Episcopal Church South in the Pleasant Hill and Manny circuit, who are determined to have a camp meeting this fall. We have secured means sufficient to repair the east wing of the Pierce and Paine College, and purchased a bell for the same. We have a fine school in these buildings, situated

at Pleasant Hill, Desoto parish, under the direction of Mr. Joshua W. Foster, a worthy citizen, a good teacher, and a graduate of the University of Alabama, of the class of 1847. Mr. Foster is desirous of procuring competent assistance to aid in carrying on every branch of an education usually taught in such schools. His next scholastic year will commence September 5, 1870. This institution, founded on the prayers and tears of good men, braced by energetic teachers, nourished by an interested community, guided by a wise and prayerful body of men, watched over by divine Providence, can and will succeed.

J. F.

NEWS FROM THE CHURCHES.

CHINA GROVE, MISSISSIPPI CONFERENCE.

MR. EDITOR: Brother Liverman has just closed a meeting at China Grove, on what was, till our last Conference, Pearl river circuit, Mississippi Conference. The meeting began on Saturday before the third Sabbath in July, and closed the Thursday evening following. He was assisted by Brothers H. T. Jones, E. R. Strickland and H. Winborn. It was my privilege to be there the two last days. From the first the interest was encouraging, and it increased more and more till the close. On the last day of the meeting, "that great day of the feast," there were ten adults and sixteen infants baptized, and twenty-seven persons received into the church. I have been acquainted with China Grove from my childhood, and I do not think I have ever seen a better state of things there than they seem to have now. The number of conversions is not known. At the close of the meeting the altar was crowded with penitents. It is truly refreshing to know that God is pouring out his Spirit upon his people in some places. May it not be so, everywhere?

W. B. LEWIS.

HOLMESVILLE, MISS., July 25, 1870.

MOUNT OLIVET, MISSISSIPPI.

MR. EDITOR: We are having a gracious revival of religion at Mount Olivet. The church has been greatly revived. Sinners are being converted, and the Sabbath school children are also being converted—two yesterday and three to-day. The meeting is still in progress, and we trust much good will be accomplished in the name of Jesus.

Your brother in Christ,

THOS. W. FLOWERS.

JULY 25, 1870.

BRANDON DISTRICT CONFERENCE.

MR. EDITOR: The district conference for the Brandon district, Mississippi Conference, was held at the pleasant little village of Garlandville, in the county of Jasper. The conference was opened and organized for business on Thursday, July 14. The Bishop not having arrived, Rev. H. J. Harris, the esteemed and efficient presiding elder of the district, acted as president at the opening of the meeting. On the next day (Friday) Bishop J. C. Keener, as was expected, appeared and at once entered upon the duties of president of the conference.

The pastoral reports of the condition of the work in the various circuits were a means of information to the church that we fondly hope, will stimulate the zeal of all for the welfare of our Zion.

The subject of home missions, especially to the colored people, received careful attention.

The subjects of education, of Sabbath schools, of our church literature, of ministerial support, and the circulation of our church papers and periodicals, were all duly considered, and we hope for good results.

The following named individuals were duly elected lay delegates to the next Mississippi Annual Conference: J. E. Watts, W. A. Moore, D. M. Womack and W. C. Dowd. The following were elected reserve delegates: Rev. Irvine Miller and W. J. Seals.

The next conference for the Brandon district is appointed to be held at Forest.

After passing resolutions of thanks to the Bishop, to the Baptist church for the offer of their house of worship, and to the people of Garland-

vile and vicinity for their generous hospitality, the conference adjourned sine die on Saturday evening, July 16.

G. W. CHATFIELD, Sec'y.

RELIGIOUS INTELLIGENCE.

The Baptists have organized their work in Greece by ordaining Mr. Sakellarios, formerly in the employ of the American and Foreign Christian Union. The services were conducted by American Baptists, Mr. Constantine acting as interpreter.

A FRANCISCAN monk named Hotyl, who had written in defense of Dr. Dollinger, has been summoned to Rome by order of his superior "ad recreandum animum," and is now recreating himself in a narrow cell, deprived of books, thus enjoying a Roman summer.

A Jew in Hanover, Germany, recently refused to have his son circumcised, and the synagogue refused to enter the child on the list of the congregation. The father appealed to the courts, and the congregation was directed to enter the name. They have appealed to the higher court.

The Cumberland Presbyterians report twenty-five synods, one hundred presbyteries, two thousand churches, one thousand four hundred ministers, and one hundred and fifty thousand communicants, of whom ten thousand were added the past year. It will be seen that these round numbers are only rough estimates.

The education question is now the all-absorbing topic of interest in England. The Dissenters have united against Mr. Foster's bill, as allowing denominational instruction in schools supported by the public rates. There is no special opposition to the reading of the Bible in the schools, and that question has not yet arisen.

BISHOP SCHREINER, with seven missionaries, all of the Norwegian Society, arrived last September at Antananarivo, the capital of Madagascar. Whether they were heartily welcomed by the London missionaries seems doubtful from the conflicting accounts we have seen. The mission was started three years ago, at Befato, among the Betsileo.

The synod of the Vaudais Church has just held its sittings at Turin. The report of the Committee of Evangelization states that the Vaudais Church has to-day in Italy thirty missionary stations without country off-shoots. The number of those who frequent these little churches averages three thousand three hundred and thirty, and the communicants are one thousand nine hundred and ten. The commission employs twenty pastors, fifteen evangelists and fifty-four school masters.

A TARIFF account of the missions of the American Board given in the Evangelist shows that of its missionaries eighty-nine are Congregationalists and forty-nine Presbyterians, besides some not known. Of the secretaries of the board Drs. Trent and Wood are Presbyterian and Dr. Thompson a Congregationalist. The Presbyterians have a majority of the missionaries in Syria, Persia, Madura, and among the Dakotas and Ojibwas. In the Gaboon and Fuh Chau missions the number is the same.

The Southern Presbyterians contributed last year \$29,045 for foreign missions, an advance of nearly fifty per cent. Nearly one-half of the one thousand four hundred churches contributed nothing. They have fifteen ordained missionaries, of whom four are natives, and labor among the Choctaws, Cherokees and Creek Indians, and in China at Hang-chau and Gu-tsin, cities one hundred and fifty and three hundred miles west of Shanghai. The running expenses of their society last year were \$3,503, about twelve per cent.

In his letter to Sir Bartle Frere, published last November, Dr. Livingstone speaks of a tribe of Troglodytes living under ground in Ruia, probably the Urwa of Captain Speke, a region west of Lake Tanganyika. He speaks of a great subway thirty miles long, in which these people live. Captain J. A. Grant, who accompanied Captain Speke, says that a very intelligent African whom they had with them told of a similar passage which it took from sunrise to noon to go through, which passed under a river, and was so high that the top could not be reached from the back of a camel. Captain Grant believes that such a subway really exists, being a natural passage, caused by the displacement of strata of slate.

REV. I. S. GREEN, an old missionary to the Hawaiian Islands, writes to the Pacific that the constant decrease of the Sandwich Islanders has left nearly all the large churches built years ago much too large for their present congregations. Some of them have been reduced several times. He says:

"I do not expect that the race will be utterly extinct in my day, and thus my work among the peo-

ple be finished ere I put off my armor and cease to wield the sword of the Spirit. There will doubtless be a remnant of Hawaiians and half-castes, to whom I can preach the gospel while I am able to preach at all; still it is no ordinary trial to address a handful of people in the places once thronged with multitudes of attentive listeners."

C. F. HEVEN is a Lutheran missionary in India, aged seventy-seven. In a late diary we notice that on the evening of April 8 he walked eight miles, and slept on the ground under a banyan tree. The next day he started before day and walked till eight o'clock, when he rested till after the heat of the day; and then, after teaching in the evening some converts who were to be baptized the next day, he traveled till midnight, examined in the morning candidates for baptism, baptized twenty-one in the afternoon, and preached on the occasion. He was intending to visit a school thirty miles distant; but the canal-boats had ceased running, and the distance was too great for a pedestrian of his age.

A JOURNALIST correspondent to a London paper writes from Beyrout: "There has recently been a move of the Musselmans of Damascus toward Christianity. It is said that some fifty families—representing about five hundred individuals—are now really Christians. About two months ago twelve of these came forward as representative men, and applied to the Greek patriarch to be received into his communion. He declined, however, to receive them, fearing disturbance, and apprised the governor-general of the fact. The latter for a time took no notice of the matter; but when the fanatical Moslems took it up the persons implicated were arrested, questioned, and finally sent to Beyrout for shipment to Constantinople as exiles."

THE MORAVIAN mission among the Thibetans reports no marked progress the past year. The main station is in Khyelang, which is in the extreme north of the British territory, although the mission extends farther north into Ladak. Dewi Chand, the Governor of Khyelang and vicinity, has shown himself quite favorable—at least so much so as to give largely for the support of the school. A lama, a poor man who has been in the employ of the missions, and who had secured the ill-will of his fellow-priests by defending the missionaries, died very suddenly, under suspicious circumstances, and it is feared that his death will deter others from joining the Christians. The mission in Khyelang was started in 1856, and it was not till 1865 that the first convert was received, followed soon by several others. The suicide of one of the first converts was quite a drawback. A second station, Poo, in the Province of Kuniawur, and very near the borders of Grand Thibet, was occupied in 1865. A journey in Thibet by the medical missionary, made in 1868, during a period of the prevalence of small-pox, is the only opportunity as yet which they have had to go beyond the control of the British government.

THE NESTORIAN mission has reached a critical period, when it will probably be necessary to reorganize its policy. When modern missions among the Eastern churches first began, it was a fond dream of the early pioneers that they could by working within those churches so mold them as gradually to reform all their abuses out of them. Nowhere has this policy had a better opportunity for trial, and nowhere has it been longer persisted in than among the Chaldean churches of Ooroomiah and vicinity. For a long time all seemed as favorable as could be wished. The leading ecclesiastics, such as Mar. Yohanan, aided the missionaries in every way. Still it was found necessary long ago to form a sort of church within the church—a select body of communicants. The results of this reforming movement have not been quite satisfactory. In the schools a grand influence has been exerted, and interesting revivals have occurred. Of late years the desirability of completely separating the new body from the old has been made more apparent, and this will doubtless soon be done. Action on this matter is precipitated by an extreme Anglican and ritualistic influence from England, from which country money is expected to establish a mission which will subsidize the party opposing reform in the church, still allowing them all their old rites and especially the indiscriminate administration of the sacraments. Mar. Yohanan, says Mr. Cochran, in the Missionary Herald, has for years secretly, and often openly and most offensively, opposed spiritual and reformatory labors. Priest Joan, a most untrusting and reckless man, is arousing a furor of zeal for old churchism—a zeal and fanaticism which will not be likely to subside with the spasmodic efforts he may make. He and others are now administering the communion every few weeks to the whole people,

without distinction of character. They also enjoin the fasts and saints' days, resume the use of the liturgy in ancient Syriac, burn incense daily, bow before the altar, and make the sign of the cross; though some, as yet, refuse to come into all these measures. In Geog Tapa, Priest John's town, one hundred members have withdrawn from all participation in the services conducted by him; and this movement will become general if the reactionary influence is strongly developed elsewhere. These and other distractions have seriously hindered the spiritual growth of the churches the past winter; but of late quite an extensive religious interest has existed in several places.—*Independent.*

WEBSTER'S DEATH-BED.

In the evening the will, which had been drawn up by Mr. Curtis, was brought to Mr. Webster to sign. He was then in a sitting posture, supported in his bed by pillows.

By this time nearly the whole household were assembled in his room. He asked if Mrs. Webster and his son had seen his will, and if they approved it; both assured him that they fully assented to it. Then he said: "Let me sign it now." It was placed before him, and he affixed his signature to it, strongly and clearly written; and, as he returned the pen to Mr. Curtis, he said, looking at him with a peculiar smile: "Thank God for strength to do a sensible act," and then immediately, and with great solemnity, raising both his hands, he added: "O God! I thank thee for all thy mercies!"

He then looked inquiringly around the room, as if to see that all were there whom he wished to address. As he was manifestly about to say something that ought to be preserved, Mr. Curtis took notes of his words. He spoke in a strong, full voice, that might have been heard over half the house, and with his usual modulation and emphasis, but very slowly and with an occasional pause. He said:

"My general wish on earth has been to do my Maker's will. I thank him now for all the mercies that surround me. I thank him for the means he has given me of doing some little good; for my children—these beloved objects; for my nature and associations. I thank him that I am to die, if I am, under so many circumstances of love and affection. I thank him for all his care."

"No man, who is not a brute, can say that he is not afraid of death. No man can come back from that bourne; no man can comprehend the will or the works of God. That there is a God, all must acknowledge. I feel him in all these wondrous works. Himself, how wondrous!"

"The great mystery is Jesus Christ—the gospel. What would be the condition of any of us if we had not the hope of immortality? What ground is there to rest upon but the gospel? There were scattered hopes of the immortality of the soul, running down, especially among the Jews. The Jews believed in a spiritual origin of creation. The Romans never reached it; the Greeks never reached it. It is a tradition, if that communication was made to the Jews by God himself, through Moses and the fathers. But there is, even to the Jews, no direct assurance of immortality—in heaven. There is, now and then, a scattered intimation, as in Job: 'I know that my Redeemer liveth'; but a proper consideration of that does not refer it to Jesus at all. But there were intimations—crepuscular—twilight. But—but, thank God, the gospel of Jesus Christ brought life and immortality to light—rescued it—brought it to light. There is an admirable discourse on that subject by Dr. Barrow, preacher to the Inner Temple. I think it is his sixth sermon."

"Well, I don't feel as if I am to fall off; I may."

He now paused for a short time; a drowsiness appeared to come over him, and his eyes were closed. In a moment or two he opened them, and looking eagerly around, he asked: "Have I—wife, son, doctor, friends, are you all here?—have I, on this occasion, said anything unworthy of Daniel Webster?" "No, no, dear sir," was the response from all.

He then began the words of the Lord's prayer; but, after the first sentence, feeling faint, he cried out earnestly: "Hold me up; I do not wish to pray with a fainting voice." He was instantly raised a little by a movement of the pillows, and then repeated the whole of the prayer in clear and distinct tones, ending his devotions with these words: "And now unto God, the Father, Son and Holy Ghost be praise forever and ever! Peace on earth and good will to men—that is the happiness, the essence—good will toward men."—*George Trehear, Curtis in Life of Daniel Webster.*

CHRISTIANITY is ennobled not by the dignity of men's persons, but by the strength of their faith.—St. Gregory.

The Christian Advocate.

SATURDAY, AUGUST 6, 1870.

WESLEYAN METHODISM.

SOME STRIKING FACTS.

We have already noticed the statistics returned by the Wesleyan district meetings, and last week published the completed table. Some facts contained in the returns are of great interest. In the second London district the gross number of removals for the year was one thousand seven hundred and nine; deducting six hundred members received into the district, a net loss by removals of one thousand one hundred and nine was shown. Assuming the change to be from one circuit to another within the district, the matter stands thus: Out of every hundred members twelve have during the year changed circuits; and of the twelve only four have turned up as members in the circuit to which they removed. If it be supposed that many persons marked "removed" went to other districts, still the fact remains that for every seventeen members who remove from a circuit only six are received elsewhere. This leak troubles the Wesleyans greatly, and its causes are much discussed.

The work of forming children's classes progresses slowly. In the same district it appears that the aggregate number of children in a membership of fourteen thousand three hundred and seventy-two, met by ministers in Bible or catechumen classes, or in children's meetings, on week days, is five hundred and twenty-seven. We presume that even this is a better showing than would be made in a district of our own church containing fourteen thousand members. In day schools the Wesleyans exhibit an admirable zeal. In the same district (second London) the number of day schools is thirty-five; of scholars, five thousand nine hundred and forty-one—costing \$23,545 32, or \$3 96 for each child, derived from the following sources: Children's pence, 9s. 9d.; subscriptions and collections, 2s. 3d.; government grant, 5s. 10d.

But the most difficult question for Wesleyan Methodism at present is the "Connexional Leakage," as it is termed. One writer attributes it in part to the neglect to give full employment to local preachers, some of whom, not having work in the "Connexion," go out and build up independent congregations; another writer thinks that fully one-third of the local preachers are incapable of correct and forceful preaching, and so alienate the people from chapel attendance. The same writer is of opinion that many of the traveling preachers adhere too much to old sermons and stereotyped forms of thought, so that the young, who love freshness, forsake Wesleyan ministrations. We must leave to the Wesleyans to determine the sources of this great trouble. One thing is certain: they will discover that machinery, no matter how perfect, will not do everything for them. Life is more than forms.—*Methodist*.

PASTORAL VISITING.—Pastoral visiting may be done in such a way as to be absurd. I saw a caricature the other day in one of our papers in reference to it: A Presbyterian minister going around with an elder, reading a chapter, catechizing the children, etc. You can put that in such a way as to make it look supremely ridiculous; but the thing rightly done is not ridiculous. No man of sense would now go about it in that way. The charm, the essence of pastoral visitation is this—that a man goes into the bosom of the family; he talks to them in their own vernacular. The children, perhaps, as they looked up at him in the pulpit, on a Sunday, did not realize very distinctly that he belonged to the human race at all. The language he spoke, even the box in which he stood, is peculiar to a church; but when the man goes into the family it is a kind of pleasant surprise to the children to see that he is really a man of flesh, and in many respects something like their own father. We can bring down to the family the tones, and common, ordinary feeling of humanity, and they will feel themselves a little nearer to him than before. He asks them about the children, and if he has children they will ask about his own in return; then the sorrows come up; they perhaps weep, and if he is a true man, perhaps a tear will come into his own eye. There is no studied ceremony about it; if he sees the family is not just then engaged, he will perhaps say in a quiet, serious way: "These troubles we can best get rid of by telling our Father of them." A simple prayer is offered, but it has linked in communion the hearts of these people to his heart. He knows them now. They know him now. They feel they know him. When he goes to speak to these people in the pulpit it is a conversation to his friends, a talking to those who trust him. A bond of sympathy is one of the strongest helps

that you can have toward thoroughly good preaching.—*Dr. John Hall*.

PLAIN PREACHING.

From many years' observation and experience I am convinced that many good and true men in the ministry, of excellent conversational talents, fail to preach the gospel effectively and interestingly because when they attempt to preach they read, and read in a reading tone, or put on airs of the orator, speak in an artificial, declamatory and unnatural manner. This is a great mistake. Preaching the gospel, as to manner, should always be in the plainest diction possible. I am convinced we should preach to, and not for, or over, the hearers. Earnest men, addressing their fellows to persuade them, look them directly in the face, and talk to them in concise, simple, plain, luminous language. And this is the way to preach Christ and the resurrection. In the first place, let the preacher get his own heart warmed up with the theme, and his mind thoroughly filled with a scriptural, logical digest of the topic, and then he may go into his pulpit with or without his manuscript, and, casting himself upon the Lord for his blessing, may hope to preach a sermon that will not be dull, or lull his hearers to sleep. When you attempt to preach the gospel, brother, having carefully looked over the subject, and adopted a good, logical arrangement, and turned and prayed the matter over until your heart and mind are thoroughly surcharged with the subject, you may safely ignore your manuscripts, and cast to the moles and bats all artificial airs, and tones, and attempts at playing the orator, and speak in your plainest, simplest, most concise and conversational manner. If you will do this you will find that you have suddenly become effective, interesting and even eloquent to your people. It is amazing that good men can ever become dull in preaching the blessed gospel; and they never would if they could only be emancipated from the miserable bondage of professional airs and tones, and tell the story of the cross in a plain, simple, natural and earnest manner. Men always become interested when they find themselves addressed by one with a full heart and a luminous mind, talking earnestly and affectionately to them. Their minds are at once put into sympathy with the speaker, and the mind of speaker and hearer travel on together in sympathetic union to the end. But when the preacher speaks with airs and artificial tones, and does not seem to be simple-hearted and earnest in his Master's work, the hearer naturally takes the place not of a learner, but of a spectator who is witnessing an exhibition, and he feels that he is there not to feel and act, but to look on the farce and criticize the performance.

All the most efficient, effective preachers of our day are men who talk—yes, that is the word—talk to the people, and they talk in plain, simple, concise language, and the people understand and appreciate the talk; and this is the secret of the great pulpit power of such men as Prof. Finney, Newman Hall, Henry Ward Beecher, Mr. Spurgeon, Mr. Knapp, Mr. Earle, and many others, who are found to be sons of thunder in the pulpit.—*Watchman and Reformer*.

SPASMODIC EFFORTS.—Spasmodic efforts are not the ones calculated to accomplish the most in the end. In this age of the world, when the body is carried a mile a minute and thought transmitted with lightning speed, people think that everything, however hard—and soul-winning is included—must be done in a moment or not at all. They forget that to evangelize a community, or that to evangelize a something more, or the world, requires something more than paroxysms of labor. Moral and civil reforms are not produced in a day. A large practice is not built up in an hour. Why, then, expect to produce religious reforms in a day or week? The sun does not dart into his meridian splendor. He tells from early morn till noon. The scholar, the artist, the mechanic, do not leap into eminence. The just man does not vault into excellence. The path of all these is as the shining light which shineth more and more. The reason why that they trust too much to spasmodic action and too little to persistent work. They lack that superior quality called the power of application. So, my Christian friends, if you wish to see a work of grace going on this year in your community, and the church to which you belong revived, you must settle down to steady work for Jesus. Duty must prompt you when inclination is wanting. You promised to serve Christ. You are under obligation to work for him. You should have a religious as well as business sense of honor. You must work in darkness, and amidst doubt—bear reproach, endure trial. Why need you fear, grasping, as you proceed, the hand of the Master?

THE TWO HEARTS.

Some time ago I dreamed that I was in a kind of laboratory, in the midst of which sat a venerable man, deeply occupied in examining something on a table near him. I drew near, and on looking closer discovered he was employed in the dissection of a human heart! At the first glance it appeared fair to the view; but the operator, whose name was Truth, applied to it a small mirror of exquisite workmanship, and invited me to examine it. I did so, and was surprised to find the heart of a very dark color, and in many places deformed; it felt also, when I touched it, very hard and cold. "You seem astonished," said the surgeon; "know you not, that the heart is deceitful above all things, and desperately wicked; and this is a heart in its natural state. The name of this mirror is the Law of God, and it is so perfect as invariably to detect the slightest flaw." He then pointed out to me certain words engraved very legibly on the surface of the heart. In the most prominent part I distinctly read: for it was in strong characters—the word Self. Lower down were Pride, Anger, Hypocrisy, Ambition, Craft, Avarice and many others of a similar kind. In one corner my director informed me I should find the motives; but they were so heaped together and in such a confused state that I was unable to distinguish them. He then took a sharp kind of probe, called the Word of God, and by it dividing the mass, laid them out in order before me.—*Heb. iv, 12*.

I turned away from the picture in sadness and disgust. "Yes," said he, "as in water face answereth to face, so the heart of man to man. The dim light afforded by reason and conscience is too often obscured by the shades of passion and self-love; no light but that of truth is adequate to the discovery."

"But cannot this heart be rectified?" asked I eagerly. "No," replied the old man; "but a new one may be substituted. There's but One who can effectually change it, and he promises to give new hearts to those who seek them. I have a heart of his workmanship. If you like I will show it to you."

He then produced, in careful preservation, a heart widely different from the other—in fair color, and soft to the touch; appearing in some parts as though it had been broken. On inspecting it more narrowly for the words I had seen on the other, I found in large letters—what the surgeon informed me was the first impression the Maker stamped on it, and with his own private seal—the word Love. Below, indeed, I perceived Self, but on a level with it was Neighbor. And while in the former everything relating to God was omitted, here in every part, in the most inward recesses, I met his name. Faith, hope, devotion, humility and many other graces were there; but I should have very imperfectly distinguished them without the assistance of a lamp, called Good Works.

I noticed, however, a few spots here and there, which I remarked to my companion. "These," said he, "are the cause of great sorrow to the owner of the heart, for they open again those wounds in it which you have perceived, and often erase the word Peace, which had been stamped upon it. In spite of all his efforts these stains are ever coming. There is but one fountain in which they can be cleansed—a fountain rising in Mount Calvary, and called the Blood of Christ."

I was proceeding to make further inquiries, when, to my sorrow, I suddenly awoke, and found it was only a dream.

SELLING THE SOUL.—Before the court in the province of Pesth, Hungary, a suit was pending in which an aged Jew was to make a statement under oath. He was ready to take the oath, when another Jew arose and protested against it.

"This man dare not take an oath." "Why not?" asked the judge. "There exists a Hebrew prayer which contains the sentence that 'every Jew has a share in the life to come.' It is now about twenty years ago, and I was present, when the man who is now about to take an oath sold his 'share in the life to come,' guaranteed to him in the prayer, to another Jew, a Mr. Y., who paid him a certain amount of money for it. As he, therefore, cannot count any longer on a future existence, he has nothing to fear or hope for in the life to come; it must be certainly indifferent to him whether he swear to a truth or a falsehood."

The matter was examined into, and as the strange transaction was found to have taken place in reality, the court granted the protest of the old man, and the party who sold his 'share in the life to come' was declared incapable of taking an oath.

A LADY SAYS she always feels well dressed when she has on handsome fitting gloves and shoes, no matter how plain the rest of her dress may be.

THE POWER OF A LOOK.

A company of young ladies were assembled one evening to make arrangements for a series of tableaux, which were to be given for the benefit of the Sabbath school with which they were all connected either as teachers or scholars. One of the number, Miss Hattie G., who was a leading spirit among them, sat with pencil and paper in her hands, ready to take down the names of those who were to take part in the entertainment. She was a girl of fine abilities, energetic and resolute, and exercised a great influence over the young people of the place; which influence, unfortunately, was not always employed for good, owing chiefly to the exercise of an unbridled tongue. Witty, sharp, sarcastic, and possessed of a most keen sense of the ridiculous, her trenchant tongue was apt to ent right and left, without consideration for the feelings of others. Notwithstanding this fault she was a professing Christian, and zealous in the discharge of every outward duty. But much of the good she might have done was counteracted by this unrestrained trait in her character.

"What other name shall I put down?" said she, resting the tip of her pencil on her lips.

Several names were mentioned, and duly inscribed on her paper. "Put down Emma N.," said one thoughtless girl with a laugh; "she would do very well for one of the camels in that Eastern picture; I'm sure her neck is long enough."

At this sally they all laughed, and each, in turn, tried to show her wit by a fling at the unfortunate absent lady, amid the boisterous laughter of the rest.

But there was one person present who did not join in their merriment. Miss E. sat near Hattie G. with a very grave face. She was deeply pained by the thoughtless mirth of the others. She knew that Emma N. was a most estimable person, a member of the same household of faith with themselves, and a fellow-teacher in the Sabbath school. To make a mock of her deformity was not only unkind and unbecoming, but it was a reproach to her Maker. She would fain have reproved the young girls for their thoughtless folly, but diffidence kept her silent. So she sat still and grave, while the room rang with the merry laughter of the rest.

It so happened that the eyes of Hattie G., looking with mirth and fun, fell accidentally on the face of Miss E. She saw its pained expression; she read its silent condemnation. Conscience-struck, she stopped suddenly short in the midst of a laugh, checked the merry jest she was about to utter, and grew grave in an instant.

"I won't say another word," she said; and turned, sobered and subdued, to her pencil and paper again.

Her example edified the rest, and a better spirit was manifested during the remainder of the evening.

From that hour an understanding sprang up between Miss E. and Hattie G. that was of inestimable value to both.

O Christian! wherever you are, be true to yourself; and if, through diffidence or delicacy, you are not able to rebuke sin, at least show by your silence and your looks that you disapprove of it.—*Christian Banner*.

IMMENSITY OF THE UNIVERSE.

The late Prof. Mitchell closed one of his lectures on astronomy with the following passage, which, delivered in his impassioned manner, must have produced a thrilling effect. After speaking of the unfathomable distances which no telescope can penetrate, lying far beyond the system in which the earth revolves, and yet filled with independent systems of worlds of infinite numbers, he said: "Light traverses space at the rate of a million miles a minute, yet the light from the nearest star requires ten years to reach the earth, and Herschel's telescope revealed stars two thousand three hundred times further distant. The great telescope of Lord Ross pursued these creations of God still deeper into space, and having resolved the nebulae of the Milky Way into stars, discovered other systems into stars—beautiful diamond points glittering through the black darkness beyond. When he beheld this amazing abyss—when he saw these systems scattered profusely throughout space—when he reflected upon their immense distance, their enormous magnitude, and the countless millions of worlds that belonged to them, it seemed to him as though the wild dream of the German poet was more than realized.

"God called man in a dream into the vestibule of heaven, saying: 'Come up hither and I will show thee the glory of my house.' And to his angels, who stood about his throne, he said: 'Take him, strip

him of his robes, of flesh; cleanse his affections; put a new breath into his nostrils; but touch not his human heart—the heart that fears and hopes and trembles. A moment and it was done, and the man stood ready for his unknown voyage. Under the guidance of a mighty angel, with sounds of flying pinions, they sped away from the battlements of heaven. Some time on the mighty angel's wings they fled through spheres of darkness, wildernesses of death. At length, from a distance, not counted save in the arithmetic of heaven, light beamed upon them—a sleepy flame as seen through a lazy cloud. They sped on their terrible speed to meet the light—the light with lesser speed came to meet them. In a moment the blazing of suns around them—a moment the wheeling of planets; then came long eternities of twilight; then again, on the right hand and the left, appeared more constellations. At last the man sank down, crying: 'Angel, I can go no further; let me lie down in the grave, and hide myself from the infinitude of the universe, for end there is none.' 'End is there none?' demanded the angel. 'And from the glittering stars that shone around there came a choral shout: 'End is there none.' 'End is there none?' demanded the angel again; 'and is it this that avers thy soul? I answer, and there is none to the universe of God! Lo, also, there is no beginning.'

GEMS FROM WATSON (1649).

Heaven is the highest link of the saint's happiness. The lamp of glory will be ever burning, never wasting. As there is no intermission in the joys of heaven, so there shall be no expiration. When God has once planted his saints in Paradise he will never transplant them—"they shall be for ever with the Lord."

Prayer delights God's ear; it melts his heart; it opens his hand. Plead with him earnestly, and either he will remove the affliction or remove the impatience.

God being an infinite fullness, there is no fear of want for any of the heirs of heaven.

That grace is tried gold which can stand in the fiery trial and withstand fiery darts.

He that loseth his heart in the morning, in the world, will hardly find it again all the day after.

The Lord's Supper is the most spiritual ordinance ever instituted; here we have to do more immediately with Christ. In prayer we draw near through Christ; in this ordinance we become one with him. In the word preached we hear of Christ; in the supper we feed on him.

Though our sins go up to heaven as the smoke of a furnace, yet Christ's prayers go up as incense.

Men can never pray fervently that do not pray feelingly like Samson, when he said: "Shall I die for thirst?" Daniel in the den prayed fervently and feelingly, and God did slay the lions' mouths, and did open the lions' den. "The fervent prayer of the righteous man availeth much."

Prayer is the wall and bulwarks of the land. God's vials of indignation are not poured out while the shutters of prayer are open.

When men cast off prayer, it is as if they have cast off God; it is the brand of an apostate: "Thou restrainest prayer before God."

Sin casts the soul overboard, and the loss of the soul is an unparalleled loss; it can never be made up again.

Mental prayer is not unheard—"Hannah spake in her heart."

When the heart is so full of grief that it can only groan in prayer, yet God writes that down: "My groaning is not hid from thee."

God's ministers must have their hearts fired—not with passion, but with love; and as they are Christ's ambassadors, must come to sinners with an olive-branch of peace. The thunderbolt may crush, but the sun melts. It is better to love as a pastor than speak as an angel.

It is easy to turn white into scarlet, but not so easy to turn scarlet into white; yet God hath promised the repentant sinner to make the scarlet of a milk-like whiteness: "Though your sins be as scarlet, they shall be white as snow."

A REAL HIT.—In Chatham street, New York, a countryman was clamorously besieged by a shop-keeper. "Have you any fine shirts?" said the countryman.

"A splendid assortment. Step in, sir. Every price and style. The cheapest in the market, sir."

"Are they clean?"

"To be sure, sir."

"Then," said the countryman, with great gravity, "you had better put one on, for you need it."

"Mamma," said a wee child, one Sunday evening, after having sat still in the house all day, like a good child, "have I honored you to-day?" "I don't know," replied the mother; "why do you ask?" "Because," said the little one, shaking her head sadly, "the Bible says, 'Honor thy father and mother, that thy days may be long;' and this has been, oh, the longest day I ever saw."

HEAVENWARD.

There was once a little child who wanted to touch the sky. Day by day she looked with longing at its soft, blue depths; and watched the white clouds come forth and play and frolic there. Morning and evening she saw the glory of the sunrise and sunset painted there. Night by night the stars came out and danced, and twinkled, and the moon rode in a car of silver and peeped up its lime arches. So the little child looked and longed. "O, that I might lay my hand on the sky, and wrap its soft folds around me as they floated by!" And the child looked with longing at the far-off line where earth and sky kissed each other.

"If I were only standing on the tops of the trees in the pine forest over there," she said, "or if I were on the top of yonder hill, I could reach it."

So she set forth to go to the place. Little feet they were that pattered softly along the dusty road. A sweet little, eager face, with eyes full of longing, that looked over to the far-off line.

On and on she went, over the valley and up the distant hill-slope. The path was steep and rough, but she stood on the brow at last. Surely this was the place she had been seeking; here was the old house, and the woods, and the broad green field, where the sky bent down to the earth.

But, alas! the sky was as far away as before. This could not be the place; on and on, a weary way further on, was the place. So the tired little feet pattered on again. Ah! it was a great way off, and it came no nearer. Then the light of hope faded from the young face, the steps of the little feet became weary and slow, and at last the child, tired and sad, lay down and sobbed herself to sleep.

The frightened parents missed the child from their home; they were filled with sorrow and fear; they looked long and anxiously for the little wanderer. They found her at last, as the twilight shades were closing in, asleep by the roadside, remote from home. Her clothes were soiled and torn, the tears were wet on her burning cheeks, and she sobbed and moaned in her sleep. Ah! but they took her up tenderly, and folded her close in their loving arms, and carried her back to her home.

O, poor child, dear child! how many of us, like you, are looking toward God's distant heights, and longing for them! Ah! if we were standing here or there, in this place or that, then we could reach up our hands and touch the heavens; the breath of God's Spirit would be upon us, and we should be good and holy."

We forget that the kingdom of heaven, if it is ours indeed, is round about us, near to us, in our own hearts, inspiring even the plainest, lowliest duties of our daily life.—*The Little Corporal*.

SOMETHING ABOUT WHEELS.—The Vermont Chronicle relates the following incident about a sermon which might probably be repeated with profit: "A brother in the ministry took occasion to preach on the passage in Luke xvi, 10—'He that is unjust in the least is unjust also in much.' The theme was, that men who take advantage of others in small things have the very element of character to wrong the community and individuals in great things, where the prospect of escaping detection or censure is as little to be dreaded. The preacher exposed the various ways by which people wrong others; such as borrowing; by mistakes in making change; by errors in accounts; by escaping taxes and customs duties; by managing to escape postage; by finding articles and never seeking owners; and by injuring articles borrowed, and never making the fact known to the owner when returned."

"One lady the next day met her pastor, and said: 'I have been up to Mr. —'s to rectify an error he made in giving me change a few weeks ago, for I felt bitterly your reproof yesterday.'

"Another individual went to Boston to pay for an article not in her bill, which she noticed was not charged when she paid it."

"A man, going home from meeting, said to his companion: 'I do not believe there was a man in the meeting house to-day who did not feel condemned.'

"After applying the sermon to a score or more of his acquaintances, he continued: 'Did not the pastor say something about finding a pair of wheels?'

"I believe not, neighbor A. He spoke of keeping little things which had been found."

"Well, I thought he said something about finding a pair of wheels, and supposed he meant me. I found a pair down in my lot a while ago."

"Do you," said his companion, "know whom they belong to? Mr. B. lost them a short time ago. The owner was soon in possession of his wheels."

"Well, I thought he said something about finding a pair of wheels, and supposed he meant me. I found a pair down in my lot a while ago."

"Do you," said his companion, "know whom they belong to? Mr. B. lost them a short time ago. The owner was soon in possession of his wheels."

"Well, I thought he said something about finding a pair of wheels, and supposed he meant me. I found a pair down in my lot a while ago."

"Do you," said his companion, "know whom they belong to? Mr. B. lost them a short time ago. The owner was soon in possession of his wheels."

"Do you," said his companion, "know whom they belong to? Mr. B. lost them a short time ago. The owner was soon in possession of his wheels."

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, AUGUST 6, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—REV. LINUS PARKER, 112 Camp Street, New Orleans, La.

AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEE.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office Order, Draft, or by Express. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

A GOOD TIME.

This is a good time to subscribe for the ADVOCATE. The church news for the next few months will be of more than usual importance, as during this time the Annual Conferences will be held, and it will embrace the customary season for holding protracted and camp meetings. Then, again, the war in Europe is assuming gigantic proportions, and threatens to shake the Old World to its foundation. The NEW ORLEANS CHRISTIAN ADVOCATE will furnish full and recent intelligence from the battle-field. The latest dispatches up to the time of going to press will always be found on our first page. Let our agents and friends make a note of these considerations, which are of special force just at this time. We shall aim to supply our readers with the secular and religious news, so that where no other paper is taken, they may be fully informed of what is going on.

HEALTH OF THE CITY.—We can assure our friends at a distance that New Orleans is at present about the healthiest city in the United States. The total number of deaths last week was one hundred and eighteen. This includes the former suburbs from Carrolltown down, and Algiers. There is no yellow fever, and no intimations of its approach. We can almost certainly predict a healthy season from this time on.

THE WAR.—The capture of Saarbrück is reported in the latest dispatches. The French were victorious in this first encounter with the Prussians. It is probably a victory of little importance, but the line is crossed, and a bloody campaign is about to be inaugurated. The complications of European affairs increase every day, and it is not unlikely that all the leading powers, including England, will become involved.

NOTICE TO BUILDERS.—By reference to the advertisement in another column it will be seen that those who have charge of the repairing of Centenary College are calling for sealed proposals. Builders and architects are invited to examine into the matter. See particularly the notice.

MEMPHIS CONFERENCE FEMALE INSTITUTE.—We call attention to the advertisement of this excellent institution, which is published in this week's issue of the ADVOCATE.

THE KORAN was translated into Latin in 1143 A. D.

HOPE IN SORROW.

Exemption from sorrow is no part of the believer's lot. The lives of the most eminent saints exhibit scenes of the deepest suffering. The Saviour himself is described, in the language of prophecy, as "a man of sorrows and acquainted with grief." His tears at the grave of Lazarus do not rebuke ours. The anguish of Abraham, of Jacob and of David, in the hour of their bereavement, was not prevented by their faith in the world to come. Neither do we find that the gospel condemns the grief which the severance of earthly ties occasions. There is a tender recognition of it, but it is not censured as inconsistent with the highest realizations of Christian experience. The teachings of Christ and of the inspired writers of the New Testament manifest in them all the workings of sanctified sorrow. As to the apostles, we may suppose that this was an essential qualification for their ministerial work. None but a suffering soul could have penned the eighth of Romans or the fifteenth of First Corinthians, and no other could well have appreciated and recorded the fourteenth of John.

This ministry of tears is everywhere apparent in the sacred page, showing that the writers were not separated from us by the divine afflatus which rested upon them. It does indeed seem to irrigate and fertilize the whole field of revelation, and causes it to bloom with consolations for the stricken heart. The highest and best utterances of the word of God come to us through the channels of tribulation, and are the outpourings of spirits deeply and sadly chastened by the ordeal of woe. So true is this that in order to fully interpret and apply the promises we must ourselves have passed through some overwhelming affliction. Some of the sublimest and most wonderful declarations of the gospel are sealed until they are opened to the soul by the power of suffering; and how little do we know of the divine art of consolation until the great deep of our own natures, broken up by misfortune, has been calmed and tranquilized by the peace of God! In our troubles we instinctively turn for sympathy and support to those who have drank of the same cup. The preacher's bereavement is not seldom followed by a remarkable revival, and the greatest success in winning souls is born of an indescribable and mighty grief. The Christian's spirit takes a softer mold under the action of sanctified sorrow, and is thus qualified to minister tenderly to others. The self-condemnation of the bereaved will often be that they have hitherto felt so little for others.

It is manifest that, if affliction is to do us good, it must be felt. The more keenly and deeply felt, the more likely it is to have a lasting influence upon the heart. The stoical philosophy has no place in Scripture. The sensibilities and affections are purified but not destroyed. Sordid and sensual vices may paralyze all the finer feelings and destroy the natural affections, but religion refines and exalts them. The good man may for this reason be capable of greater pain, under the ordeal of affliction, than the man whose nature has become imbruted by sensuous indulgences. Affliction, in the case of the latter, may fail of all good, because the soul is past feeling; whilst in reference to the former it is fruitful of spiritual and eternal benefits. Through the agency of affliction a "weight of glory" is to be wrought for the believer; and the affliction itself is "not worthy to be compared with the glory which shall be revealed in us."

The aim of the gospel, therefore, is not to exempt us from "the sufferings of this present time," but to sanctify them. Our sorrow is neither censured nor arrested, but qualified by the injunction "that ye sorrow not, even as others which have no hope." Where the future life is a matter of doubt, or where it is utterly rejected, we may not be surprised at the rayless gloom, the blank despair of the desolate heart. If the shadow of death is peno-

trated by no assuring beam, if its night yields to no harbingers of a coming morn, and if its pall-like horizon affords no earnest of "the day-spring from on high," then is our sorrow hopeless indeed! But with life and immortality brought to light through the gospel, and with a Saviour waiting at the door of our hearts, who is "the resurrection and the life," we may triumph over all. The child of God already feels the resurrection power in his soul, and rejoices in the earnest of the heavenly inheritance. "But thanks be to God, which giveth us the victory through our Lord Jesus Christ."

LOCAL VERSUS GENERAL.

The last paragraph is taken from a letter of Dr. Cunningham's in the St. Louis Christian Advocate. It appears from the doctor's statement that the Nashville Advocate is the recognized organ of the two Conferences in Kentucky. With this fine territory, and a large part of Tennessee besides, we know of no church paper that has so large and promising a field. The editor of the Western Methodist protests against the policy and justice of claiming local and general patronage at the same time. He says:

Undoubtedly this policy always has been and always will be a source of weakness and dissatisfaction—resulting in comparative failure. Only give the Christian Advocate its just and proper relations to every Annual Conference, as the general organ of the whole church, and its circulation would be increased four-fold by the next General Conference. We are willing to pledge for it an increase in our bounds according to this ratio—assured it would be as it should be, a great power in the church. But as long as it is a Tennessee journal, and a Kentucky journal, or a local organ, in any sense which impinges upon its relations to the whole church, it must suffer the consequences—it must depend upon local support mainly.

There is evidently some friction, and by doubling the size and reducing the price of the Nashville paper nearly one-half, there may be a very damaging competition. Dr. Redford has renounced the purpose of making the Advocate a source of profit for the future, and we have no idea that he intends to use the prestige and capital of the Publishing House to affect injuriously the interests of our other journals. The existence of a recognized primacy in our connectional journalism is liable to this abuse, but it is by no means a necessary consequence. But to Dr. Cunningham's paragraph:

THE WESTERN METHODIST.

Such was to be the title of a paper projected by several members of the Kentucky Conference, the prospectus of which was issued some months ago.

Dr. Redford, in a letter to the Nashville Advocate, says: "A large subscription was procured, with every prospect of success. Their love for the Nashville Advocate and for the Publishing House overruled them; and believing their wants can be supplied by the Advocate, they have abandoned the enterprise." Dr. Henderson is announced as a regular contributor of Kentucky news to the Nashville paper.

Western Methodist, the title of the proposed paper for Kentucky, it seems to me, would have been inappropriate, had the paper made its appearance. On a line almost due west from upper Kentucky we have two Methodist papers. The St. Louis Advocate is more than three hundred miles west, and the Spectator, of San Francisco, is more than twenty-five hundred miles west of the so-called Western Methodist, that was to be. To us out here, west of the Mississippi river, yet more than two thousand miles east of our Methodist paper on the Pacific coast, it looks a little presumptuous in our Kentucky brethren to be claiming western honors. Brother Johnson, of the Memphis Advocate, stole the western thunder of our Kentucky brethren by changing the name of his paper to Western Methodist before us yet the non-appearance of the Kentucky paper was announced.

HUNTSVILLE FEMALE ACADEMY.—The advertisement of this institution is published this week. It is a Methodist school—the buildings are the property of the church. Last year there were one hundred and sixty pupils in attendance from six different States, and we doubt not a much larger patronage awaits the academy during the coming year. It is located in the most beautiful part of north Alabama.

THE MISSIONARY APPEAL.

The appeal of our Missionary Board, which we publish on our fifth page, should be read and pondered by every member of our church. The debt must be paid. Our honor and integrity as a church are at stake, and our missionary work will be crippled and embarrassed until this burden is removed. Let every one who loves the church and desires to see her moving forward in the great mission to which she is called, lend a helping hand immediately. Thirty thousand dollars is a small matter for half a million of people to manage, if a tenth part of them would do their duty. We hope many other churches, according to their ability, will follow the example of the McKendree church in Nashville. The proposition of a member of that church to be one of twenty to pay \$500 each is a challenge that ought to meet many responses. We sincerely trust that there will be a general awakening upon this subject, and that the close of the year will witness the gratifying result of a missionary treasury out of debt, and with abundant means in hand to sustain and extend our missionary operations.

CHURCH PROPERTY.

In that gem of a church paper, the San Francisco Spectator, we find an able and suggestive article on the hinderances and helps to the growth of our church in California. We give below the concluding paragraphs on the importance of securing church property. The sentiments apply equally well to every latitude:

Fourth, and though last, by no means the least, we mention another help to church prosperity, very much needed by us—the securing of church property, not for property's sake, but for safety, permanency and peace. When the organization of a church extension society was proposed at our last Conference, looking to this end, it was unanimously agreed that neglect of this important object had been, heretofore, one of our greatest weaknesses. To-day we are the next largest Protestant denomination in California, with very nearly no church property at all. The spiritual kingdom of Christ can live and grow without town lots and houses; but the Methodist Episcopal Church South cannot, at least in California. Our church is an organized institution in the midst of similar institutions. It is not altogether a spiritual thing. It must have "a local habitation and a name." Help is very much needed in this direction, and we cannot proceed too speedily or too vigorously to render it. Let us be ashamed of our past neglect, and though late, yet not too late, let us mend our ways.

Brothers, one and all, lay and clerical, this is not a mere essay written to while away the time, and to be read for a similar purpose. We have earnestly, if not wisely, stated some of the hinderances and helps to our prosperity as a church on the Pacific coast. As you do not know who the author is, let his personal identity be forgotten, while you calmly consider the suggestions. If you object, discuss the matters with us. If you approve, act upon them at once and vigorously. The church has not much to fear, except a death-like indifference.

MANFIELD FEMALE COLLEGE.—The advertisement of this school appears this week. The college is owned and entirely under the control of the Louisiana Annual Conference. Rev. Charles B. Stuart needs no endorsement from us. He is one of the foremost men in Southern Methodism, and an educator of long experience. The people of Louisiana cannot find a better school for their daughters by going far from home. There is no institution, far or near, to which we would give preference over this. We sincerely hope that the preachers of the Conference will use all suitable means to keep the claims of our Conference school before the people.

BISHOP ANDREW WASHT OXFORD, but was extremely feeble. On Tuesday he had an attack of vertigo and came near falling, and his friends were for a time much alarmed for him. But he soon rallied, and went to the country, where he remained with his son-in-law, T. M. Merriweather, Esq., considerably improved, as we learned on Wednesday.—Southern Christian Advocate.

SLOW PEOPLE.

As nature abhors a vacuum, all materialities and all creatures must have their uses. From our finite nature we must often be ignorant of the specific use of many things, many creatures; while careful observation will teach us the purpose of some.

What is the use of slow people? We cannot, perhaps, give an exhaustive answer; but some of their uses are apparent. They are highly conservative. They are a standing protest against all novelties, innovations and seeming precipitancies. They have a few most conservative proverbs and maxims: "Rome was not built in a day;" "Let well enough alone;" "There is safety in caution;" "Haste makes waste;" "There's time enough yet." There are impulsive people, perhaps precipitate, and if not restrained would possibly run away with the car of Progress, set the axle on fire, and burn up the vehicle. So these slow people act as brakes, and moderate speed and conduce to safety.

Another use may be to exercise the patience and forbearance of the whole class of energetic workers. If this is an office of these slow people, they certainly discharge its functions well. The fiery chargers champ the bit, paw the ground, and flock their bodies with impatient foam; but it's no use. The mountain will not come to Mohammed, so Mohammed must needs wait, or continue his labors and walk himself to the mountain. In this aspect these slow people, like all other trials, may be a means of grace. But trials are not always sanctified. They, alas! are often no better than temptations. These slow people, as every earnest and active worker has long since learned, are temptations to impatience and irritability. They keep thousands on thorns and in hot water.

The vis inertia may be a valuable element of character, but it certainly may be in excess. We are quite sure if too much might be done by the progressionist, that too little would be done by the slow coaches. It is beyond debate that there is a great deal to be done, and somebody must do it. These slow people are willing enough to reap the benefits and comforts which zealous enterprise produces and secures. They cannot be got up until late, but they will eat the breakfast which the early marketer has brought home and the early cook has prepared. They readily enough take to the railroad after somebody else has built it. They will get up and warm their toes at the fire which another has kindled.

We are not sure but the virtue of conservatism must be diluted and abated by a considerable infusion of laziness and selfishness. We think that much of the so-called conservatism and prudence are little better than a love of ease—a conservation of individual comfort—and not the wise, forecasting and cautious things they get credit for being. Honor to whom honor is due. But we are sometimes a little weary of the conservatism that throws the burdens and the hard work of the world on the prompt and the diligent. If some people are too fast, there are a great many too slow; and if something has been lost or wasted by precipitancy, a great deal more has failed through delay. We believe in being zealously affected, and in giving all diligence in all good things. W.

WOODVILLE FEMALE SEMINARY.—The advertisement of this school will be found in another column. Too much can hardly be said in favor of it as a first class institution for the education of girls. The gentlemen who constitute the Board of Trustees, and those who are engaged to conduct the school, guarantee everything that can be desired. The course of instruction is thorough, the seminary buildings are spacious and the location delightful. The sixth annual session will begin on Wednesday, October 5, 1870.

FAITH and works are as necessary to the spiritual life of the Christian as soul and body are to our life as men: for faith is the soul of religion and works the body.—Colton.

NEW PUBLICATIONS.

LIFE IN UTAH, OR THE MISTERY AND CRIMES OF MORMONISM.—Being an expose of the secret rites and ceremonies of the Latter-day Saints, with a full and authentic history of polygamy and the Mormon sect from its origin to the present time. By J. H. Beadle, editor of the Salt Lake Reporter, and Utah correspondent of the Cincinnati Commercial. National Publishing Company: Philadelphia, Pennsylvania, Chicago, Illinois, Cincinnati, Ohio, St. Louis, Missouri, Boston, Massachusetts, and Atlanta, Georgia. In this volume of five hundred and forty pages, octavo, is everything that any one can wish to know of Utah and the Mormons. The history is traced from the birth of Joseph Smith, the Mormon prophet, down to the present day. There is a full account of the doctrines of Mormonism, their religious rites, and the present social condition of Utah. The work will prove of more than usual interest at this time, when the attention of the nation has been directed to Utah by the opening of railroad communication, and by the proposed action of Congress in reference to this singular people. The volume contains a map of Utah, and has numerous illustrations.

THE RIVERSIDE MAGAZINE, FOR YOUNG PEOPLE.—August, 1870. Published by Hurd & Houghton, New York. This magazine has been a favorite with us and a perfect delight to our boys from the first. The present number opens with a story by Hans Christian Andersen, called "Great Grandfather." Beside this there are fifteen other first rate articles, and among them some most interesting and instructive subjects, as "How Bees are Born and Bred," and "How Railroads are Made."

BURKE'S WEEKLY FOR BOYS AND GIRLS.—An illustrated journal of instruction and entertainment. Macon, Georgia: John W. Burke & Co., publishers. July, 1870. The monthly part for July is a very superior number. We are pleased to mark a decided improvement from month to month in the material, typography and embellishments, and also in the quality and variety of the reading matter. A copious and well digested index is furnished for volume three. This is a magazine of great merit—the best of its kind in the South. Our children cannot be supplied with a purer and better literature.

THE NEW ECLECTIC MAGAZINE.—August, 1870. Baltimore: Turnbull & Murdock. This number, as usual, is filled with articles of a high order of merit; among them "A Victim of Patents," "A Singular Narrative," "The Hampton Roads Conference," by Hon. Alexander H. Stephens, and chapter twelve of "The Mystery of Edwin Drood," the last and unfinished story of the lamented Dickens.

THE METHODIST QUARTERLY REVIEW.—July, 1870. D. D. Whedon, J. L. D., editor. New York: Carlton & Lanahan. Contents: Mommson's History of Rome; An Inquiry into the Meaning and Aim of Matthew xxiv, 1-26; The Twenty-second Psalm; Southern Reconstruction; The Earnest versus the Easy Minister; Training of Deaf Mutes; The Methodist Hymn Book and its Associations; Foreign Religious and Literary Intelligence, and the Quarterly Book Table.

THE LITTLE CORPORAL.—August, 1870. Published by Sewell & Miller, Chicago, Illinois. A superior number of a charming periodical. The matter is nearly all from original contributors, and the whole is made up and edited with ability and taste. There are some gems of poetry this month, among which we note "Baby Bell" and "Our Baby's Gone."

It is impossible to make people understand their ignorance, for it requires knowledge to perceive it; and therefore he that can perceive it hath it not.—Bishop Taylor.

HE is worthy of honor who willeth the good of every man; and he is much unworthy thereof who seeketh his own profit, and oppresseth others.—Cicero.

CONSIDER in prayer, and watch in the same with thanksgiving.

MR. THOMAS K. PRICE.

Mr. Thomas K. Price was born in 1802, whether in Maryland or Kentucky is not certainly known. Some forty years ago he was born again, joined the Methodist Church in Nashville, Tennessee, and lived in its communion until his death, July 28, 1870, at his residence in this city.

We would not let this good citizen, this faithful Christian, this diligent servant of the church and beloved friend pass away without lingering a little while in mournful and tender recollection of what he was to the world, to the church and to us.

Brother Price sought and found God in early manhood, and consecrated to God his best affections, and to the church his most devoted service, up to the very last day of health and strength—"ceasing at once to work and live."

In his business and temporal relations Brother Price was diligent and painstaking. He was a beautiful exemplification of the compatibility of business and piety; for while he was "not slothful in business," he was "fervent in spirit, serving the Lord." As a merchant, a member of banking and insurance companies, and of the City Council, he was diligent, prompt and unimpeachably honest. As a church officer he was most active, punctual and faithful. He has long been a steward and treasurer of the church, a class leader, a trustee, a Sunday school superintendent, and vice president of the Southwestern Bible Society.

As a neighbor and citizen he was most kind and hospitable. In Nashville, as in New Orleans, he was like "Justus, whose house joined hard to the synagogue." From the venerable McKendree down to the last elected, all our Bishops have been his guests, and hundreds of our ministers have shared his hospitality. He sought out strangers, especially Methodist, and invited them to share his board and to attend his class.

He was charitable to the poor, and visited the bereaved and sick and attended funerals almost like a pastor, to impart his Christian sympathies and show neighborly respect. As a friend he was warm and unswerving. Sometimes his manner seemed a little abrupt and forbidding; but it was only a seeming, for underneath these beat a kind and sympathizing heart. In his church duties and devotions he was most constant. His class might calculate on him. Whoever else might fail at prayer meeting, the pastor would be sure to meet him. So much was this the case that if he was unavoidably away the question went round: "Is Bro. Price out of the city? Is he sick?" It was felt something must be the matter, or he would be there. He loved the courts of Zion, and felt it an honor to be "a doorkeeper in the house of the Lord."

In his domestic relations he was most affectionate and religious. All in his house—children, children and servants—shared his love and watchful solicitude. As a Christian he planted himself on the Bible. He believed in the necessity of pardon, regeneration and holiness, and hoped for salvation alone through the atoning Lamb. He made no compromise with fashionable sin, but kept himself unspotted from the world. He loved the Bible and good books, and gave many away with words of exhortation and warning.

He was a profoundly earnest man, and deeply realized the solemnities of his immortal being. His last work was to prepare reports and attend the quarterly meeting. His last guests were his presiding elder and pastor, and by a happy coincidence the last two sermons he ever heard were on peace: "The Lord will bless his people with peace;" "Peace I leave with you; my peace I give unto you." From perfect health to death, only two days and nights! His sufferings were sharp but short. He sleeps well. Embalmed in our hearts be his virtues, and farewell until we meet where no enemy enters and no friend departs.

His old friend and pastor,
J. B. WALKER.

At the official meeting of the Board of Stewards of the Carondelet street Methodist Church, South, of which Brother Price has long been an official member, the following paper was presented and unanimously adopted:

WHEREAS, It has pleased God in his wisdom to call our esteemed and beloved brother, T. K. Price, from labor to rest; therefore,

Resolved, That the official board of the Carondelet street church recognize that they have lost a long-tried and valuable collaborator, the church a faithful member, and the community a useful citizen.

Resolved, That we tender the bereaved family our kindest sympathies, and that we invoke upon them the blessing of our Father.

J. B. WALKER, Pastor.
JOHN L. DUNNICK, Sec'y.

THE MISSION DEBT.

To the Ministers and Members of the Methodist Episcopal Church South:

The Board of Missions, after mature deliberation, have judged it proper to set forth the following brief statement of their embarrassments, and to entreat the church to come at once to their help.

At the General Conference of 1866, held in the city of New Orleans, the indebtedness of our Missionary Society was found to be about \$60,000. This amount was distributed among the Annual Conferences. After all the efforts that have been made we are humiliated to have to say to you that we recognize as justly due by our church, on account of the "mission debt," \$31,278.

Our creditors have shown a forbearance for which we cannot be too thankful.

When every consideration of church honor and Christian integrity obliges us to the payment of this debt, we feel that an argument would be an insult to our brethren. Indeed we do not know a person among us who is doubtful as to our duty in the case.

Three Annual Conferences—Tennessee, North and South Georgia—as we are informed, have fully paid their assessments, and we thank them. Others have paid the largest part of their assessment; these we exhort to complete what they have so well begun. Many others have the largest part to pay—these we entreat, that they will now bestir themselves, and use every means to meet their obligations.

Let this be done, at farthest, by the next session of the Annual Conferences. Be assured, brethren, we shall never have done with this debt until we pay it. We cannot pay it unless we give the money.

To those Conferences and churches that have met their assessments we most respectfully appeal once more.

We know that our representatives have promised that they should hear no more about this "old debt."

We appeal to your magnanimity and to your love for our church. Brethren, help us once more. It is your cause, for it is the cause of our church and of Christ.

After this Conference year the new constitution of the Board of Missions comes into operation.

The Domestic and Foreign Boards have been consolidated. Forty per cent. of the moneys raised for missions will, after this Conference year, be paid to the treasurer of this board. With this forty per cent. we are required to conduct the entire missionary work confided to us. With this we are to sustain one mission in China, our mission among the Indians, our German missions, and to aid our struggling Mission Conferences.

We believe that, under the constitution adopted by the late General Conference, we can meet these obligations, provided this old debt be extinguished.

Embarrassed with this terrible incubus, we do not see that it will be possible to sustain our missionary operations; we greatly fear that some of our hard-won spoils will fall from our grasp.

This forty per cent. will yield no surplus for the debt. The money for this we must raise, and it is of the last importance that we do this by January 1, 1871.

The board do not hesitate to say that the secretary, Rev. J. B. McFerrin, D. D., is doing and will continue to do his utmost; but we most earnestly request the zealous, prompt and continued co-operation of all our brethren.

We particularly request the Bishops to present our cause at all of the meetings that they may attend, and to lend us the full benefit of their influence.

We may make the same appeal to each presiding elder in the church. We request of each pastor in the connection that, at the very least (surely not one will deny us this) he will read this statement and appeal, and give the people opportunity to help us. We further ask that each member of the church consider this as a personal appeal, and help us "as God has prospered him."

Meantime this effort to pay our

debts must not interfere with the usual missionary collections of the current year. We must not—we dare not—stop the wheels of our enterprise. We are abundantly able to pay our debts and to extend our operations.

Finally we commend you, brethren, to the illustrious example of the ancient churches in Macedonia: "How, that in a great trial of affliction, the abundance of their joy, and their deep poverty, abounded unto the riches of their liberality."

In behalf of the Board of Missions,
ATTORNEY G. HAYWOOD.
ROBERT A. YOUNG.
A. P. McFERRIN.

MISSION ROOMS, NASHVILLE, July 27.

Accompanying this appeal we have the pleasure of submitting the following generous proposition, coming from a single congregation that is behind none other in missionary enterprise and liberality.

J. B. McFERRIN, Sec'y.

A PROPOSITION.

To the pastors in St. Louis, St. Joseph, Louisville, Covington, Parkersburg, Baltimore, Richmond, Petersburg, Norfolk, Charleston, Savannah, Augusta, Columbus, (Georgia,) Atlanta, Macon, Mobile, Montgomery, Selma, Vicksburg, Columbus, (Mississippi,) New Orleans, Galveston, Houston, Memphis, Little Rock, San Francisco, Knoxville, Raleigh, or to any others who feel able and willing to respond to this proposition:

McKendree church, in Nashville, has paid on the "old mission debt," this year, \$1,458 90. A member of this church now proposes to be one of twenty who will pay \$500 each on this debt immediately. This proposition is made with the understanding that \$10,000 can be raised in this way, and \$20,000 by the usual agencies of the church. So the whole debt can be paid this Conference year. Pastors, surely each one of you will be able to find a liberal soul that will give \$500 to accomplish this purpose. Please send your responses to Nashville, Tennessee, by October 1, 1870.

ROBERT A. YOUNG.

BROOKS' REVOLVING WROUGHT IRON COTTON SCREW PRESS.

Special attention is called to the advertisement of this press. J. B. Jennings & Co., No. 14 Union street, are the proprietors. Cotton planters will find this press a great improvement on the old-fashioned wooden screw—more durable, more easily worked, and far cheaper. We can heartily commend Messrs. Jennings & Co. to the patronage of our friends throughout the country. Their press has the endorsement of many planters and factors.

Mrs. Young J. Allen, wife of our missionary to China, reached this city on Saturday last, the twenty-third instant. She is accompanied by her three children. She left our city on Tuesday evening for Atlanta, Georgia, via Louisville and Nashville, intending to make a brief sojourn at the latter place. She left China on the eleventh ultimo, and arrived at San Francisco on the fourteenth instant. The journey was made safely and pleasantly. She reports all at the mission in good health, and pursuing their usual labors—Brother Allen being increasingly interested in his Chinese newspaper, and hopeful of its usefulness. She expects to rejoin her husband some months hence in that distant field of self-sacrificing toil, where there is so much of peculiar and painful privation to be endured. They deserve human applause, and have a rich heritage of divine blessing.—St. Louis Advocate, July 30.

Married.

In the city of New York, at the Twenty-fourth Street Methodist Episcopal church, between Eighth and Ninth avenues, on Sunday evening, July 17, by Rev. Dr. James E. Gorse, ZENAS PRESTON, Esq., of Tennessee parish, Louisiana, to Miss MARY ELIZABETH MERRIMAN, of that city.

Obituaries.

Died, July 14, 1870, JOHN COPELAND, son of Rev. John C. and Emily R. Miller, aged one year and eleven months. Hope looks beyond the bounds of time; Where what we now deplore Shall rise in full immortal prime, And bloom to fade no more.

Died, July 1, 1870, at the residence of her son-in-law, A. G. Ward, Esq., Isaacson county, Mississippi, opposite Lake Providence, Louisiana, SUSAN E. widow of G. N. Parks, in the fifty-sixth year of her age.

Mrs. Parks was born in Carroll parish, Louisiana, July 13, 1814. Her maiden name was Susan E. Brown. She was married twice. Her first husband was John Tompkins, Hennessee county, Louisiana. He died in 1841. She joined the Methodist Episcopal Church South a number of years ago.

A few months before death she was deprived of speech. Her friends feared her mind was impaired. Only by signs was she enabled to communicate with them. Through this means they were satisfied that she heard and understood all that was spoken.

Her daughter, anxious to know the state of her soul, asked her to raise her hand as a token of readiness to die. She did so; and even when the grim monster came she met him with undaunted courage—was ready; and as one falling asleep she breathed her last. She died without a struggle. Her peaceful spirit took its happy flight to the God who gave it. "Let me die—the death of the righteous, and let my last end be like hers." R. A. D.

Memphis Avalanche will please copy.

Departed this life, on the ninth of December, 1869, in the town of Greenwood, Mississippi, MARGARET E. CHAPMAN, wife of William H. Chapman and daughter of W. T. and M. A. Jones.

The subject of this notice was born in Haywood county, Tennessee, September 5, 1842. She was dedicated to God in holy baptism in infancy, and was brought up in the church. She was converted about ten years before her death. As a member of the church she was in her place in the house of God; frequently led in the female prayer meeting and other social meetings, and was a teacher in the Sabbath school when she died. She frequently spoke of her trust in her Saviour and her hope of heaven.

Her husband is left to mourn her early death; and her two children—one aged three years and the other four months—will have to be raised without a mother's love and care. But they are left a legacy to the church, whose duty it is to see to their religious training. Rest, dear sister, until the last trump shall wake thy dust.

W. WILKINSON.

Rev. C. Chamberlin.
W. A. Simral, Esq.

The Sixth Annual Session will begin on WEDNESDAY, October 5, 1870, and close June 30, 1871.

The founders of this school have organized it on an elevated basis, and design that it shall afford to young ladies the means of a liberal collegiate education. It is empowered by law to confer degrees. The system of instruction seeks to train the mental powers to independent and accurate thinking, and to cultivate a refined taste. The teachers employed are well qualified for their work, and sufficient in number to give full attention to each pupil.

The Seminary buildings are spacious and airy and in a healthy district—have a beautiful location in a large grove, affording ample room for exercise. The school possesses high social advantages, and the nucleus of a good library. It is accessible by railroad from the Mississippi river, at Bayou Sara—twenty-eight miles distant.

CHARGES FOR THE ACADEMIC YEAR.

Board, with furnished rooms, lights, washing and fuel, per month	\$240 00
Tuition in Primary grade	40 00
Tuition in Middle grade	60 00
Tuition in Collegiate grade	80 00
Lessons on piano	72 00
Lessons in vocal music	72 00

Pupils are received at any time, but must remain to the end of the current half session.
Mr. E. H. WALLIS is in charge of the school and boarding department. Dr. T. J. HENDERSON, or at Bayou Sara, Physician.
For further particulars address
CLARA B. WALLIS, Principal.

CHILDREN TEETHING.

MRS. WINSLOW'S SOOTHING SYRUP.

FOR CHILDREN TEETHING.

greatly facilitates the process of teething by softening the gums, reducing all inflammation; will allay ALL PAIN and spasmodic action, and is

SURE TO REGULATE THE BOWELS.

Depend upon it, mothers, it will give rest to yourselves, and

Relief and Health to Your Infants.

We have put up and sold this article nearly thirty years, and can say in confidence and truth of it what we have never been able to say of any other medicine—NEVER HAS IT FAILED IN A SINGLE INSTANCE TO EFFECT A CURE, when timely used. Never did we know an instance of dissatisfaction by anyone who used it. On the contrary, all are delighted with its operations, and speak in terms of commendation of its magical effects and medicinal virtues. We speak in this matter "WHAT WE KNOW," after years of experience, and pledge our reputation for the fulfillment of what we here declare. In almost every instance where the infant is suffering from pain and exhaustion relief will be found in fifteen or twenty minutes after the Syrup is administered.

Full directions for using will accompany each bottle. Be sure to call for

"Mrs. Winslow's Soothing Syrup,"

having the fac-simile of "CURTIS & PERKINS" on the outside wrapper. All others are base imitations.

Sold by Druggists throughout the world. j18 6m

GARDEN SONGS.

Know where there's a beautiful shoe,
They are sweet, but it won't fit you;
It hides away in the balm of oak,
And you find a pair in less than an hour.

Thank you, my liddle; now this I'll do,
I'll pluck a heart flower just for you;
The hearts hang close on a bending spray,
And every heart hides a lye away.

How shall you find it? I'll tell you true;
You gently under the heart in two,
And under the color, as white as milk,
You'll find the lye with its strings of silk.

Thank you, my liddle; now this I'll do,
I'll pluck a heart flower just for you;
The hearts hang close on a bending spray,
And every heart hides a lye away.

How shall you find it? I'll tell you true;
You gently under the heart in two,
And under the color, as white as milk,
You'll find the lye with its strings of silk.

Thank you, my liddle; now this I'll do,
I'll pluck a heart flower just for you;
The hearts hang close on a bending spray,
And every heart hides a lye away.

bushes, he was startled by a peculiar sound like the cry of a child. He paused and listened. The sound was repeated. Looking intently he saw a dark object in the thicket. Knowing that some wild animal imitated the cry of children, he supposed it to be one of them and drew up his rifle to fire. But just at that moment, reaching out from the bushes, he saw the hand of a little child.

Dropping his rifle, he approached the spot, and there found a little girl not far from three years old. Speaking kindly to her, he easily won her confidence. Taking her in his arms, he asked her name, the name of her parents, her home, and how she came there. Her own name she gave, but she could give no further information. She lived at home with papa and mamma. She went into the woods after berries, and could not get back. When it was dark she lay down on the nice leaves by a log. She had found plenty of berries, but now was hungry.

To find one so helpless, there in the depths of the forest, alone and unprotected, and though there was danger on every side, still unharmed—no wonder the traveler was amazed.

But she must be saved. So, giving her the little food remaining in his game bag, he arranged his blanket after the Indian fashion, and placed her in it, swung her upon his back, shouldered his rifle and started on.

Wearied with his labor and long travel, and the additional weight of the child, he was several times on the point of giving up. However, he pressed forward, and just as darkness was gathering in the forest, he reached a rude shanty, where some men had been making shingles. From this point there was a trail leading to the nearest settlement.

After a brief rest he resumed his burden and his walk, and about ten o'clock at night reached the settlement.

Here another surprise awaited him. Instead of the darkness and silence he expected at that hour, late as it was, lights were gleaming from every cabin, and the people were all astir. Entering the first house, he inquired the cause of the excitement, and was told that a little girl, the only child of the parents whose house he had entered, had strayed into the forest, and had been missing two days and nights. Two days had been spent in fruitless search, and now, though they had but faint hope of success, they were preparing for a more extended and thorough search on the following day.

Through an open door he saw in another room the father bowed with grief, and the mother in mute, unutterable anguish, too deep for tears.

Up to this moment, strange to say, he had not thought of the little one quietly sleeping in his blanket. Suddenly the truth flashed upon his mind. Stepping into the room he swung the burden from his back, and, as it rested on the floor, awakened by the light, the child looked up, and called: "Mamma!"

To the mother, roused by that voice, one glance was sufficient. With a wild cry she sprang forward and clasped the little one in her arms, sobbing, "O God, I thank thee," and then sank, fainting, on the floor.

With lightning speed the news, "The lost one is found!" flew from house to house, and soon the entire population were gathered to rejoice with those parents who had been so recently overwhelmed with grief, and to unite in fervent thanksgiving to God.

As the stranger told his story, none could fail to see the hand of God in it. Had he crossed the river on the first tree, he would have gone directly on, and the little wanderer must have perished. He had been almost ready to murmur at being turned two miles out of his way. But he now saw that the hand of a kind Father in heaven had directed his way, and thus brought him to the spot to which the little one had strayed—all of which went to show that the eye of that kind Father was on the child, and in his own good time and way he had provided means for her rescue.

And who but that Father could have protected her by day, and especially through the darkness of night, "wherein the wild beasts of the forest do creep forth?"

I hope the story may interest you as much as it did me when I first heard it, almost forty years ago. Then I was a young minister—now the little folks call me "Grandpa."—Rev. E. W. Taylor in Interior.

NATURAL FAMILIES OF PLANTS.

CRUCIFERÆ (MUSTARD FAMILY.)

Cruciform flowers have an interest and charm apart from mere beauty. They have, as the poets say, "something than beauty dearer," a form around which lingers the charm of association, sacred in many eyes and admired by all, as much to-day as in centuries long gone by. It is true that the cruciform family cannot show as many brilliant garden ornaments as some that might be mentioned, but they make up for this in other ways. The family is a large one—more than one thousand species; of these about one hundred are natives of the American continent, and almost all are found in the temperate zones. It is a trying family for botanical beginners; the blossoms are so much alike that one cannot tell one from another, and the genera have often to be determined by the seed-vessels and seeds; still, much of the difficulty vanishes when one becomes familiar with the pervading characteristics—the four parted calyx, the four regular petals supported by claws and spreading above the calyx in the form of a cross, and the fruit a pod. It is a most important family; to it we owe many of the most valued and nutritious of the culinary vegetables and popular condiments. Some of the species possess an acrid, pungent principle; others abound in sulphur, nitrogen or etheral oil; and though many are burning, biting and blistering, none are really poisonous. Here are found all the varieties of cress, delighting to grow beside spring, rivulet or river, or to spread beneath the silvery waters; they are pretty and poetical—the cool, green leaves adorning all they touch. The writer has seen an old well made beautiful by a perfect carpet of these crisp and shining plants, which, filling all the space within the well-curb, crept over the sloping edge and down the cool stones, and into the still water, no one knew how far; and every time the "old oaken bucket" went down and up, they were deluged with crystal drops. Here belong those "breathings of spring," the pink-tinted radishes, the peppery peppercress, and pungent mustard and horse-radish, and that pretty vegetable so prized by Teutons, and not unprized by Anglo-Saxons, with all its delicate ramifications spreading out into broccoli, Brussels sprouts and cauliflower, and kale, so elegantly and elaborately crimped and curled. Those who have not considered the cabbage a handsome plant had better glance at the frontispiece in Washburn's Horticultural Catalogue for 1870, or at Mr. Vick's delineations of Brussels sprouts and fildekraut and drumhead savoy.

The turnip tribe comes also with agreeable names—early white, golden ball, red top, purple top, white sweet, German and others; and that singular vegetable, the white and purple kohlrabi, where the stem, just above the surface of the ground, swells out into a large bulb crowded with leaves. This bulb when cooked is pronounced tender and delicate, combining the flavors of cabbage and turnip. One variety, called purple giant, often weighs six or eight pounds. After the useful, the ornamental, and in this very respectable, substantial family may be found many pretty and what is a most desirable addition—many charmingly fragrant flowers; among them the well known Hesperis or Rocket, from Siberia and Europe, also found on the shores of Lake Huron; the sweet Alyssum from Grecian isles; the many varieties of candytuft from southern Europe; the pretty purple and white Arabis from Switzerland; the sulphur-yellow erysimum from Palestine and the bluffs of Arkansas; the showy clusters of white and purple warea from Southern hills; and the lilac-tinted heliophila, and the really magnificent varieties of gillyflower or July-flower, natives of England and Germany. And who does not love the dear old, honest honesty or lunaria from Germany? Pleasant always to the eye are the moony, soft, silvery silicles of the biennis, or the rarer and more graceful perennial, with slender, oblong, silken, satiny pods.

But beyond and above all, for beauty and sweetness and poetic fame, is the English wallflower, delighting to expand its glowing cross and send out its delicious fragrance on the deserted tower and crumbling wall.

"Flower of the solitary place,
Gray Ruler's golden crown,
Lending a melancholy grace
To haunts of old renown."

This charming flower grows wild abundantly in England, and is also a deservedly prized garden and house plant. There are double varieties, but the single has more of the true cruciform grace; the colors are rich, and varying shades of orange, brownish red, and golden yellow.—Hearth and Home.

Love is an alchemist that can transmute poison into food.

GLANDERS IN HORSES.

Glanders is a very contagious disease, and generally a fatal one. It is found among horses that are kept in close, ill-ventilated and filthy stables. The infection is communicated by eating or drinking from the diseased horse, and not unfrequently it is taken by an inhalation of the breath, even if the horses are several yards apart.

The ordinary symptom is the running of one nostril, generally the left. The fluid at first is nearly transparent and thin; it soon grows thicker and stickier, its color changing to pale yellow; it then takes on a mucoous character, till at length a stream of filthy and sometimes bloody pus issues from the nostril. Up to this time the horse can be cured, although during these stages the horse will lose flesh, spirits and appetite; but if this point is passed, tumors soon form in the head, and the horse dies.

Dr. Stewart, of considerable notoriety as a veterinarian, gives the following treatment for the glanders, which, if used before the last stage of the disease, is said to effect a cure:

"Bleed in the neck-vein, removing about three quarts of blood. Have ready a strong decoction of tobacco, of which put one gill in a pint of warm water and turn this down the horse. It will make him very sick, but it will affect him much less than when in health, and thus used is not really dangerous. Wash out his nostrils with the tobacco decoction weakened with water. Be at pains to reach as high up the nostril with the mop as you can. The mixture must be as hot as he can bear it. Continue this treatment from two to four weeks, or until a favorable change is apparent. Use the mop in the nose for eight or ten days; drench with the tobacco mixture two or three times, at intervals of three days. Give the horse as much sulphur and rosin as you can get him to eat, for the space of ten days. A full dose will be four ounces of sulphur and two of rosin, both pulverized. Let the food be light and relaxing—grass if it is in season; if not, boiled roots thickened with shorts, and salted. A quantity of salt should be placed where the animal can help himself. Attend promptly to disinfecting your stable. Fumigate it with tobacco smoke while the horse is in it. Make him and all his companions inhale as much of the smoke as you can. Fill the stable with the smoke until you can no longer remain in it yourself. Wash every part of it, and especially the mangers, with a strong decoction of tobacco, and keep pounded tobacco leaves in every feeding place used by any horse that has been exposed to the disease. An occasional fumigation of the stable when any infectious disease is suspected will act as a preventive."

[Unless there is absolute security that the affected horse can be completely separated from his fellows, we should recommend the shooting of an animal—no matter how valuable—that was unmistakably attacked with the glanders. It is not only a contagious but a loathsome disease, and it is said to be dangerous for a man to breathe the odor which emanates from the mucous discharges of a horse in the final stages of glanders.—Editor of *Hearth and Home*.]

THE GRASS WORM.—The grass worm is making great havoc in the corn and cane fields of southwestern Louisiana. It strips the corn and cane leaves, eats the tender tops of cotton, and devours grass and weeds extensively. All the crops will be somewhat injured by them, except early corn. The real cotton worm has not made its appearance, but millers abound in many cotton fields. *Planter's Banner*, July 27.

LEANING ON GOD ALONE.—Sir William Hamilton was doubtless the most learned Scotchman of our century, the omniscient Lord Macaulay not excepted. He was familiar with every branch of philosophy; he had analyzed, with wonderful power, all religions into their simplest elements. He was an inspiring teacher—one of the few masters of philosophy and letters; an admitted leader of his generation.

But while at home in the learning of all ages, and exciting the wonder of his contemporaries by the bold sweeps of his genius, no less than the vastness of his attainments, he sat as a little child at the feet of Jesus. He was a sincere believer. His mind rested on the great truths of the Christian system. There is an exquisite pathos in the record of his last hours, that when his spirit was hovering on the borders of the unseen world, just ready to penetrate its great mysteries, he was heard to murmur: "Thy rod and thy staff, they comfort me!"

A little learning often breeds skepticism. Profound knowledge leads back to Jesus.

Without memory the judgment must be unemployed, and ignorance must be the consequence. Pliny says it is one of the greatest gifts of nature.—Montaigne.

MUSICAL INSTRUMENTS.

PHILIP WEILIN,
Nos. 80 and 82 BARONNE STREET,
NEW ORLEANS,
Southern Depot of the celebrated and renowned

PIANOS: Marshall & Mitten's, Danham & Son's, and J. P. Hale's.

Which are fully equal to any in the world.

MUSICAL MERCHANDISE OF EVERY DESCRIPTION.

40-inch Bell, 800 lbs	1000 lbs	175 00
48-inch Bell, 1200 lbs	1500 lbs	265 00

These Bells are warranted for one year against breakage in ordinary use.

THOS. H. BODLEY & CO.,
No. 9 Perdido St., N. Orleans.

BELLS, STEEL COMPOSITION.

For Churches, Schools, Etc.

BLYMER, NORTON & CO., Manufacturers,
Cincinnati, Ohio.

These celebrated Bells (of Cast Iron or "Amalgam") rival in purity and volume of tone those of copper and tin, are more durable, and cost only one-third as much.

Send for descriptive circular. \$25 1/2

THE ARROW TIE.

FOR HAILING COTTON THE ARROW TIE.

is the most popular, being the best Cotton Tie in use.

Planters and Cotton Press men everywhere prefer it to all others.

THE ARROW TIE

was used to cover MORE THAN HALF THE CROP OF 1869, giving entire satisfaction.

The patented and manufacturer of the celebrated ARROW TIE, J. J. McComb, formerly of New Orleans, now residing in Liverpool, having control of the best and most extensive Rolling Mills in Europe, is constantly importing large stocks of this popular Tie, manufactured of the very best quality of English Iron, to meet the increasing demand for it throughout all the Cotton States.

Planters can lay or order the ARROW TIE of all dealers in Iron Ties, and of country merchants generally, at the lowest market price; and we respectfully solicit the patronage of Planters and Factors everywhere.

H. T. HARTLETT AND
R. W. WAYNE,
General Agents for the Arrow Tie.

Jetsly 124 Carondelet St., New Orleans.

CARPET AND OIL CLOTH WAREHOUSE.

MISCELLANEOUS.

BROOKS' IMPROVED PATENT

COTTON SCREW PRESS.

Patented by R. M. Brooks, of Georgia, April 14, 1865.

It took the first premium at the Louisiana State Fair, at New Orleans, April, 1868, over eleven competitors; also at the Tennessee State Fair, at Memphis; and more recently at the Mississippi State Fair, at Jackson, and again at the recent State Agricultural Fair, at New Orleans, April, 1870, in a contest with fourteen Cotton Presses, embracing the most approved patents from different States of the Union, North and South.

The following is the certificate of some of the principal cotton factors and merchants of New Orleans. In our circulars can be seen the certificates of practical planters and accurate testimonials from several Southern States in regard to the admirable principle and practical working of this Press.

"We, the undersigned, purchased last season, from Messrs. J. B. Jennings & Co., the Brooks' Improved Cotton Screw Press for our customers, and, so far as we heard from, they have given entire satisfaction."

"Messrs. Greenwell & Son, Warren, Crawford & Co., C. L. Walmsley, Irby, McDaniel & Co., Frank & Daniel, Campbell & Strong, Chapman & Co., E. F. Golan & Co., R. S. Walker, Violet, Black & Co., Block Bros., Wright, Allen & Co."

Circulars, giving cuts, with full description, price list, etc., sent by mail on application to J. B. JENNINGS & CO., Proprietors, 14 Union Street, New Orleans.

GEORGE B. HOLZACH'S

PATENTED IMPROVED

MOVABLE WINDOW SHADE.

This improvement relates to a new and simple manner of so arranging window shades that light and air can be admitted to the room through the upper part of the window, while, and when the window is furnished with the combined screens its usefulness and comfort in warm weather, when a good current of fresh air is so welcome, cannot be over-estimated.

Particular dining rooms and bed rooms, late especially in time of summer, are in this improved combination thoroughly ventilated and lighted at pleasure, without the slightest inconvenience to the sleeper or patient, or exposure to the passers-by.

It can be attached to any window with the least alteration and at moderate expense. Orders solicited and promptly attended to. State Rights for sale by

GEORGE B. HOLZACH,
Inventor and Patentee.

Je4 3m 61 Camp Street, New Orleans.

BRACES AND TRUSSES.—DR. JOSEPH A. ANGELL, informs the medical profession and others that he has constantly on hand, and for sale a complete assortment of RAYNOLD'S TRUSSES, Spinal and Shoulder Braces, and other appliances for the relief, relief and cure of general debility, weakness, and derangement of the spine, and weakness of the lungs, spinal weakness and deformity, dyspepsia and various ailments, constipation and chronic rheumatism, female derangements and extreme prostration of the system, and weakness of the female system.

These light, cool and springy appliances are the special favorites of the profession, and are extensively and successfully used in all parts of the Southern States.

All orders must be sent direct to PHILIP WEILIN.

60 and 82 Baronne St., New Orleans.
Our General Agent for the Southern States, 104 1/2

PRICE, \$1 PER BOTTLE.

Within two months this remedy has cured a sensation among the people and with the above diseases. It never fails to cure radically the very worst cases, and demand for the medicine is very great.

DR. HANCOCK'S

Rocky Mountain Indian Salve

FOR CORNS, BUNIONS AND ETC.

This Indian Salve cures Corns, Bunions and all other

Scientific.

THOMPSON'S ROAD STEAMERS.

The adaptation of the locomotive to common roads has long been the object of numerous and varied experiments. The first road locomotive was constructed by Mr. Goldsborough Gurney. This gentleman, sharing an error prevalent at that time among all scientific men, namely, that there would not be sufficient adhesion between the wheels and the ground to permit locomotion, made use of levers and propellers, which, acting as the human leg and foot, drove the vehicle forward. With only one supporter, Dr. Wollaston, Mr. Gurney persevered, and in a few years produced an engine which not only moved without propellers, but ascended several steep hills, and, like its railway cotemporary, was attached to a carriage. Space will not permit us to describe the numerous other projects which were subsequently tried. It is sufficient to say that a machine has recently been constructed which has every probability of soon becoming a common traveler on the high roads.

The great peculiarity in this road steamer is that the wheels are bound round to the depth of five inches with an India rubber tire. This covering, which at first sight does not appear capable of sustaining much hard work, possesses innumerable advantages, being at the same time perfectly noiseless and exceedingly durable. It also enables the steamer to pass over wet grass and newly-made land with an incredible ease and lightness—an immense improvement on the ponderous traction engines which, a few years since, were wont to wander about London, to the intense disgust of coachmen and to the terror of nervous invalids, and which even now cause great apprehension to the benighted countrymen by their midnight prowls about the country roads.

The steamer is commonly used to draw an omnibus or carriage. It is also, however, capable of dragging a plow, thus successfully solving the problem of plowing by direct steam traction, as the India rubber tires enable the steamer to go over the softest ground without showing the slightest sign of sinking.

In 1868 extensive experiments were made in Edinburgh to test the powers of the steamer, when it not only hauled several heavily loaded wagons up a very short incline, but ran across a soft grass field with the greatest ease, and without leaving the slightest track; and in August, 1869, its plowing capacities were severely and successfully tried.

On the twenty-fifth of June a further experiment was made in Edinburgh with the steamer and omnibus. The omnibus has only two wheels, and is a handsome and commodious vehicle. It is built to carry sixty-five passengers—twenty inside and forty-five out. The journey, which was to Leith and back, was accomplished without the slightest hitch, and the whole of the party, among whom may be mentioned the Lord Provost of Edinburgh, expressed themselves highly satisfied with the performance of Mr. Thompson's ingenious and useful invention.—*The Graphic.*

The experiments of Prof. O. W. Holmes make the rate of transmission of nerve influence to and from the brain considerably greater than those of other observers. By experimenting on a single person, Helmholtz, Fizeau and others have reached rates of from forty to eighty or one hundred or more feet a second; so that, as has been occasionally repeated, it would take a whale a second to feel the stroke of a harpoon in his tail. Fizeau says it takes one-tenth of a second to transmit an order from the brain to the muscles, and one-hundredth of a second for the muscles to get into motion.

Dr. Helmholtz put ten intelligent students in a circle, with joined hands, and had a hand-pressure communicated from one to another ten times round the circle. Here was "a nervous circle of about sixty-six feet," (less than sixty, we should think, unless the students had arms like apes,) repeated so as to make it "six hundred and sixty feet," where the impression of a hand-pressure had to be conveyed to the brains as many times to the other hand. He found, after practice, that the time required was ten seconds, making one-tenth of a second for the passage through the nerves and brain of each individual—less than the least time assigned by any other experimenter.

The Quakers of Philadelphia and the Catholics of a New England town have reached a point of agreement. The Quakers proposed to discourage costly presents at weddings; the Catholics to frown against more than two or three carriages at funerals. As the wedding of many a nun has been the death of him, the necessity of the Quaker and Catholic action at the two extremes of life is apparent. It is a pious effort to make both ends meet.

HOUSEKEEPERS' DEPARTMENT.

To SET COLORS.—A spoonful of ox-gall to a gallon of water will set the colors of almost any goods soaked in it previous to washing.

To PREVENT FLIES FROM SITTING ON PICTURES.—Let a large bunch of leeks soak for five or six days in a pailful of water, and wash your pictures or any other piece of furniture with it. The flies will never come near anything so washed.

PLAIN RICE PUDDING.—Half a pint of rice, one quart of milk, half a pint or less of sugar, nutmeg or cinnamon. Bake it slowly two hours. Tapioca may be cooked in the same way, after soaking in warm milk for an hour or two; and sago, after thoroughly washing and soaking over night, is good in the same fashion. It is possible to dilute the milk one-half and yet have the pudding good, if care is exercised in soaking and cooking.

SAFETY from moths for furs consists in leaving them undisturbed through summer in a snug place. Muff-boxes are not secure. Taking them out occasionally to air exposes them to the moth. No pepper, camphor or tobacco is needed. After you have worn them for the last time in spring put them into a linen pillow-case, tie up the end in a tight knot, and shut them up in a drawer which will not be often opened. A true and tried prescription.

CHURNING.—Churning should be slow at first, until the cream has been thinned and becomes a uniform mass. The motion may then be increased, but not to too great an extent, else undue heat may be generated and the butter become frothy. Butter should come in thirty to forty minutes; if much sooner, it will be soft and acquire a bad taste. Metallic churns, as those wherein metal forms a prominent part, should never be used, as such affect the flavor of the product unfavorably.

IMPORTANCE OF AIRING BEDS.—The desire of an energetic housekeeper to have her work completed at an early hour in the morning causes her to leave one of the most important items of neatness undone. The most effectual purifying of bed and bed-clothes cannot take place if no time is allowed for the free circulation of pure air to remove all human impurities which have collected during the hours of slumber. At least two or three hours should be allowed for the complete removal of atoms of insensible perspiration which are absorbed by the bed. Every day this airing should be done, and occasionally bedding constantly used should be carried into the open air, and when practicable, left exposed to the sun and wind for half a day.

MAKE use of time, if thou lovest eternity; know, yesterday cannot be recalled; to-morrow cannot be assured; to-day is only thine, which, if thou procrastinate, thou lovest; which lost, is lost forever; one to-day is worth two to-morrows. *Enchiridion.*

SCHOOLS AND COLLEGES.

WHITWORTH FEMALE COLLEGE.

BROOKHAVEN, MISSISSIPPI.

On the New Orleans, Jackson and Great Northern Railroad, one hundred and twenty-eight miles north of New Orleans, and fifty-seven south of Jackson, will reopen on

The 1st of September, 1870.

Thorough instruction in all the branches of

Charge for board, tuition in English, English text-books, school-room stationery, washing, fuel, lights, medicine and medical attendance, \$250 per year for forty weeks.

The languages and music, extra. A deduction of \$50 made for pastors of churches.

Number of pupils last term, 165.

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS

PUBLISHED BY

CHARLES SCHUBNER & COMPANY,

651 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.

"Incomparably superior to anything published."

Introduction to the Study of Geography.

Elementary Geography.

Intermediate Geography.

Common School Geography.

Guyot's System is approved and indorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenney, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New system, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by its pupils this generation will obtain a clearer, more definite and exact knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

NEW ORLEANS MARKETS.

From the N. O. Price Current.

The general market continues extremely dull, with very little movement in any branch of trade. The receipts and supplies of sugar have been too inconsiderable to admit of more than a retail business, but prices have been fully maintained. Flour has shown rather more animation within a day or two, but Western produce generally has continued inanimate, without any marked change in prices.

Our accounts from the country are still conflicting, those from some localities being decidedly favorable to both cotton and sugar, while other reports of the former are even more discouraging and gloomy than last week. The alarm with regard to worms continues to prevail in many parts of Mississippi, Arkansas and Louisiana. From some points, however, we hear of their disappearance. The prospect is still involved in a good deal of uncertainty, and it would be rash to predict a material increase over last year, if any at all. We are still without any receipts of new cotton, except the two bales received on Thursday from the Rio Grande, which cannot be regarded as a part of our crop, or any indication of its forwardness. No doubt it is considerably behind hand, however early a first bale may be rushed forward from some Louisiana plantation.

The river is now eleven feet eight inches below high water mark.

COTTON.—The following are the arrivals since the twenty-ninth ultimo:

Louisiana and Mississippi bales	680
Mobile	4
St. Louis	8
Texas	7
Total	699

On Saturday the movement commenced with only a limited inquiry, mostly for the better qualities, and notwithstanding less discouraging accounts from Liverpool, the demand subsequently continued confined to a very few brokers, resulting in sales of only 470 bales, at irregular prices, showing a pretty general decline of $\frac{1}{16}$ ¢, with some lots at a still greater reduction. On Monday, under the advance reported at Liverpool and New York, factors were more stringent in their pretensions, but buyers stood aloof, and the business was confined to 180 bales, partly at previous rates, and partly at $\frac{1}{16}$ ¢ to $\frac{1}{8}$ ¢ less than inside quotations. On Tuesday the market opened under a favorable influence of still more encouraging accounts from Liverpool and New York, and buyers coming forward rather more freely, 600 bales changed hands at prices still more in favor of factors, showing a partial recovery of the previous decline. Ordinary sold at 12¢, low middling at 17¢, middling at 17 $\frac{1}{2}$ ¢ and 17 $\frac{3}{4}$ ¢, strict middling at 18¢, and good middling to middling fair at 20¢.

This makes an aggregate for the past three days of 1,250 bales. The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 1,133,907 bales, against 794,481 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 783,879 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 472,644 bales to Great Britain, of 126,648 to France, and of 117,833 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	11 $\frac{1}{2}$ to 12 $\frac{1}{2}$
Good ordinary	13 $\frac{1}{2}$ to 14 $\frac{1}{2}$
Low middling	16 $\frac{1}{2}$ to 17 $\frac{1}{2}$
Middling	17 $\frac{1}{2}$ to 18 $\frac{1}{2}$
Strict middling	19 $\frac{1}{2}$ to 20 $\frac{1}{2}$

COTTON STATEMENT.

Stock on hand Sept. 1, 1869, bales	770
Arrived past three days	699
Arrived previously	119,260
Made from waste and damaged cotton, samples, etc.	9562-120,807
Total	120,637

Exported past three days	3489
Exported previously	115,510
Burned	1317-115,916
Total	143,721

MONEY.—Gold, 120 $\frac{1}{2}$ to 121 $\frac{1}{2}$. American silver half dollars, 113 to 115. Mexican dollars at 3 $\frac{1}{2}$ to 4 per cent. premium in gold.

The stock market has been almost stagnant, with a general weakness in prices, and quotations are nominal. On Monday 50 shares Bank of New Orleans sold at \$37.50. The Citizens' Bank has declared a dividend of 8 per cent. from the profits of the past six months.

City Treasury notes are quoted at 20 per cent. discount.

CATTLE MARKET.

NEW ORLEANS, August 2, 1870.

Texas cattle, choice, per head	\$40 to 45

Special Notices.

MACON DISTRICT CONFERENCE.

The District Conference for Macon district, Mobile Conference, will convene at Macon, Mississippi, on Thursday, September 8. It has been deferred until the revival season is over, with the promise of a full attendance of preachers and official members. Opening sermon by Rev. William Murrah, D. D. J. B. STONE, P. E.

SHREVEPORT DIST. CONFERENCE.

The District Conference for Shreveport district will meet at Greenwood, Louisiana, on Thursday, September 22. The official members of the respective churches are pressed with the importance of attending. JOHN PIPES.

VICKSBURG DIST. CONFERENCE.

The District Conference for the Vicksburg district, Mississippi, will be held in Port Gibson, Mississippi, on Wednesday, September 7, 1870. Opening sermon by Rev. Thos. Nixon, on Wednesday night. Bishop Keener has promised to be present. JOHN A. B. JONES, P. E.

WOODVILLE DIST. CONFERENCE.

The Woodville District Conference will convene in Liberty, Mississippi, on Thursday, the first day of September, at eleven o'clock A. M. Pastors will please prepare full reports of the condition of the churches under their charge. Local preachers will be expected to present reports of their appropriate work as such. Each steward will please present to the conference an exhibit of the amount collected by him for church purposes this year, with such other facts as he may think proper to report to the conference. Delegates to the Annual Conference will be elected. Brethren, we expect you all. JAS. A. GODFREY, P. E.

MERIDIAN DISTRICT MEETING.

The District Conference for Meridian district, Mobile Conference, will be held at Belmont, Alabama, August 11-14. A full attendance is requested. J. T. HEARD, P. E.

COMMITTEES OF EXAMINATION.

NORTH MISSISSIPPI CONFERENCE.

Admission on trial—George Shaffer, John Brerford, A. C. Allen.

First year—W. P. Barton, R. J. Jones, M. H. Ford.

Second year—A. J. See, A. Kendall, M. H. Ford.

Third year—T. Y. Ramsey, F. S. Pettway, E. E. Hamilton.

Fourth year—Isaac Elbert, W. T. J. Sullivan, J. H. Brooks.

MISSISSIPPI CONFERENCE.

Admission on trial—R. Albey, T. Nixon, J. G. Jones.

First year—J. L. Forsyth, W. H. Leith, J. M. Pugh.

Second year—H. T. Johnson, C. G. Andrews, J. T. Heard.

Third year—B. Jones, W. L. C. Hunt, W. H. Harrington.

Fourth year—H. H. Montgomery, J. A. Godfrey, Josiah Barker.

D. S. DOUGGETT.

RICHMOND, VA., July 6, 1870.

CAMP MEETINGS.

A camp meeting will be held on Pleasant Hill and Manny circuit, at Baylath, commencing on Friday evening, the thirtieth of September. Preachers will please note it. JOHN PIPES.

There will be a camp meeting at China Grove, between the Westville and Ozark circuits of the Marina district, Alabama Conference, commencing on Friday before the second Sabbath in September. Brethren, come!

W. A. SAMPEY.

T. S. ARMISTEAD.

There will be a camp meeting held in Springville, Springville circuit, Louisiana Conference, beginning on the first day of September next. Let the preachers come. JESSE FULTON, P. E.

A camp meeting will be held at Linwood, DeKalb circuit, Macon district, Mobile Conference, commencing on Thursday night before the fourth Sunday in September. U. L. THOMPSON, P. E.

New Orleans Dist., Louisiana Conference.

THIRD ROUND OF QUARTERLY MEETINGS.

Felicity street, 6 P. M., July 10

German charges, 7 $\frac{1}{2}$ P. M., at

Dryades street, 7 $\frac{1}{2}$ P. M., Aug. 1

Carondelet street, 7 $\frac{1}{2}$ P. M., Aug. 1

New Orleans circuit, Jefferson

City and Algiers, 7 P. M., at

Advocate office, 20.21

Thilodux, at Honma, 20.21

Moreau street, 7 $\frac{1}{2}$ P. M., Sep. 5

Baton Rouge, 20.21

Plaquemine, 24.25

During this round each Quarterly Conference is required to nominate by ballot one lay representative to the Annual Conference, and out of the nominees the District Conference is to elect four. It is important that these nominees should be made, and their names promptly reported. The District Conference will probably be convened in October.

LINUS PARKER, P. E.

Opelousas District, Louisiana Conference.

THIRD ROUND OF QUARTERLY MEETINGS.

Washington circuit, Aug. 13, 14

Vermillion circuit, 15, 16

Opelousas, 20, 21

Conocochee, 25, 26

Bayou Mallet, 28, 29

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, AUGUST 13, 1870.

NO. 30.

NEWS OF THE WEEK.

DOMESTIC.

SALT LAKE CITY, Aug. 6.—The election passed off quietly. Partial returns indicate that two thousand votes were cast for General Maxwell, the opposing candidate.

The Mormon women generally voted.

The entire vote of this city is above four thousand.

The Mormon family, with whom Maxwell boarded for a year, turned him off under positive orders from the church, because of his part in the election.

MEMPHIS, Aug. 6.—The election returns from west Tennessee show a decided victory for the Democrats, and large gains for that party.

RALEIGH, Aug. 6.—The election returns to-day confirm the previous opinion expressed that the State had gone Democratic by 5,000 to 15,000 majority.

Cobb, Republican, first district, and Dixon, to fill the vacancy occasioned by the death of Eaton, and Thomas, both Republicans from the second district, are certainly elected.

Additional returns render the election of Waddill, Conservative, over Dockery, Republican, as certain.

Gilliam, Conservative, to fill Dewey's vacancy, and Rogers, Conservative, are both elected. Rogers beats Harris, colored, about 900.

Leach, Conservative, is elected over Scott, Republican, for the sixth district.

Harper, Conservative, is doubtless elected over Jones, Republican, in the seventh district.

Both houses of the Legislature will be largely Democratic. Some claim a two-thirds majority in each house.

WILMINGTON, N. C., Aug. 6.—Returns enough have been received to settle the fact that the Conservatives carry both houses of the Legislature by decisive majorities. They also carry the third, fourth, fifth, sixth and seventh Congressional districts, which makes the delegation stand five Conservatives and two Republicans. In the third district Waddell, Conservative, is undoubtedly elected, though there are two counties yet to hear from. Careful estimates fix his majority at 375.

It is conceded that Shipp, the Conservative candidate for attorney general, carried the State.

NEW YORK, Aug. 10.—Per cable come the following dispatches:

PARIS, Aug. 10.—The excitement in the chambers last night was unparalleled. Several members struck each other, and threats were made to shoot such members as opposed the imperial policy.

Julius Favre demanded the recall of the Emperor, as unfit to command the army.

FOREIGN.

CARLSRUHE, Aug. 4, 3 P. M.—There was hard fighting at Weissenburg yesterday.

To-day a large force of Prussians advanced between Weissenburg and Lauterburg ten miles into French territory, driving the advanced posts of the enemy, and destroying miles of railroad between Lauterburg and Strasburg, along which it is supposed that McMahon was preparing to advance.

The French loss is heavy, including many prisoners.

LATENT.—The Prussian victory at Weissenburg was decisive. The troops engaged were regiments of the fifth and eleventh Prussian army corps, and of the second army corps of Bavaria, led by the Crown Prince in person.

The French force consisted of Donay's divisions of McMahon's corps.

Weissenburg and Geishall, in the rear of that town, were carried by storm at the point of the bayonet after an obstinate resistance.

The general who commanded the French in the absence of Donay was killed, with two officers of his staff.

A French encampment, one piece of artillery and five hundred wounded prisoners, including many Turcos, fell into the hands of the Prussians.

On the German side General Killbach was wounded. The grenadier guards and fiftieth regiment suffered severely.

BERLIN, Aug. 5.—A dispatch dated near Weissenburg, at six o'clock Thursday evening, says:

"We have won a brilliant but bloody victory."

The attack was made by the left wing of the Prussian army, consisting of the fifth and eleventh corps of Prussians, and the second corps of Bavarians.

This force carried by assault, under the eyes of the Prince Royal, the fortress of Weissenburg and Giesburg.

Donay's division of Marshal McMahon's corps was splendidly defeated, being driven from its camp, and General Donay himself was killed.

Five hundred prisoners were taken, none of them wounded. There are many Turcos among the captured.

Prussian General Kirschaek was slightly wounded.

The Royal Grenadiers and the left regiment of the line suffered heavy losses.

BERLIN, Aug. 7, 4 A. M.—The Prince Royal reports, August 6, in the evening, a battle was fought in which we defeated McMahon, whose corps had been reinforced by divisions from corps of Failly and Canrobert. We have taken two eagles, six mitrailleurs and at least four thousand prisoners. General Daze was wounded. Loss great on both sides.

BERLIN, Aug. 7.—The French have been defeated along the entire line in two days' fighting, and are in retreat on Metz and concentrating for the defense of Paris. Their losses are immense.

McMahon was beaten on the right, and Frossard on the left.

The Prussians captured four thousand prisoners, thirty guns and six mitrailleurs from McMahon.

BERLIN, via London, Aug. 6.—The French Emperor has withdrawn his entire line, and is concentrating his troops for the defense of Paris. His losses have been enormous. The Prussians overtook the retreating French forces early on Saturday morning, west of Saarbrücken, near Spicheren Hills. The position at which the French endeavored to make a stand during their retreat was carried by Prussians at the point of the bayonet. This battle is known as that of Haguenau.

BERLIN, Aug. 7.—King William sends the following dispatch to the Queen: "Good news; a great victory has been won by our Fritz. God be praised for his mercy. We captured four thousand prisoners, thirty guns, two standards and six mitrailleurs. McMahon, during the fight, was heavily reinforced from the main army. The contest was very severe, and lasted from seven in the morning until nine at night, when the French retreated, leaving the field to us. Our losses were heavy."

Metz, Aug. 7.—The morale of our troops is excellent this morning. It is impossible to give the exact figures of our losses.

General Coffiniere is organizing defensive measures.

Three corps here are still able to give the enemy much trouble, and stop his onward movement.

PARIS, Aug. 7.—The Journal Officiel says the defense of Paris is assured.

It would require an army of half a million to invest its fortifications, while thirty thousand men would suffice to defend them, and there are troops enough now in and around the city to furnish the necessary garrison, together with the sailors from the fleet, which could be procured. The Garde Nationale, the Garde Municipale and firemen would make up a solid army of one hundred thousand.

PARIS, Aug. 7.—Special to the New York Times: I learn on the very best authority that Italy sends fifty-five thousand troops this week to aid France, and it is believed in official quarters that Austria will also send a contingent at once.

In the battle of Haguenau, noon, sixth, General Colson, General McMahon's chief of staff, was killed by his side.

General Raoul is missing. Preparations are going on at Metz for a vigorous defense.

PARIS, Aug. 7.—La Liberte has the following from official sources: General Frossard has only retreated a short distance.

Marshal McMahon fought near Niederbronn.

His headquarters were at Haguenau, and he has fallen back to St. Avertin. Thus Strasburg is menaced.

PARIS, Aug. 7.—The Journal Officiel, in its second edition, to-day, publishes the following proclamation:

"ALL FRENCHMEN.—Up to this hour we have always given without reserve all certain news which we have received, and we continue to do so. Last night we received the following dispatch:

"Metz, Aug. 7, midnight.—Marshal McMahon has lost the battle."

"General Frossard, on the Saar, has been obliged to retire. His retreat was effected in good order."

"All can be re-established."

Metz, Aug. 7, 3.30 A. M.—My communications have been interrupted with Marshal McMahon. I am going to place myself in the center of the position.

ROME, Aug. 7, via Paris Aug. 9. General Dinnont, commanding the French forces, left Rome last night with another detachment of troops. He goes to Lyons to take command of a division of the army in the field.

General Guilhem, who remains to superintend the embarkation of the remainder of the troops, had an audience with the Holy Father to-day, and was most courteously treated.

BERLIN, Aug. 8.—General Steinmetz telegraphs the following particulars of the contest between Von Goeben and the French force under General Frossard:

"The fight was opened on our side by the fourteenth division, which was subsequently reinforced by artillery and cavalry. A fierce and bloody struggle raged along the line between Saarbrücken and Forbach, lasting until night."

"The heights of Spicheren were carried at the point of the bayonet, and the enemy thrown back on Forbach. Meanwhile our fifteenth division had advanced from Völklingen, taken Rosel, and reached Forbach at nightfall, when a broken division of the French army being driven upon that point, their baggage and camp equipment, and many prisoners, were taken."

LONDON, Aug. 8.—The Prussians claim that they will have eight hundred thousand men at the theater of war by this evening.

Rumors of the purchase of the Stevens battery by Russia are discredited here.

PARIS, Aug. 8.—The Temps this evening announces that Marshal Bazaine has been appointed commander-in-chief, and General Trochu major general of the army. General Le Boeuf retires.

Le Parlement says the ministry have determined to create a national committee, with power to act under all circumstances arising from the war.

LONDON, Aug. 8.—French dispatches to-day represent that actual hostilities are suspended, but a rumor prevails that the Prussian armies have concentrated, and that a battle is raging before Metz.

LONDON, Aug. 8.—At last accounts Marshal McMahon was at St. Avertin. His corps suffered less than was at first supposed. The reports that General Colson was killed by his side, and that General Raoul is missing, have been confirmed.

The Pall Mall Gazette says the result of this battle means the triumph of the Prussians in the war.

The German press generally consider the French loss irretrievable, but there are three French corps which have never yet been under fire.

The movement of retreat for the purpose of concentrating has been effected, and a new line of defense taken up in the passages of the Vosges.

A general battle in front of Metz is considered probable to-morrow. The Prussians are moving in that direction by forced marches.

LONDON, Aug. 8.—It is said that the Emperor Napoleon's attack is a return of his old disease, provoked by equestrianism. The American generals, Sheridan and Forsyth, have gone to the Continent.

LONDON, Aug. 8, 4 P. M.—It is stated, privately, that the Emperor is ill at Châlons, and that Drs. Nélaton and Ricord have gone to attend him.

PARIS, Aug. 8.—The Journal Officiel contains the following:

"Metz, Aug. 7, 9.30 A. M.—Our artillery suffered heavily."

General McMahon is now in communication with General Failly.

Metz is being prepared for a vigorous defense.

The Journal Officiel adds: The relations with foreign governments are not prejudiced by Saturday's events. On the other hand they develop the significant fact that which other governments desire in common with France is the maintenance of European equilibrium.

The remainder of the Garde Nationale is to be incorporated with the Garde Mobile, and the two corps will be organized in a single body at once.

The Journal Officiel, of to-day, says: "The relations of France with other powers are satisfactory, and late events have developed rather than weakened this feeling."

Metz, Aug. 8, 9.10 P. M.—General Changarnier has arrived here. He was conducted from the railway station to prefecture by honorable citizens. The general was in civilian's dress. He was immediately taken into the presence of the Emperor.

The public here receives with favor the advent of General Changarnier.

LONDON, Aug. 8.—The Times, of this morning, says: "It is a momentous question whether the Emperor's health leaves him in possession of his ordinary faculties."

"The war is marked by his usual hesitation, which is attributable to random and purposeless strategy and puzzling inaction, which have probably brought calamity to the national arms."

"The Emperor is now bound to accept battle instantly; yet he has on hand the task of concentrating his forces and restoring esprit to his defeated army; and this while his army is concentrating in the heart of Lorraine."

"Circumstances will soon exact the reappearance of England in the character of a mediator."

It is said that the Orleans Princes are prodigal of their money in relieving the wounded of the French army.

Ships still enter the Elbe and the Weser rivers, notwithstanding the blockade.

PARIS, Aug. 9.—A correspondent of Le Temps thus describes the interview between the French minister and Cardinal Antonelli on the twenty-fifth ultimo: The former having read Duke de Grammont's dispatch, directing the evacuation of Rome by the French troops, Antonelli said, imperturbably: "I will mention it to the Holy Father."

"Then I may expect an answer in the evening?" inquired the minister.

Cardinal—"Shall receive you with pleasure."

In the evening the Marquis de Beauville called on the cardinal, and the following brief colloquy took place:

Marquis—"What does his holiness say?"

Cardinal—"He says God will provide for me. May I never see French troops again?"

Marquis—"Is that all?"

Cardinal—"All."

PARIS, Aug. 9.—The minister of the interior has issued a proclamation, announcing that according to the terms of the law of 1849 on the declaration of a *stat de siège*, the military authorities have a right to interdict all publications of a nature to excite or keep up disorders. As such propositions as that made by the Siecle, to institute a committee of defense, tend to anarchy, and compromise a unity of action, and creates useless agitation, on advice of the council of ministers it has been decided that the military authorities shall apply proscriptive measures to any journal renewing such propositions.

PARIS, Aug. 9.—The Republican and Democratic journals advise an immediate meeting of the Corps Legislatif and the arming of the people. They all censure strongly the disorders which have taken place in the streets, and counsel calmness and moderation.

The deputies to the Corps Legislatif, who are now in Paris, met yesterday afternoon and called upon the Emperor.

There is great activity in enrolling volunteers in all parts of the city.

Thirty-three thousand workmen are strengthening the fortifications, assisted by twenty thousand sailors from the navy.

The Gaulois says the false news of victory was disseminated at Strasburg last week at the same hour it was sent out here, and shows that there was a preconcerted attempt to deceive the nation.

Metz, Aug. 9, 8.30 A. M.—By cable to the Associated Press: The enemy has in a large measure concentrated in front of Metz. Marshal Bazaine has the direction of operations.

The corps of General Frossard has retired in good order upon Metz. All has been quiet during the night. The Emperor has just gone to the general headquarters of Marshal Bazaine.

LONDON, Aug. 9.—Authentic advices from France show that Marshal Bazaine, commander-in-chief, has one hundred and thirty thousand men at Metz, Marshal McMahon fifty thousand at St. Avertin,

and Marshal Canrobert fifty thousand at Nancy.

LONDON, Aug. 9.—The following official dispatch is dated at Homberg, in the Palatinat, at 9.45 A. M., August 8:

"Yesterday, after the battle of Worth, the enemy retired in the greatest disorder. The French artillery endeavored to make a stand at Wiedeburn, but that town was taken by the Bavarians. The enemy retired on the route to Bitscho. The cavalry of Wurtemberg captured the enemy's stores and four pieces of artillery at Regelsbachen."

"The enemy's dead and wounded covered the route of the retreating army. This A. M. we have occupied Haguenau, which had been evacuated by the enemy. German troops held both banks of the Saar river, having occupied Sarreguemines and Forbach after slight resistance."

MUNICH, Aug. 9.—The King of Bavaria makes the following report concerning the battle of Worth:

"Early on the morning of the seventh instant, just as our troops had left their bivouac to march on Ergolzheim, the thunder of cannon was heard. This hastened our movements, and we soon came up with the first corps, which was engaged with the enemy."

"The Bavarian troops were placed in action at once, and participated in the assault upon the height of Guemere, which was carried about five o'clock, the French being repulsed in disorder and with heavy loss. The action was severe and sanguinary."

"The King issued congratulatory orders to the second corps, thanking them for their splendid conduct and gallantry."

PARIS, Aug. 10.—The session of the Corps Legislatif opened at two o'clock this afternoon, M. Schneider presiding. As soon as the formalities of the opening were over M. Ollivier addressed the house as follows:

"Messieurs: The Emperor in his proclamation told you if circumstances should prove unfavorable, the Emperor would call you to her. We have not waited until the situation was compromised before calling you. [Interruption.]

Mr. Favre exclaimed—This is too audacious."

M. Ollivier continued—We call you at the first signs of trouble. Some of our troops have met with reverses, but the greater portion remain unvanquished. Our citadels, our natural defenses and our munitions are intact. We ask you to aid us in organizing the national guard."

Deputy Pere—All sacrifices without you."

M. Ollivier resumed—We are all prepared. We can arm forty-five thousand men in Paris, and that the departments which are threatened are in a state of siege. Prussia hopes to add to her own advantages by our intestine trouble, but her expectations will not be realized. We shall defend ourselves. Order is safety. Now, Messieurs, one word: It were impatience at such a time to dwell upon personalities. Accuse us, doubt us; we shall not answer except to defend the measures we intend to prepare. If the chamber is not with us [ironical laughs and interruptions] it is wanting in the performance of its first duty. Let us not lose time in discussion. This I beg, as perhaps this is the last time I shall mount this throne. Make no more speeches. Send us away if you deem it best. [Shouts from the left, Yes, yes.] Deputy Dumenilin interrupts, and proposes that the presidency of the council of ministers be conferred on General Trochu."

Julius Favre demanded that the chambers should at once assume the direction of public affairs.

Paul de Cassagnac said: "If he was a minister he would send before a council of war men sustaining such a proposition."

A scene of great violence here ensued between the members.

Picard asked that the chambers pronounce a vote of censure against the ministers. The members on the left were continually demanding calls to order."

Paul de Cassagnac, who was temporarily presiding, refused to accede to these demands, saying that violence on one part would only produce violence on the other."

Finally, M. Ollivier, after great effort to make himself heard in the confusion, said: "Some of my colleagues ask me if I would have them shot." The Duke de Grammont exclaimed: "They all ought to be."

At this expression Deputy Estalclm rushed toward Duke de Grammont, shaking his fist in his face. Deputy

Favre also left his seat and threatened the Duke. The members of the right rushed from their seats and interfered, restored order, and the president put on his hat in the midst of the confusion, and the session was temporarily suspended."

M. Jules Favre on the resumption of session demanded the immediate consideration of his proposal, but it was refused by a vote of 190 to 53."

M. Clement Duvivier then proposed an order of the day declaring that the chambers, desirous of insuring energy in the national defenses, pass to the order of the day."

M. Ollivier refused to accept the order of the day, and rested the fate of the ministry on its passage, but the order was adopted, and at the request of M. Ollivier a recess was taken that he might withdraw and consult with his colleagues."

M. Ollivier returned after a brief absence, and mounting the tribune said: In the presence of the vote of the chamber, the ministry has given its collective resignation to the Emperor Regent, who has accepted it. I am instructed to declare that General Palikao has been charged with the duty of forming a new ministry. [Applause.]

As for us, we shall continue to do whatever our country demands of us, and from the present moment on our successors, whatever misfortune they may encounter, will have our support."

After the declaration the chambers separated in great agitation. In the Senate the resignation of the ministry was also announced."

LONDON, Aug. 10.—It is reported that a great Prussian victory was achieved to-day."

PARIS, Aug. 10.—General Changarnier has been placed on the general staff, and his presence has an excellent effect."

PARIS, Aug. 10, via London Aug. 10.—A dictatorship is anticipated, with General Trochu as anpromote head."

The Emperor has been invited to return to Paris and await the reconstruction of the government. His refusal is considered certain."

LONDON, Aug. 10.—The Prince Imperial of France has arrived with the Emperor's confidential agent and the Empress Eugenie's jewels."

LONDON, Aug. 10.—Paris telegrams of Tuesday afternoon and night, now coming in, do not change the aspect of affairs."

It seems true that the Emperor, when solicited to return to Paris, replied he would return "dead or victorious."

Houses, trees and all obstructions within five thousand yards of the fortifications of Metz have been destroyed."

LONDON, Aug. 10.—The Prince Imperial of France has arrived in London in charge of W. F. Smith, the Emperor's confidential agent. Smith also brought with him the Empress Eugenie's jewels and valuables, and the famous diamonds of the Duke of Brunswick."

NEARING THE OTHER SHORE.—When, after the weary voyage that I first made across the ocean, sick and loathsome, I arose one morning and went upon the deck, holding on, crawling, thinking I was but a worm, I smelt in the air some strange smell, and I said to the captain: "What is the odor?" "It is the land breeze from off Ireland," I smelt the turf, I smelt the grass, I smelt the leaves, and all my sickness departed from me; my eyes grew bright, my nausea was gone. The thought of the nearness of the land came to me, and cured me better than medicine could cure me. And when, after off, I saw the dim line of land, joy came and gave me health, and from that moment I had neither sickness nor trouble; I was coming nearer to the land."

Oh! is there not for you, old man, and for you, wearied mother, a land breeze blowing off from heaven, waiting to you some of its sweetness? Behold, the garden of the Lord is not far away; I know from the air. Behold the joy of home. Do I not hear the children shout? The air is full of music to our silent thought. Oh, how full of music when our journey is almost done, and we stand upon the bound and precinct of that blessed land! Hold on to your faith. Believe more firmly. Take hold by prayer and by faith. Away with troubles and buffetings! Be happy; you are saved. In a few hours visions of God and all the realities of the eternal world shall be yours, and you shall be saved with an everlasting salvation."

The Christian Advocate.

SATURDAY, AUGUST 13, 1870.

OUR ANGELS.

Oh! not with any sound they come, or sign,
Which deeply ear or eye can recognize;
No curiosity can compass or surprise
The secret of that intercourse divine
Which God permits, ordains, across the line,
The changeless line which bars
Our earth from other stars.

But they do come and go continually,
Our blessed angels, no less ours than His;
The blessed angels whom we think we miss;
Whose empty graves we weep to name or see;
And vainly watch, as once in Galilee,
One, weeping, watched in vain,
Where her lost Christ had lain.

Whenever, in some bitter grief we find,
All unawares, a deep, mysterious sense
Of hidden comfort come, we know not
whence;
When suddenly we see, where we were blind;
Where we had struggled, are content, re-
signed;
Are strong where we were weak—
And no more strive nor seek—

Then we may know that from the far glad
sides
To note our need the watchful God has bent,
And for our instant help has called and sent,
Or all our loving angels, the most wise
And tender one, to point to us where lies
The path that will be best,
The path of peace and rest.

And when we find, on every sky and field,
A sudden, new and mystic light which fills
Our every sense with speechless joy, and
thrills
Us, till we yield ourselves as children field
Themselves and watch the spells magicians
And the world,
With tireless, sweet surprise,
And rapture in their eyes—

Then we may know our little ones have run
Away for just one moment, from their play
In heavenly gardens, and in their old way,
Are walking by our side, and one by one,
At all sweet things beneath the earthly sun
Are pointing joyfully,
And calling us to see!

Ah! when we learn the spirit sound and sign,
And instantly our angels recognize,
No weariness can tire, no pain surprise,
Our souls rapt in the intercourse divine,
Which God permits, ordains, across the line,
The changeless line which bars
Our earth from other stars.

H. H. in Heart and Home.

TRENTON SUNDAY SCHOOL.

Mr. Editor: I give you an account of a recent celebration of the Juvenile Missionary Society of Trenton. About three months ago Bro. J. Lane Borden inaugurated a society, under circumstances rather discouraging, in this little town, and by dint of repeated efforts induced the children to take an interest in its work and object. After they began to appreciate it, however, they became enthusiastic. It was early stipulated that they should not give to the Lord that which cost them nothing, but should make their contributions out of the proceeds of their actual labor. It was amusing to see twenty or thirty boys during the day entering the stores in search of little jobs that might realize their monthly dues, and as many little girls over sewing or garden patches, or on errands, in the same spirit of self-denying toil. When their meeting transpired, as each one brought his contribution he was asked and stated whence he got his money, and it might have put the utilitarian in a brown study to have heard their responses as they deposited their mites upon the desk.

At the celebration the children were dressed appropriately and uniformly, and presented as bright a constellation of beauty as could be found, for the same numbers, in the land. The exercises consisted of hymns, speeches, recitations, etc., with a dramatic representation of their usual monthly meetings. At the close, of course, came the inevitable but ever pleasant collection and making of life members. In consequence of the weather being very inclement, the skies dripping and the streets running, we had but a limited audience, but sufficient to realize the snug little sum of \$135. Felicity street and Carondelet may look to their laurels, for Trenton Sunday School Missionary Society, under the faithful tutelage of that inimitable superintendent and friend of children, Brother Borden, aspires to be the banner society of the Conference.

Brother Borden's success with children is indeed astonishing. He will, if persevering, accomplish a great work in the Conference—a work that will multiply itself every year.

MONROE, LA., July 25, 1870.

Bigots ever think others most perversely and willfully wrong-headed.

BROOKHAVEN DIST. CONFERENCE.

Mr. Editor: This body convened at Brookhaven on the twenty-seventh of July, and remained in session three days. Eight appointments were represented. Rev. Geo. F. Thompson, presiding elder, and L. R. Redding, secretary.

In response to the first question, written reports from the several charges represented were read and discussed.

Crystal Springs and Hazlehurst charge was represented as in a hopeful condition. "Encouraging prayer and class meetings, which are generally comfortable and sometimes happy meetings."

At Wesson and Beauregard Rev. R. B. Downer reports: "Increased interest manifested in the attendance on public worship at eleven A. M. on Sabbath, but astonishing indifference and carelessness in reference to class and prayer meetings and love feasts."

Brother Day reports of Georgetown: "Some vitality in the church, and symptoms of improvement manifest."

Brookhaven was reported as in a very cold condition. No prayer or class meetings.

Brother Nicholson, from the Martinsville circuit, gave a very encouraging account of this work. All the social meetings of the church well attended, and, as a consequence, glorious revivals. More than forty converted at Bahala chapel recently.

Pleasant Valley and Rehoboth were represented by Brother Wadsworth as decidedly lukewarm. Social meetings of the church much neglected, and much indifference among the membership.

The secretary failed to get Bro. Sharbrough's report, of Scotland circuit.

The financial condition of the several charges, excepting Martinsville, is discouraging. Sunday schools flourish everywhere.

The second question, "How can the spiritual interests of the church be promoted?" elicited a very interesting discussion, participated in by the delegates generally.

Pleasant Valley was selected as the place for holding the next conference.

The prayer meetings, held morning and evening during the session, were "seasons of refreshing from the presence of the Lord."

Rev. M. J. Whitworth, Jehn Dunning, V. J. Wroten and Levi Godbolt were elected lay delegates to the ensuing Annual Conference.

Rev. Thomas King, Jesper Thompson, J. M. Wesson, Jr., and Fletcher Enoch, alternates.

Conference adjourned at noon on the twenty-ninth of July.

L. R. REDDING, Sec'y.

MINISTERIAL EDUCATION.

Mr. Editor: I notice in your issue of the twenty-third instant an article from Rev. H. J. Harris on the above subject. He calls upon me, as the president of the Ministerial Educational Association of the Mississippi Conference, to bring the subject of auxiliary organizations and the giving of material aid before the friends of the cause within the bounds of our Conference.

As you are aware, Mr. Editor, I have heretofore done so in your paper, early in April last. But as it is a subject near my heart, I thank the brother for his interest in the cause, and do most earnestly entreat all who are interested in this important enterprise—and who is not?—to at once go to work. There are a number of interesting young men who are asking the church to assist them in their literary and ministerial education. Let us help them. Organize at once. Concentrated effort will accomplish the great design, and send out many polished shafts into our Master's vineyard. I solicit clerical and lay members to redeem their pledges.

Yours in Christian love,

THOS. REED.

FAYETTE, July 29, 1870.

Worldly pleasures are no more able to satisfy the soul than the light of a candle to give day to the world.

The man who is venial himself believes that everybody has his price.

SHARON FEMALE COLLEGE.

TO THE LADIES WHO HAVE ATTENDED SCHOOL THERE.

The dormitory and boarding house

of this institution was burned down in August, 1868, and owing to the stringency of money matters has not been rebuilt. Such a building is felt to be a necessity to the college. We must have a boarding house for the young ladies who attend this school. To help us erect this house we make an appeal to all the ladies who have ever attended school in this college—however limited or long the term—to send us a contribution for this purpose. Cannot each one of you send me from \$1 to \$10? Cannot each one of you raise and send me \$10, if not able to pay that amount yourself? Please to try, and let me hear from you.

If you will do it the house will go up speedily, for there are thousands of these ladies. They are to be found in Georgia, Alabama, Mississippi, Louisiana, Texas, Arkansas, Tennessee, Kentucky, Illinois, Missouri, Massachusetts, California, and in how many more States I am not now prepared to say.* Remit by post office money order on Canton, Mississippi, or draft or registered letter to me at Sharon, Madison county, Mississippi.

I doubt not but many ladies and gentlemen who may see this will feel it to be a privilege to respond to this call for help. Please to send me your contribution at once.

H. H. MONTGOMERY, Agent.

P. S.—The papers of the States above named will confer a favor on the trustees of the college and advance the cause of education by publishing this appeal and calling attention to it.

* Brazil and Honduras also.

THE LATE HON. A. B. LONGSTREET.

HIS LAST HOURS.

The week just gone has called on the literary world to mourn the loss of one of its highest ornaments, and has robbed religion of one of her most zealous and able servants. On Saturday, the ninth of July, the Hon. Augustus Baldwin Longstreet died, covered with the honors accumulated through a life of eighty-one years. For a week previous to his decease he had been suffering from a severe attack of chills, but after the first two or three days had rallied so far as to sit up, to read and to write. Late on Wednesday evening he declared his intention of sitting up through the whole of the next day; but early in the morning he was seized by a chill, which rapidly developed into pneumonia, and then he sank rapidly.

His last hours were remarkable, even for those of a true Christian. To within two days of his death, and while prostrated by disease, his aged and trembling hands were eagerly writing on a work of a religious character, to which the last part of his life had been devoted. An ineffable peace settled around him, quieting even the grief-stricken about his bedside. All the numberless moments of his life, which had been consecrated by his remarkable, unhesitating trust in God, seemed to gather from the by-gone years, drawing around him in the trying hour of death to sustain and brighten him and his. When questioned respecting his spiritual condition, raising his hand, he replied: "There is not a cloud." So unshaken was this repose that he watched the approach of death with the curious interest of one making a new and important chemical analysis rather than with the tremulous apprehension of one about to enter the unknown and awful hereafter.

The parting of the soul and the body was an event which he had made the topic of his daily conversation. When the time came, with a wonderfully lucid mind he gave the closest scrutiny to the loosing of every tie which united the two; and it is very doubtful whether any soul of the millions departed can tell more of the rationale of death than that of Judge Longstreet. With his own fingers he counted the failing pulse. When he could no longer move his hand he made one of his attendants place it on his wrist, and, looking around on the loved ones he was leaving, he quietly exclaimed: "Almost gone." At four o'clock in the afternoon, and without pain, he expired, with the light of a glorified smile playing over his face. In St. Louis Christian Advocate.

of the science of manners is an al-

most absolute silence in regard to

yourself.

Gilt tassels, as a sign of noble

birth, will no more adorn the caps

of Oxoniens.

RELIGIOUS INTELLIGENCE.

THREE PEERS—Lords Radstock, Farnham and Teynham—are at present preaching in Great Britain.

The Established Church of Scotland asks of Parliament \$85,000 this year to supplement the salaries of its poorer ministers. The Free Church gives all its ministers a living salary, and asks no favor.

A DREADFUL massacre of Christians is said to have taken place at Pekin, China, on the twenty-first of June. A French secretary of legation, with a number of Sisters of Mercy, priests and Russians, were ruthlessly slaughtered, and a cathedral burned.

The anniversary of the institution of Christianity in the Hawaiian Islands was celebrated at Honolulu with unusual enthusiasm. The entire native and foreign population from that and adjacent districts, and many persons from other islands, attended.

PEWS.—The rental of pews in eight or ten of the principal churches of Chicago, of several denominations, was found by actual examination, a short time since, to average from \$60 to \$75 per pew, which, says a contemporary journal, is a virtual exclusion of the poor.

THE German Protestants in Egypt, who, for a long time, have had a church and hospital in Alexandria, have established a second congregation in Cairo, and recently the Crown Prince of Prussia laid the corner-stone of this new church, to which his father made a donation of twenty thousand guilders.

A TIME OF REFRESHING.—For a week past our Minna street church has been enjoying a time of refreshing from the presence of the Lord. Many of the members are spiritually much revived, and an unusual interest is manifested by other members of the congregation. The evening services are still continued. San Francisco Spectator.

THE English Bishop of Colombo, Ceylon, writes that Bishop Colombo's writings are being used vigorously against the religious work of the missionaries by the Buddhists there. They have printed tracts made up of the Bishop of Natal's objections to the Pentateuch, and used them in attack of the Bishop of Colombo. They have excited some considerable feeling of alarm among the Christian converts.

THE BAPTISTS OF GREAT BRITAIN.—The latest statistics show the churches to number 2,563; ministers, 2,504; members, 237,435; missionary churches, 1,209; members of ditto, 163,311. Of these churches 46 were built during last year; the increase during the year was 9,982. Of the churches 219 are in London. Wales contains over 600 churches, and more than 60,000 members, the recent growth there having been very great.

MORAVIANS.—The membership of the Moravian Church in America, Northern and Southern Province, British Province, and "German," is twenty-five thousand, a gain over last year of one hundred and seventeen. The missions of the church employ seventeen missionaries, two of them women, and have congregations containing sixty-nine thousand one hundred and twenty-three persons, making the Moravians number in all ninety-four thousand five hundred and twenty-four persons.

THERE appears to be some truth in the report that the Marquis of Bute will return to the Church of England. The John Bull says: "We hear on good authority that there is every probability of the Marquis of Bute returning to the Anglican Church. When his secession to Rome was first announced in these columns, six months before it was avowed, the statement was received with an indignant denial, and, doubtless, the same will be the result now. Our information, in both cases, is from the same quarter."

CHRISTIAN WORK reports \$3,396,350 raised in England last year for foreign missions by thirteen societies, \$1,177,690 for home missions by twelve societies, \$304,000 for Jewish missions, \$235,630 for colonial and continental missions, and \$821,715 for educational societies, including fees. The largest receipts are \$911,325 for the Bible Society, including sales, after which come the large missionary societies in the following order: Wesleyan Missionary, Church Missionary, Propagation Society and London Missionary.

SEVERAL of the Presbyterian churches of Brazil report additions, and chiefly converts from Romanism. At the last communion in Rio Janeiro two young men were received on profession of their faith. At Lorena three persons were baptized and admitted to the church on profession of their faith. At Brotas one old man—"a miracle of grace"—was received, and at Sao Paulo three were admitted to the church on examination, and three on certificate, and four children were dedicated to God in baptism. The brethren in Rio de Janeiro have at last been enabled to purchase a desirable property for a chapel.

THE Cross Gazette, of Berlin, learns from Rome that the Oriental Catholic Church of the Armenians has entirely separated itself from the papal chair. This news has caused much ill feeling at the Vatican, where the blame is attributed to France. The United Chaldeans now, it is said, intend to break off all connection with Rome, and the Copts are about to do the same.

The Eastern bishops approve of the course adopted by their sees, and Mgr. Pluyin announced, in his last dispatch from Constantinople, the approaching withdrawal of the Maronites, Syrians and Greek Melchites from communion with Rome.

In this case the Pope will have entirely lost all his power in the East.

THE Sacramento Union gives an account of a Chinese wedding in that city. The bridegroom, Som Hing, is a well-to-do Chinaman, and a member of one of the Chinese Sunday schools. The bride, Miss Gut Quill, had been betrothed to him since childhood, and arrived by the last steamer. Two or three American families accorded her protection before marriage, as it was not safe for her to reside on the Chinese street; and the wedding, which was to take place in the Congregational church, was celebrated the day before at the residence of Rev. S. C. Dwinell, as the parties were afraid she might be kidnapped. This is the first case in California of a Chinese marriage by a clergyman.

DR. HERRMAN, the Presbyterian missionary in Japan, writes, under date of May 19, that he is engaged regularly in the translation of the gospels. He has finished Matthew, Mark and John, and was about half through Luke. His Bible class continues prosperous, and the dispensary was never so hoped as it has been of late. "I would the kingdom of Christ is steadily but quietly advancing in Japan. There is a good deal doing in a quiet way which will tell some days hence."

Rev. Mr. Cornes writes in a similar strain. Several Buddhist priests are studying the Scriptures with the missionaries at Yedo. More than one inquirer is mentioned. A reinforcement of men is called for from the united church.

THE Congregationalist says that Mr. Nathaniel Willis, the father of the poet, whose death was recently announced, deserves the honor of being the founder of the "first religious newspaper (Boston Recorder) ever published in the world." The Christian History, issued at Boston, March 5, 1743; the Herald of Gospel Liberty, published at Portsmouth, New Hampshire, September, 1808; and the Religious Remembrancer, printed in Philadelphia, in 1813, were in the field before it, but they were not designed to be newspapers. The Recorder was "the first journal which presented to the public a newspaper complete in all its parts, yet distinctly religious in its character, aims and ends."

The past year the American Home Missionary Society employed 946 ministers in its service. Of these 311 were in the New England States, 71 in the Middle, 6 in the Southern, and 556 in the Western States and Territories, including 31 on the Pacific coast. Of the whole number 556 have served a single congregation, 257 have ministered to 2 or 3 congregations each, and 131 have labored in a yet wider field. They report 3,322 additions by profession and 3,082 by letter, and revivals in 73 places. They have organized 76 new churches, and 52 have become self-supporting. The receipts have been \$283,103, an increase of about \$40,000. New England contributed \$208,034, and expended within her own limits \$64,775.

The nineteenth Annual Conference of the Evangelical Methodist Church of France and Switzerland opened on June 17, in Lausanne. The whole number of ordained ministers in the Conference—twenty-five—were present. The Conference was larger this year than formerly, the Conference of last year deciding that this should be a general one. Several important questions were to be brought up for decision—such as the holding of the Conference only once in two years, the admission of laymen as delegates, and the division of districts. Rev. L. Pulsford presided, and Rev. J. P. Cook was secretary. Two young men were taken into full connection, and two were received on trial. In the afternoon of the first day several propositions were made in regard to the period of holding the Conference.

A CORRESPONDENT of the Evangelical Witness (Canada) writes that paper that "the adoption of the principle of lay representation by the Episcopal Church in Ireland has evoked a discussion on the same subject in Wesleyan Methodist circles in that country, and the result has been that memorials have been sent from Belfast and other towns urging the introduction of the same principle into the Wesleyan Conference. If the laity act wisely they will keep the ball

rolling; if the Conference act wisely they will permit no bitter agitation on the matter, but be prepared to concede the rights of the laity when public opinion among them is ripe for this modification of their system. The adoption by the senior body of the principle of lay representation would lead to a fusion at no distant period of several Methodist bodies. But old and large bodies in an old country are intensely and stubbornly conservative, and not in our day do we expect to see so desirable a consummation realized as that we have indicated."

OPINION in favor of the disestablishment of the Anglican Church is gaining in England. The motion recently introduced in the House of Lords for excluding all bishops hereafter created from a seat in that body has considerable significance. The passage of the bill was urged with much vigor, but it did not obtain. Mr. Beaumont, who introduced it, believes that it would be better for the State if its connection with the church were severed. The object of the resolution, however, was to confine the bishops to their ecclesiastical duties. If the bill had been passed, how long would it have preceded disestablishment? The National Church would then be without representation in Parliament.

Dissenters, Jews, and others who are hostile to the establishment, enter largely into the composition of the House of Lords, and, would, it is safe to predict, if the bishops were denied seats in the House, soon sever the connection between church and state.—Methodist.

THAT \$5,000,000.—The Presbyterians, it is generally known, have resolved to raise a "thank-offering" of \$5,000,000 as a memorial of the reunion of their churches. The plan, says the Christian Union, resolved upon by the committee for doing this includes the distribution among the four hundred and thirty-five thousand members of the church of one million "free-will offerings" of ten cents each week for fifty weeks, each contributor becoming responsible for one or more contributions. Instead of contributing to the general fund, contributors are enabled to subscribe directly to any of several religious enterprises—to "theological seminaries and colleges, and seminaries, for the education of our daughters, including buildings and endowments of the same, it being understood that such institutions shall be chartered and shall be in connection with the Presbyterian Church;" to "literary institutions for the raising of a native gospel ministry in heathen lands;" to "church buildings and mansees originating subsequently to the union, and otherwise entitled to public aid; hospitals and orphan asylums in connection with the church;" to "institutions for the education and evangelization of the freedmen;" or "for the establishment of a permanent sustentation fund, which shall include appropriations for the support of disabled ministers and their families." The names of donors are to be preserved in the archives of the church, and certain certificates issued to them.

THE HAWAIIAN JUBILEE.—These semi-centennial jubilee commemorating the introduction of Christianity in the Hawaiian Islands commenced at Honolulu on the fifteenth of June and was to be continued for one week. The Honolulu Gazette gives the following account of the initiatory services:

"On Sunday morning Rev. M. Kuaca delivered a semi-centennial sermon in Hawaiian at Kawaiahaeo Church, and in the evening Rev. Dr. Damon delivered the semi-centennial sermon in English at the Fort street church. On Monday evening Mrs. Thurston gave readings of reminiscences of fifty years ago, at Fort street church, to a large audience, which was deeply interested in the recital of the experiences of the venerable lady, who is one of the few remaining of those devoted missionaries who, fifty years ago, landed on these shores and commenced the work of evangelizing this people—a work which they have so gloriously accomplished. Last evening the reminiscences of Rev. A. Bishop and Mrs. M. P. Whitney were read at the same place."

The Gazette describes the jubilee procession composed of clergymen, members of the Legislature, Sunday schools, citizens, etc., and gives a programme of the various addresses and other public exercises of the occasion.

"A collation was given at the close of the exercises to which the King, to show his good will and desire to co-operate, made a right royal donation of ten thousand pounds of poi, twenty hogs, eight sheep, four hundred mullet fishes, one bullock, etc."

"There were also examinations of schools, missionary meetings, commemorative speeches, and social festivities. The jubilee, in honor of the greatest event in the history of the islands, was observed in a spirit worthy of so great an occasion."

The Christian Advocate.

SATURDAY, AUGUST 13, 1870.

TWO MOONS.

I picked the barrels as I went
Singing above the river side;
The skies above were opulent
Of sunshine. "Ah! what'er betide,
The world is sweet," I cried,
That morning by the river side.

The curlew called along the shore;
The hounds put out from sandy beach.
After I heard the breakers' roar
Mellowed to silver-sounding speech:
And still I sang it o'er and o'er—
"The world is sweet for evermore!"

Perhaps to-day some other one,
Trotting along the river side,
Content beneath the gracious sun,
May sing again: "What'er betide,
The world is sweet." I shall not chide,
Although my song is done.

CONCERNING PREACHERS.

Not concerning priests; for they have "gone out"—or, at least, are going out, like last year's bonnet. So great were the sacerdotal institutions of Judaism that they projected their rugged shadow across nearly two thousand years of Christian history. But it is only a shadow. And the light is scattering it. We do not wish to write of priests Catholic or priests Protestant, High School priests or Puritan priests. Neither Christ, nor Peter, nor Paul knew anything of the special privileges of a special class who might claim to have access to the private ear of God. And in this day we are coming back, not to apostolic succession, but better, to apostolic simplicity. We are learning to see God as he is, with eyes and ears open alike to the voices of all his children, and to know that every trustful soul is a king and a priest unto God.

We are not writing about ministers. A minister is a servant. But, like many other humble titles, it has come to have a cant sense the very opposite of its etymology. A minister is a far more respectable person than a preacher. You cannot tell why; but it is so. Some years ago a Presbyterian divine, in a catholic and brotherly frame of mind, attacked his Methodist brethren fiercely in a series of diatribes headed: "Letters from John Smith, a Presbyterian minister, to Peter Smith, a Methodist preacher." The very essence of Christian generosity was wrapped up in the distinction between a minister and a preacher. A Methodist gladiator entered the lists, however, with a series of "Letters from Peter Smith, a Methodist minister, to John Smith, a Presbyterian preacher." He had the advantage of the alliteration, which was probably as high an advantage as either of the combatants sought. But the incident illustrates the assumption of a class distinction in the title, minister. It is the professional badge. We have too many ministers; we have too few preachers.

A minister is a member of one of the learned professions, and he feels it. A preacher is a man who has something to say, and who says it. What we wish to call attention to is, that there is an ever-increasing demand for preachers. And no means are taken to supply the want. A theological seminary does not make preachers. It turns out ministers.

Let us be more definite. To be a divine, one must know theology. To be a preacher, one must know men. In the business of preaching the knowledge of man is the chief thing. A man may be a theologian and a preacher. But he may be a preacher without being a theologian, while speaking of Spurgeon's theology is an indifferent, second-hand article, held without any intelligent thought or any particular learning. But Spurgeon's knowledge of men and sympathy with men is all but boundless. We doubt if Henry Ward Beecher ever mastered systematic theology. We feel very sure that his opinions are not susceptible of formulation. Theological professors have not cared to conceal their contempt for his views. But what theologian in the country, with all his erudite mastery of the lore of the schools, can so lay bare the human heart, can so quicken the human conscience, can so lift up into trust the human soul? We question much if Bishop Simpson could pass any kind of muster at a theological examination. He was never in a seminary in his life. But he knows the secret spring that opens the fountain of human feelings; he can melt the heart and lift the soul of thousands. He is a preacher.

Do not misunderstand. We say not a single word against theological knowledge and study. No man is the better for his ignorance. But we do say that the churches, orthodox and heterodox, are not crying out for scholars, but for preachers. We do say that ten years in academy, college, seminary, at the formative period of a man's life—ten years of monkish isolation from all but students and scholars—has a tendency to wither those sym-

thies that are indispensable to the preacher. Men of exuberant life and tender feelings survive the process. But many a man is sent out to be a mere minister, a white cravat, surmounted by gold-rimmed spectacles, without much human blood or feeling, who might, under a right treatment, have attained to the high destiny of being a preacher. For a preacher need not be eloquent, but he must be fresh; he need not be pathetic, but he must be tender; he need not be learned, but he should be devout; he must be, as a great preacher once put it, "More a man and less a clergyman."—*Independent.*

DEATH WARRANT OF CHRIST.

Chance has put into our hands the most imposing and interesting judicial document, to all Christians, that has ever been recorded in human annals—that is, the identical warrant of our Lord Jesus Christ.

We transcribe the document from a copy of the translation: Sentence rendered by Pontius Pilate, acting Governor of Lower Galilee, that Jesus of Nazareth shall suffer death on the cross. In the year seventeenth of the Empire of Tiberius Caesar, and the fourth of March, in the city of Holy Jerusalem: Adams and Caiaphas being present, sacrificators of the people of God.

I, Pontius Pilate, Governor and procurator, condemn Jesus of Nazareth to die on the cross between two thieves—the great notorious evidence of the people saying:

First. He is a seducer.
Second. He is seditious.
Third. He is an enemy of the law.
Fourth. He calls himself, falsely, the Son of God.
Fifth. He calls himself the King of Israel.

Sixth. He entered the temple followed by a multitude hearing palm branches in their hands.

Order the Centurion Quirinius to lead him to the place of execution. Forbid any person whatsoever, poor or rich, to oppose the death of Jesus.

The witnesses that signed the death warrant of Jesus are:
First. Daniel Robani, a Pharisee.
Second. James Morhable.
Third. Caiaphas, a citizen.

Jesus shall go out of the city by gate Srenuous.

The above sentences are engraved on a copper plate. On one side is written these words: "A similar plate is sent to each of the tribes." It was found in an antique vase of white marble while excavating in the city of Aquilina, in the kingdom of Naples, in the year 1822, and was discovered by the commissioner of arts attached to the French army. At the expedition to Naples it was found closed in a box of ebony in the Sacristy Courten. The French translation was made by members of the commissioners of arts.—*New York Courier Etats Unis.*

MARTYRDOM OF PASCAL.—Of all its opponents Rome most hated the Vandois. To bind one of the primitive Christians to the stake seemed to give strange satisfaction to their modern persecutors. In September, 1560, Pope Pius the Fourth and his holy college gathered at Rome to witness one of their favorite spectacles. A pile had been raised in the square of St. Angelo, near the bridge over the Tiber. The people assembled in a great throng. The condemned, a pale and feeble young man, was led forth, when suddenly he began to speak with such rare eloquence and force that the people listened. The Pope grew angry and troubled, and the inquisitors ordered the Vandois to be strangled, lest his voice might be heard above the flames. Pius the Fourth then saw the martyrdom in peace, and directed the ashes of his foe to be thrown into the Tiber.

The martyr was John Louis Pascal, a young pastor of great eloquence, who had been called from Geneva to a congregation of Vandois in Calabria. The post of danger had a singular charm for the brilliant preacher. He was betrothed to a young girl of Geneva. When he told her of his call to Calabria she cried, with tears: "Alas! so near to Rome and so far from me!" Yet she did not oppose his generous resolve, and he went to his dangerous station. Here his eloquence soon drew a wide attention. He courted, by his boldness, the crown of martyrdom. He was shut up in a deep dungeon, was chained with a gang of galley slaves, was brought to Rome where Paul had suffered, and was imprisoned in a long confinement. His persecutors strove to induce him to recant; but no bribes nor terrors could move him. He wrote a last fond exhortation to Camilla Gnarina, his betrothed; his eloquence was heard for the last time—*Harper's Magazine.*

He who truly loves God delights to meditate of him, and to discourse of him, and to hear the mention of his name, and is weary of the conversation where God is seldom, slightly or never remembered.

ARCHBISHOP USSHER.

This great man was a strong and a sound Protestant. Were he living in these our days many would style him a bigot, a sectarian, or a hot polemic; but in his times the fear of Romanism had generated both the knowledge of the system and the hatred of it, for the blood, poured out on English soil, of the Marian martyrs had scarce had time to be exhaled to heaven, or their ashes borne away on the winds.

Three years after his marriage he assisted much and materially in drawing up the articles of the Irish Church, at that time a distinct establishment from that of England. It was a sister church in doctrine, in its liturgy, and in the mutual participation of its pulpits with those of the English clergy; but still each church was a complete body by itself, and remained so till the Act of Union with Ireland in 1800, which international tie has been lately severed by Mr. Gladstone's bill.

At this union the two churches became one, as "the United Church of England and Ireland," the English Thirty-nine Articles having been received and adopted by the Irish sister long before, through Land and Stratford's agency, and with the consent of Ussher. But we have reason to believe that as Ussher advanced in years the sterner Puritanism which Travers had taught him in college gave way, his views became enlarged, and his mind was imbued with more genial and scriptural conceptions of the wide-spread love and grace of God to a sinful world.

These Irish Articles are now a mere matter of history, having been in abeyance for two hundred and fifty years. We are told, however, that Ussher would still recur to them when he was examining candidates for the ministry.

About 1655 Cromwell heavily oppressed and evil-entreated the Episcopalian party. The clergy were forbidden to exercise their functions, or even to teach their children. Ussher went to the Protector to mediate. He found him in the hands of a surgeon, who was dressing a boil on his breast. "I shall be all right," he said, "when the core is out."

"I fear," answered the primate, "that the core lies deeper—there is a core in the heart which must be taken out before all this is right."

"Ah," said Cromwell with a sigh, "it is so, indeed."

The primate's mission was a failure. He had abundance of civil speeches, but Cromwell would give him no satisfying promise, and Ussher left him sad and foreboding.

On the twentieth of March, 1655, this great and good archbishop fell asleep in Christ, and entered into the rest prepared for the people of God. He was seventy-six years of age, and had held his episcopate for thirty-five years. His death was rather sudden. He was ill but two days, and these he spent in prayer and preparation for his change. He had perfect peace even to the end, and the last words which his lips framed were: "Oh, Lord, forgive me, especially my sins of omission."

Cromwell, on hearing of his death, issued an order that he should be honored by a public funeral in Westminster Abbey. This was fully carried out, and his revered dust reposes in St. Erasmus chapel, next to the tomb of Sir James Fullerton, his early instructor in Dublin. Toward the heavy expenses of this unburied funeral Cromwell contributed out of the deadlands in his almoner's chest £200; while Ussher's family, who all along desired that he should be interred quietly and privately in the Peterborough vault at Reigate, had to pay fully £600!

There is a striking anecdote related of Ussher on the authority of one man, which tallies so well with the traits of his character as almost to establish its authenticity. He had been benighted, and lost his way when traveling; and seeing a rectory at hand, he knocked at the door and demanded a night's lodging, concealing his name and rank, and merely stating his sacred profession. This the clergyman rudely questioned, saying that he doubted "whether he knew the number of the commandments."

"Indeed I do," said the archbishop; "there are eleven!"

"Eleven!" rejoined the clergyman; "tell me the eleventh and I will assist you."

"If you obey it," said Ussher, "you certainly will."

"A new commandment give I unto you, that you love one another."

Some minds may have attained to a degree of what the people of his day called the "stupendous learning" of the great archbishop, but very few men have been found to combine his natural genius and acquired knowledge with such a measure of Christian activity, such holy consistency of walk and way, such a ready upstanding and valor for the truth at all times, yet ever sweetened and adorned with the meek and quiet spirit which is in the sight of God of great price. These qualities, fully as much as his intellectual power, threw a halo around the character of James Ussher in life, and now that he is gone the remembrance of them rests brightly on his name.

HOME.—Home is the one place in all this world where hearts are sure of each other. It is the place of confidence. It is the place where we tear off that mask of guarded and suspicious coldness which the world forces us to wear in self-defense, and where we pour out the unreserved communications of full and enfolding hearts. It is the spot where expressions of tenderness rush out without any sensations of awkwardness, and without any dread of ridicule. Let a man travel where he will, home is the place to which his heart, untraveled, fondly turns. He is to divide all pleasure there. He is to divide all pain. A happy home is the single spot of rest which a man has upon this earth for the cultivation of the noblest sensibilities.

And now, my brethren, if that be the description of home, is God's place of rest your home? Walk abroad and alone by night. That awful other world, in the stillness and the solemn deep of the eternities above, is it your home? Those graves that lie beneath you, holding in them the infinite secret, and stamping upon all earthly levity the mark of frailty, and change, and fleetingness—are those graves the prospects to which, in bright days and dark days, you can turn without dismay? God in his splendor—dare we feel with him affectionate and familiar, so that trial comes softened by this feeling—it is my Father; and enjoyment can be taken with a frank feeling—my Father has given it me, without grudging, to make me happy. All that is having a home in God. Are we at home there?—*Robertson's Sermons.*

VOICELESS FLOQUENCE.—The following touching story of "a handsome English coach dog" and his drunken master is vouched for by a leading Boston paper:

"The man pursued his devious course, closely followed by his four-footed companion, until at length he approached the door of the saloon referred to, and was about to enter, when, to the surprise of all who had witnessed the affair, the dog jumped up and, catching the skirts of the man's coat, sought to prevent him from going in. The infuriated biped spoke in angry tones to the beast, but without avail, until a more than ordinarily severe command induced him to relinquish his hold, and the man hastened inside, followed by his faithful companion and would-be protector.

"Actuated simply by curiosity, we also went in, and as we gained a position near the bar, saw in close proximity thereto the beast and his master, the latter trying to reach the bar, and the former standing on his hind legs, with his fore paws placed against the man's breast, vainly endeavoring, even at the eleventh hour, to prevent him from again indulging in the intoxicating cup."

"To the credit of the bar-tender he is stated, he refused to furnish the man with more liquor, and tears were drawn from eyes that had long been numbed to the mellowing mood, as at each refusal the undoubtedly heart-stricken canine would hew a look, intended doubtless to be one of gratitude upon the dispenser of 'juleps,' 'slings' and 'tads,' and then turning, would, as it were, mutely beseech his liquor-loving master to abstain."—*Exchange.*

EXTINCT FAMILIES.—Robert Stephenson leaves no family behind him. His wife died many years ago, and he remained a widower; so the direct line from George Stephenson, the eminent English engineer, has died out. James Watt, the noted English inventor, left no descendants. It appears that the men noted for mechanical genius, like many of those famous in literature, science and government, leave no children to perpetuate their names. Shakespeare, Milton, Bacon, Newton, Harvey, Pope, Mansfield, Goldsmith, Congreve, Hume, Bishop, Butler, Locke, Hobbs, Adam Smith, Bentham, Davy, Sir Joshua Reynolds, Sir Thomas Lawrence, Byron, Lord Clyde and others well known to fame in British annals, have no living representatives now living.

A snip should not be made to depend on one anchor, or life on one hope.

"MEN OF HOT HEARTS."

The earnestness of the adherents of error is enough to crimson our cheeks. It is not long since thirty young Jesuits (imitating the men of the Solemn League and Covenant high three centuries ago) opened a vein in their arms, and dipping their pens in their own blood, wrote a letter to their superior, announcing their willingness to go wherever he was pleased to send them. Will not the true "Order of Jesus" send forth an increasing number of illustrations of kindred earnestness?

"We need men of hot hearts to tell of the love of Jesus," was the appeal sent home by some Chinese converts, the other day. This is what the church needs—"men of hot hearts."

"I would ye were hot," is the Master's cry.

If we are to succeed we must be on fire about it. Dr. Arnot, of Edinburgh, tells of his being at a railway station one day, and wearied of waiting for the train to move, he asked one of the men what the trouble was: "Is there a want of water?"

"Plenty of water, sir," was the prompt reply, "but it's no' bilin'."

That's the trouble with the church to-day. There's abundance of machinery—the engine is all in order, the train is made up, the men are all at their posts—"there's plenty of water, but it's no' bilin'." The great motive power is wanting. We need to heap on the fuel of sound doctrine; not shavings of sentiment which may make a big blaze only to go out as quick, but the solid logs of fundamental truth—chunks, if you will.

But we need yet more the fire—to be baptized with the Holy Ghost as with fire.

"Come, Holy Spirit, heavenly dove, With all thy quickening powers; Come, shed abroad a Saviour's love, And that will kindle ours."

"Christ formed us, dwelling in our hearts by faith"—that will do it. "Deeper, deeper and you will find the Emperor," cried one of the scared veterans of Napoleon's Guard, as the surgeon, probing a deep wound with his lancet, had got very near the heart. Can we, who profess to be soldiers of a grander army and a more illustrious Commander, say the same? A whole burnt offering; a living sacrifice; a thorough, whole-hearted service; a soul with the zeal of our Father's house consuming it; and the love of Christ constraining it; *this* is what we want.

Let us throw our hearts, then, into "the great battle of God Almighty."

The heart of the Captain of Salvation is in it all the time. Having spoiled the principalities and powers, triumphing over them on his cross, he hath set down on the right hand of the Majesty on High, from henceforth expecting (always *expecting*, in the darkest period of the world and church never doubting,) until his enemies be made his footstool. Though his body be on the throne, his soul is on the battle-field.

When the heart of the Prince of Bannockburn was being borne in an urn to Jerusalem, the noble Douglas, with the brave escort who accompanied it, were assailed by the infidel Turks.

Almost overcome by the swarming horde, the little band of heroes recoiled, when their leader threw the casket which contained the precious treasury into the midst of the enemy. It roused the lagging spirits of his men. They fought with redoubtable energy for the heart of their dead king, and their enemies did lick the dust.

Not the heart of a dead but a living King is with us. And as we, rather than those who claim it, have the best right to claim it, "Brethren and sisters of the sacred heart, let us be stimulated by the thought that the heart of the living, loving Christ is here, in the world's great field of battle."

"Oh! who would not a champion be in this the fiercest rivalry? To see ye, then, brave brother hand, With honest hearts and working hands. We are but few—toll-tried, yet true, And hearts beat high to dare and do; Oh! there be those who need to see The day dawn of our victory. Work, brothers, work—work hand and brain. We'll win the golden age again."

A GREAT change seems to be coming over Constantinople in the matter of female education, thanks to the efforts of Munif Effendi, who is endeavoring to establish a normal school for the training of female teachers. This will doubtless prove an important step toward the deliverance of Turkish women, and the elevation of Turkish domestic life, now so barbarously tyrannical. The idea that women must receive some education has been gaining ground in Turkey for the last few years, and the example of the successor to the throne will aid its growth: he has just placed one of the ladies of his household in the family of a European physician for mental training, and she has even adopted the European costume.

Thy friend has a friend, and thy friend's friend has a friend—he disceet.

Boys AND GIRLS.—Boys and girls are not the same. They are born different, and show it while they are infants. The boy-baby is restless and uneasy in his mother's arms. He is never still except when asleep, and even then tumbles from side to side in his crib with sudden flings of arms and legs. When he grows beyond babyhood he plays differently. Without ever being told of it, he instinctively turns away from dolls, lays them aside in indifference, and freely donates them to whatever little girl will have them. He demands balls and bats and drums; he turns down chairs for horses, lays hold on all the strings of the house for lines, wants all the little sticks made into whips, mounts lounges and drives four-in-hand; he asks for guns, and wants you to tell him stories of bears and lions and tigers, and is amused beyond measure at their leaping upon and eating up crows and oxen. The girl-baby is gentle, even from the first, and looks quietly out of the blue eyes, or laughingly out of the dark ones. She takes naturally to her dolls, and never wearies of dressing them and arranging the baby-house; she is gentle in her plays, and would be frightened with what would fill her brother with a paroxysm of delight; she loves fairy tales, and will not laugh and ask some absurd question about the babes in the wood, but rather cries over their sorrows. The sister will smooth pussy and hold her lovingly in her lap, while the brother wants to see if the cat can jump, and when she tries to get out of his undesirable company, will detain her by the leg or tail. And these same divergences of disposition and character perpetuate themselves as the boy or girl grows older. There are exceptions, it is true; some boys have all the tastes and gentleness of a feminine nature, and some girls have much that is masculine. I do not regret seeing it in each. The gentle boy will not make any the less noble man because there was so much that was girl-like in his childhood, nor will the girl that was, in her rudeness, often called a boy, be any the less, but perhaps all the more a true and lovely woman.—*Dr. Allen's Life at Home.*

STEPHEN ALLEN'S POCKET-PIECE.—The following was found in the pocket-book of the Hon. Stephen Allen, who was drowned from on board the Henry Clay:

Keep good company or none. Never be idle. If your hands can't be usefully employed, attend to the cultivation of your mind. Always speak the truth. Make few promises. Live up to your engagements. Keep your own secrets, if you have any.

When you speak to a person look him in the face.

Good company and good conversation are the very sinews of virtue. Good character is above all things else. Your character cannot be essentially injured except by your own acts.

If any one speaks evil of you, let your life be so that none will believe him.

Drink no kind of intoxicating liquors.

Ever live, misfortune excepted, within your income.

When you retire to bed think over what you have been doing during the day.

Make no haste to be rich if you would prosper. Small and steady gains give competency with a tranquil mind.

Never play at any game of chance. Avoid temptation, through fear you may not withstand it.

Earn money before you spend it. Never run into debt unless you see a way to get out again. Never borrow if you can possibly avoid it.

Do not put off until to-morrow that which should be done to-day. Do not marry until you are able to support a wife.

Never speak evil of any one.

Keep yourself innocent if you would be happy.

Save when you are young, to spend when you are old.

Read over the above maxims at least once a week.

A JAPANESE encyclopedia gives us an interesting account of the sun and one of their Joshinas in ancient times. In the year two hundred of our era a battle was fought in the Corea, between the consort of the Mikado and the State Suira. Before the battle was decided the sun was on the point of setting. The sacred princess then drew her sword and beckoned to the sun, when that luminary turned back in its course, and it became noon. The spirit of the Pure and Good then came to the aid of the sorely pressed Japanese fleet, and aided it in gaining a complete victory over its enemies.

AN AMERICAN, making the tour of Ireland, stepped into a school of some forty children in the Black Valley, and, in the midst of his talk with the children, asked them what they expected to do when they became men and women; and with one inspiration they responded, "Go to America."

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, AUGUST 13, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.Address—REV. LINUS PARKER, 112 Camp Street, New Orleans, La.
AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

THE SUNDAY SCHOOL VISITOR for September has been received. The new editor shows much taste and care in the preparation of this number. Its appearance promises well for the future. May the day soon come when Brother Haygood shall be able to send forth a weekly to our Sunday schools larger and better than the present semi-monthly. See the editor's notice in another column.

SOUTHERN UNIVERSITY, GREENSBORO, ALABAMA.—The advertisement of the University is published in this week's paper. Read and send for circular. No institution of its age has turned out more first rate scholars, and many of our most promising young men are among its alumni. The faculty is composed of gentlemen of eminent scholarship, and favorably known throughout the church. It will be seen that the next session begins on the first Wednesday in October.

GOOD, IF TRUE.—We find the following paragraph in the New Orleans Picayune of the eighth instant. We hope it is true, and that Dr. Deems will be presently in possession, and engaged in his great and successful mission as pastor of the Church of the Strangers.

A Noble Deed.—We learn that Commodore Vanderbilt has purchased the Mercer street Presbyterian church, and made it a present to Rev. Dr. Deems, of North Carolina, the well known and popular pastor of the Church of the Strangers. The doctor will now have a church of his own in which to display his fine oratorical powers.

NEW ADVERTISEMENT.—Attention is directed to the advertisement of L. B. Lassiter, of Opelousas, Louisiana. Mr. Lassiter is real estate agent, and agent for Brooks' screw press. The references of Mr. Lassiter are satisfactory, and "the Brooks screw press" is well known to the public.

BISHOP WIGHTMAN writes that he expects to pass through Nashville, August 11, accompanied with Mrs. Wightman, and to spend Sunday, August 14, in St. Louis, en route to the Columbia Conference, which meets at Dallas, September 7. He is now organizing the colored South Carolina Conference, at Abbeville, South Carolina.—Nashville Advocate.

A MAN should never be ashamed to own he has been in the wrong, which is but saying, in other words, that he is wiser to-day than he was yesterday.—Pope.

THE most charming necktie which any mother can wear is her baby's arms.

AN INSTRUCTIVE MINISTRY.

People may abuse and pervert the truth, but they must have it in order to be saved. Generally they may know a great deal better than they do, but they cannot do well without knowledge. Salvation is through the knowledge of the truth. The preacher tells his hearers that they are already sufficiently informed, and that what is needed is, that they put the information they have into practical operation. He acts upon this assumption of religious intelligence, and seeks to arouse and incite to immediate action, while no effort is made to instruct. There is a foundation for this assumption, but it may be pressed too far. The golden mean lies practically in the union of the didactic and the hortatory. The sermons of Christ are of this character, and the apostles followed their Master in this respect, as in every other. The men of power in the early days of Methodism were not mere exhorters. Whitfield and the Wesleys often expounded large portions of Scripture consecutively, and their regular sermons were full of doctrinal instruction.

Fifty years ago our ministry was distinguished for its statement and defense of the doctrines of religion, and for its careful exhibition of the leading features of gospel truth. Very little was taken for granted in those days, but arguments and Scripture references were set in array to overwhelm error and to establish "the right ways of the Lord." There was a spice of controversy in the preaching of "the fathers," and a sharply militant and polemic spirit was often manifested. It was likewise noted for particular and pungent application, and for the stirring exhortation which concluded every sermon. The nail, however, was driven before it was clinched, and the foundation was made sure before the walls and cornices were thought of.

It is safe for the preacher to assume that his congregation is ignorant even where intelligence ought to be found. Religious ignorance is often the greatest where the general intelligence is of a superior order. The busy merchant, the professional jurist, the learned doctor, the refined and cultivated lady of the world, and the planter of enterprise and education, are not necessarily familiar with their Bibles. They need instruction in spiritual things as much as the most illiterate and obscure. It is a grievous error to suppose that because people live in these days of wonderful enlightenment and mental activity, surrounded by the most startling discoveries and inventions, and smothered under the mountain piles of books and periodicals which hourly teem from the press, that they are proportionately wise in the lore of the gospel. Too much intelligence may be predicated of the various agencies which are at work in the diffusion of religious knowledge. These agencies are doing much to diminish the ignorance of the world, and to mitigate the gross darkness which covers the people. But with our Bible societies and Sunday schools in full operation, and with churches all around us, the amount of religious ignorance is astonishingly great.

A close examination of the membership of a church will reveal a great lack of accurate and thorough acquaintance with the word of God, and the duties and obligations of our religious profession. Converted men must be instructed in the doctrines of the gospel, and guided into the higher experiences of the spiritual life; and what is sometimes set down to their meanness, indolence and selfishness, is the result of ignorance rather than perverseness. Instruction does not necessarily hinder revival influences. Jonathan Edwards testifies that he found doctrinal preaching the best to promote religious awakenings, and the same thing is shown in the great and permanent reformation which have taken place. Neither Luther nor the Wesleys would have accomplished anything without the clear and persistent exhibition of divine truth. Times of great interest are the very best in which to instruct. The awakened soul is peculiarly prepared to receive and apprehend sound doctrine. The good ground is ready for the seed of the kingdom, and the sower casts his bread upon the waters rather than upon the barren rock. To promote the work of revivals there is need of judicious and godly tact, the wise improvement of favoring circumstances, and motion, prayer, exhortation, and the power of sacred melody. But these, without instructive preaching, will fail of the highest and most lasting effect.

The mischievous notion that people are already sufficiently instructed must be guarded against, while we aim to lead them up to the practice of what they really know.—Preaching is needed as well as exhortation. The "people perish for lack of knowledge," and furnish for the bread of life. With all possible incitements and exhortations, the gospel must be preached with the Holy Ghost sent down from heaven. "Because the preacher was wise, he still taught the people knowledge." Paul, the model New Testament preacher, preached Christ, "warning every man, and teaching every man in all wisdom." The spiritual qualifications are paramount—all must be fused and aglow with the heavenly baptism; but without the aim or capacity to teach, the ministry will fail in the great commission to which it was called when the Master commanded: "Go ye, therefore, and teach all nations, baptizing them in the name of the Father, and of the Son, and of the Holy Ghost; teaching them to observe all things whatsoever I have commanded you."

Quarterly Conference Reports.

We have found that where the preacher in charge takes pains, all the reports are usually brought in. If he reminds the trustees in time, and insists upon its importance, they will be ready at the last Quarterly Conference with a statement of their affairs; and if he directs the attention of his stewards to the matter they will have a written exhibit of the finances, and not detain the Conference while they are making up their accounts. The trustees and stewards ought to attend to their business without prompting from the pastor, but they will seldom do it. Those two reports which the Discipline requires the pastor to make in writing are very frequently neglected. When the written report of the Sunday schools is called for the presiding elder is often referred to a report from the Sunday school superintendent. But this does not meet the obligation of the preacher to make a written report to the Quarterly Conference. A verbal statement from any one is not sufficient, and a written account from the superintendent cannot discharge a duty which is incumbent upon the pastor. The same is true in reference to the state of the church. No one is in a position to make this report fully except the preacher in charge. Neither the secretary of the church conference nor anybody else can do it. The report should, of course, be written, and cover all the ground of the question, not of statistics alone, but of the spiritual condition, and many matters of interest and importance to the presiding elder and the Quarterly Conference. It is very rarely, indeed, that those reports are made in a satisfactory manner, and the fact is due to the culpable negligence and indifference of the preachers, and the equally culpable negligence or good nature of the presiding elders. The latter ought to insist upon reports in due form, as required by the Discipline; and where this fails, the Annual Conference might take cognizance of the matter in the passage of character. We agree with a correspondent of the Western Methodist that this careless and slipshod manner of doing business in the Quarterly Conference should be ended in some way. He writes as follows:

"The form of the reports made to our Quarterly Conferences, and the manner of their presentation, have often caused me to wish for improvement in those regards. The Discipline requires that two written reports be presented by the preacher in charge to each Quarterly Confer-

ence—one on "Sabbath schools and pastoral instruction of children;" the other on the "general state of the church." Any intelligent preacher or layman, in hearing the majority of these reports, is left with the painful impression that the highest ambition of the reporter was to get rid of the matter with the least possible labor. Do our brethren forget that these reports are to form a part of church history, and that their standing in this history will be affected by these very reports? I might give here specimens of reports I have heard that would crimson the cheeks of those presenting them, if their names should accompany them. Will some Bishop or presiding elder, or other competent person, give us a specimen of reports to serve as a guide for younger brethren, and by which older ones might profit? At any rate, let brethren prepare and present reports somewhat after parliamentary usage."

THE SOUTHERN REVIEW.

The contents of the number for July, 1870, are: 1. Human Nature. 2. The Bible and Egypt. 3. Derby's and Bryant's Iliad. 4. The Aesthetics of Friendship. 5. Birds and Flying Machines. 6. Hamlet. 7. Progress of Astronomy in the Nineteenth Century. 8. Ireland in 1870. 9. Gladstone's Ecce Homo. 10. Notices of Books. 11. Poem, The Song of the Sea. A glance at the title of the several articles gives some idea of the variety and scope of the work, but they must be read in order to reach the inevitable conviction that the Southern Review is superior to any quarterly in Europe or America. Some misunderstanding has existed in reference to Dr. Bledsoe's acceptance of the terms proposed by the General Conference. We do not think this misunderstanding was altogether groundless; but the following card, which we find in the Baltimore Episcopal Methodist, will remove every objection. The terms upon which the General Conference consented to adopt the Review were:

The committee appointed to consider the proposition of A. T. Bledsoe, LL. D., to identify the Southern Review with the interests of the Methodist Episcopal Church South, has carefully considered the same, and recommended its acceptance upon the following terms:

1. The elimination from said Review of party politics, and the substitution of a theological department.
2. Its advocacy of the doctrines and polity of the Methodist Episcopal Church South.
3. The exemption of the church from all pecuniary responsibility and legal liability on its account, and the relinquishment by the church of all claim upon its emoluments.
4. The acceptance by Dr. Bledsoe of an editorial committee, to be appointed by the College of Bishops, and to be associated with him in conducting the theological department.
5. That on these conditions the church accept the proposition, and recommend the adoption of all suitable means for its extensive circulation throughout the church.

We understand that the above terms are accepted by Dr. Bledsoe without reservation. We can, therefore, recommend the Review on its own merits, and also as having the endorsement and recognition of the General Conference as a publication of the Methodist Episcopal Church South. We shall boglad in all possible ways to promote its circulation. Every preacher must have a copy, and hundreds of the laymen in Louisiana, Mississippi and Alabama. They cannot afford to be without it.

A CARD.—DR. POISSAT.—Dear Sir: You say, in your issue of the sixteenth instant, that the letter which I addressed to you at Memphis, and which you laid before the General Conference, has not, "from motives of delicacy, been made public." You are at perfect liberty to publish that letter. It was, indeed, on the showing of that letter that the General Conference adopted the Southern Review, and recommended all the ministers of the Methodist Church to use their influence to increase its circulation, provided I would agree to certain conditions prescribed in their resolutions. Having most cordially and fully accepted those terms, or conditions, I am prepared to discharge any part of the obligation, which may be seen in said letter. It has been said, by one writer, that it seems "that the Southern Review must teach Dr. Bledsoe's politics and Dr. Bledsoe's theology—which is all right—and, further, that there is a difference on the subjects, in their relations to the Southern Christian Advocate."

Review, between Dr. Bledsoe and the General Conference." Now this cannot be shown, for the fact is otherwise. Dr. Bledsoe will, it is true, teach his theology in the Southern Review; but then there is no difference between his theology and the theology of the Methodist Episcopal Church. They are in fact one and the same. For more than twenty years there has been a perfect agreement between my theology and that of the Methodist Episcopal Church South; and there is, at this moment, not one of her twenty-five articles which I cannot subscribe as the very truth of God's eternal word. The theology of the Southern Review will, then, be the theology of the Methodist Episcopal Church, as well as my own. Had it been otherwise, sir, I should not have written the letter in question to you, or appealed to the General Conference for assistance. I did so, sir, simply because I believed their theology to be founded on the word of God, and because I hoped, with their aid, sympathy and support, to be able to show that it is far in advance of that of any other sect or denomination under the sun. It omits all these things in the thirty-nine articles of the Episcopal Church which I have long been constrained to reject as a monstrous perversion of divine truth. Very truly yours, A. T. BLEDSOE.

REV. CHARLES J. HALLBERG.

Rev. Charles J. Hallberg, of the Louisiana Annual Conference, died in Issaquena county, Mississippi, July 29, 1870. Brother Hallberg was, we believe, of Swedish parentage, and born in the West Indies, on the third of June, 1820. He came with his family to New Orleans while quite a youth, and was converted in his seventeenth year. He was admitted on trial in the traveling connection at the session of the Mississippi Annual Conference held in Port Gibson, Mississippi, December 11, 1844, and was appointed junior preacher on the Vidalia circuit.

In 1845 he was appointed to Plaquemine, Louisiana. At the session of the Mississippi Conference held in New Orleans, December 10, 1845, the Louisiana Conference was set off, and Brother Hallberg fell within its bounds. At the first session of the Louisiana Conference, held in Opelousas, January 6, 1847, he was admitted into full connection, ordained deacon by Bishop Soule, and appointed to the Houma and Bayou Black circuit. In December, 1848, he was appointed to the Richmond circuit, and in 1850 he traveled the Monticello circuit. At the Conference held in New Orleans, December 25-31, 1850, Bro. Hallberg was elected to elder's orders, and ordained by Bishop Capers. In 1850 he continued on the Monticello circuit. His subsequent appointments were: Chicot, Caddo, Monticello, Richmond circuit and Madison colored mission, Alexandria, New Orleans city missionary in 1858, on Trinity circuit in 1859-60, in 1861-62 at Pecan Grove and Willow Bayou, in 1863 at Carroll, in 1864 at Providence and Bunche's Bend. Circumstances having compelled him to move to Mississippi, he was left in the bounds of that Conference, in 1865, without any definite work. The Conference which met at Mansfield, in November, 1865, granted him a supernumerary relation, and he continued in this relation until his death.

For a number of years Brother Hallberg had been a great sufferer from inflammatory rheumatism, and rendered incapable of preaching. For some weeks previous to his death his mind was in a wandering condition, but in his last hours he was perfectly rational, and his end was peace. He was a good preacher, a faithful and self-denying laborer in the ministry, and had endured and suffered much in the service of the church. He leaves to the care of the church a dependent family, consisting of a wife and five children.

DECATUR CIRCUIT, SOUTH GEORGIA CONFERENCE.—The Rev. William Hayes writes: God has graciously visited us with an outpouring of his Holy Spirit, reviving a good part of the church, reclaiming a few backsliders, and converting a number of the young men and women of our community. Bro. Her Bond's faithful labors are now yielding fruits of righteousness. May the Lord continue to bless him with this mark of his favor.

BISHOP MARVIN reached home last week, on the twenty-fifth instant. We need not say how joyful and affectionate the home welcome. Concerning the effects of his sojourn in Virginia upon his health, the Bishop will speak for himself next week in the closing letter of the series of his Virginia correspondence. He believes strongly in pulpit hygiene. If ever he visits Virginia again, it will be on a preaching tour. In truth, however, the record shows much preaching, and our readers will thank him for some part and benefit of it in the analysis of one of his sermons given in his letter of this week. His superior love for preaching itinerancy will find ample gratification in the present tour, commencing on Sunday last at Pleasant Hill, and ranging down to the Great Southwestern camp meeting in the Granby district, at Red Oak—appointments nearly every day for two weeks or more, and for every Sabbath till he leaves for his Texas tour, including several camp meetings in Missouri and Illinois.—St. Louis Christian Advocate, Aug. 6.

ACCIDENT TO DR. L. PIERCE.—The Augusta Constitutionalist of Wednesday, July 27, says: "One of the wheels of the passenger car attached to the down way freight train on the Georgia railroad gave way near the fourteen-mile post yesterday morning, throwing the car from the track. The venerable Dr. Lovick Pierce, a passenger on the train, was regret to learn, received painful injuries on one of his feet, which is likely to interfere with his walking for some time. The venerable divine was on his way to Louisville to attend the Savannah district meeting, and came to the city, and is stopping with Rev. Dr. Mann, the pastor of St. John's (Methodist) church." We have heard nothing more of this sad affair than the above paragraph gives. We trust, however, with Dr. Pierce's multitude of friends, that the accident is not serious, and that he will be able very soon to appear in the pulpit again.—Southern Christian Advocate.

SYLVANIA CIRCUIT, SOUTH GEORGIA CONFERENCE.—The Rev. W. T. McMichael writes: We are in the midst of a revival at one of our appointments. The altar is crowded with penitents, and the Holy Spirit in melting power falls upon the people. There is a decided purpose on the part of the people to seek for that which is vital—not satisfied with the formal religion that has been so prevalent in this region almost since the war. One powerful conversion took place at home at midday, creating such a sensation in the neighborhood as to prompt us to protect the meeting. This conversion was like a thunder clap in a clear sky. It shows that the fires of piety are smoldering under the ashes of form. We have had several accessions, and are looking and praying for better times in Sevier county. Brethren, pray for us.—Southern Christian Advocate.

BISHOP WIGHTMAN.—A private letter received from Bishop Wightman states that he expects to spend Sunday, the fourteenth of August, in St. Louis, and start for California the next day. So he may be expected here on the nineteenth or twentieth of August. May Providence vouchsafe to him a safe and pleasant passage.—Spectator.

A CORRESPONDENT wishes to know if she must "rest in the promises of God, regardless of emotion." Of course she must. She must live by faith, by which she is justified—not by feeling, which is a result of faith. If she is conscious that she depends alone on the merits of Christ for acceptance, and that she has consecrated body, soul and spirit to him, and that she is living in accordance with this act of consecration—all is well. Emotions are variable—changing with one's health, the state of the weather, trials, etc. In all cases, where faith is genuine, there will be the direct witness of the Spirit; but if our faith be weak the evidence will not be so clear; and if our minds are affected by any of the causes suggested, we may fail to derive that comfort from it to which we are entitled. Still if we hang by faith on the cross and discharge every known duty, our condition, though not so satisfactory as we might wish, is nevertheless safe; and it dishonors God to doubt our acceptance in the Beloved. If you renounce all sin—if you trust alone in Christ for pardon—if you depend upon the Holy Spirit to help your infirmities, invoking and using the grace which he supplies—fear not; God loves you. Honor him by your confidence and obedience, and he will honor you with "the tokens of his grace." That is the way to meet the requisition: "Let Israel rejoice in him that made him; let the children of Zion be joyful in their King." "Rejoice in the Lord alway, and again I say, rejoice."—Nashville Advocate.

A YOUNG LADY in this city has just celebrated her wedding by marrying a blockhead.

NEW ADVERTISEMENTS.

The Child's Corner.

LITTLE FINGERS.

Busy little fingers,
Everywhere they go,
Rosy little fingers,
The sweetest that I know.

Now into my work-box,
All the buttons finding,
Tangling up the knitting,
Every spool unwinding!

Now into the basket,
Where the keys are hidden,
So mischievous looking,
Knowing it forbidden.

Then in mother's tresses,
Now her neck enfolding,
With such sweet caresses,
Keeping off a scolding.

Darling little fingers,
Never, never still;
Make them, heavenly Father,
Always do thy will.

For the Advocate.

THE THREE FAIRIES.

"Come here, Ellie!" The person addressed was a bright looking child about ten years of age. A young man, her only brother, was calling her. "Come here," he continued, "I have something for you to do; if it is done nicely I will tell you a beautiful story as a compensation for your services." Ellie went to work in great glee, for nothing delighted her more than for Brodie to tell her a story. In a few minutes the task was completed, and going to her brother she said: "Now I am ready to hear that pretty story." Lifting her upon his knee, he began: "Well, there were once three lovely fairies; they were named Torahayda, Torayda and Tayda. The queen of the fairies being both a wise and good woman, one evening, just as the cold, pale hour of twilight had veiled the earth, called the three sisters to her, and to each one gave a beautiful dew-drop, saying the one who made the best use of her present should have an office of high degree conferred on her. They departed to perform the task allotted them, each one wishing to obtain the promised reward. Torahayda, the eldest, soon came to a fountain, which was in the garden of a king. The silvery waves of the fountain sparkled and danced in the sunlight like so many diamonds. Into this she let fall her precious dewdrop. The waves leaped and danced as before, and the dewdrop was lost without accomplishing any good whatever. Torayda, the second fairy, saw a crown, adorned with earth's most valued gems. She changed her dewdrop into a jewel of surpassing loveliness, and placed it in the crown. Again the mission of the tiny drop was not accomplished, for there were other jewels there of equal beauty.

"Little Tayda, after many hours of weary travel, found a bird lying on the ground, perishing for water. The kind-hearted fairy immediately let the dewdrop fall into the mouth of the poor little bird, which so much revived its strength that it arose and flew far away into the bright blue sky."

The fairies, after the completion of their tasks, returned from whence they came, and related the history of their dewdrops to the good queen. "And, Ellie, who do you think performed the noblest deed?" "Oh! I think Tayda was the one; don't you?" "She saved the life of one of God's creatures, and neither of the others did." "You are right, Ellie; and Tayda did receive the reward she so well deserved. Little sister, learn from this simple narrative an important lesson. It teaches that goodness of heart never goes unrewarded. If though 'tis only a little bird on whom you bestow a kindness, the act is remembered, and another pearl will be added to the crown given you in the spirit land."

MAY OLIVE.

The Little Gentleman in the Velvet Coat.

BY G. E. HATHAWAY.

I will introduce you to a charming European gentleman, and trust you will find the acquaintance to your mutual advantage. I prophesy, however, it will be a very one-sided friendship, for, although the gentleman wears a velvet coat, and belongs to a good family, his habits are very remarkable, and he has but little intercourse with young people.

He differs vastly, in his tastes, from you and I, preferring even a

rainy season, such as that of last summer, to a dry one. When the rain falls in heavy showers he rejoices! Now one would think he must love to see the treasures which the rain brings us; that he would delight in the diamonds which fall from the dripping leaves; that he would sail a boat in the stream when it is calm, or skip stones on the lake, or water his house plants, or clean out his cistern, or do something that other people do. Not so. He loves the rain because he is—thirsty! He starts out in his velvet coat, which never lets the water or the wind touch his skin, and then he—drinks! Another reason why he cares so little for the pretty rain drops, and the light of the sunbeams on them is, he cannot see very well; the little gentleman has such very small eyes that many think him blind. So I suppose he does not think it worth while to look about him much, though he is a great traveler, taking long journeys by water, always preferring to swim rather than cross a bridge. He never drives. You should see his magnificent house. As eccentric in that as in anything else, he builds his house an entire basement. It contains a great central *salon*, and numerous arches, supported by pillars, but all is under ground. He is a timid little man, and has many means of entrance and egress to and from his dwelling, so that in case of surprise from an enemy he may easily effect a retreat. Though I should think he might always do that readily enough, for he is his own mason and carpenter, and in almost an incredibly short time he could build a new stronghold.

I suspect it is on account of his wife and children he is afraid, for he is of a very fierce disposition. Though he is very industrious, as you may see from his being his own architect and builder, he still has so much leisure that he sleeps half the time.

Perhaps you do that, too? Yes, but you divide the time differently. This little gentleman lies down in his velvet coat for three hours, and then labors for three again.

Should you like to do that? I am sorry to say some boys of his own country make "game" of him. If they knew how much good his cellars and sub-cellars do sometimes, they would not be so thoughtless.

I have spoken of his "love of drink," but not yet of his food. He lives on a fellow-worker, though he is not at all a cannibal, as his food is not related to him, except that their labors have the same relation to mankind. His food is *worms*, which he skins before eating. One can thus be dainty, yet subsist upon worms!

You begin to suspect that you are not entirely unacquainted with this gentleman in the velvet coat, do you not? Although you do not know himself, yet his *American cousin*, the *shrew mole*, is probably quite familiar to you all.

Moles and worms bring to the surface the earth which lies far beneath, thereby providing nourishment for the seed when planted. They are untiring workers, and are so numerous that they effect what man could scarcely attempt.

When you reflect upon what I have told you of the European mole you will find him possessed of many virtues, and I hope you will be willing to accept him for a friend, though he is but six inches in length. *Little Corporal*.

"COULD I KEEP THE GOOD NEWS?" A New Zealand girl was brought over to England to be educated. She became a true Christian. When she was about to return some of her playmates endeavored to dissuade her. They said:

"Why go back to New Zealand? You are accustomed to England now. You love its shady lanes and clover fields. It suits your health. Besides, you may be shipwrecked on the ocean. You may be killed and eaten by your own people—everybody will have forgotten you."

"What!" she said, "do you think that I could keep the 'good news' to myself? Do you think that I could be content with having got pardon, and peace, and eternal life for myself, and not go and tell my dear father and mother how they may get it too? I would go if I had to swim there!"

The Book of Job has just appeared in German imitations from the pen of Dr. Andrea, of Marburg. Critics say that the measure has been chosen with much skill, and the desire to adopt this classic poem of old Hebrew poetry to the taste of the actual reading world is eminently successful. The poem seems much more effective than the prose, especially as the rendering is effected, even in the severest passages, as much as possible in the sense of the original, without in any way detracting from its original dignity and beauty. It reminds us of the recent rendering of Ecclesiastes in English rhythm by Dr. Layton Lewis, in the Lange series of commentaries.

The Farm and Garden.

CHINESE AGRICULTURAL ART.

The Chinese have long been celebrated for their minute knowledge of the art of agriculture. Thus they will take an acre and, by peculiar methods, grow therefrom a perfect tree, but so dwarfed that it will not attain a height of more than twelve inches, and the roots will all be contained in a four or five-inch flower pot.

They are the most persistent cultivators and irrigators of any nation upon earth. They manufacture and apply manures both solid and liquid, wasting nothing that contains the organic elements of plants. They are particularly careful in the selection and saving of seed, plucking them stem by stem. They cure them in the most careful manner, and wash thoroughly before sowing.

One of the most striking evidences of their good farming is the entire absence of weeds among their growing crops. Labor is plenty and cheap. Their population is dense, and land is consequently scarce and must be made the most of. They are fully alive to the fact that, just in proportion to the weeds growing in a crop, in just such proportion will the crop be diminished.

The Overland Monthly for June contains some interesting information relating to their social economy, and yet more relating to their superstitions. One of their superstitions is that—

If, in the beginning of winter, a carefully measured quantity of grain be put in an earthen vessel, and left for fifty days, and then measured again, that the season will be good if it has increased in bulk, or the season will be bad if it has decreased.

There may be some peculiarity in the climate of China, to make this rule work uniformly, but it would not be a safe guide in ours. An earthen vessel will absorb moisture from a damp atmosphere, and give it back to a dry one, and the atmosphere is usually damp during the season of the germination of seeds. The last season's crop, for instance, would with us have continued to shrink until March, and then would have swelled for two months, and then again have shrunk from that time forward. The season, upon the whole, has been very unfavorable. During the season of 1869 it would have swelled during the winter, remained stationary during March and April, and then would have reached the germinating point during May and June, and yet the season was disastrous from the drowning of the crops. Maxims are excellent in their place, but they must not be founded upon superstitions.—*Interior*.

THE HORSE AND ASS.—In a very able paper in the Old Guard for August, the origin respectively of the horse and ass is thoroughly discussed, and after a clear and learned statement of the facts reaches the following conclusions:

The horse was used by the Aryans from the remotest period to which we can trace their history, and prior to the separation of their western and eastern tribes—that is, before they penetrated into Egypt.

The ass, on the contrary, was wholly unknown to them at that period. The various Aryan nations of Europe and Asia received it much later, and separately in the countries where their great migration led them. It was brought to the Iranians, of Persia, by the Semites, of Mesopotamia; hence it passed into India, preserving, however, its Semitic name, which indicates its origin.

The ass had been brought to the Greeks by a race speaking a Semitic tongue—probably the Phoenicians; but it was completely naturalized among the former when the Homeric poems were written. It was from the Greeks that the Latins received it; and they, in their turn, spread it among the people in the north and west of Europe, Kelts of the Continent or of Great Britain, Germans, Scandinavians, and even Slavonians. In the time of Aristotle there were no asses in Seythia, or in the neighboring lands, nor even in Gaul. (Aristotle, *De gener. anim.* ii, 8.)

These facts, which philosophy has disclosed, are strengthened by those which we think we can draw from the monumental representations of ancient Egypt, and from Bible texts, which confirm the opinion that the horse and ass originated in countries widely separated. The horse became domesticated in the highlands of upper Asia; and the Aryan migration was the most powerful means of spreading that species through the world; it was rather lately adopted by the Semites, and did not appear in Egypt until about twenty-five centuries before the Christian era. The ass is an African species, which first must have been domesticated on the shores of the Nile. From Egypt it early passed into the hands of the Semites, who transmitted it afterward to the Aryan tribes, in Greece on one side, and Persia on the other; and this animal followed exactly the oppo-

site course from the horse, but finally found its way to every part of the world. Thus the two species, though starting from opposite points, were destined to meet and be useful in every land.

TOMATO CATSUP.—As it soon will be time to preserve tomatoes and make catsup (ketchup) the following will be found to give a superior article: Tomatoes, one-half bushel; salt, six ounces; allspice, ground, six drachms; yellow mustard, ground—one ounce—five and a half drachms; black pepper, ground, three ounces; cloves, ground, six drachms; mace, ground, three drachms; cayenne pepper, ground, two drachms; vinegar, one gallon. Mix.

Cut the tomatoes to pieces; boil and stew in their own liquor until quite soft. Take from the fire, strain and rub through a middling fine hair sieve, so as to get the seeds and shells separated; boil down the pulp and juice to the consistency of apple-butter (very thick), stirring all the time; when thick enough, add the spices, stirred up with the vinegar; boil up twice; remove from the fire; let cool and bottle.—*Druggist's Circular*.

Scientific.

FROM GERMANY we have intelligence of the discovery of a process of making ice.

A certain Franz Windhausen, of Brunswick, has invented a new machine for freezing water without the aid of chemicals. The process takes place in a cylinder, "where the air is first powerfully condensed, then cooled by the admission of water, and finally expanded till its pressure is about equal to that of the atmosphere." By this means, it is asserted, the very astonishing result is obtained of lowering the temperature of the air to fifty degrees Celsius (four degrees Fahrenheit), so that when conducted in moderate quantities into a space through which water flows, "the water is almost immediately turned into ice, of which enormous blocks may be thus obtained if desired." The invention will also, it is said, be applicable to the cooling of large apartments, such as theaters, hospitals and churches.

At the same time we hear that Dr. P. H. Van der Weyde, of Paterson, New Jersey, has just constructed a machine for a similar purpose. It is designed to freeze ten tons of water in twenty-four hours, at a cost of \$2 per ton. The machine occupies an area—including the engines, but not the boilers—of twelve feet square, and it is nine feet high. Instead of ammonia, ether or other fluids hitherto used for the same purpose, a petroleum product termed "Rhigolene" is employed to render latent, by its volatilization, the heat abstracted from the water to freeze it.

A beautiful proof of the undulating theory of light is afforded by Angstrom's late measurements of the so-called wave-lengths. Nine years ago Fizeau made some curious observations on "Newton's rings." If a watch crystal be pressed tight on a flat piece of glass, around the point of contact will be seen rings of prismatic colors. By calculating the distance between the crystal and the plane glass, at the color nearest contact, we get the wave-length of that color. By using light of a single color we get rings of that color separated by dark bands. Fizeau found that he could produce about five hundred of these successive rings by using a yellow soda light, and gradually withdrawing the convex from the plane surface; but then the rings disappeared to reappear again, increasing and then diminishing in distinctness, and thus breaking up into batches of about one thousand each. This phenomenon he was able to continue until he had counted fifty-two such batches, and the glasses were nearly half an inch apart. The explanation is that the light of soda is not strictly homogeneous, but composed of two elements of very nearly the same wave-length. One of these gradually overlaps the other until it counteracts it, and then in turn re-enforces it. Fizeau found that it was necessary to move the glasses apart a distance of 0.28945 millimeters to go through the entire phase from one obliteration of the rings to another. Now Angstrom finds the wave-lengths of the two elements of soda light to be 0.000589513 and 0.000588912 millimeters. These allow respectively nine hundred and eighty-two and nine hundred and eighty-three waves in the distance 0.28945 determined by Fizeau—that is, if the wave theory is correct, these two elements of soda light ought completely to interfere once in nine hundred and eighty-three vibrations; and such is the fact, as given in the round number one thousand by Fizeau.

There is a captivity of the reason and an enraging of the passions. It hinders business and distracts counsel. It sins against the body and weakens the soul.—*Bishop Taylor*.

MUSICAL INSTRUMENTS.

PHILIP WEINLEIN,
NOS. 80 AND 82 BARONNE STREET,
NEW ORLEANS.

Southern Depot of the celebrated and renowned

PIANOS: MARSHALL & MUMFORD'S, DUNHAM & SON'S, and J. P. HALE'S.
ORGANS: NEEDHAM & SON'S, Special gold Medal for Church, School, Lodge and Parlor, which are fully equal to any in the world.

MUSICAL MERCHANDISE OF EVERY DESCRIPTION.

PIANOS TUNED, REPAIRED, RENTED, EXCHANGED, STORED AND SHIPPED.

I desire to call your attention to the fact that I am conducting my business on the most economical principles as regards store rents and expenses, and am enabled to sell Pianos and Organs at from ten to twenty per cent. under current rates, and at bargains. My large stock cheerfully shown to visitors, and orders promptly filled.

J. P. HALE'S
GREAT PIANO FORTE COMPANY.
Chartered January, 1866.

We are now prepared at our NEW FACTORY, corner of Tenth Avenue and Thirty-sixth Street, to turn out fifty Pianos per week, from our splendid New Scales, which are pronounced by the best judges to be the most powerful Square Piano that has ever been brought before the public. There is no Piano made that will stand in time like this.

PRICES:
No. 3—Plain style.....\$425
No. 3-7 Octave, front Round Corners..... 450
Serpentine Molding..... 500
No. 4—7 Octave, front Round Corners, Serpentine Carved Legs..... 600
No. 5—7 Octave, four large Round Corners..... 600

This Company, believing that the public want demands

A GOOD SUBSTANTIAL SEVEN OCTAVE PIANO FORTE.

Embracing all the modern improvements, such as a Rosewood Case, French Grand Action, Harp Pedal, full Iron Frame, Overstring Bass, etc., at

PRICES WITHIN THE MEANS OF ALL.
Now offer such an instrument at a price lower than any other reliable manufacturer. These Pianos are made of the best materials, with great care, and by the most skillful workmen, selected from the best factories in this and the old country, and fully warranted to stand in any climate, and to give as good satisfaction as any Pianos sold for \$1,000.

Our terms are NET CASH in New York; for multiplying such terms we are enabled to sell at low prices.

We want Five Hundred Agents and Teachers to introduce these splendid new instruments in all parts of the Southern States. All orders must be sent direct to

PHILIP WEINLEIN,
80 and 82 Baronne St., New Orleans,
Our General Agent for the Southern States.

BELLS—BELLS.

48-inch Bell..... 1200 lbs	1500 lbs	265 00

These Bells are warranted for one year against breakage in ordinary use.

T. B. BODLEY & CO.,
19-611 No. 9 Perdido St., New Orleans.

BELLS, STEEL COMPOSITION.

For Churches, Schools, Etc.

BEYMER, NORTON & CO., Manufacturers,
Cincinnati, Ohio.

These celebrated Bells (not Cast Iron or "Amalgam") rival in purity and volume of tone those of copper and tin, and are more durable, and cost only one-third as much.

Sent for descriptive circular. \$25 ly

THE ARROW TIE.

FOR BAILING COTTON THE ARROW TIE is the most popular, being the best Cotton Tie in use.

Planters and Cotton Press men everywhere prefer it to all others.

THE ARROW TIE

was used to cover MORE THAN HALF THE CROP OF 1869, giving entire satisfaction.

The patentee and manufacturer of the celebrated ARROW TIE, J. J. McComb, formerly of New Orleans, now residing in Liverpool, having control of the best and most extensive Rolling Mills in Europe, is constantly importing large stocks of this popular Tie, manufactured of the very best quality of English iron, to meet the increasing demand for it throughout all the Cotton States.

Planters can buy or order the ARROW TIE of all dealers in Iron Ties, and of country merchants generally, at the lowest market price; and we respectfully solicit the patronage of Planters and Factors everywhere.

H. T. BARTLETTE AND R. W. RAYNE,

General Agents for the Arrow Tie,
Jels ly 124 Canale St., New Orleans.

CARPET AND OIL CLOTH WAREHOUSE.

MISCELLANEOUS.

BROOKS' IMPROVED PATENT COTTON SCREW PRESS.

Patented by R. M. Brooks, of Georgia, April 14, 1868.

It took the first premium at the Louisiana State Fair, at New Orleans, April, 1868, over eleven competitors; also at the Tennessee State Fair, at Memphis, and more recently at the Mississippi State Fair, at Jackson, and again at the recent State Agricultural Fair, at New Orleans, April, 1870, in a contest with fourteen Cotton Presses, embracing the most approved patents from different States of the Union, North and South.

The following is the certificate of some of the principal cotton factors and merchants of New Orleans. "In our circulars can be seen the certificates of practical planters and seeders in regard to the admirable principle and practical working of this Press."

"We, the undersigned, purchased last season, from Messrs. J. L. Jennings & Co., the Brooks' Revolving Cotton Screw Press for our customers, and so far as heard from they have given entire satisfaction."

"Messrs. Greenwood & Son, Warren, Crawford & Co., C. L. Walmsley, Ivey, Michael & Co., Frank & Daniel, Campbell & Brown, Clapp Bros. & Co., E. F. Gidson & Co., B. S. Walker, Violet, Black & Co., Block Bros., Wright, Allen & Co."

Circulars, giving cuts, with full description, price list, etc., sent by mail on application to J. L. JENNINGS & CO., Proprietors, 14 Union Street, my21 5m New Orleans.

GEORGE D. HOLZACH'S PATENTED IMPROVED MOVABLE WINDOW SHADE.

This improvement relates to a new and simple manner of so arranging window shades that light and air can be admitted into the room through the upper part of the window without raising any portion of the shade; and when the window is furnished with the combined screens its usefulness and comfort in warm weather, when a good current of fresh air is so welcome, cannot be surpassed.

Parlors, dining rooms and bed rooms, the shade especially in time of sickness, are by this improved mode of construction thoroughly ventilated and lighted at pleasure, without the slightest inconvenience to the sleeper or patient, or exposure to the passers-by.

It can be attached to any window with but little alteration and at moderate expense. Orders solicited and promptly attended to. State Rights for sale by

GEORGE D. HOLZACH, Inventor and Patentee, Jels 3m 61 Camp street, New Orleans.

BRACES AND TRUSSES.—DR. JOHN C. BANGELL, informs the medical profession and others that he has constantly on hand and for sale a complete assortment of BANGELL'S TRUSSES, Spinal and Shoulder Braces, and other appliances for the prevention, relief and cure of general debility, neuralgic weakness, and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, spinal weakness and deformity, dyspepsia and nervous affections, constipation and chronic diarrhoea, female derangements and extreme displacements of the womb, RHEUMATISM, PLEURISY, Catarrhs, and weakness of the male and female systems.

These light, cool and springy auxiliaries are the special favorites of the profession; are intensely common-sense and rational in their action; supply a missing link in treatment; place the doctor at a distance in a new and more hopeful light, and often complete cures where medicine can only mitigate, any more than it can cure a hernia or a dislocated joint.

He specially desires an examination of these appliances by the medical profession. Where necessary the professional application of the above braces will be under his supervision or that of the family physician.

These valuable appliances are sanctioned by a large number of the medical profession in the United States and Europe as the best adapted to fulfill the purpose for which they are intended, and the Trusses and Braces are adopted by the United States government for the use of the army and navy. Terms cash. Circulars free. Send for their pamphlet; it is better to call.

The Christian Advocate.

SATURDAY, AUGUST 13, 1870.

NAPOLEON'S INFERNAL MACHINE.
The mitrailleuse, which is as yet untried in practical warfare, is considered by the French as the most destructive military weapon known. Recently three hundred wretched horses, already condemned to the poleax, were purchased at the rate of four or five francs each, and ranged at a considerable distance. Two mitrailleuses were brought to play on them, and in three minutes the animals remained standing. On a second occasion five hundred horses were brought down at a single trial. This formidable weapon is constructed as follows:

It is a thirty-seven-barreled gun, arranged so that its barrels may be discharged simultaneously or consecutively. The thirty-seven cartridges, intended for one charge, are contained in a small box. A steel plate, with corresponding holes, is placed on the open box, which is then reversed, and the cartridges fall points foremost into their respective holes. They are prevented from falling through by the rims at their bases. The loaded plate is then introduced into the breech slot, and when the breech is closed by a lever a number of steel pins, pressed by spiral springs, are only prevented from striking the percussion arrangement in the cartridges by a plate in front of them. When this case is moved slowly by a handle, the cartridges are fired one by one. If the plate be withdrawn rapidly, they follow each other so quickly that their discharge is all but simultaneous. The invention seems very well adapted for use in forts or other permanent places of defense or offense, but its carriage and management in the field would present many and insuperable obstacles to its general use.

A CORRESPONDENT writing from Canton says that Ward, the American filibuster, who went to China and entered the service of the emperor, aiding in suppressing the rebellion, has been deified. The people accept all the gods that may be decreed, and now that an American has been thus favored they will have still more confidence in our country and countrymen. The correspondent says:

"Ward was of great service to the emperor in putting down the rebellion. His success was wonderful to the Chinese, and at the time when he was accidentally shot by his own men, they looked upon him as the greatest general that had existed for two thousand years."

"At his own request his coffin was left at Ning Po, according to Chinese custom, above ground and uncovered. Nine months after (1863) the emperor ordered the body to be removed to Sung Kong and deposited in the court-yard of the Temple of Confucius. Within the temple was set up a tablet bearing his name as the 'Captor of Sung Kong and many other cities.'"

"The emperor has seen fit to go further, and in a recent edict has placed him among the major gods of China, commanding shrines to be built and worship to be paid to the memory of this American."

"The people are worshipping him along with the most ancient and powerful deities of their religion as a great deliverer from war and famine—as a powerful god in the form of a man. In every household, school and temple his name will be thus commemorated. The remembrance of millions of people secures his immortality."

THE BOTTOM OF THE SEA.—Prof. Carpenter, in his recent lectures before the Royal Institution, states the general results of the recent explorations of the deep sea by dredging to be: 1. That there is certainly no limit to the depth at which even highly organized animal life may exist; 2. That the distribution of living creatures under the sea is affected far more by temperature than by pressure, but even where the climate is steadily a little below the freezing point at the bottom, there is a rich abundance of varied life; 3. That a vast number of animal forms, hitherto supposed to have become extinct in remote geological periods, are still preserved in the sea depths; and 4. That a very large number of new types have been discovered, with every indication that these are merely an earnest of coming discoveries, and that "the treasury of the deep is inexhaustible."

A BOSTON LADY, now studying medicine at the High School at Zurich, is said to be a constant surprise to her professors on account of the extraordinary nerve exhibited by her at the clinics and post-mortem examinations of the institution. There are eleven other girls in the same class, but most of them get rather nervous when the blood spurts freely and the saw is hissing through the bones.

A TOUCHING INCIDENT.

A friend of mine, seeking to relieve the poor, came to a flight of stairs that led to a door, which led into a room reaching under the slates. He knocked. A feeble voice said: "Come in," and he went in. There was no light, but as soon as his eye became adapted to the place he saw, lying upon a heap of chips and shavings, a boy about ten years of age, pale, but with a sweet face.

"What are you doing here?" he asked of the boy.

"Hush, hush! I am hiding."

"Hiding? What for?" And he showed his white arms, covered with bruises and swollen.

"Who was it beat you like that?"

"Don't tell him; my father did it."

"What for?"

"Father got drunk, and beat me because I wouldn't steal!"

"Did you ever steal?"

"Yes, sir; I was a thief once."

(These London thieves never hesitate to acknowledge it; it is their profession.)

"Then why don't you steal now?"

"Because I went to the Ragged School, and they told me, 'Thou shalt not steal; and they told me of God in heaven. I will never steal, sir, if my father kills me!'"

Said my friend: "I don't know what to do with you. Here is a shilling; I will see what I can do for you."

The boy looked at it a moment, and then said:

"But please, sir, wouldn't you like to hear my little hymn?"

My friend thought it strange that without food, without fire, bruised and beaten, as he lay there, he could sing a hymn; but he said: "Yes, I will hear you." And then, in a sweet voice, he sang:

"Gentle Jesus, meek and mild, Look upon a little child; Pity me, O pity me, Suffer me to come to thee."

"Fain would I to thee be brought; Gentle Lord, forbid it not; In the kingdom of thy grace Give thy little child a place."

"That's my little hymn; good by!"

The gentleman went again in the morning; went up stairs; knocked at the door. No answer; opened it and went in. The shilling lay on the floor. There lay the boy with a smile on his face—but he was dead! In the night he had gone home. Thank God that he has said: "Suffer little children to come unto me!" He is no respecter of persons, black or white, bond or free, old or young. He sends his angels to the homes of the poor and destitute, the degraded and wicked, to take his blood-bought little ones to his own bosom.—J. B. Gough.

A PROFESSOR'S COURTSHIP.

When Prof. Aytoun was making proposals for marriage to his first wife, a daughter of the celebrated Prof. Wilson, the lady reminded him that it would be necessary to ask the approval of her sire. "Certainly," said Aytoun, "but as I am a little diffident in speaking to him on this subject, you must just go and tell him my proposal yourself." The lady proceeded to the library, and taking her father affectionately by the hand, mentioned that Prof. Aytoun had asked her to become his wife. She added: "Shall I accept his offer, papa? He says he is too diffident to name the subject to you himself." "Then," said old Christopher, "I had better write my reply and pin it to your back." He did so, and the lady returned to the drawing room. There the anxious squire read the answer to his message, which was in these words: "With the author's compliments."

SCHOOLS AND COLLEGES.

CORONA.

Corona is a School designed for

The Higher Education of Women.

With a Faculty of ten able, experienced teachers, it is prepared to give young ladies a course of instruction equal in extent and thoroughness to that pursued in the best colleges for men. Most facilities in music, in the family of the principal young ladies will find the kindness and comforts of a home. The bed-rooms are large, airy, newly furnished and carpeted. Number of boarders limited to twenty-five. Apply early. Terms moderate. Session opens first Monday of September, 1870. Address

A. B. STARK, Principal, Lebanon, Tenn.

POANOKE COLLEGE, SALEM, VA.

Next Session Begins September 5.

This Institution has a full corps of instructors, a thorough course of studies, and aims at a high grade of scholarship. Its superior educational advantages, moderate expenses, healthy location, and excellent staff, traveling and telegraphic facilities, render it well worthy the attention and patronage of the South.

Expenses for session of ten months, about \$210 00

This estimate includes board and tuition, embracing modern languages. A slight advance on the above for students boarding in private families.

For further particulars, catalogues, etc., address

REV. D. F. BITTLE, D. D., President of the College.

A SUMMER TERM OF THE

Southern Methodist High School

will commence on Monday, the fourth day of July next. School hours from eight A. M. to twelve M. Tuition returned only cost and board.

The best advantages afforded. For terms, etc., consult

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS.

PUBLISHED BY

CHARLES SCHMIDT AND COMPANY,

654 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.

"Incomparably superior to anything published."

Introduction to the Study of Geography.

Elementary Geography.

Intermediate Geography.

Common School Geography.

Guyot's System is approved and Indorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenney, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by it the pupils of this generation will obtain a clearer, more definite and extended knowledge of the world on which they live, and that it is so systematized as to render that knowledge so valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

MAY. 1 2 3 4 5 6 7

NEW ORLEANS MARKETS.

From the N. O. Price Current.

We have no improvement to notice in the general market, which continues extremely dull. The receipts and supplies of sugar have been too inconsiderable to admit of more than a retail business, but prices have continued firm. Western produce generally has continued inanimate, without any marked change in prices.

Our accounts from the country are still conflicting. The alarm with regard to worms continues to prevail in many parts of Mississippi, Arkansas and Louisiana. A letter from De Soto speaks in a desponding tone. On the other hand, travelers by the Jackson railroad give cheering reports from parts of Mississippi and Tennessee. The prevailing impression in our cotton circles appears to be that there will be no increase.

The river is now twelve feet four inches below high water mark.

Cotton.—The following are the arrivals since the fifth instant:

Louisiana and Mississippi, bales.	522
Mobile.	3
Florida.	7
Total.	532

On Saturday a buyer came forward and took 401 bales for the North, in addition to which another took 13. On Monday the demand was equally limited, and the sales were confined to 313 bales. On Tuesday the inquiry appeared to be confined to two parties, who came forward and took 191 bales, part at 12½ to 14c., and part at 17½c. for strict middling. We have rarely seen the market more stagnant. On Thursday inferior was quoted at 7½c., low ordinary at 9 to 10½c., ordinary at 11 to 12½c., good ordinary at 13 to 15½c., low middling at 16½ to 17c., middling at 17½c., and strict middling at 18c., but from the indications of prices paid the market may now be quoted nominal as below.

This makes an aggregate for the past three days of 925 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 1,139,059 bales, against 794,770 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 788,188 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 475,281 bales to Great Britain, of 126,648 to France, and of 118,378 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary.	11 to 12½
Good ordinary.	13 to 14½
Low middling.	16 to 16½
Middling.	17 to 17½
Strict middling.	17½ to 18

COTTON STATEMENT.

Stock on hand Sept. 1, 1869, bales.	770
Arrived past three days.	507
Exported previously.	113,970
Made from waste and damaged cotton, samples, etc.	9,562-120,379
Exported past three days.	4470
Exported previously.	113,949
Burned.	1317-116,574
Stock on hand and on shipboard.	38,827

SUGAR.—There is little or none coming in. Louisiana is scarce, while the stock of Cuba is very light.

MOLASSES.—There is little or none coming in, and the stock on hand is so light as to be merely nominal.

Flour.—The market has continued dull, with some inquiry for export, though without any change in prices.

MONEY.—Gold, 116½ to 117½. American silver half dollars, 110½ to 112. Mexican dollars at 3½ to 4 per cent. premium in gold.

Warrants have been dull, with no sales reported, except \$1,200 Metropolitan Police, on Saturday, at 99½, \$1,600 old State, on Monday, at 90c. Dealers have bought State warrants at 70c. for new, and 90c. for old, and Metropolitan Police at 98½ to 99c., and sold the former at 72c. for new, and 93c. for old, and the latter at 99 to 99½c.

The stock market has been almost stagnant with a general weakness in prices, and quotations are nominal. The sales embrace 200 shares Mississippi Valley Navigation Company, on Saturday, at \$2, 100 at \$2, 25 at \$2 12½, 600 at \$2 10, and 500 at \$2 10; and 205 Sugar Shed Company at \$23 50; 100 Slaughter House, on Monday, at the reduced rate of \$16; and 500 Ship Island Canal, on Tuesday, at 60½c., 500 at 62½c., and 50 Sugar Shed Company at \$26. Slaughter House was better on Tuesday, with \$17 bid.

City Treasury notes are quoted at 15 per cent. discount.

CATTLE MARKET.

New Orleans, August 9, 1870.

Texas cattle, choice, per head.	\$4 to 45
Texas cattle, second quality, per head.	30 to 40
Texas cattle, third quality, per head.	20 to 30
Hogs, per lb. gross.	9 to 11c
Sheep, first quality, per head.	\$4 to 6
Sheep, second quality, per head.	3 to 4
Sheep, third quality, per head.	2 to 3
Milk cows, choice, per head.	60 to 125
Milk cows, per head.	0 to 10
Milk cows, with calves.	0 to 10
Yearlings, per head.	7 to 12
Calfes, per head.	5 to 12

Special Notices.

ALEXANDRIA DIST. CONFERENCE.

The District Conference for Alexandria, Louisiana Conference, will convene in Centerville, Catahoula parish, Louisiana, on Friday, the sixteenth of September, 1870, at eleven o'clock A. M. Local preachers, pastors and stewards will please come prepared to present their reports. Delegates to the Annual Conference will be elected.

J. F. MARSHALL, P. E.

PENSACOLA DIST. CONFERENCE.

The District Conference for the Pensacola district, Alabama Conference, will hold its annual session in Milton, Florida, beginning on Thursday, September 23, at eight o'clock A. M. Opening sermon by Rev. J. A. Pace, on Wednesday night, September 28. Ministers from abroad are expected and invited to attend.

J. A. PARKER, P. E.

NOTICE.

To the Official Members of the Yazoo District, Mississippi Conference:

Failing to secure the co-operation of a sufficient number of tent-holders for the camp meeting at Fletcher chapel, our District Meeting is transferred to Richland, Holmes county, Mississippi, and will begin on Thursday morning before the first Sunday in September, at ten o'clock.

MACON DISTRICT CONFERENCE.

The District Conference for Macon district, Mobile Conference, will convene at Macon, Mississippi, on Thursday, September 8. It has been deferred until the revival season is over, with the promise of a full attendance of preachers and official members. Opening sermon by Rev. William Murrell, D. D.

J. B. STONE, P. E.

SHREVEPORT DIST. CONFERENCE.

The District Conference for Shreveport district will meet at Greenwood, Louisiana, on Thursday, September 22. The official members of the respective churches are pressed with the importance of attending.

JOHN PIPES.

VICKSBURG DIST. CONFERENCE.

The District Conference for the Vicksburg District, Mississippi Conference, will be held in Port Gibson, Mississippi, on Wednesday, September 7, 1870. Opening sermon by Rev. Thos. Nixon, on Wednesday night. Bishop Keener has promised to be present.

JOHN A. B. JONES, P. E.

WOODVILLE DIST. CONFERENCE.

The Woodville District Conference will convene in Liberty, Mississippi, on Thursday, the first day of September, at eleven o'clock A. M. Pastors will please prepare full reports of the condition of the churches under their charge. Local preachers will be expected to present reports of their appropriate work as such. Each steward will please present to the conference an exhibit of the amount collected by him for church purposes this year, with such other facts as he may think proper to report to the conference. Delegates to the Annual Conference will be elected. Brethren, we expect you all.

JAS. A. GODFREY, P. E.

CAMP MEETINGS.

We will have a camp meeting (D. V.) at Frost's Bridge, on the Clark and Shubuta circuit of the late Mobile Conference, embracing the second Sunday in October. Brethren in the ministry, who can do so, are especially invited to attend, and any others who feel interested in this great work. Come over, Mr. Editor, and help us.

WILL H. LETH, Pastor.

A camp meeting will be held on Pleasant Hill and Manny circuit, at Benah, commencing on Friday evening, the thirtieth of September. Preachers will please note it.

JOHN PIPES.

There will be a camp meeting at Chin Grove, between the Westville and Ozark circuits of the Marians district, Alabama Conference, commencing on Friday before the second Sabbath in September. Brethren, come!

WM. A. SAMPY.

T. S. ARMISTEAD.

There will be a camp meeting held in Springville, Springville circuit, Louisiana Conference, beginning on the first day of September next. Let the preachers come.

JESSE FULTON, P. E.

A camp meeting will be held at Linwood, DeKalb circuit, Macon district, Mobile Conference, commencing on Thursday night before the fourth Sunday in September.

U. L. THOMPSON, P. E.

Lafayette Dist. Montgomery Conference.

Arbaconchee mission, at Humri-racine.

Lineville circuit, at Lineville.

Marble Valley circuit, at Andrew chapel.

Pineknayville circuit, at Mt. Moriah.

Socapatoy circuit, at Mt. Pisgah.

Tallassee circuit, at Pleasant Grove.

Dadeville circuit, at Dadeville.

Lafayette circuit, at Sweet Home.

Frederick circuit, at Pleasant Grove, Sept. 4.

Wedowee circuit, at White's chapel.

F. L. B. SNAPE, P. E.

Woodville Dist. Mississippi Conference.

Buffalo, at Mar's Hill.

Moulville, at Beech Hill.

Anite, at Adam's.

St. Helena, at Synd.

Wilkinson.

Liberty, at Liberty.

Woodville.

Percy Creek.

JAS. A. GODFREY, P. E.

Opelousas District, Louisiana Conference.

THIRD ROUND OF QUARTERLY MEETINGS.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, AUGUST 20, 1870.

NO. 31.

NEWS OF THE WEEK.

DOMESTIC

WASHINGTON, Aug. 14.—There is an immense amount of cable dispatches to the effect that the French have certainly evacuated Metz and Nancy, crossing the Moselle to the Fortress of Toul. The French destroyed a fine bridge of seven arches. Large quantities of stores were captured. The fighting was confined to the outposts. The headquarters of the united armies of Frederic Charles and General Steinmetz are at Henry, twenty miles from Metz.

NEW YORK, Aug. 15.—A special to the Herald: London advices from Forbach say the French, in retreating to the west side of the Moselle, were attacked by the Prussians of General Steinmetz's army. The French were thrown into great confusion, and after a gallant stand were routed with great slaughter. A dispatch from Carlsruhe says: The Prussians occupy Mulhouse and Besancon.

One hundred thousand landwehr are crossing the frontier.

CHICAGO, August 15.—President Grant's attention having been called to a dispatch from New York in this morning's Chicago Tribune, stating that it was understood in Republican circles that he opposes the nomination of Mr. Greeley for Governor of New York, he pronounced it utterly untrue. On the contrary, he expresses himself quite favorable to Mr. Greeley's nomination, and thinks no candidate can be put in the field who can get more votes against Hoffman than Greeley.

Dr. Nelson von Patten committed suicide by shooting himself, on Saturday, at Maple Plain, Minnesota, on the St. Paul and Pacific railroad. Previous to doing so he dressed himself for burial. He left considerable money, and also a letter saying he was weary and wanted rest.

Captain J. F. Webb, of the government steamer Montana, at work at the bar a few miles below St. Paul, had his leg terribly crushed yesterday by the reaction of a cable.

President Grant, Vice President Colfax, Governor Palmer and General Logan and party of friends visited the Elgin Watch Factory to-day.

President Grant left here this evening at five o'clock for the East, via Cleveland.

Governor Seward left for San Francisco and China this morning. This morning Christopher Thiers, at Horsier's Grove, near this city, aged nineteen years, while attending the threshing machine, fell among the works and had both of his legs frightfully lacerated. He lived but a short time.

ST. LOUIS, Aug. 15.—John D. Perry, president of the Kansas Pacific railroad, received a dispatch from the end of the track this P. M. stating that seven miles of track was laid between five and eleven o'clock this morning. The remaining gap of three and a quarter miles will be laid this P. M., when another grand through route to the Pacific will be completed. This is the fastest track laying ever done before.

OMAHA, Aug. 16.—Hon. W. H. Seward arrived here to-day, and goes west to-morrow on his trip around the world.

On the thirty-first of July Fred Sawyer and Thomas Johnson hired a conveyance at Lincoln, Nebraska, for the purpose of locating land on Blue river. Sawyer returned to Lincoln on the ninth of August alone, and reported having left Johnson at his homestead. Suspicion being aroused, his neighbors went in search of him. He was found sixteen miles west of Beaver Crossing, by the side of old Fort Kearney and Nebraska City road, with seven bullet holes in his body. His remains had been partially eaten by wolves. Sawyer has been arrested. Johnson's friends reside at Dixon, Illinois.

CINCINNATI, Aug. 16.—The National Labor Convention admitted Sam F. Cary to a seat.

A stormy time followed the motion admitting John W. Langston, colored. The motion was objected to on the ground that Langston did everything he could to injure the labor movement. He was finally admitted by three or four ladies voting aye.

SAN FRANCISCO, Aug. 16.—Two German military commissions to-day remit an additional \$10,000 to Berlin.

The French residents yesterday observed the fete of Napoleon.

At the village of New Almaden a quicksilver mine was destroyed on the fifteenth, and fifty or sixty houses burned.

CHICAGO, Aug. 16.—The Post of this evening says Mr. Frelinghuysen having concluded to decline the mission to England, President Grant offered the place to Senator Trumbull, who, it is understood, will not accept, preferring to remain in the Senate.

NEW YORK, Aug. 16.—The latest telegrams show that the French were defeated in the battle near Metz.

A Berlin dispatch says the battle was fought at Pagay, near Metz, and raged furiously for six hours. The Prussians numbered sixty thousand, under command of General Steinmetz.

The French were commanded by Marshal Bazaine, number unknown. The fire of the French infantry and artillery was terrific, but the Prussians, never wavering, followed up every advantage, and finally broke the French line, when a general panic ensued, and the troops fled to Metz and Verdun.

The loss on either side is unknown, but it is believed to exceed that at Woerth.

It is rumored that a secret alliance has been entered into by England, Holland and Belgium.

Antwerp is being rapidly fortified.

NEW YORK, Aug. 17.—The Prussian minister of war emphatically denies the reported loss of forty thousand to the Prussians in Monday's battle, but admits that they received several checks which obliged them to abandon their effort to cut off the French on their line of retreat.

NEW YORK, Aug. 17.—Midnight dispatches put Steinmetz at Metz, the Crown Prince at Bar Le Duc, and the Prussian center, under Frederic Carl, between Metz and Verdun. The entire French army is moving toward Chalons, and a Paris correspondent says:

"The impression is universal in that city that Bazaine will fight his battle at Chalons. The fighting is with the French rear guard in hopes of forcing a general engagement at some point short of that picked battle ground."

M. Gallardet telegraphs that advances from the army represent the French soldiers as eager for revenge and ready for battle. He also says Trochu has an army of two hundred thousand already at Chalons, and that the Imperial Guard are forming at Mourmelon.

NEW YORK, Aug. 18.—Berlin telegrams report Metz to be invested on all sides by the Prussians.

Ten thousand wounded Frenchmen arrived at Chalons on Sunday.

The regular army remains faithful to the Emperor.

The Prussian loan, failing at home, has been offered at a heavy discount in London.

Russia and England are anxious to mediate between the belligerent powers in the interest of peace.

Cannading has been heard off Cuxhaven.

NEW YORK, Aug. 18.—Per cable comes the subjoined dispatch:

"Paris, Aug. 18.—There was a battle of twelve hours' duration near Metz on Tuesday. No reliable account of the result has been received; but what is known shows that the French position at Metz is impregnable. The losses on both sides were fearful."

"Marshal McMahon's proclamation had revived confidence among people and soldiers."

"Routes had advanced one per cent."

NEW YORK, Aug. 18.—Later intelligence confirms the news of a disastrous defeat to the Prussians in the battle of Tuesday near Metz.

The French army was commanded by Marshal Bazaine, and gave battle to the combined Prussian forces under Prince Frederic and General Steinmetz.

The losses on both sides, it is reiterated, were fearful.

General Frossard, of the French army, was dangerously wounded.

Several Prussian generals were killed and wounded.

Olivier, late prime minister of France, has fled the country, amidst the derision of the populace.

FOREIGN

LONDON, Aug. 14.—The fortifications around Paris are becoming immense and rapidly increasing. The railroads around Paris have been cut. Drawbridges will be placed over the cuts to allow the approach of friendly trains.

LONDON, Aug. 14.—The French are retreating. They have retired from Metz and Nancy, and the Prussians occupy the latter.

LONDON, Aug. 14.—Advices from Metz state that the French army

has been withdrawn to the east bank of the Moselle. Marshal McMahon is at Toul, twelve miles west of Nancy.

The evacuation of Metz is considered certain.

Prussians count on starving out the defenders of Strasburg without recourse to bombardment.

A dispatch from Nancy, via Berlin, dated Saturday night, says that a French battalion, moving toward Metz, was encountered in the morning on the railway, near Port-a-Mousson, and retreated, leaving its baggage train in the hands of the Prussians.

The Prussians have occupied Nancy, which had been evacuated by the French.

The Prussian cavalry have destroyed a portion of the railway between Frouard and Paris, cutting off supplies and forage for the French troops sheltered under the glais of Metz.

PARIS, Aug. 14, noon.—There is nothing new from the headquarters of the army. Telegraphic communication was interrupted yesterday between Paris and Nancy.

The authorities at Toul have sent a dispatch to Paris stating that Nancy had been occupied by a Prussian detachment. The news is confirmed this morning.

LONDON, Aug. 14.—The Emperor Napoleon's retreat from Metz is fully confirmed from Cuxhaven.

It is stated that nine French ironclads and avisos are in the offing. The French Admiral Bouet Villamez is off Kiel.

The French deny having committed any violation of the protocol of Geneva by the neglect of wounded soldiers.

Metz, Aug. 14, 8.10 A. M.—The prefect of the department of the Moselle sends the following telegram to the minister of the interior: The Emperor left to-day at two o'clock, for Verdun, accompanied by the Prince Imperial.

Before leaving his majesty issued the following proclamation: "On quitting you to fight invaders, I confide to your patriotism the defense of this great city. You will never allow the enemy to take possession of this great bulwark of France, and I trust you will rival the army in loyalty and courage. I will ever remember with gratitude the reception I have found within your walls, and I hope, in more joyous times, I may be able to return to thank you for your noble conduct."

PARIS, Aug. 15.—The city of Mulhouse is still in the hands of the French.

L'Opinion Nationale computes the force for the defense of Paris at one hundred and thirty thousand men, with six hundred guns mounted.

LONDON, Aug. 15.—Great events are expected at Kiel immediately.

LONDON, Aug. 15, 2 P. M.—The French order in regard to telegrams has been modified. Private telegrams can be accepted for and through France, except for the following departments: Moselle, Bas Rhin, Vosges, Haute Rhin, Haute Marne, Marne, Meuse and Haute Savoie.

The time allowed neutral ships to leave the blockaded ports of Germany is only ten days instead of fifteen, as at first reported.

PARIS, Aug. 15.—Reports say that Marshal McMahon is at Toul. The Constitutionnel, however, says he is at Nancy. Edmund About is still missing, and it is feared he has been killed.

LONDON, Aug. 15, 2 P. M.—A second pitched battle is reported as having occurred near Metz this morning, in which the Prussians were victorious.

Revolutionary movements of a formidable character have recently occurred in Italy, as well as in Spain. Proclamations establishing republics in both countries are hourly expected.

NEW YORK, Aug. 15.—The Telegram has the following: LONDON, Aug. 15.—Disturbances of a serious character have occurred at Marseilles and Lyons. Crowds collected in the streets shouting, "Abas L'Empereur." Three persons are reported killed. Very strong rebellious feeling has been manifested. Serious fears are entertained of trouble to-day, it being the Emperor's fete day. Advices respecting the Prussian flank movement upon Metz are confirmed by a statement that the German troops held Port-a-Mousson.

VIENNA, Aug. 15.—The Austrian government denies having moved troops to the Transylvania frontier.

BERLIN, Aug. 15.—Hundreds of German families have been expelled from Paris. Many have just reached Cologne. Subscriptions for their relief are opened in different parts of Germany.

PARIS, Aug. 15.—Twenty French citizens of Worth have been shot by the Prussians in retaliation for cruelties said to have been inflicted on some wounded German prisoners.

FLORENCE, Aug. 15.—A dispatch from Palermo announces the arrest, yesterday, of Mazzini. He had just arrived from Genoa. He was taken to Galt.

PARIS, Aug. 15.—Advices from the Rhine indicate that the enemy does not readily intend to lay siege to Strasburg, but merely to cut off communication, and for this purpose they blew up the bridges and railway to Basle. It is thought that the surrounding forces of the enemy are inconsiderable in number.

The city is fully garrisoned and provisioned for a siege, and the supply of water is under the control of the authorities and cannot be cut off.

The Gaulois reports that Victor Emmanuel wrote a long letter to the Emperor Napoleon, saying: "I gave you my word and am ready to keep it, but I must tell you should I leave Italy I may never re-enter it."

The Gaulois adds, the Emperor released the King from his promise.

The Presse admits the mission of the Duke de Cadore to Denmark appears to have failed, and quotes a statement of a Danish journal that the King, Christian, declined to receive him through the pressure of England and Russia. The Presse also gives up all hopes of an armed assistance from Italy, where Garibaldians are doing everything in their power to turn the minds of the people against the nation which so chivalrously aided them in their hour of need.

Advices from Rome represent the soldiers of the Legion d'Antibes as anxious to join the armies of France.

The French residents are much affected by the news of the reverses, but the clerical authorities and partisans of the Pope seem to rejoice and flock to the new Prussian legation, where they are received with unusual favor.

The press in all parts of France resolutely denounces overtures of peace until the Prussians are driven from the French soil.

VIENNA, Aug. 16.—Baron Von Benst denies any attempt on his part to mediate between France and Prussia.

LONDON, Aug. 16.—The statement of the total destruction of the steamer Pennsylvania is erroneous; the cargo was destroyed, but the vessel will be able to go to sea on the twentieth instant.

Prussian dispatches to the Prussian minister are full of triumph, and express the greatest confidence in the result of the war.

PARIS, Aug. 16.—The Journal Officiel declares Cherbourg, Brest, Lorient and Rochefort, in a state of siege.

The French left two dispatch boats in the Tiber upon evacuating Rome.

LONDON, Aug. 16.—Extracts from the French official bulletins state the Prussians are not in force before Strasburg, and that Bitsche still holds out. The bridges at Tergesheim and Basle have been destroyed by the enemy.

English experiments with the mitrailleuse indicate their destructive at close quarters, but troops handling them may be annihilated before they come in range.

The Times sympathies are strongly with Prussia, and rejoices in Prussian successes.

It is reported that the Bavarians have captured Marsal with six cannon.

VERDUN, Aug. 16, 6 A. M.—No news from Metz. Nothing has occurred to-day. All day yesterday cannon was heard between Metz and Verdun. Persons from that direction say a great battle was fought, in which the Prussians lost more than forty thousand, and that the Prussians were completely defeated yesterday morning at the extremity of Verdun. The enemy had been seen directing his retreat to the south.

Though this is transmitted by authority, the government has not been able to verify it. It is given to the public under reserve by the minister of the interior.

The Bishop of Luxemburg and several clergymen have gone to Metz to comfort the dying.

HAVANA, Aug. 16.—The Panama and West India cable met with an accident after reaching deep water.

A defect was also discovered in the cable across the shallows.

VIENNA, Aug. 17.—In consequence of the abolition of the concordat, the Papal Nuncio has been recalled.

LONDON, Aug. 17.—A dispatch from Carlsruhe, the headquarters of Baden army, dated the fourteenth, says: The garrison of Strasburg is to complete the fortifications, but the besiegers have destroyed much of their work.

VIENNA, Aug. 17.—The Abendblatt corrects the statement of the London Times regarding Von Benst's friendliness to French pretensions, and positively denies that the premier offered to form an alliance with France.

FRANKFORT, Aug. 17.—General Sheridan has received permission to follow the campaign with headquarters of the King.

LONDON, Aug. 17.—Napoleon's growing unpopularity is entirely owing to his interference with the army, instead of leaving it with military experts.

The Times says the French received the finishing stroke at Metz; that a battle will be fought at Chalons, when English intervention will occur.

FLORENCE, Aug. 17.—The Italian army has been increased. An extraordinary loan for war purposes has been negotiated.

Children's Missionary Societies.

MR. EDITOR: The late General Conference, as you remember, recommended the organization of missionary societies in connection with all our Sunday schools. The attempt has been made in some places with great success. Below you have the result of the efforts of two schools, as given by the editors of the Sunday School Visitor and the Christian Advocate. At Jonesboro, Holston Conference, the plan is working well. The Rev. E. E. Hoss, the pastor, is training the dear children of his charge, and they are doing nobly.

J. B. McFERRIN, Sec.

MISSION ROOM, Aug. 10, 1870.

CHILDREN'S MISSIONARY SOCIETIES.

The condition of our mission work painfully demonstrates the fact that we are not a missionary church. We never wrote these words before—we write them with reluctance now, and with qualifications too. We must develop the missionary spirit in the church, or, perhaps, we should say, of the church—for the missionary spirit is of the very essence of Methodism. On this subject we shall have more to say on a fitting future occasion. For the present we wish simply to state that we must take hold of the children, and imbue them with the spirit of missions. The late General Conference made a move in the right direction when it recommended the formation of children's missionary societies in all our Sunday schools, and that monthly missionary collections be made in them. The juvenile missionary societies in the British connection, by their numerous tributary streams, swell largely the great current which fills the missionary treasury of that great missionary church. Let us imitate their example. A communication in the September number of the Sunday School Visitor shows how this matter is attended to in the Monumental City:

"I take the liberty of giving you a brief account or history of a children's missionary society connected with Trinity church, Baltimore. 'Trinity Sunday School Missionary Society' was organized in June, 1866. Its officers consist of a president, vice president, secretary and treasurer, the first three being chosen from the scholars of the school. It has such a constitution as is needed for its efficient working. The school, as a whole, forms the society. The names of the scholars are usually selected by the teachers, upon the suggestion of the teachers, having reference to beauty and appropriateness. I will mention a few of the names of this society: 'Heirs of Immortality,' 'Priceless Laurels,' 'Crimbs for the Comfortless,' 'Little Gleaners.' Upon the second Sunday of each month this society holds its regular monthly meeting. After appropriate religious exercises, and the reading of the minutes of the preceding meeting, the secretary calls the name of each class, which, in response, sends forward to the treasurer the amount of money collected during the month. The secretary

reports the amount collected to the school as often as is expedient. Suitable persons are procured to address the children at these meetings in a manner to encourage them, and induce them to give more largely, and to keep before their minds the principle which, entering into a gift, makes it acceptable to God. At the end of the year the society holds an anniversary, which has always proved a success. It would make your heart glad to see with what happiness the children witness their anniversary. It is, of course, a public meeting. As at the monthly meeting, each class, when called by the secretary, sends forward to the treasurer an envelope, upon which is written the whole amount collected during the year. Then upon a card in the envelope is written a scriptural motto corresponding to the name of the class; also upon the card the name of some person selected to address the class from this motto. The treasurer receives the envelope, reads the amount written upon it, hands the card to the person whose name it bears, who makes a brief and pertinent address to the class. Each class also has an emblem suggested, if possible, by its name, or a floral one of some beautiful design. To assure all of the great good to be accomplished by this means, let me give the amounts collected each year by this society. In March, 1867, they reported \$1,050. In March, 1868, \$1,179. In March, 1869, \$1,258 46. In March, 1870, \$1,636 74. Every feature, in both the monthly and anniversary meetings, is calculated to create a great interest among the children in the proceedings, and to beget within them a spirit of generous rivalry to excel. If you could see the spirit with which they enter into it, you would be convinced, if you are not already, of the good likely to be accomplished by such organizations, both in the amounts actually received for beneficent purposes, and in the fostering of that spirit of charity and unselfishness, the opposite of which the wisdom of this world is so inclined to teach. God has permitted us to see good accomplished by this work, and when the records of all acts and their results shall be opened to our view, souls, we have no doubt, will ascribe their salvation through Christ to these missionary efforts."

The Rev. G. G. N. MacDonell writes to the Southern Christian Advocate, Savannah, Georgia, July 21:

"Inclosed find \$30, the second installment of Wesley Church Sunday School Missionary Society for the China mission. Our mission school is prospering, and I think we will report at least one hundred and fifty scholars, and \$100 missionary money at Conference. Urge upon the Sunday schools everywhere the importance of organizing societies."

Sunday School Convention, 1871.

The General Conference, at its session in Memphis, provided for a grand Sunday school convention. The object is to bring together, from all sections of the church, Sunday school workers, who will meet not to legislate, but to investigate methods, appliances and regulations, and spread before the entire connection the result of their investigations. A committee was appointed to arrange for said convention. As secretary of that committee, it has been made my duty to call the attention of each Annual Conference, through the Advocate, to the importance of electing delegates. The committee earnestly desire every Conference to send delegates.

The convention will meet in Nashville, Tennessee, on the third Thursday of May, 1871. The delegates are to be chosen "by the Annual Conferences from their most efficient Sunday school men, in the ratio of one member for every forty members of each Annual Conference; provided, however, that every Annual Conference shall be entitled to one representative."

JOHN MATHEWS, Secretary of Committee.

Is there any connection between those book children who are described as "perfect little lambs" and the "muttonheads" we sometimes find in society?

There is no real use in riches, except it be in the distribution; the rest is but conceit.

The Christian Advocate.

SATURDAY, AUGUST 20, 1870.

THE SONG OF THE BOW.

SECOND PART, 1, 17-21.

Beauteous hills of Israel!
The slain are on thy sides:
The mighty and the beautiful,
How sunk in martial tides!
O, tell it not in boasting Gath,
Nor yet in Askelon!
Philistia's daughters else will laugh,
And boast the battle won!

Upon Gilboa's silent hills
Fall not, ye gentle showers!
Cease your rippling, crystal rills!
O dew! be not the flowers!
For there the shield of Saul was lost;
'Twas in a sudden war;
And Jonathan—the mountain crossed—
The raging onset bore.

The bow now hangs near Dagon's head,
The sword to Gath hath gone—
And on the hills are Zion's dead,
While Israel doth mourn.
O, tell it not in boasting Gath,
Nor yet in Askelon!
Philistia's daughters else will laugh,
And shout the battle won!

A. in Interior.

PROVING THE WORD OF GOD.

"That ye may prove what is that good, and acceptable, and perfect will of God."—ROMANS XII, 2.

In 18—, when I was junior preacher on C— circuit, G— Conference, while preaching one beautiful Sabbath, I observed a fine-looking old gentleman, sitting far back in the congregation, who paid very close attention to every word of the sermon. On making inquiry I learned that he was a wealthy planter of the neighborhood, and was a very intelligent man, and that he was an infidel. The people were astonished to see him at church, for he had not been there before in many years. Some one informed me, however, that he had learned there was a boy on the circuit, and had come to hear what the boy could say. He was pleased with the boy, and so he frequently attended my appointments during the year.

In the latter part of October, when I arose to preach I saw the infidel sitting quietly before me. The services over, he sought an introduction to me, and gave me a pressing invitation to accompany him to his home and spend the afternoon and night. My brethren urged me to go:—"For," said they, "you may do him and his son some good." I consented. When we reached his elegant mansion rain was falling and the cold wind was blowing, which made us enjoy the beautiful parlor and the blazing fire. Dinner was announced. It was rich, and I enjoyed it. I felt that the lines had fallen unto the youthful itinerant in one very pleasant place.

While dining Mr. S— informed me that he had lost his wife about two years before, and that he and his son had led a lonely life. He seemed very much affected while speaking of his departed wife. I had learned from others that she was a devoted Christian, a member of the Methodist Episcopal Church South, and died most triumphantly, in the full assurance of glorious immortality.

After dinner we gathered about the fire, and Mr. S— began the conversation by saying:

"Mr. T—, will you please to give me a reason for believing the Bible is the word of God?"

I had been reading Watson's Institutes, Alexander on the Evidences of Christianity, Butler's Analogy, etc., and was ready to reply: "Certainly, sir, with great pleasure."

I gave him a reason. He began to argue, and soon, it seemed to me, he undermined and overturned my reason!

I was a boy then, and was not prepared for the conflict. It was cruel in him to treat me so. I gave him another reason, and, so far as I could see, he destroyed that! I continued to present reason after reason, and he swept them all away. I was troubled—almost overwhelmed. What shall I do? What will become of me? The stormy night was gathering around the mansion; but infinitely worse was the storm, and the night which were gathering about my soul!

I sat and viewed Mr. S—, who seemed to lift himself in triumph above his youthful and fallen antagonist.

I thought of my past life, and looked forth to the future. I re-

membered my precious mother, and asked myself: "What will she say when she hears that I have become an infidel?" I called to mind her modest, consistent and devoted Christian life, and how she taught me to believe the Holy Bible, and how she patiently and faithfully trained me in the way in which I should walk.

To heaven my sinking heart cried for help in that hour of deepest sorrow. Quick as lightning the light burst upon me, and I was ready to turn with all my might upon my cruel foe.

"Now," said I, "Mr. S—, you may out-reason me on these evidences of the truth of the Bible which we have had under consideration, but there is one kind of evidence which we have not touched."

"Well, sir," said he, rather defiantly, "let us have that."

"It is," said I, "the testimony of experience. Every one's privilege and duty is to prove for himself the Bible to be what it purports to be—the revealed will of God. Now, sir, when quite a child I was taught in the Bible to repent of my sins; and therefore, when a youth of fifteen summers, I repented. The Bible then taught: 'Believe on the Lord Jesus Christ, and thou shalt be saved.' I believed. And, sir, glory be to God, I was saved! I received an inward assurance that my sins were forgiven, and I was happy. Yes, I rejoiced in hope of the glory of God!" And thus I continued to speak of the joy, the life and the power of experimental religion for a long time, until I felt that my soul was filled with the glory of God.

Oh, it was good to be there! The old infidel relented and began to weep. His son, an intelligent young man, also wept. It seemed to me we were in heaven's gate! Supper was announced. Not much was said while we ate. Not long after the old man opened his elegant library and took out a large, well worn Bible and an old hymn book, and brought them to me.

"This," he said, "was my wife's Bible. She believed in it and loved it. This was her hymn book. She delighted to sing these hymns." (His tears flowed freely.) "My wife was a true Christian—if there are any Christians. She died happy and is in heaven—if there is a heaven. Now I wish you to read a chapter out of my wife's Bible and sing a hymn out of her hymn book, and pray for me and my son."

When I had read a suitable lesson he said: "Please sing my wife's favorite hymn, commencing:

"Jesus, lover of my soul,
Let me to thy bosom fly,
While the nearer waters roll,
While the tempest still is high."

I sang and was happy. I prayed and was more happy. Never have I seen a happier night in all my pilgrim course.

Next morning, after prayer and breakfast, I exhorted the young man to trust in his mother's God, and induced Mr. S— to promise me that he would try to believe the Bible and meet his wife in the Bible's heaven. I promised to pray for them. I left, and have never heard anything further of them. I know this, however: I have been saved from infidelity to this day, and mainly by the influence of a pious mother; and have fully proved in my own heart "what is that good, and acceptable, and perfect will of God." Glory be to God for Christian mothers! Glory be to God for the Bible!

"Holy Bible, book divine,
Precious treasure, thou art mine."
W. S. TUCKER.

AUGUST 5, 1870.

SHARON FEMALE COLLEGE.

Mr. Editor: The annual examinations of the pupils of this institution were had on the nineteenth and twentieth of July, 1870, and were as thorough as the time allotted to this work would permit. In all the branches in which the young ladies were examined they showed that they had been well instructed and had applied themselves to their studies.

The commencement exercises were on the twenty-first of July. There was no senior class this year, and consequently no graduates; yet the

entire school took part in the exercises of commencement day. Dialogues, short addresses, compositions and music filled up about three and a half hours, to the pleasure, profit and delight of the large audience present to hear and appreciate. It was a good day for the college. The past term has had a full attendance of regular scholars throughout the term than for several years before. There were five in the junior and eleven in the sophomore class, so that if these classes continue we shall have the pleasure of graduating several young ladies within the next two years.

This college dates back thirty-five years! It was the mother of schools for young ladies in central Mississippi. It is a fine and pleasant location for schools, and those to whom it belongs should do more for it than they do. The boarding house ought to be rebuilt. It is a necessity. All feel this to be so. Many hearts have a place for the old college, and we expect to see her arise and accomplish a great work yet. She has been engaged too long in this noble work to now be silent or idle. Let all in this part of Mississippi send their daughters and wards to this place for education.

Rev. J. M. Pugh's health is such that he has had to resign the presidency of the college. The Rev. W. L. C. Hunnicutt has accepted the position, and the exercises of the college will be resumed under his presidency on Monday, the nineteenth of September next.

Visitor.

Florence Wesleyan University Commencement.

Mr. Editor: Knowing the deep interest felt by you in all that concerns the North Alabama Conference, its people and institutions of learning, we are satisfied you will hear with pleasure that the old college, established by the church almost half a century ago at Lagrange, and removed in 1855 to Florence, Alabama, where, under the name of the Florence Wesleyan University, it became one of the most flourishing and useful institutions of our Southern Church, has been reorganized, and promises soon to resume the proud position it held before the war under Dr. Rivers. The first annual examination since the war began on Wednesday, June 29, and closed with the commencement exercises on the sixth ultimo.

The commencement sermon was delivered on Sunday by Rev. J. G. Wilson, president of Huntsville Female College. Theme: "Great is the Mystery of Godliness." It was a plain, unpretending gospel sermon, chaste in language, simple in arrangement, clear, concise and logical, sometimes warming into an elevation of thought or melting tenderness that moved the whole audience.

Monday evening was devoted to literary addresses. About twenty speeches were delivered. The magnificent chapel was crowded with the elite of town, country and visitors from afar; and, if we can judge from the rapturous applause, the close attention, and the beautiful bouquets that, thrown by fair hands, fell in showers upon the young orators, we must conclude they had a great success.

On Tuesday, at half-past two, the law class was examined by Chancellor Wade Keyes and Judge William B. Wood, who, reinforced by the Florence bar, seemed to exhaust all the knotty points and hard learning of the law on the class without causing it to fail or hesitate.

At half-past eight P. M., O. S. Kennedy, Esq., delivered a beautiful and appropriate address to the alumni society of old Lagrange and the University.

On Wednesday, at half-past ten A. M., the commencement exercises opened with prayer by Bishop Paine, after which a band discoursed sweet music, and then a speech was delivered by Mr. James K. Powers, of the sophomore class. From his appearance and character we expected a fine speech, and were not disappointed.

George P. Jones, law graduate, next spoke. Theme: "The Crucifixion." The speech was well con-

ceived, and abounded in beautiful thoughts and sound deductions. William J. Wood, law graduate, followed with a speech full of fun, wit and satire.

Rev. R. H. Rivers, D. D., of Louisville, Kentucky, then delivered the literary address. Theme: "Truth and its Conflicts." Of the speech we will only say that Dr. Rivers' friends say it was one of his best efforts. It was solid, practical and pointed, and when he closed the audience was "very much stirred up."

President Anderson then conferred the degree of LL. B. on George P. Jones and William J. Wood; A. B. on E. A. O'Neal, Jr.; A. M. on Rev. Thomas Moody, Captain O. S. Kennedy, Prof. William E. Steinback, of Tuka, Mississippi, and E. A. Luckett, of Missouri; D. D. on Rev. J. G. Wilson, of Huntsville, Alabama, and Rev. C. D. Oliver, of Tuscaloosa, Alabama; and LL. D. on Prof. Chase, of Louisville, Kentucky.

We were sorry that the lateness of the hour prevented Dr. Anderson from delivering the usual address to the graduating class. We expected a rich treat from President Anderson, and that we were disappointed was no fault of his.

Mr. Editor, Florence is a beautiful, growing place, healthy and easy of access. The Tennessee and North Alabama Conferences are thoroughly united in the support of our University. Our building is spacious and beautiful, our professors learned, pious and indefatigable, and our citizens refined and intelligent. Our law school equals any in the South for thoroughness and extent of learning. Will you help us to build up a university worthy of the great Conferences under whose patronage it is, and to whom it belongs—worthy of the Southern people, and worthy of the great aggressive Methodist Church?

The alumni of old Lagrange and of Florence Wesleyan University met and reorganized their society. They passed a resolution to endow "the alumni professorship" with \$25,000, to be raised by donations and subscriptions. The old feud about the removal has died out. The Federal army burned the college buildings at Lagrange. All are now united, and look to this as their alma mater. We have had help from Louisiana. Let us have it again.

FLORENCE, ALA., AUG. 1, 1870.

JACKSON DISTRICT CONFERENCE.

Mr. Editor: The Jackson (Mississippi) District Conference was begun and held in Canton, Mississippi, July 28-30. In the absence of one of the elect ten, Rev. Richard Abbey, presiding elder, acted as Bishop. Brother John T. Cameron, of Canton, was chosen secretary. All the traveling preachers of this district were present but two. Several local preachers attended, and six of the appointments were represented by official members.

Quite an interest, not to say excitement, was gotten up by a discussion of some resolutions strongly condemning dancing and social card-playing. The entire conference, with two exceptions, voted the above named diversions to be sinful, that they must be discontinued under all circumstances, and that the general rule, under the interpretation of the Bishop's pastoral, must be judiciously yet firmly enforced. Even the dissenting voters claimed to be no advocates of dancing, but doubted the expediency of condemning it in such unmeasured terms.

The preachers in charge of circuits gave accounts of the spiritual condition of their pastorates, which were generally very encouraging. A comprehensive digest of these various reports would be that the Jackson district is in a healthy condition, and that the preachers are devoting themselves to their work. All the interests under the jurisdiction of district conferences were had under advisement, and proper action taken thereon.

Sharon, Mississippi, was selected as the place of holding the next meeting.

The election of lay members to the Annual Conference resulted as follows, viz: Messrs. John T. Cam-

eron, M. J. McKie, J. W. Hall and G. W. Harper. Alternates: A. M. Gurley, J. H. Postell, Dr. Catehings and Thomas Green. C. G. A.

"SAND IN THE EYES."

Mr. Editor: I suppose that almost every novice has had "sand in his eyes." I believe there are some cunning, tricky persons in every trade, occupation or profession. From this fact almost every beginner suffers some whilst "cutting his eye-teeth." We see this powerfully exemplified in the case of the newly enfranchised as soon as he places his foot on Northern soil. Physical and mental inferiority is the reason why a colored individual cannot be a cadet at West Point—i. e., "so-called." We might expect to find trickery among hucksters, horse dealers, lawyers, etc., knowing man's depravity and love for worldly gain; but one does not look for it in the church, and especially among the ministry.

The young fledgling—just born of God's Spirit, just baptized with the commission to preach, his heart all fired with charity, filled with tender emotions, panting to obey the call, and truly rejoicing in every means and opening for the furtherance of the Master's kingdom—little dreams that, under cover of the most sacred professions, and seemingly in the use of the most powerful and most approved arrangements, some of the older brethren are simply throwing "sand in his eyes." For instance, the Sunday School Union Publishing Society, at Philadelphia, employs a minister to sell their books. He is paid a good salary, and is sent forth as a "Sunday School Union missionary." His professed object is to establish Sunday schools wherever none exist, provided it can be done. He is generally a "managing man," and can either sing well or tell anecdotes well, or do both well; or he has some especial qualification which makes him take with the young. He goes along very quickly and agreeably, until he finds a novice in the field. He will immediately curry favor with him. He will ask advice of the older preachers of the vicinity, readily agree with and thank them; but will so manage as to get out with the novice; profess great love for his church, and groan in his spirit that there is so little union among the churches. He would just as soon reorganize a Methodist Sunday school as any other; proposes, however, to show no sectarianism, and suggests that the vote of a promiscuous congregation (made up of all sorts and shades of character) in a Methodist society, in a Methodist Sunday school (where probably not a half dozen gospel sermons were ever preached, save by the self-deifying Methodist preacher,) whether the Sunday school will continue a Methodist Sunday school or be made a union Sunday school. Then, with charity not minified, he will have the same congregation elect a superintendent for the school, even though it be still a Methodist school, and in face of the fact that such superintendent is a member of the Quarterly Conference, and is, by discipline, the appointee of the preacher in charge of the work; then, with still greater charity, he will proceed to take a collection for the purchase of Sunday school books, and supply this Methodist Sunday school with his books; thus starve our Publishing House, and accomplish his first object—i. e., sell his books and get his commissions. He has thrown sand in the gentle, loving, devoted young preacher's eyes. I like a Sunday School Union missionary. I like him to go to the untrodden fields, and there plant his scions of Sunday schools. But, Mr. Editor, I don't like them to "throw sand in my eyes."

ONE WHO HAS GOT THE
SAND OUT OF HIS EYES.

A TRADER of the sex thinks that Echo is always of the feminine gender, because the consistent grammarian discovered that she always succeeded in having the last word.

It is an excellent thing when men's religion makes them generous, free-hearted and open-handed, seeming to do a thing that is paltry and sneaking.—*Henry.*

NEWS FROM THE CHURCHES.

FOREST HILL, MISSISSIPPI CONFERENCE.

A REVIVAL.

Mr. Editor: We have just closed one of the most remarkable meetings of the year—my privilege to attend, at Forest Hill, on the Jackson circuit, Mississippi Conference, resulting in the accession of fifty-one to the church at Forest Hill, and I suppose about twenty-five conversions, probably more. Three united with the church in Jackson. I learn that some two or three more will yet join us.

There was less excitement during the entire time than is usual in such meetings. Everything was done dispassionately, deliberately, evidencing a calm, determined purpose on the part of most or all to make it a lifetime business. There were many heads of families and some entire families among them. Men and women, advanced and in the prime of life, embarking in the cause of Christ, give evidence of a permanent increase to the church. From a little crippled membership of thirteen we now boast a strong, healthy, promising membership, with a weekly prayer meeting, and some seven or eight new family altars erected. Revs. C. G. Andrews and John Lusk were with us, and did nearly all the preaching—doing good service; and much is due them for their faithful, effective labor in the meeting. We have others appointed, which we hope will result in great good to the church of Christ. "Pray for the peace of Jerusalem."

Yours in Christ,

JULIUS T. CURTIS.

MARBLE VALLEY, ALABAMA.

Mr. Editor: Permit me to say, through our CHRISTIAN ADVOCATE, that the Lord has done great things for us, whereof we are glad.

Our third Quarterly Meeting was at Andrew chapel, commencing on the twenty-third of July, and was protracted until the night of the twenty-eighth. The Lord was with us in his soul-reviving power. We received seventeen into the church, and about that number were converted.

Brother F. L. B. Slaver, our presiding elder, filled his office well, and preached the gospel in its purity. We all love Brother Slaver, and hope he will remain with us the next three years to come. We most heartily sympathize with him in his bereavements, as also in his recent losses by fire. We pray God's grace to sustain him. Pray for us.

Your brother in Christ,

HENRY YOUNG, P. C.

SPIRITUAL DISSIPATION.—The Examiner and Chronicle has some appropriate remarks on this subject: But there is a class of Christians in our churches who are chronic sufferers from the effects of spiritual dissipation. The men and women to whom we refer are never satisfied with the appointments of their church, however numerous. They contrive, somehow, to drop into every adjacent parish at least once a week. They devote no time to that religious meditation which promotes digestion; they have no inclination for that religious work which is to the full soul, what exercise is to the over-fed body. Their one idea of religious life is to cram with sermons and prayer meetings, day in and day out—always receiving, seldom or never imparting—their ideal of Christian experience being most aptly typified by the process which fits a Strasburg goose to minister to the tastes of the epicure. Such persons need to realize that there is such a thing as spiritual dissipation, and that their excesses seriously endanger their spiritual life. As the examining process goes on they lose their taste for the plain, simple, nourishing food of the gospel, and seek far and wide for high-spiced and dangerous viands. The constant excitement of their emotional nature, unaccompanied by any attempt even to give religious emotion expression in religious action, leaves them as thoroughly demoralized, as callons as regards real suffering, as much a prey to gross sensationalism as the professional novel reader.

HAZLITT believes that the greatest efforts of intellect have almost always been made while the passions are in their greatest vigor, and before hope loses its hold on the heart, and is the elastic spring which animates all our thoughts.

Mr. HEMMERT, the Swiss minister at Yeddo, Japan, says that every woman throughout the empire is able to read, write and cipher.

The Christian Advocate.

SATURDAY, AUGUST 20, 1870.

A CAPTIVE HUMMING BIRD.

BY JOEL T. HART.

Fleet, flying gem of burnished crest,
And silver-tipped wing,
With azure, gold and sapphire breast,
Aolian, captive thing.

Tell me the secrets of thy song,
And whence thy robe of beaus;
If to the earth thou dost belong,
Or Paradise of dreams?

Born for one season, of a ray,
To banquet 'mid the flowers;
Or wilt thou chant another May,
Sweet minstrel of the flowers?

The coiest honey-suckles still
Their daintiest buds unfold,
For thee to kiss with honeyed bill
Their nectar lips of gold.

The lily opens its snowy cell,
The pink its crimson door;
"Sip," whispers every fond bluebell,
"My honey to the core."

While blushing flowers for thee all things
Their fragrance on the air,
And purple morning-glories cling
On high in beauty bare.

The tiny chalice of the lily,
And daisies, plead below;
Each dew-eyed, too small to climb:
"Come, kiss me ere you go."

Away on thy melodious wing,
To Love's mysterious bowers,
Still thy free hand of minsters bring
To revel 'mid the flowers.

Breathe on their bosoms fair and sweet,
And rosy lips apart,
And give and take, in Love's retreat,
The honey of the heart!

FLORENCE, ITALY, June, 1870.

RELIGIOUS LIFE IN RUSSIA.

CHAPTER FIVE.

A friend is one day driving me from house to house in Archangel, making calls, when we observe from time to time a smart officer going into courtyards.

"This man appears to be dogging our steps."

"Ha!" laughs my friend; "that fellow is an officer of police."

"Why is he following us?"

"He is not following us; he is going his rounds; he is warning the owners of all good houses that four candles must be lighted in each front window to-night at eight o'clock."

"Four candles! For what?"

"The Emperor. You know it is his angel's day; you will see the streets all lighted—by police suggestion—at the proper time."

"Surely the police have no need to interfere. The Emperor is popular; and who can forget that this is St. Alexander's day?"

"There you are wrong; our people hardly know the court at all. You see these shops are open, you stalls are crowded, that mill is working, as they would be on the commonest day in all the year. A mujik cares but little for kings and queens; he only knows his own angel—his peculiar saint. If you would test his reverence, ask him to make a coat, repair a tarantass, or fetch in wood, on his angel's day. He would rather die at your feet than sully such a day with work. In fact, a mujik is not a courtier—he is only a religious man."

My friend is right in the main, though his illustration takes me as a stranger by surprise.

The first impulse in a Russian heart is duty to God. It is an impulse of observance and respect, at once moral and ceremonial; an impulse with an inner force and an outer form; present in all ranks of society, and in all situations of life; in an army on the march, in a crowd at a country fair, in a lecture room full of students; showing itself in a princess, dancing at a ball, in a huckster writing at his desk, in a peasant tugging at his cart, in a burglar rioting on his spoil.

This duty adorns the land with fane and altar, even as it touches the individual man with penitential grace. Every village must have its shrine, as every child must have his guardian angel and baptismal cross. The towns are rich in churches and convents, just as the citizens are rich in spiritual gifts. I counted twenty spires in Kargopol, a city of two thousand souls. Moscow is said to have four hundred and thirty churches and chapels; Kiev, in proportion to her people, is no less rich. All public events are celebrated by the building of a church. In Kiev, St. Andrew's church commemorates the visit of an apostle; St. Mary's, the introduction of Christianity. In Moscow, St. Vassili's commemorates the conquest of Kazan; the Donskoi convent, Fedor's victory over the Crime Tartars; St. Savion's, the expulsion of Napoleon. In Petersburg, St. Alexander's commemorates the first victory won by Russia over Sweden; St. Isaac's, the birth of Peter the Great; Our Lady of Kazan's, the triumph of Russian arms against the Persian, Turk and Frank. Where we should build a bridge, the Russians raise a house of God; so that their political and

social history is brightly written in their sacred piles.

By night and day, from his cradle to his grave, a Russian lives, as it were, with God; giving up to his service an amount of time and money which no one ever dreams of giving in the West. Like his Arabian brother, the Slavonian is a religious being, and the gulf which separates such men from the Saxon and the Gaul is broader than a reader who has never seen an Eastern town will readily picture to his mind.

An Oriental is a man of prayer. He seems to live for heaven and not for earth; and even in his commonest acts he pays respect to what he holds to be a celestial law. One hand is clean, the other unclean. One cup is lawful, another cup is unlawful. If he rises from his couch a prayer is on his lips; if he sits down to rest a blessing is in his heart. When he buys and when he sells, when he eats and when he drinks, he remembers that the Holy One is nigh. If poor in purse, he may be rich in grace; his cabin a sanctuary, his craft a service, his daily life an act of prayer.

Enter into a Russian shed—you find a chapel. Every room in that shed is sanctified; for in every room there is a sacred image, a domestic altar, and a household god. The inmate steps into that room with reverence; standing for a moment at the threshold, baring his head, crossing himself, and uttering a saintly verse. Once in the house, he feels himself in the Presence, and every act of his life is dedicated to him in whom we live and move.

"Slava Bogu"—Glory to God—is a phrase forever on his lips; not as a phrase only, to be uttered in a light vein, as a formal act, but with an inward bending and confession of the soul. He fasts very much, and pays a respect beyond our measure to sacred places and to sacred things.

He thinks day and night of his angel; and payments are made by him at church for prayers to be addressed in his name to that guardian spirit. He finds a divine enjoyment in the sound of cloister bells, a foretaste of heaven in kneeling near the bones of saints. The charm of his life is a profound conviction of his own unworthiness in the sight of God, and no mere pride of rank ever robs him of the hope that some one higher in virtue than himself will prove his advocate at the throne of grace. He feels a rapture, strange to a Frank, in the cadence of a psalm, and the taste of consecrated bread is to him a fearful joy. Such things are to him not only things of life and death, but of the everlasting life and the ever-present death.

The church is with a Russian early and late. A child is hardly considered as born into the world, until he has been blessed by the Pope and made by him a "servant of God."

As the child begins, so he goes on. The cross which he receives in baptism—which he receives in his cradle, and carries to his grave—is but a sign. Religion goes with him to his school, his play-ground, and his workshop. Every act of his life must begin with supplication and end with thanks. A school has a set of prayers for daily use; with forms to be used on commencing a term, on parting for holidays, on engaging a new teacher, on opening a fresh course. It is the same with boys who work in the mill and on the farm. Every one has his office to recite and his fast to keep. The fasting is severe; and more than half the days in a Russian year are days of fasting and humiliation. During the seven weeks before Easter no flesh, no fish, no milk, no eggs, no butter can be touched. For five or six weeks before St. Peter's day, and for six weeks before Christmas day, no flesh, no milk, no eggs, no butter can be used. For fifteen days in August a fast of great severity is held in honor of the Virgin's death. A man must fast on every Wednesday and Friday throughout the year, eating nothing save fish. Besides keeping these public fasts, a man should fast the whole week before making his confession and receiving his sacrament; abstaining from every dainty, from sugar, cigarettes, and everything cooked with fire.

On the eve of Epiphany—the day for blessing the water—no one is suffered to eat or drink until the blessing has been given, about four o'clock, when the consecrated water may be sipped and dinner must be eaten with a joyful heart. To fetch away the water, people carry into church their pots and pans, their jacks and urns; each peasant with a taper in his hand, which he lights at the holy fire, and afterward burns before his angel until it dies.

Every new house in which a man lives, every new shop which he opens for trade, must be blessed. A man who moves from one lodging to another must have his second lodging purified by religious rites. Ten or twelve times a year the parish priest, attended by his reader and his deacon, enters into every house in his district, sprinkles the rooms with holy water, cleanses them with

prayer, and signs them with the cross.

In his marriage, on his dying bed, the church is with a Russian more than at his birth and baptism. Marriage, held to be a sacrament, and poetically called a man's coronation, is a long and intricate affair, consisting of many offices; most of them perfect in symbolism as they are lovely in art. Prayers are recited, rings exchanged, and blessings invoked; after which the ceremony is performed; an actual circling of the brows with a golden rim. "Ivan, servant of God," cries the Pope, as he puts the circlet on his brows, "is crowned with Nadia, handmaid of God." The bride is crowned with Ivan, servant of God.

Some people wear their bridal crowns for a week, then put them back into the sacristy, and obtain a blessing in exchange. Religion touches the lowliest life with a passing ornament. The bride is always a queen, the groom is always a king, on their wedding day.

A man's angel is with him early and late; one whom he can never deceive. He puts a picture of this angel in his bedroom, over the pillow on which he sleeps. A light should burn before that picture day and night. The angel has to be propitiated by prayers, recited by a consecrated priest. His day must be strictly kept, and no work done, except works of charity, from dawn to dusk. A feast must be spread, the family and kindred called under one roof, presents made to domestics, and alms dispensed to the poor. On his angel's day a man must not only go to church, but buy from the priests some consecrated leaves, which he must give to servants, visitors and guests. On that day he should send for his parish priest, who will bring his gospel and cross, and say a prayer to the angel, for which he must be paid a fee according to your means. A child receives his angel's name in baptism, and this angelic name he can never change. A peasant who was tried in the district court of Moscow on a charge of having forged a passport and changed his name, in order to pass for another man, replied that such a thing could not be done.

"How," he asked in wonder, "could I change my name? I should lose my angel. I only forged my place of birth."

So closely have religious passions passed into social life that civil rights are made to depend in no slight degree on the performance of religious duties. Every man is supposed to attend a weekly mass, and to confess his sins, and take a sacrament once a year. A man who neglects these offices forfeits his civil rights; unless, as sometimes happens in the best of cities, he can persuade his Pope to give him a certificate of his exemplary attendance in the parish church!—*Free Russia, by William Hopworth Dixon.*

A NEW TRANSLATION.

BY REV. S. L. GRACEY.

The question whether it is possible to have a new translation of the Bible that shall be generally acceptable, and as the King James edition has it, "with former translations diligently compared and revised," is one that bids fair to be soon solved through the "Convention of Canterbury," England. As your readers may know, the convocation is ecumenical in character, embracing the world's denominations as found in England; but as Protestantism did not put in an appearance at Rome, Rome will not go to Canterbury; for though Dr. J. H. Newman, of the liberal Roman Catholic school, was invited to represent his church at the meeting, he declined, doubtless fearing the hostility of his church to all heretics friendly to the Protestant version.

All other "dissenting" churches of England have been recognized, and are participating in the movement—even the Jews being represented, as Dr. Adler, a Jewish rabbi and profound Hebrew scholar, has accepted an invitation and has gone heartily to work. Our present translation of the English Bible is venerable with age, and the ablest scholars and critics combine to bear testimony to its general faithfulness and its extraordinary force and beauty, and yet the work was performed by fallible men; and more recent research and learning seem to indicate many improvements in the text.

There is much of romance to be found in the history of the English version. It was the result of a full century of toil and study, for Tyndale seems to have turned his attention to the translation about 1511, and in the year 1611 the authorized version was published. During the years intervening the ripest scholars of England were devoting time and careful study to the work, and the ablest biblical critics of Europe gave it aid.

The men who worked on this massive block in the Master's great temple were so deeply in earnest that many of them gave the best years of their lives, and endured hardship, persecution, and even

death itself, for the accomplishment of the cherished plan.

Tyndale, Rogers and Cranmer became martyrs to the noble purpose to give their countrymen the true word of God. The later translators gave the finished work to the world, with the following introduction:

"It remaineth that we commend thee to God and to the spirit of his grace, which is able to build further than we can ask or think. He removeth the scales from our eyes and the veil from our hearts; opening our wits that we may understand his word; enlarging our hearts, yea, correcting our affections, that we may love it above gold or silver, yea, that we may love it to the end."

And yet these translators were not infallible; and it is now claimed that the grammatical knowledge of the Hebrew and Greek is much more thorough now than it was in the sixteenth and seventeenth centuries. The peculiarities of Hellenistic Greek, especially, have received the attention of scholars, and much light and beauty of expression could be gained by a more careful rendering. The frequent repetition of one Hebrew or Greek word with several English meanings, while frequently two or three more Hebrew or Greek words entirely dissimilar in sense are represented by one English word, call for more careful renderings.

Bishop Ellicott says very truly: "If we are persuaded that there are errors and inaccuracies in our version; if we know that by far the best and most faithful translation the world has ever seen still shares the imperfections that belong to every human work, however noble and exalted; if we feel and know that these imperfections are not less patent than remediable, then surely it is our duty to him who gave that blessed word for the guidance of man, through evil and through good report, to labor to supply what is amiss, to render it more perfect, and thus hand down the most blessed heritage to succeeding generations."

The large number of learned gentlemen who have undertaken the work of revision did so at the invitation of the prelates of the Church of England, and have been divided into two companies—the one revising the Old, the other the New Testament. The former is to begin the work on the Pentateuch, the latter on the three Synoptic gospels.

The Old Testament company consists of the Bishops of St. David's, Llandaff, Ely, Lincoln, Bath and Wells, with four scholars from the lower house. They have invited a number of learned ministers of all opinions, churches and sects, ranging from Dr. Pusey to Dr. Davidson, to join them.

The New Testament company embraces such men as the Bishops of Winchester, Gloucester and Bristol, and Salisbury, with the Deans of Canterbury and Westminster, and Canon Blakeley, with a similar number from all theological schools, including even the Unitarian, the latter being represented by a learned biblical scholar, Rev. G. Vance Smyth. The object aimed at is to make no alteration that is not really of import, and even then to make it as much as possible in the style of our authorized version, and to make none on the MS. reading for which there is not a decidedly preponderating evidence. They hope to get rid of what are generally admitted errors by all scholars without undermining popular reverence for the Bible.

The company on the New Testament met for the first time on June 22 in London, and sat for upward of five hours, the Bishop of Gloucester and Bristol acting as chairman. Twenty members were present, including the Bishop of Llandaff, the chairman of the Old Testament company.

All preliminary arrangements connected with the form and carrying on of the work were discussed and agreed to, and some progress was made in the actual work. The London Times, in stating these facts, says that "the whole tone and character of the meeting was such as to suggest a well-grounded belief that this great and important work will be carried on with harmony, promptitude and success."—*Methodist.*

A CHEMICAL EXPERIMENT.—When Isaac Hopper, a member of the Society of Friends, met a boy with a dirty face or hands, he would stop him and inquire if he ever studied chemistry. The boy, with a wonderful stare, would answer: "No."

"Well, then, I will teach thee how to perform a curious chemical experiment," said Friend Hopper. "Go home, take a piece of soap, put it in water, and rub it briskly on thy hands and face. Thou hast no idea what a beautiful froth it will make, and how much whiter thy skin will be. That's a chemical experiment. I advise thee to try it."

PEOPLE who are always fishing for compliments do not need very long lines—they will get the best bites in shallow water.

Scientific.

Soluble glass has been successfully applied on bands of machinery to restore elasticity and polish, and is found to be better adapted for the purpose than gum arabic or similar substances. Experiments upon the leather strips of a spinning jenny proved entirely satisfactory, and as liquid quartz or soluble glass is now largely manufactured, a fair trial of it is worthy the attention of our machinists.

M. Borely has given a course of lectures on "Madness in Man and Animals." He has collected three hundred and two cases of rabies, taking place in six years, and finds that hot weather is not a predisposing cause, as seventy-six cases occurred in summer, and seventy-five in the winter, eighty-nine in the spring, and sixty-six in the autumn. Male animals seem to be more subject than the female to this disease.

Mr. L. Trouvelot has been noticing the tendency of trees to bend their branches in certain directions. He says this is especially observable in the cherry tree, whose small branches so generally bend to the east that one can tell thereby the points of the compass. This is not due to winds, as it is equally observable in trees that are sheltered by walls or houses. As the cherry tree is one especially difficult to make live when transplanted if several years old, this gives color to the notion of farmers that trees must be set out with the same relation to the points of the compass that they had before being transplanted. Mr. Trouvelot knew a case in which twenty rather large trees were set out, all of which were pretty well bent. Only the five lived which happened to be set out with the bend toward the east.

TEACHERS of botany often instance the case of the barberry as showing how the sensitive stamens when touched throw the pollen on the stigma. But this explanation implies a natural device to produce self-fertilization, while in most plants there are special devices to prevent this, and to insure crossing by having insects bring the pollen of other flowers. If this case be examined more closely, it will be found that the stamens are veritable only close to its base; and that, if touched there, even with a hair, it will spring forward. Now, when a bee in search of honey brings his proboscis to this sensitive point, the stamens, in springing forward, will generally strike the bee's leg, or proboscis, or body interposed between the stamens and the stigma, and will thus carry the pollen to the next flower. The stamens then slowly recovers its regular position, so as to be ready for the next insect.

A new process for the preparation of hydrogen on a large scale has been suggested by Messrs. Tessie du Motay and Marechal. It consists of heating to redness a mixture of damp coals and alkaline hydrates. A mixture of hydrogen and carbonic acid is thus disengaged, and conducted over certain carbonates, which retain the carbonic acid and become bicarbonates. The pure hydrogen is collected in a gasometer to be used as required. The bicarbonates are employed as such, or as reservoirs of carbonic acid. As to the oxides produced by the combination of the alkaline coals, they may be utilized for the purpose of agriculture or other industries, or, better, to form the hydrates for subsequent operations. They likewise propose to produce pure hydrogen by passing ordinary illuminating gas over lime heated to cherry redness; the dry residue will be carbonate of lime.

IN A LONG paper in Nature, H. Charlton Bastian gives the details of his experiment to discover whether he could obtain, by what is often called "spontaneous generation," any low forms of life in vegetable solutions that had been protected from the ingress of foreign germs. He suspected that in many experiments with sealed flasks the generation of gases caused such a pressure as to retard the development of life. Accordingly he exposed the flasks for some time to a boiling heat, allowing the steam to escape through a fine glass tube, which he sealed up with a blow-pipe. He now had a vacuum over the liquid, which he thought might render the equilibrium of the fluid more unstable, and thus favor the development of organisms. He says that his experiments, which were conducted with the greatest care, were quite successful, and that he found abundant proof of the genesis of vital forms. The particulars are to begin in a succeeding number of Nature.

A MICROSCOPE has recently been constructed in New York which magnifies objects nine billion times. At this rate of enlargement, an ordinary fly could cover a space equal to New York city below Wall street; a man would appear more than a hundred miles high, and a hair of the ordinary length from a lady's head would reach half way from

New York to New Haven. Yet, under this enormous magnifying power, the creations of the Lord only display new beauties. A microscopic shell called an *angulatum*, of which about one hundred and forty placed end to end will reach an inch, and which, when examined under ordinarily powerful microscopes, is simply marked with lines of the most exquisite delicacy, exhibits under the new instrument half globes of white silice, whose diameters appear to be an inch and three-quarters, and of which only fifteen can be seen at once. In reality, the point of a cambric needle is larger than the circle upon which these fifteen half globes exist, and yet that circle appears like a desert-plate covered with lady apples.

HEALTH HINTS.

CURE FOR FELON.—As soon as the felon makes its appearance, bind on to it a poultice of yellow clay wet with cold water, from an eighth to a quarter of an inch thick. Wet it as often as it begins to get dry, and put on a fresh poultice two or three times in twenty-four hours. It will almost entirely relieve the pain, and the felon will be ready to lance in an almost miraculously short space of time.—*Mrs. C. R. Fare.*

HOW TO PROCURE SLEEP.—Many years ago a curious plan for procuring sleep was announced as a great discovery by a Mr. Gardner. At the time, and was reported to have seldom or never failed, we shall give a full description of it. Testimonials of the efficacy of this method were published by Mr. Gardner, from his royal highness the late Prince Albert, Sir F. Buxton Bart, Sir W. Cockburn, Mr. Sheridan Knowles, and other men of eminence. It may be, then, that some of our readers may owe us a deep debt of gratitude for once more placing the priceless blessing of sleep within their reach upon easy terms. Let us suppose, then, a person to be in a particularly wakeful state, and that he has tossed and tumbled about into the small hours of the morning without any feeling of somnolence. If he should now desire deep repose, the following proceeding must be adopted: He is to lie on his right side, with his head comfortably placed on a pillow, having the neck straight, so that respiration may be unimpeded. Let him close his lips slightly and take a rather full respiration, breathing through the nostrils as much as possible. This last, however, is not absolutely necessary, and some persons breathe habitually by the mouth. Having taken the full respiration, the lungs are to be left to their own action—that is, respiration is not to be interfered with. Attention must be fixed upon the respiration. The person must imagine that he sees the breath passing through his nostrils in a continuous stream, and at the instant that he brings his mind to conceive this, apart from all other ideas, consciousness leaves him and he falls asleep. Sometimes it happens that the method does not at once succeed. It should be persevered in. Let the person take in thirty or forty respirations and proceed as before, but he must by no means attempt to count the respiratory acts, for if he does the mere counting will keep him awake. Even though he may not now succeed in procuring very sound sleep, he will at least fall into a state of pleasant repose. *John A. Fleming.*

CURIOUS THINGS TO KNOW.—Besides the fact that ice is lighter than water, there is another curious thing about it which persons do not know perhaps, namely, its purity. A lump of ice melted will always become purely distilled water. When the early navigators of the Arctic seas got out of water they melted fragments of those vast mountains of ice called icebergs, and were astonished to find that they yielded only fresh water. They thought that they were frozen salt water, not knowing that they were formed on the land, and in some way launched into the sea. But if they had been right the result would have been all the same. The fact is, the water in freezing turns out of it all that is not water, salt, air, coloring matter, and all impurities. Frozen sea water makes fresh water. If you freeze a basin of indigo water it will make it as pure as that made of pure rain water. When the cold is very sudden these foreign matters have no time to escape, either by rising or sinking, and are thus entrapped with the ice, but do not form any part of it.

A LONG SERMON.—A preacher, whose custom it was to preach very long sermons, exchanged with one who only preached half as long. At about the customary time for dismissing the audience began to go out. This he continued until nearly all had left, when the sexton, who had stood it as long as he could, walked up to the pulpit stairs, and said to the preacher in a whisper: "When you have got through please lock up, will you, and leave the key at my house, next to the church?"

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, AUGUST 20, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—Rev. LINUS PARKER, 112 Camp Street, New Orleans, La.
AGENTS—All the members of the patronizing Conference.

CONFERENCE PUBLISHING COMMITTEE.

FOR MONTGOMERY CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MOBILE CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. R. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, Remit the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

BISHOP KEENER returned last week from Hamburg, Arkansas, where he attended a most interesting District Conference. A most encouraging revival was in progress when the Bishop left, and an altar more than filled with mourners. Bishop Keener left on Thursday for Mobile, whither he goes to attend the Mobile District Conference, which convened at Mobile yesterday.

PERSONAL.—Rev. Dr. W. H. Watkins, of Natchez, has been in the city for the last ten days. The doctor's health has been exceedingly feeble since the adjournment of the General Conference, but we are glad to learn that there is decided improvement since his arrival in the city. He proposes to leave in a few days on a trip of rest and recreation.

Dr. Harmon, one of the traveling agents of the Southwestern Bible Society, dropped into our office this week. He is fully occupied with his great work, and is accomplishing much good in his field of labor. The society is fortunate in having the services of so effective an agent.

Rev. James L. Wright, of the Thibodaux circuit, Louisiana, Conference, gave us a brief call. We were sorry to see him looking in bad health, and to learn that his family have suffered much from sickness during their sojourn at Thibodaux.

ARIZONA, LOUISIANA.—Rev. T. J. Upton, writing under date of August 9, says: "We are in the midst of a gracious work at this place; concluded a very interesting and profitable meeting at Harmony chapel on Thursday evening last. Have not time to give particulars now."

A GARDEN is a beautiful book, with the finger of God: every flower and every leaf is a letter. You have only to learn them—and he is a poor dunce who cannot, if he will, do that—to learn them and join them, and then to go on reading and reading. And you will find yourself carried away from the earth by the beautiful story you are going through. You do not know what beautiful thoughts grow out of the ground, and seem to talk to a man. And then there are some flowers that seem to me like over-dutiful children: tend them but ever so little, and they come up and flourish, and show, as I may say, their bright and happy faces to you.—*Douglas Jerrold.*

God made both tears and laughter, and both for kind purposes; for as laughter makes mirth and surprise to breathe freely, so tears enable sorrow to vent itself patiently. Tears hinder sorrow from becoming despair and madness, and laughter is one of the easy privileges of reason, being confined to the human species.

HONEST DOUBT.

The skepticism of a malignant and sensual nature must be distinguished from that of an honest and inquiring soul. To put all doubt in the same category of wickedness, and to brand it with hard names and unmeasured condemnation is neither just nor charitable. When it is found in fellowship with gross immorality, and is evidently used as a justification for vice, it deserves little else than sharp rebuke. A man who thrusts his doubts into your face as a reason for sinful indulgence, and who takes more pains to vindicate his unbelief than to ascertain the truth, places himself beyond the pale of our commiseration. The religious distrust of those who are too indifferent or too lazy to investigate Christian evidence scarcely merits any serious treatment. In such cases the real trouble is in the love of sin, and in the hatred of purity. Disbelief is the cherished shelter from all serious convictions, and from all reproaches of conscience. It is a determined effort to entrench and fortify the soul in the sophistries and follies of infidelity, and thereby to prevent that uneasiness which ripens into "a certain fearful looking-for of judgment and fiery indignation which shall devour the adversaries." Instead of turning to the stronghold of the gospel, which must be entered through self-denial, this refuge of lies is chosen because it serves as a cloak and apology for wrong-doing.

It is not difficult to discover the hollowness and insincerity of the scoffer who regards religion with suspicion because it is not in accord with his own depraved tastes and vile practices. In this effort to vindicate sin, men may at last deceive themselves, and settle down into the persuasion that the gospel is "a cunningly devised fable," but the tone of mind and the life reveal the true animus which may be at times concealed from themselves. There is, however, such a thing as live doubt found in association with exemplary morals and the love of the truth. The root of unbelief is in the evil heart; but the noblest natures are compelled to struggle with this, as well as with other manifestations of inward corruption. It is the easily besetting sin of some who are striving to become Christians. Peculiarities of mind or temperament may specially predispose in this direction, or early influences and associations may have imbued them with the subtle poison. To judge such persons harshly, because we have not ourselves been troubled in the same way, is utterly unreasonable. "This tendency to doubt may harrow and distract, and be the fearful burden of some sincere seekers after God, though others have been strangers to such conflicts. The life may be strict to asceticism, the thirst for truth scarcely less than supreme and all-absorbing, and yet these speculative difficulties overcast the sky, and shut out every ethereal ray.

Investigation and the careful sifting of Christian evidences, however valuable, do not always bring relief. These may fail altogether of securing permanent comfort to the spirit in its fight with these spectres of uncertainty. Tossed and driven upon the sea of doubt, and ready to be swallowed up by the angry deep, the voice of the divine Redeemer alone can calm the warring elements. Experimental proof alone can satisfy and silence all distrust. The certainty which the troubled soul craves is found in the inward assurance of pardon and acceptance in the Beloved. Christ himself prescribed this remedy for honest doubt when he said: "If any man will do his will he shall know of the doctrine, whether it be of God, or whether I speak of myself." A humble and submissive will leads to the clear and joyous sunshine of assurance, and drives every cloud from the heavens. The soul beset with all-perplexing problems has only to come to God himself for aid in this extremity of weakness and ignorance. Performance of what is plain, and prayer for guidance as to the rest, is sure to end in the knowledge of the doc-

trine. It is as much the privilege of the penitent to take his doubts to God as it is to carry thither any other sin or infirmity. If he starts at the initial point of all creeds, that God is, "and that he is a rewarder of them that diligently seek him," he will surely come at length to that inward certainty and peace which shall put all his doubts to rest.

After conversion doubt may return to tempt and disturb the child of God. Some who were never so troubled before, detect the budgings of skepticism in their hearts. Dark and withering suggestions, as from Satan himself, press upon the citadel of the soul, and at times gain temporary possession. Revelation and experience are both called in question, and the wretched insinuation steals upon us that the high-wrought hopes of life are no better than the dreams of a distempered imagination. The unutterable groanings of believers so tempted, their anguish and tears are known only to the Father of spirits and to themselves. It is wholesome to review the evidences of Christianity, to freshen up and verify the conclusions of other days, and to furnish the mind with all the arguments. But the effectual remedy is in a closer walk with God. The "throne of grace" is the best place to obtain relief from this most distressing form of spiritual suffering. The love of God, shed abroad in the heart, will dispense the gloomy suggestions of the tempter, and fill the heart with serenity and peace. Let the Christian who is harassed with doubt give himself to frequent and earnest prayer, and God will prove himself to be "a very present help in trouble."

CLINTON DISTRICT.

MR. EDITOR: We are having marked indications of an approaching glorious work of grace. We have seasons of tears, of renewings, healings, restorations from backsliding, and occasionally a shout in the camp; good love-feasts, prayer meetings and sacraments. Brother Forsyth has had a goodly number of conversions and accessions at Jackson, Louisiana, and at the third quarterly meeting for East Baton Rouge circuit. We commenced on the fifth of August. God's presence was felt. We had preaching day and night, with the exception of one day. Such was the divine presence and power that there was no room for preaching. It was turned to joy. Congregations increasing, old quarrels between sinners and members all settled, friendship re-established, a goodly number of conversions, altar crowded day and night. I was compelled to leave for my quarterly meeting, seventy-five miles away, and I left on Thursday night at eleven o'clock, and by hard travel I reached my appointment, where we met the Lord's presence also. There was an accession, when I left East Baton Rouge, of twenty-eight, and others expected to join. The meeting is still in session. E. W. Simmons, pastor in charge, assisted by Rev. Joseph Young, of the Cumberland Presbyterian Church. May God bless these good men, and continue their unbounded charity.

Yours in Christ,

J. NICHOLSON.

TANGIPAHOLA, LA., Aug. 15, 1870.

A SMALL AUDIENCE.—One of the Saviour's most delightful discourses, second only to the Sermon on the Mount, is that delivered at Jacob's Well to but one listener—and that one, a poor, despised Samaritan woman. It encourages the heart of a minister, of course, to be able to preach to multitudes—often it fosters vanity and pride. But let him not count it condescension, when the occasion calls for it, to speak the truths of the gospel to solitary listeners, or to "two or three," gathered together in the name of Jesus. For he that converteth but one sinner from the error of his way, saves a soul from death, and hides a multitude of sins.—*Old School Presbyterian.*

MAN must have occupation, or be miserable. Toil is the price of appetite—of health and enjoyment. The very necessity which overcomes our natural sloth is a blessing.

LEISURE is sweet to those who have earned it, but burdensome to those who get it for nothing.

SWORDS AND ROSES.

The Methodist Quarterly Review has given to the public its matured estimate of the reception of the Union Commission by our General Conference. The lapse of a full month since the event gives its editor ample time to recover from the satisfaction which the several Advocates of our Northern brethren expressed at the time with the consideration with which their distinguished representatives were received on that occasion. Dr. Whedon cannot be pleased; his insight is too deep, his intuitions too rapid, and his charity too nicely adjusted to take truth at its plainest statement. A most remarkable instance of the blundering unreasonableness of his morbidly suspicious nature was in his treatment of the Southern General Conference four years ago, just after the close of the war.

The New York East Conference was at that time in session. It occurred to the doctor that it would be greatly in the interest of his Master's cause if a mutual prayer could be offered by these Northern and Southern Conferences for the restoration of good feeling, Christian and other, between the two sections of the country. He set the movement on foot, and the Conference at the North telegraphed to the Conference at the South. It took us all by surprise as something in excess; but as it was in the right direction we agreed to it and went to prayer. After we were through a telegram was received—the brother had changed his mind! There he stood, as we could see him in imagination, pointing and sullen—it had all gone wrong! "What's the matter now?" The answer was (and it ought to be engraved on steel): "You did not pray for the Union!" That was true. Just emerging from a four years' war, whipped but not convinced, we had not prayed for the Union. In fact we had never thought of it, did not know that it was expected, nor supposed that any body could be found with so little common sense and human sympathy as to ask it of us. To pray with and for the brethren for the mutual restoration of Christian sentiments throughout the country was in our minds the true and only object of the telegram. The doctor, however, saw more rebellion, the spirit of the Evil One, intentional insult, and no one knows what else, in the fancied omission. A single individual challenges an entire General Conference to prayer, and then refuses to pray himself at the precise instant when all are kneeling! A mind that could so draw back and find fault on an occasion so grave—one so likely to kindle in every healthy Christian the most enlarged charitable sentiment—would be apt to render unfairly any act or word that in the least degree excited the habitual shapes of its distempered fancy. And the doctor's estimate of the "genuine moral character" of so considerable a body of Christian men as were assembled at Memphis in May last, would have much greater weight if he had not already called attention to this narrowness of his vision. As the editor of the Review, however, his opinions represent the Methodist Episcopal Church, and largely indicate its future policy toward us. We therefore insert this significant article, that our people may be duly informed.

THE SOUTHERN GENERAL CONFERENCE.—"That notorious commission," as it was courteously styled by the St. Louis Advocate, presented itself before the Southern General Conference in the persons of Bishop James and Dr. Harris. They were received with unsurpassable hyperboles of cordiality and courtesy in both word and action. They were waited upon by a most honorable committee selected by the Conference, were invited to unfold their message audibly before that venerable body, were listened to with the profoundest respect and attention, were honored personally with a complimentary resolution, were greeted in private with the heartiest and most winning Southern frankness, and invited to fill pulpits belonging to the Church South. There is nothing more fascinating than the blandishments of our chivalrous Southern brethren. We have known some of the noblest specimens of human nature belonging to that kind. And when underlaid with a stimulus

of genuine moral character, no spiritual magnetism is more attracting. Yet, alas! in this case, as often, underneath the rosy wreath was the double-edged sword. Cut and dried for the crisis of the presence and speech of our two victims, Dr. Keener, the most bitter of the Southern editors (leaving the rabid and ribald "Tom Bond" out of the count), drew from his pocket a series of resolutions denying that the delegates had any official business there, declaring that separate organizations must be firmly maintained, and reaffirming the response of the Southern Bishops at St. Louis. The entire triad of resolutions, after review by a committee, were, with silent, prompt, automatic precision, all passed in lump by a unanimous rising vote.

The most significant point of the three is the indorsement of the episcopal manifesto. And the most significant point in that episcopal manifesto was the declaration that the absolute condition to the South's hearing any proposals of fraternalization is our recognition of the so-called "Plan of Separation." And the significant point in said "plan" is, that both churches must retreat to the boundary line that divided the free and slave States; that is, the Methodist Episcopal Church must abandon her three hundred thousand members in the Southern States, with all her churches and other institutions, confess the sin of her intrusion, limit herself north of Mason and Dixon's line, and then the Church South will graciously listen to and consider her petition for an exchange of ecclesiastical courtesies. It was thus that the Southern Bishops, with the profoundest professions of Christian love and burning desire for Christian union, did, with the most graceful and decisive explicitness, lay down conditions for fraternalization which they very well knew included self-stultification, self-impairment and self-degradation on the part of our General Conference. Confess yourselves fools and knaves, and then we will hear your proposals; and then we will trample on your proposals, because, by your own profession, you are fools and knaves. And let no one for a moment imagine that both the Bishops and the General Conference South do not understand and deliberately intend the full force of this "plan." In 1848 Dr. Pierce said, in his parting words to our General Conference, the condition of our receiving any offer from you is the "Plan of Separation." The Bishops at St. Louis quote his language, and in 1869 say: "His words are our words." Their unanimous General Conference in 1870, by the most plainly concerted action, unanimously adopted the "words" of these same Bishops. So that through twenty-two eventful years this pseudo "Plan of Separation" has been the sole condition for reconciliation. The conclusion, therefore, is as irresistible as fate, that the representative bodies of the Church South mean to make ecclesiastical recognition an impossibility by prescribing terms which no man's self-respect would permit him to consider. But perhaps another quadrennium may work a revolution.

Meantime a new South is coming into existence, upon which we must concentrate our attention and our forces. Already our Southern Methodist Episcopal Church numbers nearly half as many as the Church South. Immigration from Europe and the North will constitute a new population, with no warlike recollections, no regret for dead slavery, no sympathy for an obsolete church, demanding the ministrations from a Methodism of a free and loyal history. Ready to co-operate with every Christian body, yet accepting no restraining limitations, let us enter with renewed energy the inviting field, and another generation will see a free, unsectional, untrammelled Methodism covering our entire country.

"Victims," "the double-edged sword," "self-stultification," "self-degradation," "self-impairment!" Was ever man so perverse in understanding, to find in the straightforward action of our General Conference so much room for dark suspicion! One would have supposed that his former blunder would incline him to conceal if not correct this more than mental distortion. But no; he comes forward again to challenge the sincerity of our response to the overtures of the North. He sees under the "rosy wreath" a "sword!" What there was to conceal in our action we cannot even imagine; or how any answer could have been more undisguised than the one that absolutely declared against any union, present or future. What inconsistency was there, then, in the courtesy shown the commission and in the response to it? As there was nothing to be hid, we claim from him the full admiration which the doctor is willing to in-

dulge sometimes for that "heartiest and most winning Southern frankness," that "profound respect and attention" which were shown Bishop James and Dr. Harris on that occasion. Their proposition was a plain one; we answered it in a plain way. The commission proposed union; we declined it. We doubted their legislative authority to make the proposition, but still did not quibble upon the point. We admitted for the sake of answering, and answered. Where was the need of acting? There was nothing to affect; no, not even "unsurpassable hyperboles of cordiality and courtesy." It was because we intended to be outspoken that we were cordial. That condition of mind which unites cordiality with insincerity is with the doctor, not with us.

Four years ago this distinguished minister of Christ was full of intricate statement explanatory of the "net result," as he termed it, of his own superlative discourtesy, and that of his Conference, toward the General Conference of the Methodist Episcopal Church South; now he is equally pregnant with fault-finding because the last Southern General Conference received the representatives of his church with "unsurpassable hyperboles of cordiality and courtesy." Verily it is hard to satisfy the brother. He must excuse us if we return him good for evil, and if we show him that it is quite possible to entertain a messenger with due consideration, and yet with promptness reject his message. It would be well for the doctor to consider that we are still beforehand with him, that he and his friends still owe us that proposed prayer, and when they pay up it will be in judgment upon the good intention or the good taste of our conduct.

But that which cannot be found in the letter of this action—the ingenious editor sets himself to discover in its spirit! The "cut and dried" character of the resolutions, the "silent, prompt, automatic precision," and the "unanimous vote" of their passage are points upon which he conjures up the dark shapes which haunt his own mind. He sets down the whole as "the most plainly concerted action"—no doubt sees the caucus, or thinks he sees the well drilled actors; the silent submissive puppets who will vote but not speak, when the hour arrives; and that "most bitter" moult piece crammed for the encounter and the signal, etc. The one only thing wanting to give some shade of probability to this piece of constructive history is the fact that the commission did not arrive at Memphis until late in the day; as suddenly as angels coming out of the shadows of evening they appeared, and very early the next morning were introduced to the Conference. There was no time for all this drilling and drying and cranning; in fact the ink was not dry on the "triad of resolutions" when they were first read to the Conference in answer to the address of Bishop James. Dr. Whedon thinks he knows how things are done; but we have seen that his facts take the color and form of his fancy, and have no existence beside.

A much more serious part of this article is its deliberate intention to torture the reception of the Northern Bishops at St. Louis, and the commission at Memphis, into intentional insult—that the conditions laid down "for fraternalization" of those two occasions were tantamount to saying: "Confess yourselves fools and knaves, and then we will hear your proposals." The conclusion is constructive: The "triad of resolutions" indorse the Bishops' answer at St. Louis; the Bishops' answer indorses the "Plan of Separation," the main point in the "plan" is that both churches retreat to the boundary lines between former slave and free States; to do this would be, says Dr. Whedon, "to abandon three hundred thousand church members;" therefore, to demand this is simply to demand an impossibility, which is an insult, etc. A very elaborate process, therefore to arrive at a meaning already expressed. It is a well settled principle that the construction meaning of an article in any docu-

ment is not to be taken when the same point is distinctly expressed in it elsewhere. "When a law is clear and free from all ambiguity, the letter of it is not to be disregarded under the pretext of pursuing its spirit."—Civil Code, article 13. The resolutions of the Southern General Conference say expressly: "That we earnestly desire to cultivate true Christian fellowship with every other branch of the Christian church, and especially with the Methodist churches of this country and Europe." Here are no conditions. So that all that logical chain of the indignant editor falls to pieces before the plain statement that we are ready to fraternize with all Christian churches that wish it. But the Methodist Episcopal Church has never at any time, or by any official act, proposed fraternization with us. Their General Conference has never indicated anything of the kind, even in a general way. We are beforehand with them in our resolution of fraternity. We are before them in our action, for we actually sent a fraternal messenger. Their Bishops have come, and propositions have been informally made, but never for fraternization. When the Review can show that the offer has been made, it will be time enough to accuse us of laying down insulting conditions thereto. The truth is, if we were as suspicious as the Review we might say they offered union to escape offering fraternal relations; but we will not anticipate their next General Conference. Meanwhile Dr. Whedon looks to a new heaven and a new earth wherein dwell the righteous—a "new South," upon which we must concentrate our forces." So far as we know, the Methodist Episcopal Church has never ceased "concentrating;" no, not during her most loving moods. She has never ceased the work of "disintegration and absorption." "Let us enter the inviting field," she has already entered it with flying banners and rattling drums; by force, military and other, she has long since shown a disposition to embrace all that we have.

This warlike breathing accords fully with the sentiments and policy, freshly announced by the Christian Advocate a few weeks since. Speaking of the union of the Canadian Methodists and Wesleyans, as proposed by a correspondent, Dr. Curry says: "If the differences between these diverse ecclesiastical bodies is too inconsiderable to justify their continued separate existence, we cannot see why the smaller should object to being absorbed into the greater. This brings us back to our old doctrine of 'disintegration and absorption' as the best and the only practical method of church unification." The pipe or the tomahawk are the alternatives which these high officials offer our church. Inasmuch as we have refused their proposals for union, they are resolved to open the campaign with renewed vigor. Well, we must only consent to stay longer in the field. Their expressions of animosity, of love indeed, were so engaging that we were well nigh beguiled, both at St. Louis and at Memphis, into the belief that the time for the singing of birds had come—that with so much demonstrative "union" they surely meant peace; but it now seems we were mistaken, for under that "rosy wreath" there was hidden a "sword."

Sometimes a book appears which has a remarkable success, and gets all the credit of being based on an entirely original set of ideas, as the "Pilgrim's Progress." Now nearly all the leading incidents in Christian's journey are founded on a book of the fourteenth century, by one De Guilleville, or De Deguileville—for his name is written both ways. This work had a great popularity. It was translated into English, certainly early in the fifteenth century; and there cannot be the least doubt that the story so captivating, so readily adapted to almost any view of the problem of life, never quite died out of men's minds, and that some of the fragments were heard by John Bunyan, perhaps, in his childhood.

Those who in the day of sorrow have owned God's presence in the cloud will find him also in the pillar of fire, brightening and cheering the night as night comes on.

MISSIONARY.

JEWISH EVANGELIZATION.

The following communication from C. Van Noorden, secretary of the Western Hebrew Christian Brotherhood, correcting a statement made in one of our foreign notes, will be read with pleasure by those who are interested in the progress of Christianizing the Jews. He says:

"Mr. Editor: In your issue of today, July 21, I find the following paragraph under the 'Foreign Notes':

"The missions for the conversion of the Jews to Christianity seem to be growing quite unpopular, as they are so barren of results. It is said that the wealthy English society pays out half a million of dollars for every Jew converted, and even then it is claimed that most of these conversions are influenced by the interest of the parties. An effort is being made to turn this money into a channel to assist the suffering Jews along the Danube and in western Russia, countries where the poor Jews are now receiving most inhuman treatment from the government, and willing persecutions on the part of the people."

"Permit me to make the following correction. I have before me the last report of the London Society for Promoting Christianity among the Jews, dated June, 1870, kindly sent me by the secretaries."

"From this I gather that instead of giving up the missionary labors among the Jews, an effort is now being made to extend the labors of this society, which is evident from the following resolution passed at its last meeting:

"That this meeting rejoices to learn that the committee has increased the value of the society's work in Asia and Africa; and whilst cordially accepting the proposal to reoccupy Damascus as a mission station, regards the present continued liberality of the Ottoman government toward European residents as a loud call for extended efforts among the many thousands of Jews dwelling in that vast and important empire."

"The whole income from different sources has been \$165,000. Two thousand five hundred and nine Bibles, three thousand five hundred and thirty Testaments, fourteen thousand two hundred and eight portions of the Holy Scriptures, sixty-nine thousand one hundred and fifty-eight missionary tracts and books, thirty-three thousand nine hundred and seventy-one home tracts and appeals have been distributed during the year. One thousand five hundred Jewish children have received instruction in the religion of Christ. One hundred and sixty-three adults were instructed, of whom one hundred and thirty-three were hopelessly converted. Twenty-one Jews joined St. John's church on the twentieth of March, all of which goes to show that the source of your information was totally incorrect."

MISCELLANEOUS.

Mr. H. C. Hall, writing to the Christian World, communicates the following interesting information regarding the condition of affairs in Spain:

"The advance of Christ's truth in Spain has surpassed the expectations of the most sanguine. The Spanish government some time since gave notice to the Bishops and other clergy of the Roman Catholic Church that in case they did not come forward and take the oath of fidelity to the new and liberal constitution before the first of May, their 'livings' would be withdrawn. Up to the latest dates the priesthood gave no indication of yielding to this requirement, and the friends of an entire separation of church and state, with Castellar at their head, were preparing to improve the opportunity to assert, by act of Cortes, that Spain no longer has or sustains a State church."

"The distribution of the word of God continues unabated."

"Two theological schools have been established, and are in a flourishing condition. Funds are needed to enlarge these opportunities to train and educate native preachers. Sabbath schools, as well as public free schools, are being opened in all the provinces. To aid in supplying these with teachers and books, funds in large supply are solicited."

"Nothing more decidedly indicates the advantages of Christian effort in Spain than the fact that one man, a member of one of our city churches, has sold in that country a greater number of copies of the word of God, during the last sixteen months, than have been sold and given away in all Italy by all the different agencies at work there since the revolution of 1859 (a)."

Of the chief missionary societies of England, the Wesleyan Missionary Society reports a revenue of \$728,500, the Church Missionary Society of \$709,000, the Propagation Society of \$532,000, the London Missionary Society of \$524,500, and the Baptist Missionary Society of \$197,000, being in most cases an advance over last year, and forming

a total for the five societies of \$2,690,000.

Several of the churches of the Brazil mission report additions, and chiefly converts from Romanism. At the last communion in Rio Janeiro two young men were received on profession of their faith. At Lorena three persons were baptized and admitted to the church on profession of their faith. At Brotas one old man, "a miracle of grace," was received, and at Sao Paulo three were admitted to the church on examination, and three on certificate, and four children were dedicated to God in baptism. The brethren in Rio Janeiro have at least been enabled to purchase a desirable property for a chapel.

From Talca, Chili, comes the cheering intelligence that a young man had presented himself, expressing not only a personal acceptance of the offers of the gospel, through faith in our Lord Jesus Christ alone, but a desire to make the requisite preparation for advocating it before his countrymen.

A native, who recently attended the Spanish service at Valparaiso, came next morning to the depository and purchased a Bible. He said he had been gratified and instructed, adding that he had never heard so good a sermon, and promising that he would attend regularly hereafter.

CHURCH NEWS.

Rev. W. S. HALTOM, South Fork circuit, North Carolina Conference, reports seventy-two accessions and nineteen bright conversions.

Rev. W. HIRTO, St. George's circuit, South Carolina Conference, reports that charge doing well generally—particularly the Sunday school.

The Union (N. C.) Times says that a series of meetings are being held at Bethlehem church—sixty-six persons have professed conversion. At Flat Rock church thirty to forty were added to the church.—Baltimore Episcopal Methodist.

The Western Virginia Conference will meet September 7 instead of August 31. Bishop Kavanaugh will preside in the place of Bishop Paine, who will hold the North Alabama Conference, heretofore assigned to Bishop Kavanaugh—time to be announced.

Newbury, South Carolina.—Rev. O. A. Durby writes: Our District Conference, which has just closed, has left us in the midst of a general revival. Last night our altar was filled with penitents, seven of whom professed faith in Christ.—Southern Christian Advocate.

At last accounts the revival at Bonnetsville, North Carolina, was still in progress and increasing in interest. Eight or ten had professed religion and quite a number had joined our church. The congregations were large and serious, with many penitents at the altar.

The Southern Methodist Church is built, and the congregation organized, in Augusta, Kentucky, something less than two years ago, and we have now there an efficient membership of over sixty persons. Brother S. S. Deering's labors there have been greatly blessed. The church edifice is the newest in the town.—Nashville Advocate.

The Rev. G. D. Taylor, M. D., a venerable superannuated minister of the Tennessee Conference, died last week at Pulaski, and was buried on Sunday, August 7. He was, we believe, in his seventy-ninth year. He was universally esteemed and beloved. A memoir of this excellent man may be expected to soon appear in our columns.—Nashville Advocate, August 13.

The residence and grounds of Mr. George M. Cochran, Sr., of Stanton, Virginia, have been purchased by the Rev. William A. Harris, president of the Wesleyan Female Institute, for the use of that flourishing female college, for the sum of \$25,000. Mr. Harris will proceed at once to erect a large building in addition to the fine edifice which already occupies the ground.

A "WOODS MEETING" for Fauquier circuit will be held at St. Stephen's, near Catlett's Station, on the Orange and Alexandria railroad, commencing on Sunday, August 28. Preparations will be made for the accommodation of a large number of visitors. The ground is easily accessible. The members and friends of the Methodist Episcopal Church South are invited to attend. All persons wishing to tent upon the ground can obtain the required information by addressing Rev. E. H. Henry, Warrenton, Virginia.

PUNCH AND JUDY gives a remarkable illustration of "proof-positive." Wife (who has been sitting up): "Well, this is a pretty time to come home. Four o'clock!" Husband (who has taken but one glass of a curious compound, spoken of by himself, as "whiskawarra"): "What you mean, madam, by 'Four o'clock'?" "Unfortunately for you, madam, it is a happy hour, madam, for I have just heard that your husband has retired to bed in triumph in his boots."

Miss MULDER says to parents that the time must come in every family when it is the children's right to begin to think and act for themselves, and the parents' duty to allow them to do it; when it is the wisest gradually to slacken authority, to sink "I command" into "I wish," and to grant large freedom of opinion, and the expression of it.

A word of kindness is seldom spoken in vain. It is a seed which, even when dropped by chance, springs up in a flower.

Married.

In Madison county, Mississippi, by the Rev. H. H. Montgomery, July 28, 1870, Mr. R. E. LAWSON and Miss EVA SADLER.

Obituaries.

Died, in Crenshaw county, Alabama, March 16, 1870, Sister M. E. JAYNOE. She was born in Montgomery county, Alabama, and was raised by Christian parents, who taught her the principles of our glorious Christianity. She made an open profession of religion in the twenty-first year of her age, at which time she connected herself with the Methodist Episcopal Church South. She honored that profession for twenty-three years by a consistent walk and a godly conversation. She lived the life of a Christian, and died leaving her works to follow her. She left eight children and an affectionate husband to mourn her death; but, thank God, they mourn not as those who have no hope. Oh, may the Lord save her little ones.

Heaven M. GULAS, P. C.

Died, in Winnsboro, Franklin parish, Louisiana, Mrs. ANNIE ELIZABETH FURN, wife of Henderson A. MORSE, in her twenty-fourth year.

The deceased was born in the city of New Orleans, November 12, 1846, and was married in the same city, August 13, 1868. In April of the present year she removed with her husband to Winnsboro, Louisiana, where she sickened and died. Sister MORSE was converted in the Baptist Church, and was a member of that church at the time of her marriage. Soon after her marriage she joined the Methodist Church, and became a member of the Felicity street church of New Orleans, in which church her husband had long held his membership. She died an acceptable member of this church, and I can bear witness to her consistent religious profession. She was naturally most amiable, but divine grace had further refined and beautified her character. She was a guileless spirit, full of charity and all good works. Her end was peace. She testified to the faithfulness of her Lord in the last and trying hour, declaring that she was happy in the assurance of a blessed immortality. She leaves a husband and two little children. May God sustain the bereaved, and guide them and us all to the haven of eternal rest.

L. PARKER.

Jessie H. SETTLE was born in Sumpter district, South Carolina, May 24, 1854, and died in the town of Lexington, Mississippi, May 28, 1870, aged sixteen years.

In her early training in the Sunday school she had been pointed to the Saviour. During her long and painful sickness she was brought to feel the need of that Saviour. The importance of Sunday school training was developed in her case. Her friends and pastor, who prayed with her, had reason to believe that she "remembered her Creator in the days of her youth." On her dying bed, just before death, she distributed with her own hands, to her father, mother, brothers and cousin, keepsakes of her memory—the toys of her infancy, mementoes of her childhood, rewards of her Sunday school—extending her distributions down to the last article of her wardrobe, proffering what she should have and how each article should be used. Then, as if she had fully set her house in order, she calmly laid her down and died. Her pure and interest in every domestic economy, and the sweetness of her temper and spirit, can never be supplied to the family save by the consolations of holy religion.

JOSEPH D. NEWSOM.

Died, on the thirteenth of January last, near Crystal Springs, Mississippi, SARANNA E. PIERCE, daughter of Rachel H. and Rev. William P. PIERCE. Sarannah was born in Copiah county, Mississippi, July 16, 1817. She had religious parents, and was taught to pray early in childhood, and in 1860 sought and found the Saviour in the forgiveness of her sins. She was taken with typhoid pneumonia in January last, and from the first seemed to have a presentiment that she would die. Her mind was occupied with spiritual and eternal things; so much so that it pained and distressed her when any other subject became the topic of conversation in the room. Her pastor visited and conversed with her, and after w-

AMICUS CERTUS.

ship she expressed herself very happy. Her mind was stayed on the Saviour, and she had peace, all-satisfying peace, with God.

When she was dying her father asked her if she knew she was dying, and told her she would soon be in her Father's house. She said: "In my Father's house are many mansions;" and calmly and sweetly talked of a sainted mother and other loved ones who had gone before, and whom she would soon join in those mansions of light, to live with God forever; and now she sleeps with the blessed dead, and lives with the sainted throng, and sings the sublimest song "unto him that loved us and washed us in his own blood."

What solid comfort, what subdued and chastened joy must fill the parents' hearts. How beautifully are the gloomy clouds gilded—how transparent with the bright light from the other side.

WILLIAM B. HINES.

PHENICE L. PIERCE, son of Harriet A. and Rev. William P. PIERCE, was born March 18, 1864, and died August 2, 1868. "Suffer little children to come unto me, and forbid them not, for of such is the kingdom of heaven."

WILLIAM B. HINES.

Died, in the city of Selma, July 12, 1870, of disease of the heart, GEORGE W. THURMAN, aged sixty-six years, nine months and two days.

He was a native of Georgia, but moved with his parents, in his boyhood, to Dallas county, Alabama, where he grew up to manhood, married and settled. Soon after his marriage he became deeply interested in the subject of religion, and after a careful investigation sought it earnestly, refusing to be satisfied until he should receive such an evidence of his acceptance with God as should put all doubt to flight. This he received at a camp meeting, in rather a strange, miraculous manner. From that time he became a man strong in faith and powerful in prayer, active in revivals, and identified with all the enterprises of the church, both educational and missionary. His house was a home for the preacher, his purse open to supply their wants. The family altar was a fixture in the house. An active-steward, a faithful class leader, he was ever at his post. In him the fatherless and widow ever found an abiding friend.

Being a man of energy, he amassed a heavy fortune, which was swept away by the disasters of the late war, and he was thrown back upon the wreck of his fortune for a support in old age. This he bore with becoming fortitude. He suffered greatly some months before he died; but every means that affection could invent, money purchase or tender care apply was used to alleviate his sufferings, but all of no avail. As calmly as sinks the summer evening sun behind the western hills, without cloud or dimming vale, so calmly sank Bro. Thurman in the arms of death, leaving a bright example in the bosom of the church, and a light still shining along the path of the life he has left. O let me die the death of the righteous, and let my last end be like his.

WM. J. VAUGHN, President.

COOPER'S WELL, HINDS COUNTY, MISSISSIPPI.

THIS NOTED WATERING PLACE is now open for the reception of guests. The water is a natural mineral water, and is a cure for all diseases of the system, such as Rheumatism, Diarrhea, Dyspepsia, Dropsy, Diabetes, Chlorosis and general debility. It cures of Consumption the water is too excellent to be bottled. The water can be had at the Well, at twenty-five cents per gallon; delivered at Byram, on the New Orleans, Jackson and Great Northern Railroad; also at Bolton's, on the V. H. and Meridian Railroad, at thirty cents per gallon. Send denunciations, bottles or jugs. Backs will meet the four P. M. trains at Byram, and all the trains at Bolton.

Ask for excursion tickets from New Orleans to Cooper's Well and return—good till November 1, 1870. Price, \$12. Board and lodging, \$15 per week; \$3 per day.

Direct letters: Cooper's Well, via Byram or Raymond, Mississippi. Water to be had in New Orleans at Frederickson & Harlow's.

J. C. McALLISTER & CO., Proprietors.

NOTICE TO BUILDERS.

Sealed proposals for the repairs of Centenary College buildings, Jackson, Louisiana, will be received by the undersigned until the first proximo. These repairs are to embrace the Centenary Hall and all the buildings on the campus of the college, in whose hands the same have been placed for reference and greater certainty.

CHILDREN TEETHING.

Mrs. WINSLOW'S SOOTHING SYRUP,

FOR CHILDREN TEETHING.

greatly facilitates the process of teething by softening the gums, reducing all inflammation; will allay ALL PAIN and spasmodic action, and is

SURE TO REGULATE THE BOWELS.

Depend upon it, mothers, it will give rest to yourselves, and

Relief and Health to Your Infants.

We have put up and sold this article nearly thirty years, and can say in confidence and truth of it what we have never been able to say of any other medicine—NEVER HAS IT FAILED IN A SINGLE INSTANCE TO EFFECT A CURE, when timely used. Never did we know an instance of dissatisfaction by any one who used it. On the contrary, all are delighted with its operations, and speak in terms of commendation of its magical effects and medicinal virtues. We speak in this matter "WHAT WE KNOW," after years of experience, and pledge our reputation for the fulfillment of what we here declare. In almost every instance where the infant is suffering from pain and exhaustion relief will be found in fifteen or twenty minutes after the Syrup is administered.

Full directions for using will accompany each bottle. Be sure to call for

"Mrs. Winslow's Soothing Syrup,"

having the fac-simile of "CURTIS & PERKINS" on the outside wrapper. All others are base imitations.

Sold by Druggists throughout the world. j218 3m

ONE DOSE OF DR. SHALENBARGER'S

FEVER AND AGUE ANTIDOTE

ALWAYS STOPS THE CHILLS.

This medicine has been before the public fifteen years, and is still ahead of all other known remedies. It does not purge, does not sicken the stomach, is perfectly safe in any dose and under all circumstances, and is the only medicine that will

Cure immediately and Permanently every form of Fever and Ague, because it is a perfect Antidote to Malaria.

Sold by all Druggists. do 4 1/2 y

ON, M. D.

The Christian Advocate.

SATURDAY, AUGUST 20, 1870.

RELIGIOUS INTELLIGENCE.

A MINISTER and sixty-one members of Kendrick chapel, of United Brethren Association, near Indianapolis, recently joined the Methodist Episcopal Church.

The Congregationalists of Boston have just contributed the magnificent sum of \$37,000 to the cause of foreign missions. Zion's Herald foregoes the example may stimulate the Methodists to give to the same cause at least \$10,000.

Forty-one Episcopal clergymen died in the United States during the past year. The ages of twenty-one of them are known, and amount to one thousand four hundred and sixty-seven years, being an average of seven years. The oldest was eighty-three, and the youngest twenty-seven, being, with one exception, the only one under fifty-six years old.

ORANGE JUDG, of New York, has inserted a clause in his will bequeathing \$80,000 for the new professorship at the Wesleyan University of Middletown. He places the sum at interest, so that the chair may be immediately filled. This, added to the gift for the Scientific Hall, makes his donation to the institution \$100,000 within a year. Isaac Rich, of Boston, and Daniel Drew, have increased the interest on their endowments one per cent., which adds in each case \$1,000 per annum to the income of the University.

On Sunday, July 16, Bishop Ames and Chaplain C. C. McCabe were in Corinne, near Salt Lake City. They organized a society there, and steps were taken to raise means to build a church. Bishop Ames preached in the morning, and Chaplain McCabe in the evening. After services, it was agreed to build a church to cost \$3,000. Chaplain McCabe said he would give \$1,000 if the citizens would make up the balance, which they did, raising \$2,100 in a very short time. The church will be ready for dedication about September 20.—*Methodist.*

It is one of the notions of Boston to have a charitable society, called the "Silent Mission," that operates unseen and almost unknown. The receipts of the past year amounted to \$4,675 18, the expenditures, \$3,896 92; eight hundred and twelve visits had been made to families among the poorest and most unfortunate classes, their physical wants attended to, and instruction given how to live with due regard to cleanliness and virtue. Employment has been found for eighty-nine women and girls, and fifteen boys and eight men; fifteen have been induced to join temperance societies; there have also been found homes for ten children in good Christian families. The society is composed of men and women.

CUMBERLAND PRESBYTERIANS.—The Cumberland Presbyterians are almost unknown among Eastern churches, western Pennsylvania being their limit in that direction. Illinois, if we may judge from certain of their published statistics, is one of their rallying points. In that State they have three synods and twelve thousand members, most of them in the smaller country towns and the agricultural districts, while evidence of their prosperity is afforded by the fact that within the past two years they have built twenty new church edifices in Illinois. At Lincoln, in the same State, they have a college, whose cost and endowment amount to some \$110,000, and which is under the patronage of the three synods of Illinois and the two of Indiana and Iowa.

The Moravians of the United States are divided into two provinces—one in the Northern and the other in the Southern States. The statistics of the Northern Province have just been published, from which we learn that it contains 62 churches, having 5,970 communicants (an increase of 200,) 992 non-communicants, 3,610 children, and 5,494 Sunday school scholars. The largest church—that at Bethlehem, Pennsylvania—has 1,012 communicants, and at Hope, Indiana, Nazareth, Pennsylvania, and Philadelphia, there are churches with between 250 and 300 members each. Their ministers number 43. The Southern Province is much smaller, having 1,050 communicants, and 635 children and other members. The British Province contained, in 1868, 3,280 communicants and a total of 5,448 souls. The German Province, in the same year, 4,895 communicants and a total of 7,270 souls. It will be seen that the North Province of the United States is the largest in the Moravian community.

Mr. A. M. KIMBALL, a generous and noble-hearted man of Morristown, New Jersey, has just completed a large and commodious Orphans' Home, and has made the same over to the Methodist Episcopal Church in a deed of trust to Bishop James.

The deed stipulates that the trustees to whom the property is to be conveyed shall be appointed, from time to time, by the Bishops of the Methodist Episcopal Church, and that they shall hold the lands and premises, with their appurtenances, as a home for the female children of foreign missionaries of the Methodist Episcopal Church of the United States of America; and for the female orphans and half-orphans who are children of ministers of said church, and for such other female orphans and half-orphans as the trustees may select. The gift of Mr. Kimball is valued at \$50,000. It is not the first from him for the same general purpose. Some time since he established a fund within the bounds of the Genesee Conference for the benefit of widows and orphans of deceased Conference preachers.

WESLEYAN METHODISM IN AUSTRALIA.—Methodism in the antipodes is gradually, we might even say rapidly, increasing. The minutes of the Australasian Wesleyan Conference, held recently at Adelaide, show that during the year there had been a clear increase of 3,588 church members, two-thirds of which has occurred in the two mission districts of the Friendly and Feejee Islands. The total number of members in those Polynesian Islands, the missions in which, for the last sixteen years, have been carried on under the direction of the Australasian Conference, is reported as 29,011, of which more than 20,000 are in what was hitherto the cannibal islands of Feejee. In the colonial districts, including Australia, Tasmania and New Zealand, 26,545 church members are reported. There is an army, 1,351 strong, of local preachers in Australia and New Zealand, or about nine to one in proportion to the regular ministers. The proportion of Sunday school scholars to church members is two to one, there being upward of 50,000 scholars in the colonies.

A PAMPHLET has lately been published, entitled "Statement of Facts," which dwells on the great mortality assumed to exist among missionaries' wives. It says: "Probably not one out of 20 of the missionaries to-day in the field, that are of middle age, but has his second or third wife. Women may well ask: 'To what purpose is this waste of noble woman's life?' This statement is utterly wide of the facts. Of the missionaries of the Presbyterian Board 42 have been from 10 to 35 years in the field, and 29 have been married but once, and 13 more than once. There are 5 widows of missionaries in the field, while 19 have returned to this country, and some others have remarried there. In Corisco, West Africa, with 13 male and 17 female missionaries, 2 more of the former have died than of the latter. In China, since 1842, 50 males and 48 females have been engaged, and 12 males and 6 females have died. In other countries there has been a greater mortality among the females, but the average is almost the same of each. In Asia there have been laboring 133 males and 144 females, and there have died 27 males and 31 females. Of the 105 missionaries that have died since 1833 the males numbered 52, the females 53. It is not true that mission life is especially fatal to females.

The difficulty of expressing oneself in a foreign language is illustrated by the remark of a German girl, who went to see a fine boy baby, in endeavoring to express her admiration, said: "O my, what a nice babee. How fat she is, don't he?"

SCHOOLS AND COLLEGES.

CORONA.....CORONA.

Corona is a School designed for

The Higher Education of Women.

With a Faculty of ten able, experienced teachers, it is prepared to give young ladies a course of instruction equal in extent and thoroughness to that pursued in the best colleges for men. Best facilities in music, in the family of the principal young ladies will find the kindness and comforts of a home. The buildings are large, airy, newly furnished and carpeted. Number of boarders limited to twenty-five. Apply early. Terms moderate. Session opens first Monday of September, 1870. Address: A. B. STARK, Principal, Lebanon, Tenn.

ROANOKE COLLEGE, SALEM, VA.

Next Session Begins September 5.

This Institution has a full corps of instructors, a thorough course of studies, and abundant facilities for instruction. Its superior advantages, moderate expenses, healthy location, and excellent mail, traveling and telegraphic facilities, render it well worthy the attention and patronage of the South.

Expenses for session of ten months, about \$210 00.

For further particulars, catalogues, etc., address: REV. D. F. HITT, D. D., President of the College, Jyl 3m

SUMMER TERM OF THE

Southern Methodist High School

will commence on Monday, the fourth day of July, next. School hours from eight A. M. to twelve M. Rooms remarkably cool and pleasant. The best advantages afforded. For terms, etc., call on: D. I. RAST, Principal, Jyl 2m

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS

PUBLISHED BY

CHARLES SCRIBNER & COMPANY,

634 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.

"Incomparably superior to anything published."

Introduction to the Study of Geography.

Elementary Geography.

Intermediate Geography.

Common School Geography.

Guyot's System is approved and endorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dr. Huxley, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by its pupils of this generation will obtain a clearer, more definite and extended knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

VOL. XVI.

NEW ORLEANS, SATURDAY, AUGUST 27, 1870.

NO. 32.

NEWS OF THE WEEK.

FOREIGN.

LONDON, Aug. 20.—Another dispatch from King William, dated Thursday evening, says: "We have defeated the French, under Bazaine, after a battle which lasted ten hours. There were forty thousand killed and wounded. The garrison were taken prisoners. I commanded in person. The defeat of the French was complete."

WILLIAM.

PARIS, Aug. 20, noon.—Nothing yet from the front. There are rumors of an engagement between Canrobert and Prince Frederik Charles; also that the Prince Royal has penetrated France as far as Vitry le Francois, nineteen miles south by southeast of Chalons, and had an engagement with the forces under Marshal McMahon.

The advices from Chalons are encouraging. They show the presence there of several large and well appointed armies, the forces of which, combined with that of Marshal Bazaine, should effect much.

LONDON, Aug. 20.—The following is the Pope's letter to King William, proposing mediation:

Your Majesty: In the present grave circumstances it may appear an unusual thing to receive a letter from me; but as the vicar on earth of God and peace, I cannot do less than offer my mediation. It is my desire to witness the cessation of warlike preparations, to strip evils of their inevitable consequences. My mediation is that of a sovereign whose small dominion excites no jealousy, and who inspires confidence by the moral and religious influence he personifies. May God lend an ear to my wishes, and listen also to those I form for your majesty, to whom I would be united in bonds of charity.

Given at the Vatican, July 22, 1870.

LONDON, Aug. 20.—Postscript to the Pope's letter:

"I have written identically to the Emperor."

King William's reply is as follows:

Most August Pontiff: I am not surprised but profoundly moved by the touching words traced by your hand. They cause the voice of God and of peace to be heard. How could my heart refuse to listen to so powerful an appeal? God witnesses that neither I nor my people desired or provoked war. Obeying the sacred duties which God imposes on sovereigns and nations, we take up the sword to defend the independence and honor of our country, ready to lay it down the moment these treasures are secure. If your holiness could offer me from him who so unexpectedly declared war, assurances of a sincerely pacific disposition and guarantees against similar attempts upon the peace and tranquility of Europe, it certainly will not be I who will refuse to receive them from your venerable hands, united as I am with you in the bonds of Christian charity and sincere friendship.

WILLIAM.

LONDON, Aug. 20.—A serious disturbance has occurred in the department of La Vendee. The bigoted peasantry believe that the present war is the Lutheran against the Catholic Church. The Protestants have been relentlessly assailed.

MADRID, Aug. 20.—The government is preparing for heavy shipments of troops for Cuba early in September.

Some two dozen republican leaders, including Paul Arjula, have returned to Madrid, taking advantage of the amnesty recently offered them. Senor Perrand has not yet returned.

FLORENCE, Aug. 20.—There were violent debates in the Italian chambers yesterday. Deputy Wellana accused the ministers of violating the neutrality of Italy by sending Italian troops to defend the Pope. One of the ministers replied that Mazzini had been arrested for traveling in Sicily under a false name, that the government was well aware of his plans, and was determined to defeat them, and that Mazzini would have a fair trial in Sicily. It was especially inflammatory. Belani denounced the arrest as illegal.

LONDON, Aug. 20.—It is said that there are more than four hundred thousand Germans between the Rhine and Paris.

The French have succeeded in victualing the garrison at Strasburg. It is admitted that the corps of Frederick Charles suffered severely.

PARIS, Aug. 22.—The Gaulois says: The diplomatic corps meets daily. The English embassy anxiously awaits a favorable moment to introduce peace propositions. It is

said, let events take what turn they may, the interposition will certainly be made within a month.

LONDON, Aug. 22.—A letter from Queen Victoria to the Empress Eugenie, under the date of August 15, 1870, relating to mediation, has been published. The Queen regrets her inability to mediate, but intimates that mediation is a cabinet affair. She thinks the time is inopportune.

The Prussians are surrounding Verdun. The camp at Chalons has been abandoned, and the troops there have been ordered along the line.

The plan of the Crown Prince seems to be to advance along the valley of the Aube.

It is said that McMahon is performing a strategical movement preliminary to action, which action Bazaine is expected to support.

Bazaine has at last been supplied with food and ammunition.

The Paris Siecle, of to-day, says: "It is certain we must accept a siege."

Two of Bismarck's sons have been wounded.

McMahon's headquarters are at Dizier.

MADRID, Aug. 23.—The success of the Prussian armies has caused the revival of the question of Hohenzollern's candidature. There are rumors that Prim proposes submitting the question to the people by means of plebiscitum.

LONDON, Aug. 23.—It is reported the Crown Prince is abandoning the march on Paris, and has gone to the support of the Prussian armies west of Metz, which are threatened with formidable attacks from Bazaine, who has been reinforced by McMahon.

A dispatch from Alexandria says the frigate Hertha, of twenty-eight guns, has been captured by the French.

PARIS, Aug. 23.—The Journal Officiel has a dispatch which has been received from Bazaine, declaring his intention to remain in the vicinity of Metz. Without giving further explanation, the dispatch admits that Bazaine's communications were at one time endangered, but asserts them now secure.

All quiet at Rheims.

NEW YORK, Aug. 23.—A special to the Telegram, from London, says: "Nothing official has been received from either army since yesterday."

Private advices assert that the Chalons army is moving toward Thionville, in a desperate effort to effect a junction with Bazaine, escaping the Prince Royal and passing the German army north of Verdun.

McMahon is left the choice of two evils, either to leave the road to Paris open, or, by holding it, sacrificing Bazaine.

A special to the Des Etats Unis says: Preparations are going on for a combat all along the line.

Paris is virtually in a state of siege.

It is generally conceded that the issue of the campaign will be decided under our walls. If we are able to hold out for a week—and we are able against an enemy destitute of all material for carrying on a siege—all France will come to the sneer of the capitals.

LONDON, Aug. 24.—Prussian officers in the field don't believe that Paris will resist. They expect an insurrection will follow their approach, resulting in the displacement of the present authorities, when peace will be easily guaranteed.

Comte Renard, a noted writer on political economy and finance, has been appointed Governor of Alsace.

The Times recognizes the fact that there is a determination in the French Corps Legislatif for self-government, which will be irresistible should Napoleon fall.

Prussia has sent Bavaria a subsidy of ten millions in gold.

The Figaro's electric light proposition meets with favor in military circles. The glare will perplex besiegers and aid the besieged.

The Orleans party are hopeful. The Princes here watch events closely, and will have an agent of great skill and experience in Paris, advising them of every event affecting their interests.

The transportation of the wounded is assuming considerable importance. Holland refuses, and Belgium replies that her consent to allow the wounded to pass through her territory will be construed by France as an act of hostility.

ST. PETERSBURG, Aug. 24.—The Journal denies that Russia is committed against the dismemberment of France. She is, however, unfavourable to that measure.

NEW YORK, Aug. 24.—A special to

the Times from their correspondent at Paris, says he saw a letter from a high St. Petersburg official, stating that Russia was seriously alarmed about Polish affairs. There is great agitation there in favor of France, and many Poles are leaving for the French service. On the other hand, there is a movement afoot in the Russian Baltic provinces for annexation to the German Confederation of Prussia on terms which have already been determined upon.

It is believed that in self-defense Russia will be compelled to participate in the war.

NEW YORK, Aug. 24.—The following dispatches have been received:

"PARIS, Aug. 24.—La Patrie announces that all of McMahon's forces have joined Bazaine in the Ardennes mountains, by a flank movement. Other authorities say that only the regular Chalons army, forty thousand strong, has effected a junction with Bazaine, and that McMahon is probably in the south collecting forces."

"All communications continue open."

"Letters describing Thursday's battle say that a part of the army under the Crown Prince appeared on the scene at the close of the conflict, and thus saved the Prussians from utter defeat. Bazaine, therefore, really fought the three Prussian armies."

"The French government is telegraphing to America and Russia for supplies."

"The Russian fleet in the Baltic is under sailing orders."

The London Times contains another canon to the effect that the Empress Eugenie has written to Queen Victoria, soliciting the mediation of the British government.

This act, according to the Times, has caused great indignation in France.

The Courrier des Etats Unis says: It is reported that Bismarck has indirectly informed France that Prussia will never consent to peace except upon the basis that France shall be disabled to such an extent as to be powerless hereafter to revenge herself for the disasters of the war. In other words, Bismarck would reduce France to the rank of a fourth rate power.

The Courier adds: To this France will reply by force of arms. Cholera is raging in the Prussian army.

A serious conflict has occurred at Rome between the German and French troops in the papal army.

PARIS, Aug. 24, midnight.—It is reported that the Prussians are at Segonne to-day. Segonne is a small town of five thousand inhabitants, twenty-five miles southwest of Eprenoy, and sixty-five miles from Paris.

NEW YORK, Aug. 25.—Advices from Paris report that the minister of war announces that the army will soon be ready to take the offensive, and that in the battle of Sunday the French were victorious.

Large numbers of Prussian prisoners have arrived at Soissons from Gravelotte, which indicates that the French achieved some glory there.

The minister emphasizes a declaration that decisive events will soon occur at Metz. This announcement, taken in connection with his former statement that the French army at Metz is nearly ready to take the offensive, shows that Bazaine is confident of the success of his combinations whenever he decides to move.—Pittsburg.

LONDON, Aug. 25, noon.—McMahon's entire command left Rheims on Monday, hoping to protect Paris.

A WORD OF COMFORT.—Our sweet sufferer lay panting in distress. Our souls cried out: "Come, Lord Jesus, come quickly! Cut short this torture! Take her gently to thy rest!"

So fragile, so lovely, so ready for heaven, so meek and lowly in heart, why need she suffer so! Had she not borne his will all these years with Christ-like patience, and now, at the last, why could he not loose the bonds at once and let her fly to his breast?

She did not know what bitter thoughts were swelling at her bedside, but she lifted her tender, trustful, steadfast eyes to our pitying faces, and whispered: "He loves me just the same."—Congregationalist and Recorder.

The Chinese only pay their physicians when they are in perfect health; as soon as they get sick the pay of the doctor ceases, and it is, therefore, for his interest to cure them as quickly as possible.

NEWS FROM THE CHURCHES.

MOBILE, MISSISSIPPI CONFERENCE.

MR. EDITOR: I have just closed a meeting at Mount Zion. The Lord was with us, and many precious souls were persuaded to come out on the side of the Lord.

Thirteen accessions to the church, and eleven infants baptized. There were many young men of the same church who pledged themselves to take up their cross and hold family prayers. "Glorious things are spoken of thee, O Zion!"

Yours truly,

J. M. WEEMS, P. C.

MOUNT ZION, MISS., Aug. 9, 1870.

SIMS' SCHOOL HOUSE, LOUISIANA.

MR. EDITOR: We commenced a two days' meeting on the thirtieth of last month, at Sims' school house, which continued for five days. The result was, the church much revived, and an accession of twenty-seven to the church, and we trust to Almighty goodness. We were somewhat discouraged at the prospect for good on the work. But this outburst of the goodness of our divine Master has cheered my drooping spirits, and now I can go on rejoicing in God, my salvation, for his manifestation of the Spirit on the people. My prayer is that he may continue his visitations until the whole country shall be in one sacred flame of love and zeal for his kingdom on earth.

Dr. W. M. Jennings, local preacher, and Rev. Jesse M. Randolph, Baptist minister, rendered good service during the meeting. May God bless them in their labors.

Yours in Christ Jesus,

JOHN H. BOULT.

RAYVILLE, LA., Aug. 10, 1870.

CAYUGA CT., MISSISSIPPI CONFERENCE.

MR. EDITOR: The Lord is doing great things for us, whereof we are glad. I held three protracted meetings on Cayuga circuit during the month of July, to wit: Utica, Bear Creek and Cayuga, attended with encouraging results. There have been fifty accessions to the church during the year, and at the meeting at Cayuga, which closed last Sabbath night, there were three conversions. Dr. Bell was with us two days; Brother Brown, from Raymond circuit, also assisted much. He has the spirit of the gospel, and preached with power. Brother Ford was with us, full of earnestness and zeal.

It would surprise you, Brother Parker, to see and hear my venerable colleague, Brother Thomas Nixon, preach, exhort and pray. You would not think he could be over fifty years of age, while he is in his seventy-seventh year. He is a noble old veteran. Pray for us.

Your brother in Christ,

INA B. ROBERTSON, P. C.

HINDS COUNTY, MISS., Aug. 12, 1870.

NO STATE in the Union is better organized in respect to Sunday school work than Illinois. Conventions are held in almost every township in the State, and a grand rally of the friends of Sunday schools is made once a year in every county in the form of an enthusiastic, largely attended county convention. These township and county gatherings are occasions of great religious interest, usually resulting in the conversion of scores of persons. Last year the convention in Gallatin county, on the Ohio river, held at Shawneetown, was attended by more than two thousand persons. A revival of religion followed it, resulting in the conversion of many. The organization of a Young Men's Christian Association was another result. This association has kept up a noon daily prayer meeting for nearly a year. Ohio and Indiana should bid Illinois God-speed in this glorious work, and then follow her example.—Western Christian Advocate.

MULTIPLY IN PARVO.—There was a refreshing directness in John's solution of this theological problem, propounded by his wife:

"John, do you think we shall know each other in heaven?"

"Yes. Do you expect we shall be bigger fools there than here?"

THE SOUTHERN UNIVERSITY, OREGONSHORO, ALABAMA.

The Southern University was commenced with the very liberal subscription of some \$230,000. A magnificent college building was erected, an extensive and complete apparatus was procured, a learned and able faculty was elected, and the University started under the most auspicious circumstances.

Of the faculty let me say, that the trustees had their choice from the whole territory of the South, and that choice has never been regretted. They have given eminent satisfaction, both to those who elected them and to the public who know them.

Soon after the University was opened the war came on and greatly retarded its success, though it has never suspended its operations. Much of its endowment was lost in the general prostration, though we fully expect to weather the storm, and look to a long and prosperous future. It was the intention of its founders to have the institution of the highest grade, and to maintain the highest standard of scholarship; from this purpose they have never swerved. The curriculum is liberal and comprehensive, embracing as much as any young man can accomplish in the ordinary term of college life, and preserve health. But scholarship is not determined by a curriculum, but by the examinations of students upon their studies. It is in this that the University has maintained its test. The examinations are rigid and searching, being conducted upon the plan of the highest institutions of this country and Europe, and entirely by writing. The subjects and propositions upon which the examinations are to be had are all written upon the blackboard, and embrace the principles and facts of the branches that have been studied. The students take their seats, with the themes and writing materials before them, but without books or permission to communicate with each other. When they have finished their papers they hand them to the presiding professor and retire; and the result is a sure indication of what the student knows on the branches under consideration. Such a course cannot fail to send forth scholars in those who receive the honors of the University, for if any young man refuses or neglects to stand the examination he gets no degree. The faculty take no excuse. It is a trying ordeal, and some become discouraged, and fail to "stand," and especially for A. M.; and not a few are deterred from entering the institution, fearing they cannot succeed. But the trustees and faculty have the satisfaction of knowing that when a young man carries away upon his A. M. there is no sham put upon the public; it is given to no one who has not taken the University course. And the degree of A. B. indicates scholarship proportionably high. In support of the claims set up, and in proof of the appreciation of the scholarship of graduates of the Southern University by those prepared to judge, and of the stand they take in competition with those from other institutions, even the best, I may be permitted to state a few facts.

MR. H., one of our graduates, was elected to a professorship of mathematics in a college in Tennessee, and so well were those in charge of the college pleased with him that in a month or two they wrote for another; and nearly every graduate of the University has a good situation offered him immediately. And the faculty have frequent calls by letters: "Send us one of your A. M.'s." Some time since one of our graduates took the law course in the University of Virginia, and easily stood at the head of a large class.

Another is now taking the medical course in the same University, and one of the professors writes his father that he is "justly at the head of his class." Another took the course in the Medical College of New York, and bore off the first prize from competitors from ten or fifteen States. And still another sought a prominent place in the High School in one of our cities, and those whose duty it was, undertook to examine him, but they soon found the "table turning," and dropped him; he got the place! I state these things to show your readers that in order to give their sons a thorough education it is not necessary to go as far North even as Virginia. All things considered, we can do a better part for them than will be done there.

If among your readers, either in Tennessee, Mississippi or Arkansas, there are young men who wish to be fitted for any position for which education prepares men, if they wish to be prepared for the presidency of the highest academies, or professorships in the best colleges, or professorships in the Southern University and do their duty, and we will guarantee them this preparation. But it will be no matter of amusement.

Our professors are all thorough Methodists, and this is a Methodist university. Young men are brought to Christ here; from thirty to forty of the students were converted during the last session. It is doing a great work for the church, and deserves to be well sustained. Twenty students were taught gratuitously the past year.

For confirmation of what I have said, and for further information touching the claims of the University, I refer all interested to Bishop Keener, Dr. J. B. Walker and Dr. T. O. Summers, each of whom have had a son graduated there.

J. HAMILTON.

JACKSON CIRCUIT, MISSISSIPPI CONFERENCE.

MR. EDITOR: I write you a hasty note to inform you that we are in the midst of a gracious revival of religion in the church at Spring Ridge, on the Jackson circuit, Mississippi Conference. We began the meeting on Saturday, the thirtieth instant, and it still continues with increasing interest. Twenty-five have joined the church as new members and four by letter, making twenty-nine in all.

We closed the services this afternoon, with over thirty persons at the altar as seekers of religion. We think more will yet join the church. I have had but little help during the whole time, compared to the necessities of the case. Bro. Lusk, from the Raymond circuit, has been with me part of the time, and has done good service—preaching with acceptability and power.

From the two meetings held thus far on the work eighty members have been received into the church, and a considerable number of conversions—I am not able to tell how many. There seems to be a general move among the people on the subject of religion. The meeting here will continue for some days yet. "The Lord is doing great things for us, whereof we are glad."

Yours in Christian bonds,

JULIUS T. CURTIS.

SPRING RIDGE, MISS., Aug. 21, 1870.

A WEATHER GUIDE.—Two drams of camphor, half dram of pure saltpeter, half dram of muriate ammonia and two ounces of proof spirits, in a glass tube or narrow phial, will make a pretty sure weather guide. In dry weather the solution will remain clear. On the approach of change minute stars will rise up in the liquid; while stormy weather will be indicated by the very condition of the chemical combination.

TWO CERTIFICATES of death in the San Francisco coroner's office read: "Died from rapture of the head," and "Suffocated from eating poison."

The Christian Advocate.

SATURDAY, AUGUST 27, 1870.

AT THE LAST.

The stream is calmest when it nears the tide,
And flowers are sweetest at the eventide,
And birds most musical at close of day,
And saints divinest when they pass away:
Morning is lovely, but a holier charm
Lies folded close in evening's robes of balm;
And weary man must ever love her best,
For morning calls to toil, but night to rest.

Coming from heaven, she on her wings doth
bear

A holy fragrance, like the breath of prayer;
Footsteps of angels follow in her trace,
To shut the weary eyes of day in peace.
All things are hushed before her as she
throws

O'er earth and sky her mantle of repose;
There is a calm, a beauty and a power
That morning knows not, in the evening
hour.

Until the evening we must weep and toll,
Plow life's stern furrow, dig the weedy soil,
Tread with sad feet our rough and stormy
way,

And bear the heat and burden of the day,
Oh! when our sun is setting, may we glide
Like summer evening down the golden tide:
And leave behind us, as we pass away,
Sweet, starry twilight round our sleeping
clay.

LAFAYETTE DIST. CONFERENCE.

Mr. Editor: Permit me, through your columns, to give a brief account of the proceedings of the Lafayette District Conference of the North Alabama Conference, Methodist Episcopal Church South, which met at Lineville, Alabama, July 14. As we were not favored with the presence of a Bishop, the conference was called to order at half-past two P. M. by the presiding elder, Rev. F. L. B. Shaver; and on calling the names of the preachers and delegates quite a respectable majority answered to their names, after which the necessary committees were appointed and the preliminaries arranged for the future business of the conference.

The Sabbath school cause was presented in an able report by Rev. R. E. Oslin, a local elder of the Fredonia circuit, in which he set forth sufficient reasons why the church should put forth all her energies in this great work. He regarded "Sabbath schools as the best auxiliary to the ministrations of the gospel, and the early inculcation of the love of the Bible as the surest safeguard against infidelity in all its forms, and the best guarantee for the success of the cause of Christ. We earnestly invoke the co-operation of every preacher and member of the church in establishing Sabbath schools in all practicable places."

Neither the committee nor the conference seemed to favor public demonstrations in behalf of Sabbath schools as a means of accomplishing the grand object of the institution—the indoctrination of the children and youth of the country in the plain truths of the gospel, so as to be led by them to the cross, in humble penitence and faith in Christ for the remission of sins.

The financial interests of the church received a full share of attention. Our brethren in the laity are waking up to this important means of securing a successful ministry.

The Committee on the Support of the Ministry contend that the itinerant ministers are to some extent culpable for the deficiency so much and justly complained of, in that they neglect to preach upon and instruct our people in Christian liberality; that our people are fully able to support their preachers, and the failure is to a considerable extent for the want of proper gospel teaching on this subject.

A committee was raised to consider the propriety of establishing a district parsonage.

In their report the committee say that the church should not only make liberal assessments for the presiding elders, but each district should provide a good parsonage, well furnished with neat and substantial furniture. The establishment of a district parsonage at some central point will tend very much to the permanency of the district boundaries, and thereby promote the unity and strength of the church. The following resolutions were adopted:

Resolved, That this conference heartily concurs in the proposition to provide a district parsonage.

Resolved, That we recommend to

all the quarterly conferences the importance of adopting such measures as they think best to secure the object at as early a date as possible.

On the second day of the meeting Brother W. D. Nicholson offered the following, viz:

In view of the pressing demands of the missionary work, and the necessity of every member of the church bearing an equal proportion of the burden in this great enterprise; therefore,

Resolved, That we organize a missionary society in the bounds of this district.

The resolution was referred to the Committee on Missions, with instructions to report as early as possible. The committee reported in favor of the resolution, and the society was organized under the following constitution, viz:

Art. 1. This organization shall be known as the Lafayette District Missionary Society.

Art. 2. The officers of this society shall consist of a president, vice president, secretary, treasurer and five directors.

Art. 3. Any person may become a member of this society by paying \$1 annually.

Art. 4. The amount raised by this society shall be appropriated to missions within this district, so far as the drafts in favor of those missions extend; the remainder, if any, to be forwarded to the treasurer of the missionary society of the North Alabama Conference.

Art. 5. The anniversary of this society shall be held on Saturday night of each District Conference.

The officers and managers are: Jos. T. Curry, president; James M. Towles, vice president; L. R. Bell, treasurer; J. W. Garrison, secretary; E. G. Richards, R. J. Sewell, Jos. R. Hood, W. M. Spruce and R. E. Oslin, managers.

Brother Towles presented the following resolution, which was unanimously adopted:

Resolved, That we respectfully suggest to all the District Conferences of the North Alabama Conference the propriety of organizing themselves into missionary societies.

The anniversary was held on Saturday night, in the Methodist church, before a very large and attentive assembly. The meeting was addressed by Rev. A. West, of Talladega, in a deeply interesting and telling speech, every way worthy of the man and the occasion. He was followed by Rev. F. L. B. Shaver, presiding elder, in a manner and style well calculated to instruct and interest the congregation.

After the addresses a call was made for members, and about seventy names were enrolled and the money necessary to constitute membership laid on the table. Whereunto will this "little rock cut out of the mountains" grow?

The delegates to the Annual Conference are: Rev. R. E. Oslin, Colonel Jos. D. McCann, J. Percival Oliver and D. Wordlaw Sims. Alternates: Rev. Jos. R. Hood, J. W. Garrison, Richard J. Sewell and Wash. L. Smith.

The next conference is to be held at Lafayette.

A vote of thanks to the community for their hospitality, and to the Baptist brethren for the use of their house of worship, was unanimously adopted.

The conference then adjourned, with benediction by the presiding elder. Jos. T. Curry, Sec'y.

Reskin truly and beautifully says that we treat God with irreverence by banishing him from our thoughts, by not referring to his will on slight occasions. His is not the finite authority or intelligence which cannot be troubled with small things. There is nothing so small but we may honor God by asking his guidance of it, or insult him by taking it into our hands; and what is true of the Deity is equally true of his revelation. We use it most reverently when most habitually; our insolence is in ever acting without reference to it; our true honoring of it is in its universal application.

FOLLOWING Christ personally, individually, as well as collectively, is our great business—not following him in a certain way; not following him by giving services and ordinances and ceremonies; but following him in trust, in joy, in peace, in hope, in love, in faith in the invisible. And they are the best Christians who, following Christ thus, follow him the most closely.

JASPER DISTRICT CONFERENCE.

Mr. Editor: The District Conference for Jasper district, North Alabama Conference, met in Jasper, July 29, and adjourned on the following day. No Bishop being present, Rev. J. M. Bohand, presiding elder, took the chair.

After the usual committees were appointed the pastors gave a verbal report of their several charges, which showed that the state of the church was encouraging throughout the entire district. The Sunday school cause was reported as increasing in interest, and new schools being organized where there have been none heretofore. The finances of the district are coming up, in the main, very well.

The second day was occupied in reading and discussing the reports on all these various interests of the church. Special attention was given to religious exercises, and the result was that we had no wrangling, but a good spiritual feast all the time. Scarcely a report was read and discussed but what there was a gradual increase of spiritual manifestations visible in the conference, so that before we got through the whole conference was bathed in tears time and again, while we all "thanked God and took courage."

The preaching of the word was attended with power and demonstration. On Sunday night the altar was crowded with penitents, and ten or twelve were powerfully converted. The meeting is still going on successfully. The effects of the signal baptism of the Holy Ghost which was poured out here will be felt all over the district, while it was a special blessing to the church and community at Jasper. Every one who attended this District Conference was doubtless impressed with the idea that this piece of our machinery may be so managed as to do good work in spreading Scripture holiness over the land. Over \$100 was raised on Sunday for missions.

The conference elected the following brethren as lay delegates from this district to the next Annual Conference, viz: Rev. F. A. Gamble, L. Ceale, S. Parmer and G. W. Hewitt. Alternates: Rev. G. Teirce, Dr. Rosamond, F. A. Hewitt and Dr. F. Prince.

Yours in Christ,
J. W. HAMPTON, Sec'y.

REPORT ON THE STATE OF THE CHURCH.

Your committee, appointed on the state of the church, beg leave to submit the following report:

The Sunday school interest is reported to be gloriously spreading and triumphantly progressing, blessing the rising generation, rescuing them from vice and ruin, and elevating them to the lofty position of sons and daughters of God. For these reasons we are constrained to report the church not a corpse, not a dead letter, but a living, energizing power. The ark of the Lord is still with us.

We would point to the success of our beloved church since the close of the late demoralizing and devastating civil war. Our ministers went forth in great poverty—some even on foot—not knowing from whence their own bread and that for their families would come, yet trusting in God. A scattered and demoralized church has been reorganized, re-inspired, and stands forth to-day all clad in armor bright, with weapons, offensive and defensive, reflecting the divine power and glory—foremost in point of numbers, and foremost in line of battle in the great army of heaven.

We have much to stimulate us to wise and noble deeds of daring. Then onward, brethren, to the charge! Our mountain country is rich in mineral resources, and through the medium of rapidly progressing railroads will soon be developed in an almost unprecedented manner. The population, in all probability, will be more than quadrupled within the next decade of years. The wealth of the country will develop in proportion to the increase of population. It is the mission of the church to meet and drive back each tide of vice and sin which may flow in with the influx of population.

By thus laboring and ever stand-

ing upon the watch-tower the church may sanctify the growing wealth of the country, and, better still, may instruct the people in righteousness, control their moral energies, and then lead them to heaven.

A very great responsibility rests upon the ministry of the Methodist Episcopal Church South. They are to sound each note of alarm, raise each battle-cry, rush into the thickest of the fight, and then, thank God, it is their privilege to catch the first glimpse of Satan's retreating forces, and to cry: "They fly, they fly!"

It is the duty of all our preachers, local and itinerant, to preach and practice the doctrines and precepts of our beloved Methodism.

Dear brethren, let us inquire for the old paths and walk therein. Let us go back to the type and style of preaching God's word practiced by our fathers. Teach, by precept and example, Methodism in its primitive purity. Then will the secret of God be with us. Darkness and superstition will give way; heathen temples will topple and fall; teleged ceremonies and imaged symbolism will fly before the advancing sons of Wesley. Courage, brethren! Go onward to evangelize the world. Go forth to duty; and may the great Head of the Church verify in us his ancient promise: "Lo, I am with you always, even unto the end of the world."

All of which is respectfully submitted.
J. D. ANTHONY,
For pastors of the District.

Brandon District, Mississippi Conference.

Mr. Editor: In your last issue I saw and read a notice of our District Conference, recently held at Garlandsville, Mississippi. While I regard the style of our worthy secretary as truly a model, worthy of universal imitation—I may venture to say something more of that interesting occasion.

There were features of this meeting that will not soon be forgotten. More than twenty preachers were present, beside our excellent Bishop Keener. Every preacher in charge of a circuit or station in the district was present save one. Beside the traveling and local preachers of the district, we had the pleasure of greeting and hearing the ministrations of Brothers E. H. Moninger, of Yazoo City; K. A. Jones, of Starkville; H. F. Johnson, president of Brookhaven Female College, and Brothers Spillman and Black, of the Mobile Conference.

From the very beginning throughout there was a manifest devotional spirit, and all seemed to regard the occasion as one for spiritual improvement. A blessed unction rested upon the pulpit, and the word of God was glorified. The love-feast, on Sunday morning, was indeed a "season of refreshing from the presence of the Lord." Many pronounced it the happiest season of the kind they had ever enjoyed.

As Brother Chatfield, our secretary, has so appropriately stated, all the important enterprises of the church were considered, and an effort made to awaken general interest in their behalf.

A measure of special import was inaugurated, which, I hope, will not be forgotten, viz: To provide a parsonage for the presiding elder. Will the preachers in charge of the several circuits do what they promised in this matter? We shall see.

The religious exercises were continued for several days after the adjournment of the conference, under the direction of the devoted and efficient pastor of Garlandsville circuit, Rev. George W. Boyles, assisted by Revs. John D. Hays and K. A. Jones. Several were converted; eleven added to the church. A profound religious impression was made upon the community, and I am persuaded a gracious influence has gone thence to all the district.

The presence and labors of Bishop Keener will be long remembered by the preachers and people of this section. We did not exactly "thank" him for his presence and the exhibition of all those noble qualities of head and heart so freely ascribed to our Bishops, and in which we regard him by no means inferior. But we

did and always will thank the Lord that he was permitted to come among us.

Since the District Conference at Garlandsville I have held a quarterly meeting at Lake Station, on the Forest circuit, which lasted six days, with good results. This was a season of rejoicing, indeed, to the people of God, and we were blessed with some valuable additions to the church.

Returning to Garlandsville, I must say that the good people of that village deserve the thanks of all who shared their hospitality, for never have I seen a community more zealous in their efforts to accommodate, and I trust God will amply reward them.

H. J. HARRIS, P. E.
AUGUST 10, 1870.

A Revival on Martinsville Circuit.

Mr. Editor: I now propose to give an account of a revival of religion on our circuit. In the first place, in 1868 it paid its pastor between \$70 and \$80. He was a man well received and respected by all, and very dependent. If another dollar was paid by the circuit for any church purpose, I do not know it. In 1869 I was appointed to the work. The stewards met promptly and assessed the circuit \$500 to meet all the claims the church makes upon it, and at the last quarterly meeting the last dollar was reported paid, with a large addition of converted men and women to the church.

This year the revival interest has largely increased. Since I last wrote to you we have held two more protracted meetings, with great success. I don't know that I ever saw such converting power at any time. In many instances, in a few minutes or hours after a sinner resolves to be religious, he is rejoicing with the Christians. His change is clear and positive. He needs no committee to wait on him to tell him he has got religion. He goes out to tell others he has found him of whom Moses and the prophets did write.

Now for the results. All the converts of last year who are heads of families, together with the older members who had heretofore neglected family worship, are now holding family prayers. The converts of this year are falling into line. There are but few Methodist families who do not have their regular religious family worship. The children of the country are being sprung up in the churches and the school houses. Wherever a class can be formed there is a call for Sunday school books, hymn books, Bibles and Disciplines of the church.

Right here you will ask me: "Brother, do they take the New Orleans Christian Advocate?" I answer: Not to the extent they should, would or will. We have at this time but one post office. That is at the depot, ten to twenty miles away, and those that take it cannot get half their numbers. These are difficulties, we trust, which will soon be removed.

We have three church houses—one building, and two of them at new places, where societies will be organized in connection with the circuit. The last quarterly conference appointed an assistant preacher to help meet the increasing demand.

Now, Mr. Editor, I have given you the best account I can. Is it not a religious revival? If so, is it not truly encouraging to Zion? The Lord has come to save. Our local preachers deserve great praise for their abundant labors and great success. We are expecting still greater things. Many old members declare plainly that they have found depths of religious experience they did not know were attainable in the present life.

A. B. NICHOLSON, P. E.,
Martinsville Ct., Miss. Conf.

Answer.—A teacher, wishing to explain to a little girl the manner in which a lobster casts its shell when it has outgrown it, said: "What do you do when you have outgrown your clothes? You throw them aside, don't you?" "O no!" replied the little one; "we let out the

Union Springs District Conference.

Mr. Editor: The District Conference for Union Springs district, Alabama Conference, met in Greenville, Alabama, July 27. The opening sermon was preached at night, in the Methodist church, by Rev. Angus Dowling. The Conference, however, did not assemble for the transaction of business till Thursday morning at eight o'clock, and was called to order by Rev. J. W. Shores, presiding elder of the district. Rev. Angus Dowling was elected secretary, and J. L. Foster assistant.

Committees were appointed upon the following subjects: Discipline and state of the church, local preachers, Sunday schools, education, finance, parsonages and church property, religious literature, Bible cause, missions and religious interests of freedmen. These several subjects were carefully examined, and interesting and edifying reports made by the committees to whom the matter was referred.

While it is proper to refer in a general way to the work of the committees, it is not amiss to make special mention of the report upon education, which, perhaps, will be published. At the close of this report, Rev. G. W. F. Price, president of the Tuskegee Female College, addressed the conference. He pressed the claims of the East Alabama Male and Tuskegee Female Colleges upon the people of this State, and especially upon the people of the Methodist Episcopal Church South. Interesting and stirring speeches were made in the same direction by Revs. C. L. McCartha, J. B. Cottrell, W. M. Motley, J. W. Shores and Colonel R. H. Powell. At the close the following was offered and adopted:

Resolved, That, fully impressed with the importance of educating our sons and daughters beneath the shadows of their own homes and within the influence of the paternal fireside, we most earnestly recommend our own educational institutions to the patronage of our people.

The report of the Committee on Finance shows that for the support of the ministers in charge, within the bounds of the district, there had been assessed \$12,270, and \$3,753 of that amount had been paid—net quite twenty-five per cent., although more than half the year was gone.

Brother Rogers offered the following resolution, which was adopted:

Resolved, That we of the laity who are here assembled will endeavor in the future not only to do our duty more faithfully, but will make an honest effort to stimulate our brethren at home to do their duty also to afford a competent support to the ministers of God who are sent to dispense the word of life to us.

At the close of the report upon missions it was resolved that every pastor in the district preach a sermon upon the missionary work, and take up a collection therefor before the close of the year.

At the close of the report on religious literature the committee urged the great importance of a more general circulation of our own publications.

Reports from the entire district, as was shown by the Committee on the State of the Church, declare most hopefully that there is gradual improvement for good. Class meetings are much revived, and bid fair to do great good. The church is also being toned up by wholesome discipline.

Reports from the local ministry show greater activity in helping the itinerant to "spread scriptural holiness over these lands." In some portions of the district revival power is manifest, and the shouts of triumph are heard. The church is stirred and fired, and sinners are being saved.

The following were elected delegates to the ensuing Alabama Annual Conference: T. E. Branscomb, W. C. Menefee, J. L. Dunklin and J. R. Rogers. Reserves: R. H. Powell, R. H. Crop, T. Pullum and D. F. McCall.

The next Conference will be held at Fort Deposit. Secretary.

A guilty conscience is like a whirlpool, drawing in all to itself which would otherwise pass by.

Sometimes are like tempest clouds: when afar off they look black, but when above us scarcely gray.

The Christian Advocate.

SATURDAY, AUGUST 27, 1870.

A CONVENT SPECTER.

A land alive with goblins and specters, in which every woman is thought to be a witch, presents the proper scenery for such a legend as the story of the convent specter, called the Spirit of the Frozen Sea.

Peled in the existence of this phantom is widely spread. I have seen with evidences of this faith not only in the northern seas, but on the Volga, in hamlets of the Ukraine, and among old believers in Moscow, Novgorod and Kiev. All the Ruthenians, most of the Don Cossacks, and many of the Poles, give credit to this tale, in either a spiritualized or physical form.

Rufin Pietrowski, the Pole who escaped from his Siberian mine, and crossing the Ural mountains, dropped down the river Dvina on a raft, and got as near to Solovetsk as Onega Point, reports the specter as a fact, and offers the explanation which was given of it by his fellow-prisoners. He says it is not a ghost, but a living man. Other and later writers than Pietrowski hint at such a mystery; but the tale is one of which most would rather whisper in corners than prate in books.

"You have been to Solovetsk?" exclaimed to me a native of Kalatch, on the Don, a man of wit and spirit. "May I ask whether you saw anything there that struck you much?"

"Yes, many things; the convent itself, the farms and gardens, the dry dock, the fishing boats, the salt pits, the tombs of saints."

"Ah! yes, they would let you see all those things; but they would not let you go into their secret prison."

"Why not?" I said, to lead him on.

"They have a prisoner in that building whom they dare not show."

The same thing happened to me several times, with variations of time and place.

Some boatman from the Lapland ports, while striving, in the first hard days of winter, with the toes of ice, is driven beneath the fortress curtain, where he sees, on looking up, in the faint light of dusk, a venerable figure passing behind a loop-hole in the wall; his white hair cut, which proves that he is not a monk; his eyes upraised to heaven; his hands clasped fervently, as though he were in prayer; his whole appearance that of a man appealing to the justice of God against the tyranny of man. A sentry passes the loop-hole, and the boatman sees no more.

This figure is not seen at other times and by other folk. Three months in the year these islands swarm with pilgrims, many of whom come and go in their craft from Onega and Kem. These visitors paddle below the ramparts day and night; yet nothing is seen by them of the aged prisoner and his sentry on the convent wall. Clearly, then, if the figure is that of a living man, there must be reasons for concealing him from notice during the pilgrim months.

"Hush!" said a boatman once to a friend of mine, as he lay in a tiny cot under the convent wall; "you must not speak so loud; these rocks can hear. One dares not whisper in one's sleep, much less on the open sea, that the phantom walks on the wall. The Pope tells you it is an imp; the elder laughs in your face and calls you a fool. If you believe your eyes, they say you are crazed, not fit to pull a boat."

"You have not seen the figure?"

"Seen him—no; he is a wretched one, and brings a man bad luck. God help him—if he is yet alive!"

"You think he is a man of flesh and blood?"

"Holy Virgin keep us! who can tell?"

"When was he last seen?"

"Who knows? A boatman seldom pulls this way at dusk; and when he finds himself here by chance, he turns his eyes from the east wall. Last year a man got into trouble by his chatter. He came to sell his fish, and fetching a course to the south, brought up his yawl under the castle guns. A voice called out to him, and when he looked up suddenly he saw behind the loop-hole a bare and venerable head. While he stood staring in his yawl, a creak ran through the air, and looking along the line of roof, he saw, behind a puff of smoke, a sentry with his gun. A moment more and he was off. When the drink was in his head he prated about the ghost until the crier took away his boat and told him he was mad."

"What is the figure like?"

"A tall old man, white locks, bare head; and eyes upraised, as if he were trying to cool his brain."

"Does he walk the same place always?"

"Yes; they say so; always. You don't, between the turrets, is the phantom's walk. Let us go back. Hush! That is the convent bell."

The explanation hinted by Pietrowski, and widely taken for the

truth, is that the figure which walks these ramparts in the winter months is not only that of a living man, but of a popular and noble prince; no less a personage than the Grand Duke Constantine, elder brother of the late Emperor Nicolas, and natural heir to the imperial crown!

This prince, in whose cause so many patriots lost their lives, is commonly supposed to have given up the world for love; to have willingly renounced his rights of succession to the throne; to have acquiesced in his younger brother's reign; to have died of cholera in Minsk; to have been buried in the fortress of St. Peter and St. Paul. But many persons look on this story as a mere official tale. Their version is, that the prince was a liberal prince; that he married for love; that he never consented to waive his rights of birth; that the documents published by the Senate were forged; that the Polish rising of 1831 was not directed against him; that the attack on his summer palace was a feint; that his retirement to Minsk was involuntary; that he did not die of cholera, as announced; that he was seized in the night, and whisked away in a garret, while Russia was deceived by funeral rites; that in the year of emancipation he suddenly appeared in Penza; that he announced a reign of liberty and peace; that he was followed by thousands of peasants; that, on being defeated by General Drenikine, he was snuffed to escape; that he was afterward seized in secret, and sent back to Solovetsk, where he is still occasionally seen by fishermen walking on the convent wall.

The facts which underlie these versions of the same historical events are wrapped in not a little doubt; and what is actually known is of the kind that may be read in a different sense by different eyes. *Free Russia, by William Hepworth Dixon.*

The old Spartans had a great deal of good sense about the right way of communicating ideas. In an age of sophistry and unprincipled rhetoric they testified to the superiority of directness and truth. During the Peloponnesian war a Spartan was sent to the Persian satrap Tissaphernes, to engage him to prefer the alliance of Sparta to that of Athens. He stated his business in a few words, and after listening to the elaborate oratory of the Athenian ambassadors he confined his reply to drawing two lines to one point. The one was straight and direct, the other curved and crooked. "There," he said to the satrap, "take your choice." Two centuries before, the inhabitants of an Aegean island being pinched with dearth, sent to the Spartans for help. The council heard the speeches of the messenger and replied: "We have forgotten the first part of your harangue and we did not understand the last." The humiliated speech-maker went home without the needed provisions and reported his failure. The Aegeans sent another, with instructions to say as little as possible. He determined to match the Spartans in their own style. So he marched into their council with an empty flour sack and said: "Fill it." They immediately ordered the provisions to be sent, but rebuked the ambassador for having been too long-winded.

"How?" said he. "I said only 'fill it.'"

"That was unnecessary," was the reply. We think that we have passed through the Athenian age of oratorical and literary diffuseness. The necessities of newspapers have compelled condensation. Speeches are delivered now to be printed rather than heard. What was oratory in Parliament and Congress only a few years ago would be purer now. In the pulpit, however, the object is yet to affect the hearers, and the preacher sacrifices his opportunity if he cultivates a literary style. Dignified conversation without observable eloquence, the style of a man who has instruction to give and feeling to impart, is what we should aim at; and the best way to accomplish it is to be conscious that we know something that the hearers do not, and feel it.

Baltimore Christian Advocate.

Is the recently published *Life and Letters of Dr. Bethune* it is related that one evening when he was crossing by the Fulton ferry to Brooklyn, upon entering the cabin he found all the seats occupied.

Soon he heard a thick, husky voice exclaim: "Dr. Bethune, Dr. Bethune." Turning in its direction, he found a man standing, who said: "Doctor, take my seat; it is an honor to give such a man a seat."

Ever since I heard of that big church in New York trying to get you away by giving a call of \$5,000, and you said you'd see 'em—first, I have had great respect for you, and I think it an honor to give you a seat."

It is needless to say that the well-meaning man was not in a condition to judge of the terms most appropriate for such an interview.

God thinks more of the good than of the influential.

CONCERNING BOOKS.

BY A REGULAR CONTRIBUTOR.

"Was not Dr. Kippis a very clever man?"

"He might be a very clever man for aught I know," replied Dr. Robert Hall, "but he laid so many books upon his head that his brains could not move."

The fate of Kippis is a warning to all who love literature. "We live in an age of books. They fly from the printing press thick as snowflakes on a wintry day, and almost as quickly fade away. Each book is heralded to the world by an interested publisher, whose zeal at times outruns his judgment. It is, indeed, 'a creation of genius,' and has already 'made a sensation unparalleled in the history of the book trade,' while the 'demand for it is so appalling that twenty lightning printing presses, running day and night, cannot supply it.' It is a literal truth that 'no library can be complete without it.' The temptation to purchase and read such a book is almost irresistible; but happy is he who is not led away by it."

We confess to a feeling of alarm when we see the docks of books which come from the press, and think of the time wasted, or worse than wasted, in their perusal. It is easy to say, "Good judgment should be used in the choice of books," but good judgment is a gift which few possess. It is easier to make a wise choice of friends than of books. Who can gather a thousand volumes—especially of modern publications—and not have a volume but is worthy to live while the language in which it is written endures? "Read only good books," do you say? But good books are so many, and life is so short, that a selection must be made. Who can make a selection successfully? Let no one aspire to be deeply versed in books unless he is a robust genius who can grapple by the day with musty libraries, and master them.

Few persons are aware of the vast number of books which have appeared in the world. Step into the Imperial Library at Paris, founded only five hundred years ago, and there you will find one million printed volumes and eighty-four thousand volumes in manuscript—over ten times as many as fill the shelves of the Astor Library. And then remember that the book publishing business has only fairly begun. We tremble for the fate of our great grandchildren yet to be born. What an avalanche of books will descend upon them!

There is comfort in the thought that many ancient books have utterly perished. The comedies of Menander trouble not the student with their venerable jokes in perplexing Greek. The Alexandrian Library was turned into ashes. Fifteen of Plutarch's "Lives" have ceased to be, though he has many more remaining. But alas! since the art of printing, books do not perish, as formerly, through fire and flood. They multiply their species so rapidly that annihilation is impossible. Does neglect drive them from the book store and the parlor? They gather in many a public and private library, and there, though their usefulness is ended, they live from age to age, though laid upon the shelf.

Authors, as a class, lack discretion. They like to write—which is, or ought to be, a harmless amusement; but then they fancy the public will be eager to read, so they make haste to print. They print poor books as well as good ones, and despise brevity. They are impatient of revision, and are never guilty of the sin—if sin it be—of omission. So good a man as Richard Baxter to publish what will fill sixty octavo volumes of moderate sized print! Does he think future ages will find time to read all he has written? So wise a man as a professor in Oxford University giving the memoirs of Lord Broughley in three volumes of two hundred closely printed pages—filling fifteen hundred cubic inches of space, and weighing sixty pounds! So great a poet as Spenser writing one of the noblest poems in the language—"The Faerie Queene"—yet so long that not one in a hundred presses his way through it to its close. And yet six books are wanting to complete it, which have fortunately been lost. So great a historian and critic as Macaulay starting out to write, as he says, "the history of England from the accession of King James the Second down to a time which is within the memory of men still living," and filling five volumes with the events of eleven years. Suppose he had lived eighty years longer, and had written, as he proposed, the events of a hundred and twenty years, who would have read this magnificent history in fifty or sixty volumes?

Think of the volumes of learned lore in answer to such questions as "Who is Junius?" "Who was the man in the iron mask?" Think of the volumes of criticism written on useful and useless books, of the ponderous ovetives launched against

heresies which died with their utterance; of the solemnly stupid books written and published against every discovery of science, every invention of art, and every widespread revival of religion!

Life is short, and there is much to be done besides reading books. Modern authors must avoid length and tediousness, or their books will not be read. There is already a growing disposition to gain knowledge from reviews and encyclopedias rather than to go to original sources. They have already become a necessity. Meanwhile, it is a comfort to know that in the race for popularity the best book will in the long run win the day.—*Methodist.*

TREASURES OF SONG.

The great battle song of the Lutheran Church, Luther's *Eine feste Burg*—a tower of safety is our God—is said to have come into the heart of the Reformer on his way to the Diet of Worms. Both it and the little song of Gustavus Adolphus, the lofty Christian hero of his age, were consecrated for all time by a memorable incident, worthy of all honor.

On the morning of his last battle, when the armies of Gustavus and Wallenstein were drawn up waiting for the morning mist to clear away ere they sounded the charge, the king commanded Luther's grand hymn to be sung, then his own, accompanied with the trumpets and drums of the whole army. As they ceased singing the mist broke away, and the sunshine burst on the two armies. For a moment Gustavus knelt beside his horse, in the face of his soldiers, and repeated his battle prayer: "O Lord Jesus Christ, bless our arms and this day's battle for the glory of thy holy name." Then, passing along the lines with a few brief words of encouragement, he gave the battle cry, "God with us," with which he had conquered at Leipzig, and rushed on the foe. In the thickest of the fight he was found, bleeding with a death wound, but from the dying lips of the martyr fell these noble Christian words: "I seal with my blood the liberty and the religion of the German nation."

Thus have the hymns of the past been embalmed for us. We cannot gather up all the precious names of men out of whose hearts the dear cross pressed the living songs of the church; Saints Ephraim, Ambrose and Gregory; Luther, Gerhard and Tersteegen; gentle George Herbert, borne to his grave with cathedral chants; Richard Baxter, so basely brow-beaten by the infamous Jeffreys; Bishop Ken, the non-juror; Watts and Doddridge, the two great Nonconformist hymn writers; the brothers Wesley, pelted, threatened, mocked, yet distilling out of their hearts sweet songs, that go chiming everywhere like silvery bells, cheering death-beds, giving courage to brave men, and patience to suffering women; the gentle, tortured spirit of Cowper, pouring out, in the intervals of his terrible malady, his trembling but immortal songs, and many others, not to mention those great masters of music whose chorals have a deathless life. The treasury of all the past is ours, and much of the best of it has come down to us in Christian song.

As in the early autumn the birds begin to look from the North-southward, and, springing up from the shrubs, the reeds, and the waters, begin their flight, and as they wind their way out of every tree and copse, from orchard and garden come forth new singers, increasing in number at every furlong, until at length, coming down from their high pathways, they cover provinces, and fill forests, and are heard caroling and triumphing through all the unfrosted orchards, amid all the groves, and the vines, the olives, the palms, and the oranges of the tropics, with their wondrous bursts of song; so, like these birds, these sacred hymns of the past, whose nests have been found in every age, from the very gray and twilight of creation, seem to have risen up, spread and plumed their wings, and flown down to our day, and into the pleasant gardens and vineyards God has given to his church, and their sweet and heavenly music, as they lit from branch to branch, fill the church with melody, comforting and cheering, as in old time, the hearts of God's people, as if once again the advent was renewed, and God's angels were in the air.—*Dr. T. H. Robinson in Evangelical Quarterly.*

MISSIONARY LABOR.—An excellent but somewhat eccentric clergyman whose field of labor was in New England, one Sunday, at the close of the services, gave notice to his congregation that in the course of the week he expected to go on a mission to the heathen. The members of his church were struck with alarm and sorrow at the sudden and unexpected loss of their beloved pastor, and one of the deacons, in great agitation, exclaimed: "What shall we do?" "Oh, Brother C—," said the minister, with great apparent ease, "I don't expect to go out of town."

RELIGIOUS INTELLIGENCE.

PHILIP KNAPP'S Presbyterian church in Madrid had sixty-nine adult members at its second communion.

The Society of Friends in England report an unusual increase the past year in the number of its members.

A COMMISSION of Scotch Presbyterians are visiting Syria and Lebanon, with a view to investigating the best openings for native schools.

The Bombay Guardian says that the entire number of those who have identified themselves with Keshub Chunder Sen in India is a little less than two thousand.

A LETTER from Pere Hyacinthe protesting against the declaration of the dogma of papal infallibility has appeared, and causes a sensation. The Catholic organs attack the letter and its author with much bitterness.

IN ABOUT fifteen populous counties of southeastern Texas there is not a single Presbyterian minister. Through this region of country two railroads are projected, one of which will be in running order within the next twelve months.

The increase of colored Baptist churches in Louisiana for the year has been two thousand, with at least twenty churches formed.

The total membership, white and colored, of the Baptist denomination in Louisiana is said to be forty thousand.

At the meeting of the Board of Managers of the American Bible Society thirteen new auxiliaries were recognized. The entire number of books printed in various languages was seven thousand seven hundred and thirty-seven, besides others to the value of \$350.

THIRTY thousand dollars nearly, in gold, given last year for various Christian objects, the sending forth of five foreign missionaries to the regions beyond, and the employment of a native Chinese to labor among his immigrant countrymen, attest the love and devotion to the cause of Christ of the Hawaiian churches.

The sixth session of the Nevada Annual Conference of the Methodist Episcopal Church was held in Virginia City, July 21, Bishop Ames presiding. Two were admitted on trial, three were ordained deacons, and one ordained elder. There were fourteen appointments made. The church property at Austin was purchased by the Church Extension Board for \$7,000.

It is said that there are now 86 missionary societies and 40,000 missionaries in the field; the word of God is preached in 15,000 localities in the heathen world; \$5,000,000 are annually collected to sustain them; 687,000 converts are enrolled in Africa, and 713,000 in Asia. The whole amount contributed last year by Christians of every name for the spread of the gospel among heathen nations is estimated at about \$5,000,000.

THE Publication House of the Presbyterian Church, at 1334 Chestnut street, Philadelphia, was entered by burglars on Sunday, July 31. The fire-proof safe was entered through a hole cut in the wall; but the thieves found but little plunder. About \$20 in cash was all they took with them, and a few gold pens. Some registered United States bonds were left behind, and the thieves worked hard for the little booty they obtained.

THE Dutch Reformed Church in Cape Colony is in trouble, having expelled, four years ago, two rationalistic members for heresy. The colonial court and privy council have ordered that they be reinstated. The church synod has avoided the matter till this year, but will be compelled next October to meet the question. Four-fifths of the members wish the rationalists out of the synod, but a majority may vote to receive them back under protest.

EVANGELICAL ALLIANCE.—At the meeting of the Executive Committee of the Evangelical Alliance, held August 5, 1870, it was unanimously resolved, in view of the European war, to postpone the General Conference, which was to take place in September, until some future time. This action was taken with great reluctance, but as all the European branches urgently advised a postponement, the New York Executive Committee deemed it necessary to grant their request.

AN EXCELLENT Sunday school superintendent, whose name we could easily mention, having looked around his community in vain for pious persons suitable for teachers, selected over twenty unconverted persons for the purpose, and, after much persuasion, succeeded in inducing them to accept the office. In less than six months all of them professed conversion, and with them more than half of the pupils in their classes. They were led to Christ through the instrumentality of the teachers' prayer meeting. Sunday school workers everywhere, don't fail to foster the prayer meetings!—*New York Christian Advocate.*

WE see it stated in the *Christi-*

that sixty of the clergy in Madrid have left Rome and formed a new free church, and that a priest in Estramadura has come out, bringing fourteen parishes with him. The infallibility question has helped on this movement. A priest in Madrid, of Jewish blood, has joined the Protestants, and is reported to be a very eloquent man. He went six weeks ago to Avila, a town where there is a seminary of Catholic priests; and his preaching drew such crowds that the theaters were shut up, except on Sunday, when some footlardy player on the stage undertook to abuse the Protestants. He was immediately whistled at and hooted by the audience, who insisted on his reappearance to retract all he had said. The result is a new church in Avila.

In a French Protestant paper we find some spicy things in regard to the council and the Pope; the latter it styles "the blesser of Chassapots." In a conversation with Cardinal Guizié the Pope is said to have given utterance to the sentence: "Tradition—it is I." Or, as it sounds better in French and more like Bonaparte's words, we give it as we find it: "*La tradition c'est moi!*" The holy see is said to be in want of money; Rothschild, according to the French paper, not wishing to accept a hypothecation of the apostles' patrimony. In allusion to the Pope's arbitrary demand that the bishops should close their discussion within a given time, the Duke of Cactani said: "The bishops came into the council shepherds; it is designed that they shall go out sheep."—*Independent.*

THE Sadhs are a small sect in India who do not worship idols, and in their religious views and conduct are superior to the mass of Hindus. Mr. S. H. Kellogg, of the Presbyterian mission at Furrukhabad, Northern India, says in the Foreign Missionary that one of the Sadh leaders in that place, a banker, reputed to be worth about \$2,000,000, seems to be greatly interested in Christianity and has attended the Christian worship. He recently invited Mr. Kellogg to preach the gospel to the Sadh people in their own place of worship on their monthly holy day. Mr. Kellogg did so, and found among the thousands assembled in the spacious buildings and grounds a cardinal state of mind and nowhere an averted glance. They invited him to be present with them at every monthly meeting.

THE Methodist Episcopal Church in Ohio now includes four Conferences and four branches of Conferences. Methodism was introduced in Ohio shortly prior to 1800. The minutes for 1860, of the Northwest Territory, named two circuits—Miami, with a membership of 99, and Scioto, with a membership of 158. In 1805 the minutes named four circuits and a membership of 1,556. In 1810 there were returned two presiding elder districts, 21 traveling preachers, and a membership of 6,529. In 1815 there were four presiding elder districts, 45 traveling preachers, and 14,561 members. In 1820 there were 28,083 members and probationers in the church; in 1830, 40,192; in 1850, 112,483; in 1860, 141,080. The membership is divided into 575 pastoral charges, 500 of which are single charges, and 75 have two preachers.

AMERICAN BIBLE SOCIETY.—The stated meeting of the Board of Managers was held at the Bible House, Astor Place, on Thursday, the fourth instant. Thirteen new auxiliaries were recognized, of which four are in Georgia, three in Alabama, three in Missouri, two in Tennessee, and one in Kansas.

Communications were received from Rev. Dr. Maclay, of the Methodist mission, Fochow, returning thanks for funds to that mission, and giving important views as to the need of the Bible in Christian missions; from Rev. Chancey Goodrich, of the American Board at Peking, as to Bible work in that mission; from Rev. A. L. Blackford, Rio de Janeiro, as to the prospects of Bible distribution in Brazil, which are not particularly encouraging; from Per Palmquist, Esq., Stockholm, returning thanks for funds granted to the Baptist Missionary Society for Sweden, with interesting remarks; and from Rev. I. G. Bliss, dated at Paris. Mr. Bliss is, by authority from the board, on his way to New York. His letter was dated July 22.

Grants of books were made to the American Tract Society, to the American Seamen's Friend Society, to the French Canadian Missionary Society, to the National Asylum for Disabled Soldiers in Maine, and numerous grants to feeble auxiliaries, with eleven volumes in raised type for the blind. The entire number of volumes, large and small, in various languages, was seven thousand seven hundred and thirty-seven, besides others to the value of \$350.

Rev. Dr. Revell, of Florence, president of the Waldensian synod, made some interesting remarks as to the religious condition of Italy.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, AUGUST 27, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—REV. LINUS PARKER, 112 Camp Street, New Orleans, La.
AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEE.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office ORDER, DRAFT, or by EXPRESS. If this cannot be done, REGISTER the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

Centenary College of Louisiana.

The session of this college year will begin on the first Monday in October. The tuition for college classes is \$60 per annum, payable semi-annually in advance. Board at \$16 per month. This institution is located at Jackson, Louisiana, twelve miles back of Bayou Sara. It is one of the oldest in the South, and its graduates fill important positions throughout the States of Mississippi and Louisiana.

Students, upon arriving at Jackson, will report to Prof. A. R. Holcombe.

The board and faculty promise the public that nothing shall be wanting on their part to secure the thorough education of the students committed to their care, in both preparatory and collegiate departments.

For general information we state that the repairs necessary to the center building are going forward, and have already been contracted for. The members of the Mississippi and Louisiana Conferences will please do all in their power to send forward students, so that the term may begin with a large list.

J. C. KEENER,
Pres. Board of Trustees.

Conducting District Conferences.

We append a paragraph from an account of the Atlanta District Conference, published in the Southern Christian Advocate. It seems to us that Bishop Pierce's method is a good one, and most perfectly meets the end for which these conferences were established. We can see no utility in converting them into a small Annual Conference, and adopting reports which are usually prepared for it.

The venerable Bishop Andrew was present much of the time—quite feeble—but he contributed much to the interest of the occasion by his presence and by words of loving, apostolic counsel. At the opening Bishop Pierce addressed the conference briefly. These meetings were designed for spiritual edification rather than the formal transaction of business. He would not appoint the usual committees, but advised the conference to regard itself as "a committee of the whole" upon any question proper for its consideration; exhorting its members first and chiefly to make the occasion a means of grace to themselves and the community, and to go forth again to their respective charges, and places of abode, "sanctified and meet for the Master's use, and prepared unto every good work." This was the programme, and it worked well. Under it every interest of the church, usual on such occasions, passed in review in order, and without tedious monotony.

RELIGIOUS SELF-RELIANCE.

It is desirable to have all outward and human aids in working out the salvation of the soul. When the domestic surroundings are favorable, and husband, wife and all the inmates of the house are united in the service of God, and where family religion is a living and daily realization, personal piety becomes comparatively easy. The atmosphere of such a home is congenial to the devotional spirit, and love and faith are strengthened. The religious services of the home altar are among the greatest aids and encouragements to holy living. When the Christian is so fortunate as to be surrounded by pious neighbors, who are in full accord with himself in their faith and practice, he derives untold benefits from these religious associations. He is made stronger to resist temptation, and is cheered by the sympathy of those who are striving after the same immortal prize. To be almost the sole representative of the church in a community, and to stand alone in society as a witness for Christ, is a severe test of our fidelity. The social support which a religious neighborhood affords to individual believers cannot be too highly estimated. The perseverance of many depends upon this favorable circumstance. Their piety must have these social props, or it declines and ultimately is altogether lost.

The means of grace, where they are abundantly enjoyed, enable us to advance hopefully in the divine life. Regular and edifying preaching nourishes and stimulates, and the social meetings inspire and cheer the devout heart. These weekly repasts of grace, ministered by the social gatherings of praying people, become as the necessary food of the soul. There is a wonderful blessing in them, and the most stable and intelligent feel that it is unsafe to do without them. Besides the sin of neglecting these chosen helps to godliness, there is felt to be an almost irreparable loss when for any cause they are missed. To be deprived of such aids to personal piety is the greatest of misfortunes, and it often leads to discouragement, if not to recklessness and despair. There may be in the domestic relations nothing to aid, but much to hinder and depress. The family altar is unknown, and a spirit of indifference or of ungodliness prevails. All these social relations are unfriendly to a spiritual life, the church is disorganized, and a destitution of the word of God exists. Without preaching, and deprived of the ordinances of religion, how natural that the pious remnant in a godless community should yield to depressing circumstances, and surrender all as lost.

It is at this point, where these most valued and precious aids to piety fail, that we need to develop the quality of religious self-reliance. In the absence of those means which ordinarily are so essential and helpful, we must fall back upon our own resources, and determine to help ourselves. If we find no counsel nor sympathy in man, and if the ministry and church fellowship are beyond reach, it only remains that we work out our own salvation. We may rely too exclusively upon outward means, and attach too much importance to the assistance of others. Where this is the case the spiritual life will be unsteady, and an excuse for sin and backsliding will be sought in the deprivation of religious privileges. Coldness in the church will be a sufficient vindication of our own lukewarmness, and the infirmities of the preacher will be made the ground of our personal backwardness in the work of Christ. With the Bible in hand, and with the privilege of secret prayer, every man may make a successful fight for his soul's salvation. He may be deprived of the ordinary means of grace, an exile, solitary and forlorn as to all human instrumentalities, and yet win the crown of life. If he is waiting and depending upon anything outside of God and himself, he is liable to failure and disappointment. Personal responsibility is absolute, and our ability, alone and single handed,

God helping us, to achieve the conquest over all enemies is certain.

The principle is that of self-reliance, as opposed to a guilty and inert dependence upon outward and human instrumentalities. The essence of a right self-reliance is, in its other aspect, an entire and felt reliance upon God; it is of self, as opposed to man, and it is of God, as opposed to unqualified confidence in our own strength. The reason which Paul assigns for working out our own salvation is, that "it is God which worketh in you both to will and to do of his good pleasure." So long as it is God which worketh in us, rather than Paul or Timothy or Epaphroditus, and God, rather than any merely outward conditions, we may work out our own salvation in spite of the privation of gospel privileges, and the combined opposition of all the powers of darkness. The warrant and encouragement to help ourselves are found in the sufficiency of the grace of God. The hopeful and self-reliant Christian is therefore the humble and trustful believer, who feels that he "can do all things through Christ which strengtheneth me."

The conclusion we reach is one of condemnation to those who are laying their sins at the door of circumstances, and who plead the want of adequate helps to piety. These things may make it more difficult for them to be religious, but they do not make it impossible. They must break away from these sophistries of the Devil, and save themselves by relying upon God alone. No human priesthood, no privileges in themselves, can effect this great work; nor can the presence of all opposing elements hinder it. If determined upon salvation, the boon is within the reach of the weakest child of adversity and sorrow. And we would urge this message of hope upon all weary and discouraged believers who are battling with adverse circumstances. There are many who are alone, in the family circle, in their devotion to God; many who are deprived of the ministrations of the gospel, and whose social influences are all opposed to godliness; and many more fainting under manifold burdens and privations. It is a time for such to save themselves from this untoward generation, to gird up the loins of their minds, and to hope unto the end. Without aid or sympathy from man, and without many precious gospel privileges, they must go forward with a resolute self-reliance which has its root in the abiding conviction of God's all-sufficient grace.

PACIFIC METHODIST COLLEGE.—The trustees of this institution, at a meeting held at Vacaville, August 2, resolved upon the removal of the college from Vacaville to Santa Rosa. The following report was adopted. We copy from the Spectator:

The committee appointed to receive propositions from other localities, with a view to the removal of the college, report—

That they had a meeting at Santa Rosa, June 1, 1870, and received a proposition from the citizens of Santa Rosa, through a committee appointed by them for that purpose, offering a college site of ten acres of land, on which they proposed to erect a building at a cost of not more than \$15,000, according to a plan to be furnished by your committee; and to have said building ready for use by the first of January, 1871, and to deed said property to the trustees of the Pacific Methodist College, on condition that we remove the college to that point.

Your committee accepted their proposition, and appointed one of our number to procure a plan for said building, which we now have.

We also, by appointment then made, held another meeting at Vacaville on the fourteenth of June, in conference with a local committee, consisting of Messrs. Stevens, Davis and Dobbins, when these joint committees, after discussion, agreed to request the president of the Board of Trustees to call the board together to consider the matters committed to them. All of which is respectfully submitted.

W. R. GOVER, Chairman Com.

It is a good thing to obey the law of God, but it is a better thing to love it. The former is to live a new life, the latter is to have a new heart. A slave may obey a master whom he fears and hates, but the child loves the laws of a father.

METHODS AND PRINCIPLES.

In the midst of so many Quarterly and District Conferences, and near the time for holding the Annual Conferences, the problem of church finances is being pretty generally and thoroughly sifted. The study of this subject has been so general and persistent that it has doubtless exerted a marked and developing influence upon the mind of the church. The mental discipline derived from it must be nearly equal to that which our Calvinistic brethren realize from the vindication of the "decrees." If no new light is shed upon the question, we may hope that the reflex benefits in sharpening the intellect compensates in some measure for failure in every other direction. The very despair of the subject is calculated to drive us back to more spiritual matters, and to the wholesome conclusion that there is a special providence which takes care of us. Faith has been developed, as well as mental acumen. Neither preacher nor stewards over see their way through the year, and yet they manage to get through. There is no chance to "trust in uncertain riches," nor in funds secured, and they are shut up to faith. The confidence and boldness with which our system moves on amidst these chronic financial perplexities is astonishing. The Bishops send the preachers to their posts, and the whole itinerant host, with the chief pastors at their head, go forth every year, pass through the same ordeal of scant and uncertain support, and close up the campaign with meager pay, and often with great spiritual spoils. Always at the point of breaking down, yet ever moving forward, we have ceased to be nervous about the result. Our faith and hope are greatly strengthened by the very anomalies and contradictions under which Methodism manages to live and even to thrive. Here and there a man is sacrificed and sent back to his trade or profession, and some fields are turned out or very partially cultivated, but, on the whole, a large business is done on a comparatively small capital.

All our deliverances, resolutions and utterances crystallize around methods and principles. Too much importance is, perhaps, attached to the former. The plan of assessing the members is a favorite one, and we believe is now generally adopted. The stewards know how much is needed to meet the demands of the year, and they are in a position to tell what each member ought to pay, better even than the individual himself. Some are trying weekly collections, and the plan of dividing the assessments into weekly or monthly installments, to be put in envelopes, accurately marked and handed in at the Sunday morning service. In many instances the stewards call upon the members, and in others the members are left to call upon the stewards, or in any way to contribute what they please. For the current expenses of a circuit or station we believe the plan of assessments, to be paid in regular installments, weekly or monthly, is the best. We must recognize the right of the stewards to make these assessments, subject to any reasonable modifications by the members, and the duty of stated payment; otherwise, should be insisted upon. No member should put the stewards to the trouble of seeking him out and dunning him for his church dues. The methods of raising money for the support of Bishops, missions and Sunday schools generally resolve themselves into public collections for these objects. On these the pastor must do his duty bravely and wisely, and display what genius he is possessed of. Generally where the preacher faithfully represents these interests there will be a gratifying response. Methods we must have, but they should be few, simple and direct. People are easily bewildered on the subject of church finance, and too much machinery defeats the end for which it is devised.

We have had prize essays written about the principles of religious giving, and our church presses teen with their exposition. Moses and

the prophets, and Christ and the apostles are exhausted as authorities. After all, we are making haste slowly. Some of the District Conferences rather censure the preachers for their timidity and culpable silence. They may be to blame, although it is natural that they should shrink from pleading for their own bread and butter. For this service they need to be specially endowed with the spirit "of power, and of love, and of a sound mind." The preacher, however, is at a disadvantage, because it touches himself in a vital point, and his appeal may be misconstrued, and his arguments received with a grain of allowance. Still he ought to exhibit and defend the principles of giving, and never yield to the unjust imputations which too often originate in other motives than the love of the truth. We expect a good deal from our laymen in this direction; now that they have a place in the councils of the church. They are disinterested so far that their motives are beyond suspicion, and their good offices are needed more in the establishment of principles than in the origination of methods.

Giving as a grace is not generally developed equally with other graces. People are soundly converted, live acceptable members, and die in the odor of sanctity, and are fearfully derelict in this particular duty. It appears to stand by itself in the conscience, and separated from the other departments of the spiritual life. The conversion of the soul seems often to leave this department of conviction and regeneration untouched, and while there is growth in some graces there is absolutely none in this. It is the most difficult chamber in the soul to illuminate, and the most impenetrable stronghold of inbred sin to overcome. There is want of light. The stingy Christian is not self-condemned; he has an approving conscience, enjoys religion in a manner, and bears witness to the assured hope of heaven. He does not know his duty; he does not see the high obligation of consecrating his substance to God. Blinded by avarice, deceived by selfishness, he is still sincere in his ignorance. This department of duty must be recognized as a specialty, a grace to be cultivated and rescued from all-detracting covetousness, and a conscience which lies in almost complete isolation from all the other religious convictions. The cure of such a disease surely is not in methods of finance, but rather in awakening Christian men to the special obligations which rest upon them. And this is the most difficult of all undertakings—how to penetrate the darkness, to disperse it, and to infuse the soul with a love that gives cheerfully, largely, spontaneously, irrepressibly! What penitent sinner thinks, as he ought, of the sin of robbing God, and what believer, groaning after holiness, owns to the guilt of covetousness, and prays for victory over it? If it is a special and often independent phase of inbred sin, it requires a specific treatment; and if it is often the offspring of ignorance and want of thought and consideration, the gospel of giving, like every other gospel, must be preached "with the Holy Ghost sent down from heaven."

COLLEGIATE INSTITUTE.—The announcement of the fourteenth annual session of this popular school will be found in our advertising columns this week. This is one of our most thorough institutions of learning, and the principal has no superior as a teacher. Prof. Magruder is a prominent layman in our church, and is widely known and esteemed. A better school for boys is not to be found in the country. They will be under the best social and religious influences, and most conscientiously cared for in every respect.

IN ANOTHER COLUMN will be found the advertisement of a boarding and day school for young ladies, located in this city, at No. 579 St. Charles street. The principal of the school, Mrs. A. M. Faquier, is a lady of ability and experience as a teacher, and every way qualified to do justice to her pupils.

To whom you betray your secret you betray your liberty

NEW PUBLICATIONS.

LIFE, LETTERS, LECTURES AND ADDRESSES OF FREDERICK W. ROBERTSON, M. A., incumbent of Trinity chapel, Brighton, 1847-1853. Complete in one volume. New York: Harper & Brothers, publishers. 1870.

The volume contains eight hundred and forty pages, one-half of which are taken up with "the life and letters," and the other half embraces the lectures on the Corinthians, and other lectures and addresses on various subjects. The lectures are suggestive, though often fragmentary, and in style and thought are like the author's sermons. "The life and letters" give a tolerably complete revelation of the life of Robertson, physical, mental and spiritual. The letters are introduced into the several chapters in connection with the biography, and are thus made to illustrate every period of the author's life. Scarcely a paragraph in any of these letters can be read without meeting with something to arrest attention and to quicken thought. The effect may be described as rather stimulating than nourishing. Robertson's life was spent in honest devotion to his great calling, but it was shortened by overwork and intense excitement. In theology his mind was in a transition state, and had he lived until the present day it is difficult to tell what conclusions his restless soul would have reached. He was gifted exceedingly, of a high and almost preternaturally sensitive organization, and thoroughly brave and honest. With a great deal of heart, with abundant sympathy for all sufferers, with a fearless love for truth, he is yet a very uncertain and unsafe guide in matters of doctrine. With much acumen, and rich in intuitions, he is wanting in the logical faculty, and sometimes reaches very wild conclusions. The present volume should be read before reading the sermons; and both combined constitute one of the rarest and most instructive courses of reading which any recent publication affords. For sale by George Ellis, New Orleans.

SPEECHES, LETTERS AND SAYINGS OF CHARLES DICKENS, to which is added a sketch of the author, by George Augustus Sala, and Dean Stanley's Sermon. New York: Harper & Brothers, publishers. 1870.

The volume is bound in paper, and contains one hundred and forty-seven pages. It presents the great novelist especially as a speech-maker, and some of them are very good speeches. There are also specimens of his poetry, descriptions of his readings, Dean Stanley's sermon, and a great many piquant things which will interest immensely the many admirers of Dickens. For sale by George Ellis, New Orleans.

JOHN. A love story. By Mrs. Oliphant. New York: Harper & Brothers, publishers. 1870.

One of Harper's Library of Select Novels. Also for sale by George Ellis, New Orleans.

REVIVAL IN MEMPHIS.—A correspondent of the Western Methodist furnishes the following account of a revival in the Hernando street charge:

A revival has been in progress at the Hernando Street church for the last ten days. It commenced under the ministrations of the Rev. L. D. Mullins, pastor of the church. There have been, up to this writing, twenty-two members added to the church; and the work is still progressing, attended by the divine influence of the Spirit, under the effective and earnest sermons of the pastor. God is crowning his efforts with marked success, causing him to win many souls for Christ. A deep interest is awakened in the congregation, and sinners are constrained to inquire: "What must I do to be saved?" On last Sabbath morning eighteen persons were baptized at the altar by the pastor, all kneeling at once, meekly receiving the "outward sign of the inward change." The ceremony was performed in the most solemn manner, and deeply impressed the whole congregation. God speed the work of conviction and conversion, until the nations of the earth shall forget war, and learn to love and serve God aright.

The moon is said to be nearer the earth than it has been for twenty years past, and nearer than it will be again for a hundred years to come.

TUSKEGEE FEMALE COLLEGE.—The advertisement of this institution will be found in our columns. It is one of the very best of our Southern Methodist schools, and under the control of President Price has been eminently successful. The president, Rev. George W. F. Price, is a teacher of rare accomplishments, and has had a long and successful career as an educator. The boarding department is immediately under the control of the president and his excellent family, and the pupils will be most carefully and tenderly watched over. We observed that the able president has as many as twelve assistants, comprising ladies and gentlemen distinguished for their experience and literary qualifications. The location is in one of the finest regions of Alabama, in the midst of a cultivated society, and in a healthy situation. Nearly every condition of a good school is found in the Tuskegee Female College, and we do most heartily commend it to the patronage of our people. By reference to the advertisement it will be seen that the fifteenth annual session begins September 15, 1870.

STONEWALL INSTITUTE.—The attention of our readers is directed to the advertisement of this excellent school for boys. The principal, Rev. D. C. B. Connerly, a minister of our church, is a ripe scholar, and a gentleman of rare capacity as a teacher. The following extract from the Southern Argus gives a brief account of the origin and character of the school:

It is an institute founded and named, in 1865, to perpetuate and cherish, in the minds of Southern youth, the name and fame of one of the greatest of Southern generals—Stonewall Jackson. And nobly it is performing its mission. Patronized by the best men of Alabama and Mississippi, it every year sends forth young men of talent and high promise to the extreme borders of these States. Many of its students have taken the highest honors in several different universities, and all who have patronized the institute concede to its superiority as an academic school. This is due to several causes: its freedom from everything that might tend to divert the minds from study, owing to the retired situation of the school, the healthfulness of the location, and the zeal and tact of the principal in imparting instruction.

HIWASSEE COLLEGE.—This institution is advertised this week. Let none interested in schools fail to read the advertisement. Rev. F. M. Grace was recently professor of English literature in the East Tennessee University, and commands the entire confidence of the whole church. We predict that his control of Hiwassee College will prove eminently successful. The terms are so low that the poorest can give their children the advantages of a thorough education. Think of \$150 covering the entire cost of board and tuition for ten months!

UNIVERSITY OF MISSISSIPPI.—See the advertisement which appears this week. The University is ably manned with professors of great ability and wide reputation. Among them are Rev. Dr. Wheat and Dr. Garland, of our church. Rev. Dr. John N. Waddel, chancellor, is professor of moral science and Christian evidence. The curriculum is ample, and the mode of instruction thorough. The exercises are to be resumed on the first Wednesday of October.

DEATH is still busy among the foremost men of our church. Since our last, Dr. Thomas Sewell, of the Baltimore Conference, has passed away. His eloquent voice is now hushed forever. We are called upon to chronicle also the sudden death, by fever, of Mr. Theodore B. Stout, son of A. V. Stout, Esq., and a member of the banking firm of Stout & Dickinson. Mr. Stout was one of the foremost young men of New York Methodistism. Sincerely pious, zealous, cheerful, affectionate, laborious, he was beloved by all. Eminent as a man of business, and growing as a Christian, he gave great promise of usefulness. Sudden and unexpected death has brought sorrow into the midst of a large circle of friends.—*Methodist.*

RELIGIOUS need not, should not, make me gloomy. What says the author of it to his disciples? "These things I say unto you, that your joy may be full."

CORRECT AN ERROR.

MR. EDITOR: I always try to read every one of the NEW ORLEANS ADVOCATES; but I have missed one, and learn that in it some one reports me as leaving South Warren circuit, and Brother G. Bright as succeeding me. Please let me say this is quite an error. I would go to Africa and work my year out if the Bishops required me to go, and I would not go reluctantly; I am this year on the first circuit of my boyhood in the ministry, surrounded with the most devoted friends and the descendants of my early friends, and I could not ask a place I should or could serve with greater pleasure.

But as imperative and old obligations required my absence a month or six weeks after September 1, I obtained the assistance of Brother Bright to keep the work in full action. It is my pleasure to preach this year, as it was on this work thirty-eight years ago. I only regret that with me food and finances have been such as to turn me aside one day of my life from the regular work. And though the present prospect is unfavorable to my taking work at the next Conference, I mean to do as much *real work* for and in the church as I can by any possibility do on a circuit; and I mean to give my best powers to the dear old church of my early love till the last day of life.

Respectfully,

C. K. MARSHALL.
Vicksburg, August 21, 1870.

THE CHINA MISSION.

Brother Lambuth has built a house for an orphan school in Shanghai, and has seven boys and one girl under his care. He expects (if he has not already) to add six more girls. To feed, clothe and educate them will cost \$40 gold a year for each, which will be \$600. How much will you send me for that purpose? How many Sunday schools will help me in this matter—will try to raise \$40 a year to educate a boy or girl? If you will do that you may name him or her, and you will get monthly reports from the school in reference to his or her progress; also a photograph of the school, including Brother Lambuth. Here is a good opportunity of doing a permanent good. Who will accept it, and send me money for this special purpose? If you cannot invest \$40 in it, send any amount you can to me at Canton, Mississippi. I will acknowledge the receipt of it, and send it on to Brother Lambuth.

H. H. MONTGOMERY.

The next total eclipse of the sun will occur on December 22. It will be invisible here, but can be watched at the Mediterranean astronomical stations. An effort will be made by the Royal Astronomical Society on this occasion to solve the problem of the causes and nature of the corona always observed during a total eclipse of the sun, but as yet not explicitly defined.

Great talent renders a man famous; great merit, respect; great learning, esteem; but good breeding alone insures love and affection.

Obituaries.

Died, near Canton, Mississippi, August 13, 1870, JOHN MOTT, youngest child of L. B. and L. E. Coffey, aged thirteen months and two days.

This a lovely lad has been taken from fond and loving parents and transplanted to the garden above. How cheering the words of the Saviour: "Of such is the kingdom of heaven." May the parents so trust in Christ and so live for him that they may meet their loved one in heaven.

H. H. MONTGOMERY.

Mrs. JULIA A. WOLF was born near Richmond, Virginia, July 18, 1818, and died at the residence of her husband, John D. Wolf, in Madison county, Mississippi, July 1, 1870, in peace and in the hope of the gospel.

For sixteen years or more she had been a member of the Methodist Episcopal Church South, and when health admitted she was always in her place in the house of God. She had raised a large family, who are intelligent, moral, and most of them religious—members of the Methodist Episcopal Church South. She was highly respected and loved by all who knew her great worth and many virtues. She had no fears of death, and passed calmly and sweetly

away from us. May all the family be ready to join her in heaven.

H. H. MONTGOMERY.

Mrs. MARY L. McCracken was born in Sumpter district, South Carolina, in 1800, married Rev. William McCracken in 1818, and died at her daughter's home, near Marion, Alabama, in May, 1870.

Her husband was born in Belfast, Ireland, in 1790; moved from South Carolina to Alabama in 1823, and settled near Bragg's Store, in Lowndes county, where they lived ten years, and then moved to the place now occupied by their son, Jos. T. McCracken, near Oak Hill, Wilcox county. Here Bro. McCracken lived, beloved by the church and a large circle of acquaintances, until his useful life closed in peace, November, 1867.

Sister McCracken continued to live with her son at the old homestead, loved and respected by all who knew her. She was converted and joined the Methodist Episcopal Church in 1825, at what has been long known as McCracken's camp ground. Brother and Sister McCracken, by industry and economy, acquired a large property, and dispensed a generous hospitality. Their house was the preacher's home for many years. Sister McCracken was a Methodist of the olden stamp—plain and unassuming in her manners and dress, and sincerely and consistently pious. When able she was in her seat at church, and loved the services of the house of God and the society of the good. She gave her contributions to the preachers in a private, quiet way, and in amount as large as her means would allow. She was a most devoted and excellent mother, and her children raised up and call her blessed. Though called suddenly away—she was sick only twenty minutes—yet no one who knew her doubts that she "sleeps in Jesus."

A FRIEND.

ELECTUS WILLIAMS was born in the District of Columbia, July 25, 1783, and died in Franklin county, July 16, 1870, having lived almost fourscore and seven years.

He was a man of solid character, and his adherence to principle was more abiding and tenacious than his long life to the body. In 1829 he joined the Methodist Episcopal Church and turned his face heavenward; and up to the time of his death, through many storms and dark valleys, and over many rugged hills, he maintained his onward course. He was a modest man. His life was inscribed with no blazing deeds, and his goings in the earth were heralded by no trumpets or waving banners; yet his modesty never carried him from the fields of contest in the world, or caused him to shield himself behind the driftage. He was a brave Christian, always fighting with the church in her organized efforts against sin; and then single handed he could stand, though the world swept a mighty opposition around him.

For more than forty years he was a living monument of Methodism always standing before the world. In any company he was a man to sustain the dignity of the church and its superiority over all that the world could offer. No price or influence was ever sufficient to induce him to lower, for one moment, the standard of the Christian cause. His cry was always: "Raise it; keep the church above the world." He was a faithful watchman along Zion's walls, seeing danger as it approached, and giving warning. His quiet, loving words were constantly leading his friends to the cross and the Saviour.

Such as Brother Williams are the men who mold society and give it a healthy tone; and such men in the church "are epistles, known and read of all men," though we write not their names upon the walls. His last hours were peaceful, cheerful and full of Christian confidence. His life had been such as to build for him a strong habitation of hope; and though he be dead now, yet we feel assured that he lives again.

that the good work was deepening. At length he was favored with the pious precepts and example of a local preacher, who was also his teacher, by whom he was pointed daily to Christ. Twelve days before his death he was in the glow of health, and no more uneasiness was felt for his spiritual condition than for any of the rest of our young charge. But when the news reached us we asked, "What of the night?" nor felt easy until assured that upon him "the morning dawneth."

In May last, on a bright Friday night, Isaac W. was preaching to his school children. Parents and pastor were there. He preached; God drew near, sinners trembled under the message, children wept, parents shouted and greeted their children, preachers sang and shouted too, and there, amid these heavenly scenes, God set Jesse's sins in the light of his countenance, then read them out, then forgave them and loved him freely for Jesus' sake. Upon his death-bed he told his teacher the glorious news. And should teacher and friends, parents and children of this widely scattered family, and the pastor and members of his church, ever land on the sunny banks of sweet deliverance, one of the blood-washed we expect to hail is the subject of this sketch—that good boy, Jesse Comery. Father and mother, another silver chord has been stretched across the river, beside the "golden chain," to draw you to heaven. Brothers and sisters, will you go?

R. H. ADAIR.

SUMMERFIELD SUNDAY SCHOOL.

August 16, 1870.

WHEREAS, It has pleased God, in his wise providence, to remove from an earthly to a heavenly home our beloved young friend, BETTIE POOLE, who was so lately a member of our Sunday school; therefore, be it

Resolved, That we recognize in her death a loss to the Sunday school and church of one of their purest and most consistent members, and to society one of its brightest ornaments.

Resolved, That through her death the Alumni Society of Centenary Institute has deeply suffered; for, though a stranger to some, she could not have failed to win the esteem of all its members.

Resolved, That the voice of none has ever echoed within the walls of Centenary Institute who was more fondly loved, or who was more diligent and faithful in the discharge of her duties.

Resolved, That while we tender the bereaved family our kindest sympathies, we pray that all who mourn her death may be able to bow submissively to the will of our heavenly Father, and be as fully prepared for their change as she was, and leave as bright a testimony of their acceptance with God.

Resolved, That these resolutions be published in the NEW ORLEANS CHRISTIAN ADVOCATE, and a copy be sent to the parents of the deceased.

BETTIE VAUGHAN,

IDA RICHARDSON,

MAGGIE DAVIS,

Committee.

NEW ADVERTISEMENTS.

SOUTHERN METHODIST.

Male High School, New Orleans.

The exercises of the second session of this institution will commence on MONDAY, the 10th day of September proximo, in the basement of the German Methodist Church, by Adams street, between Felicite and Enterprise. The Principal, encouraged by the gratifying success of the past session, will in no respect relax his energy in the effort to make the school all that can be desired by its patrons; and to accomplish this end, he has no expense will be spared.

To furnish to those who desire it an opportunity to obtain for their sons a systematic course of instruction from the beginning of a thorough education so much demanded, Primary and Preparatory Departments have been established in connection with the High School.

In selecting professors and teachers the greatest care will be exercised in regard to not only their mental qualifications, but also their ability to impart instruction.

The rates of tuition have been fixed as low as is consistent with thorough instruction. For further information as to terms, etc., apply at the School.

D. I. RAST, Principal.

NEW ADVERTISEMENTS.

UNIVERSITY OF MISSISSIPPI.

OXFORD, MISSISSIPPI.

The exercises of this institution will be resumed on the FIRST WEDNESDAY (10th day) of October next, under the following corps of instructors in the various departments:

FACULTY OF ARTS AND LAW.

John N. Waddel, D. D., Chancellor, Professor of Moral Science and Christian Evidence.

W. S. Sear, M. A., Professor of Mathematics and Acting Professor of Civil Engineering.

J. J. Wheat, D. D., Professor of Greek.

A. J. Gholston, M. A., Professor of Latin and Modern Languages.

S. G. Hursey, D. D., Professor of English Literature.

E. W. Hildard, Ph. D., Professor of Chemistry, etc., etc.

L. C. Garland, LL. D., Professor of Analytical Physics and Astronomy.

Hon. J. A. P. Campbell, Professor Elect of Law and Governmental Science.

James A. Lyon, D. D., Professor Elect of Metaphysics, Logic and Pol. Science.

George Little, Ph. D., State Geologist.

R. H. Longbridge, Assistant in Chemistry, with such other assistants as may be demanded by the patronage of the institution.

It is the design of the authorities to inaugurate, at the earliest possible period, an efficient change in the system of instruction, so as to give to the institution the character of the full University. The advantage of a finished education in special courses of study, as well as in the usual classical course, will be furnished, and students will have the option of such course as they may select, and for every course a degree will be given to such as sustain the required examination. The complete details of this system will be announced as soon as sufficient time shall have been given to mature and organize the system.

For the present the system of Special Schools of Science and Literature is in operation, and students may make a selection of such studies as they may prefer, not less than three hours for each in the case of Special Chemistry, which occupies the entire time of the student.

THE CHEMICAL LABORATORY

will be open, as heretofore, for the reception of special students in Practical and Analytical Chemistry, and Pharmacy, under the direct instruction of Prof. Hildard. Disputations will be given in the case of Special Chemistry, which occupies the entire time of the student.

A POPULAR COURSE

In Natural Philosophy is also given by Prof. Garland, and students are instructed in the subject by lecture and text-book, illustrated by experiment.

CIVIL ENGINEERING

will be taught for the present by the Professor of Mathematics, General Sear.

THE DEPARTMENT OF LAW

will be opened at the same time for the reception of students, under Hon. J. A. P. Campbell, professor. The diploma from this school entitles the graduate to practice law in any of the courts of Mississippi.

THE PREPARATORY CLASS.

tought by the professors of Latin, Greek and Mathematics, will be continued for the present.

EXPENSES, UNIVERSITY DUES, BOARD, ETC.

Tuition in the classical course, payable in advance, for the entire school year of nine months \$50 00

Fuel fees \$15 00

Board for nine months, returnable if no damages are assessed 5 00

Fee for special students in chemistry, \$75; deposit for use of apparatus, chemicals and damages, \$25 100 00

A fee is charged for special students in other departments, amounting to a moderate sum, proportionate to number of schools attended.

Board at Stewart's Hall, per month 18 00

Board in private families in Oxford, per month \$18 00 to 20 00

Board, with lodging, fuel and servant attendance, in Oxford 25 00

Board, with lodging, fuel and servant attendance and washing, in country, where there is no separate charge, per month \$15 00 to 2 00

Lights, 50 to 75 cents per month.

Rooms in the dormitories are free of rent; and as two students occupy one room the expense is divided.

Sundry expenses need not exceed \$200 to \$250 or \$300.

The plan in operation during the last session, of having the Steward's Hall under the control of the Executive Committee, and employing a steward at a fixed salary, is discontinued, and the hall will now be conducted by Dr. J. B. Farrel on his own responsibility.

FREE STUDENTS.

The free tuition feature has been restored, and gives to the meritorious student of good moral character, and unable to pay a fee, the opportunity of obtaining a liberal education.

Candidates for the ministry of any denomination, properly recommended and certified to be such, are entitled to the same privilege.

The healthfulness of Oxford, the high moral tone of society, the unequalled means and facilities enjoyed here for the study of the sciences, the easiness of access by railway from all quarters, and other advantages, render the University of Mississippi the most attractive institution of learning in the South.

The States of Tennessee, Alabama, Kentucky, Louisiana, Texas and Arkansas are invited to continue and enlarge that patronage which they have hitherto extended to us.

For further information and catalogues apply to the Secretary of the Board, Colonel Thomas E. B. Pegues, Oxford, Mississippi, any member of the Faculty, or to the undersigned.

J. N. VANDERLINDEN, Chancellor.

ad27 2t N. H.—Text-books for sale in Oxford.

STONEWALL INSTITUTE.

Thirteen Miles North of Selma, Ala.

This School for Boys opens its sixth annual session OCTOBER 3, 1870.

Dr. C. H. CONNERLY, Principal, and Teacher of Languages.

JOHN P. SEABROOK, Teacher of Mathematics.

But few schools accomplish as much for its pupils as this does.

It is in the quiet country. Its teachers give instruction nine hours per day, including two at night.

The Institute belongs entirely to the Principal.

Two Hundred and Sixty Dollars will cover nine months' board, tuition and washing.

Transportation from Selma to the Institute on every Wednesday and Saturday in October to the twenty-second, free of charge.

Refer to J. N. VANDERLINDEN, and John M. Bonner, Esq., New Orleans, Louisiana.

For further particulars apply to the proprietor.

D. C. B. CONNERLY,

CHILDREN TEETHING.

Mrs. WINSLOW'S SOOTHING SYRUP.

FOR CHILDREN TEETHING.

greatly facilitates the process of teething by softening the gums, reducing all inflammation; will allay all pain and spasmodic action, and is

SURE TO REGULATE THE BOWELS.

Depend upon it, mothers, it will give rest to yourselves, and

Relief and Health to Your Infants.

We have put up and sold this article nearly thirty years, and can say in confidence and truth of it what we have never been able to say of any other medicine—NEVER HAS IT FAILED IN A SINGLE INSTANCE TO EFFECT A CURE, when timely used. Never did we know no instance of disaffection by any one who used it. On the contrary, all are delighted with its operations, and speak in terms of commendation of its magical effects and medicinal virtues. We speak in this matter "WHAT WE KNOW," after years of experience, and pledge our reputation for the fulfillment of what we here declare. In almost every instance where the infant is suffering from pain and exhaustion relief will be found in fifteen or twenty minutes after the Syrup is administered.

Full directions for using will accompany each bottle. Be sure to call for

"Mrs. Winslow's Soothing Syrup."

having the fac-simile of "CURTIS & PERKINS" on the outside wrapper. All others are base imitations.

Sold by Druggists throughout the world.

Scientific.

WHENCE COME METEORITES?

In examining a mass of meteoric iron found in the Cordillera of Deesa (Chili), M. Stanislas Meunier, of the Museum of Natural History in Paris, has discovered evidences of an unexpected relationship between this iron and two meteorites fallen at a great distance from Chili, viz: A mass of iron found at Caille (Alpes Maritimes), and a stone which fell at Setif (Algeria), June 9, 1867.

The meteorite of Deesa is a mixture of these two rocks; it is composed of iron, which is identical with that of Caille, injected in a state of fusion into a stone which is identical with that of Setif. The iron of Deesa is thus, evidently an eruptive rock, and is the first hitherto observed among meteorites. Besides this, it is asserted that the iron resembling that found at Caille, and the stone resembling that of Setif, have been mutually connected by stratification upon an unknown globe, and it is the first time that such a connection has been materially demonstrated.

M. Meunier remarks that the meteorites which now arrive upon the earth are not of the same mineralogical nature as those which fell in past ages. Formerly iron fell; now stones fall. During the last one hundred and eighteen years there have been in Europe but three falls of iron, whereas there have been annually, on an average, three falls of stones. The greater number of meteoric irons, which exist in the Paris collection, have fallen on the earth at undetermined epochs; all the meteoric stones are of comparatively recent date. Perhaps we are even justified in saying that stones of a new kind are beginning to arrive, for falls of carbonaceous meteorites were unknown before the year 1803, and four have been observed since then.

From this assemblage of facts M. Meunier concludes that meteorites are the fragments of one or more heavenly bodies which, at a period relatively recent (for the waifs are never found except in superficial strata), revolved round the earth, or perhaps round the moon. Having, in the course of ages, lost their own proper heat and become penetrated by the cold of space, they have arrived, much sooner than the moon, by reason of their inferior volume, at the last term of the molecular actions which are operating upon our satellite, and which are rendered evident to our eyes by the enormous craters, the deep fissures with which it is furrowed. Split in all directions, they have fallen to ruin, and their fragments, remaining scattered along the orbit, so as to form a circle more or less complete, have at the same time become arranged, according to their density, in zones concentric with the focus of attraction toward which they are constantly impelled by the resistance of the ethereal medium through which they move. The masses nearest to the center, and which were principally composed of iron, were the first to fall; afterward came the stones, in which period we now are. Hereafter, perhaps, will arrive meteorites analogous to our crystallized formations, and perhaps even to our stratified beds.

Thus meteorites, the veritable products of demolition, represent, according to M. Meunier, the last period of the evolution of planetary bodies. The incandescent orb, the sun, figures at the present day in our system as the sole representative of the primitive state through which the earth, and all the other bodies which revolve around it, have passed; the moon representing the future which awaits the terrestrial sphere, now in all the plenitude of life; and finally, meteorites show us what becomes of the dead stars, how they are decomposed, and how their materials return into the vortex of life.

MAN AND THE APES.

M. Pruner Bey has recently sent in a communication to the "Societe d'Anthropologie," of which an abstract is furnished in Cosmos of May 28, on the question whether the anatomical differences between certain apes are greater than those which exist between man and those apes which most closely resemble him, and which (very erroneously) are termed anthropomorphous; in other words, can we class man with the primates? The author admits that at first sight the resemblance between man and the higher apes is very great; all their bones for example, with two exceptions, precisely correspond; but on further investigation, he observes, the resemblance becomes less apparent. He lays stress on the importance of considering not only the points of resemblance but also those of difference; and cites the opinions of Huxley and Crisp. He then proceeds to compare the man and ape while living, and points out that, independently of the difference that exists between them in attitude, gestures, movements and aspect,

which relegates the ape so decisively to the brute creation, there are three characters that are common to all the apes, rendering them fundamentally distinct from man. The first of these characters is the clothing of hair with which they are covered, the absence of which, in man must possess so powerful an influence in leading him to exercise his ingenuity in improving his clothing by the discovery of fire and the wearing of clothes. In addition, the periphrastic sensibility arising from the conformation of his hand and of its tactile papillae, is the correlative of a sixth sense, the *geometric sense*, the employment of which is manifest. Secondly, the ape has a canine tooth, which serves him as a weapon, and the absence of which in man has led him to invent arms of steadily advancing improvement. Thirdly, a difference exists in the direction of the axis of the body when the natural posture is assumed; and this, as is rendered evident by the form, arrangement and structure of the bones, down to their most minute details, is horizontal in the ape, but vertical in man. In regard to the muscular system, the most marked points of difference exist; and the same may be said of the circulatory system; in which, as Gratiolet observes, the arterial process is much more completely developed in man. The structure of the viscera, again, in the gorilla and chimpanzee, clearly indicates their herbivorous nature. Lastly, there are the differences which depend on the nails, the beard and the penial bone. M. Pruner Bey then contrasts the cranium of the negro and the Chinaman with those of the gorilla, the chimpanzee, orang and two others, all of which latter present an appearance similar to, yet distinct from that of the two former. In the latter, however, it may be noted that the surface of their cranium is less than that of their face, appearing in fact as if it were only an appendage of the latter, while in man the opposite obtains. So also the supra-orbital crests are enormous in the apes, and destitute of function, for they contain nothing. "They constitute simply a symbol of bestiality." The cranial sutures, again, are precocious, and the forehead is absent. An examination of the simian skull as a whole shows it to be contracted laterally, posteriorly and even superiorly, by muscles which contrast strongly with those of the skull of man. The concave face and retreating chin produce a muzzle or tendency to prognathism, which contrasts even with the negro. The eye is not placed below the brain, and its axis, instead of being horizontal, is directed downward and outward. The inter-orbital septum is narrow, and the nose is flattened. M. Bey then points out the characters of the superior maxillary bone, and notices the persistence of the inter-maxillary bone and sutures. He then discusses the differential characters derived from the teeth, and from the internal mold of the cranium, and concludes by remarking that the ape differs anatomically from man, not only by simple degradation, but by a contrast evident in every part. Even from its first appearance in the Miocene, if we may judge from the mandible and the bones of the extremities, the ape presents all the characters observable in existing species; "man, in fact, constitutes not a kingdom only, but a world apart."—*The Academy*.

PATIENCE.—"I remember," says the celebrated Wesley, "hearing my father say to my mother, 'How could you have the patience to tell that blockhead the same thing twenty times over?' 'Why,' said she, 'if I had told him but nineteen times I should have lost all my labor!'"

SCHOOLS AND COLLEGES.

WHITWORTH FEMALE COLLEGE,

BROOKHAVEN, MISSISSIPPI.

On the New Orleans, Jackson and Great Northern Railroad, one hundred and twenty-eight miles north of New Orleans, and fifty-seven south of Jackson, will reopen on

The 31st of September, 1870.

Thorough instruction in all the branches of liberal education. Charge for board, tuition in English, English text books, school-room stationery, washing, fuel, lights, medicine and medical attendance, \$20 for the term of five weeks. The languages and music extra. A deduction of \$50 made for pastors of churches.

Number of pupils last term, 165.

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS

PUBLISHED BY

CHARLES SCRIBNER & COMPANY,

651 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.

"Incomparably superior to anything published."

Introduction to the Study of Geography.

Elementary Geography.

Intermediate Geography.

Common School Geography.

Guyot's System is approved and endorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenney, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that over one million (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in the Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by its use in the schools of this country will obtain a clearer, more definite and exact knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

SCHOOLS AND COLLEGES.

FLORENCE WESLEYAN UNIVERSITY.

FLORENCE, ALABAMA.

W. H. ANDERSON, D. D., PRESIDENT.

This institution of learning, so widely known throughout the South, will begin its next session on WEDNESDAY, SEPTEMBER 14, 1870.

The Faculty is composed of men of experience and ability. The course of study is comprehensive in the Literary Department, Law Department, Department of Biblical Literature and Commercial Department. The advantages of this University are seen in its healthful and attractive location, thorough course of study, excellent discipline, the character and success of its instructors, and the reasonable rates at which board and tuition are furnished.

Licentiate in the ministry and sons of ministers in the regular work are admitted to recitation on paying the incidental fees.

EXPENSES PER SESSION OF FIVE MONTHS.

Tuition in the University classes..... \$30 00

Tuition in Grammar School..... 25 00

Tuition

NEW ORLEANS MARKETS.

From the N. O. Price Current.
We have no improvement to notice in the general market, which continues extremely dull. The new crop of cotton comes forward very slowly, the receipts being confined to three bales on Monday, making the total to date (including the two bales from the Rio Grande) sixteen bales, against eighty-one last year. Sugar and Western produce show no material change. The movement in the latter is mostly confined to the local trade.

The weather has been generally clear and warm, but with frequent showers. The accounts from the country present no new features. From some points we hear reiterated complaints, especially of excessive rains, but from others the reports are favorable, and the prospect is more encouraging.

The river is now twelve feet nine inches below high water mark.

Cotton.—The following are the arrivals since the nineteenth instant:

Louisiana and Mississippi.....bales.	366
Mobile.....	21
Total.....	387

On Saturday, under the improvement at Liverpool and New York, factors generally raised their pretensions, but the sales, which embraced 435 bales, although at fuller prices, especially for the lower grades, showed no quotable advance. On Monday, with a further advance at Liverpool and New York, factors were still more stringent in their pretensions, and 350 bales changed hands, at an irregular advance of 1/4 to 1/2 c. On Tuesday the market opened with a fair inquiry, but the movement was checked by the higher pretensions of factors, who predicated their claims to advanced figures on the favorable accounts from Liverpool, but especially the light stock remaining unsold. Later in the day, however, parties came together more freely, and the business summed up 626 bales, taken by several buyers, at prices showing a decided advance on previous quotations, 10 1/2 to 11 c. being paid for low ordinary, 15 1/2 c. for strict good ordinary to low middling, and 17 1/2 c. for strict low middling.

This makes an aggregate for the past three days of 1,311 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 1,140,702 bales, against 795,987 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 791,574 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 478,465 bales to Great Britain, of 124,021 to France, and of 120,132 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary.....	11 1/2 to 13
Good ordinary.....	14 1/2 to 15 1/2
Low middling.....	17 to 17 1/2
Middling.....	18 to 18 1/2
Strict middling.....	19 to 19 1/2

-------------------------------------	-------

SUGAR.—The season for supplies is over. There is little or none coming in. Louisiana is scarce, while the stock of Cuba is very light. There is not much demand, but the market is firm, and we quote 10 1/2 to 10 3/4 c. per pound for common, 11 1/2 to 11 3/4 c. for fair, 12 1/2 to 12 3/4 c. for fully fair, 13 c. for prime, 13 1/2 to 13 3/4 c. for choice, 13 1/2 to 13 3/4 c. for yellow clarified, and 14 to 14 1/2 c. for white.

MOLASSES.—There is little or none coming in, and the market is about bare. Louisiana fermenting is quoted at 25 to 35 c. per gallon. City refinery reboiled commands 50 to 75 c., sirup \$1 per gallon. There is no movement in Cuba molasses.

MONEY.—Gold, 110 1/2 to 110 3/4.

American silver half dollars, 109 1/2 to 110 1/2. Mexican dollars at 1 to 2 per cent premium in gold.

The stock market has continued quiet, the only sales reported being 50 shares Slaughter House, on Saturday, at \$15, 50 do. at \$15 75, and 50 at \$16, 2 Germania National Bank at \$140, and 12 New Orleans City Railroad at \$160; 10 Jackson Railroad, on Monday, at \$8 1/2, and 350 Slaughter House at \$16. We have heard of other sales of stocks; particulars withheld.

City Treasury notes are quoted at 18 to 19 per cent discount.

CATTLE MARKET.
